(2) Any department or agency of any State or any political subdivision thereof, acting within the scope of its jurisdiction; or

(3) Any department or agency of any foreign government or any political subdivision thereof, acting within the scope of its jurisdiction, provided that the Commission official making the disclosure is satisfied that the information will not be disclosed except in connection with an adjudicatory action or proceeding brought under the laws of such foreign government or political subdivision to which such foreign government or political subdivision or any department or agency thereof is a party.

(b) Any disclosure made pursuant to paragraph (a) of this section shall be made with the concurrence of the Director of the Division of Enforcement or in his or her absence a Deputy Director of the Division of Enforcement. Provided, however, that no such concurrence is necessary for the Director of the Division of Economics and Education or in his or her absence each Deputy Director of the Division or for the Director of the Market Surveillance Section to release information under paragraph (a)(1) of this section concerning current or ongoing market transactions or operations.

(c) In furnishing information under this delegation pursuant to Paragraphs (a)(1) and (2) of this section, the Commission official making the disclosure shall remind the department or agency involved that Section 8(e) of the Act prohibits the disclosure by such department or agency of information that would separately disclose the business transactions or market positions of any person and trade secrets or names of customers except in an action or proceeding under the laws of the United States, the State, or a political subdivision thereof to which the department or the agency of either the state or political subdivision, the Commission, or the United States is a party.

(d) This delegation shall not affect any other delegation which the Commission has made or may make, which authorizes any other officer or employee of the Commission to furnish information to governmental bodies on the Commission's behalf.

(e) Notwithstanding the provisions of paragraph (a) of this section, in any case in which any employee delegated authority therein believes it appropriate the matter may be submitted to the Commission for its consideration. Nothing in this section shall prohibit the Commission from exercising the authority delegated in Paragraph (a) of this section.

3. Section 140.75 is added to read as follows:

---

[2] Section 8(a) of the Commodity Exchange Act, 7 U.S.C. 12(a), prohibits the Commission from publishing "data and information that would separately disclose the business transactions or market positions of any person and trade secrets or names of customers."

[3] Section 8a(6) allows disclosure of information "which in the judgment of the Commission disrupts or tends to disrupt any market or is otherwise harmful or against the best interests of producers, consumers, or investors, or which is necessary or appropriate to effectuate the purposes of [the] Act." Information so furnished may be disclosed by the recipient only in a self-regulatory action or proceeding.

[4] The version of Section 8a(6) in effect prior to enactment of the 1982 Act allowed the Commission to communicate information only to the proper committee or officer of a contract market. Such communications, of course, continue to be permitted.

[5] Rules §§ 140.72 and 140.73 are also being amended to include the General Counsel and each Deputy General Counsel among the Commission officials authorized to disclose information pursuant to the newly enacted Sections 8(e) and 8a(6). In addition, the Director of the Division of Economics and Education, the Director of the Division of Trading and Markets and specified designees are delegated authority to disclose information to other government agencies as set forth in Rule § 140.73.

[6] On October 12, 1982, the Commission amended one of its established routine uses to include release of information to a futures association registered with the Commission. *See* 47 FR 44831, 44832 (October 12, 1982). Because of this recent amendment, the Commission finds no need to further amend Rule § 146.6(a) to reflect the authority contained in the newly amended Section 8a(6) for release of otherwise confidential information.

[7] The Commission's notice of systems of records was most recently published in the **Federal Register** on October 4, 1982. *See* 47 FR 43759 (October 4, 1982). As required by the Privacy Act, this notice details, among other things, the kinds of records maintained by the Commission and the purposes for which they are routinely used.

[8] Similarly, the provisions of the Regulatory Flexibility Act, Pub. L. 96-354, 94 Stat. 1164, do not apply. *See* 5 U.S.C. 601(2). In addition, the Commission notes that these rule amendments do not constitute new paperwork collection requirements within the meaning of the Paperwork Reduction Act, 44 U.S.C. 3501, *et seq.*

VOL 48 ISS 96 MY 17 1983 UMI

§ 140.75 Delegation of authority to the Director of the Division of Trading and Markets.

Pursuant to sections 2(a)(11), 6a(5) and 8(g) of the Act, the Commission hereby delegates to the Director of the Division of Trading and Markets and to such members of the Commission's staff acting under his or her direction as the Director may designate from time to time, the authority to disclose any registration information contained in the registration applications filed by Commission registrants or any compilation of such information maintained by the Commission to any department or agency of any State or any political subdivision thereof. Disclosure under this section may be made upon reasonable request made to the Commission or without request whenever the Director of Trading and Markets or any Commission employee designated by the Director to make disclosures under this section determines that such information may be appropriate for use by any department or agency of a State or political subdivision thereof. Notwithstanding the provisions of this section, in any case in which the Director of Division of Trading and Markets deems it appropriate, or in any case in which the Commission so requests, the Director may submit matter to the Commission for its consideration.

PART 146—RECORDS MAINTAINED ON INDIVIDUALS

4. In § 146.6, paragraph (a)(4) is amended by removing the letter "(g)" following "§ 146.2" and inserting in lieu thereof the letter "(i)."

5. Section 146.6 is amended by adding paragraphs (a) (12) and (13) to read as follows:

§ 146.6 Disclosure to Third Parties.

(a) The Commission shall not disclose to any agency or to any person by any means of communication a record pertaining to an individual which is contained in a system of records, except under the following circumstances:

* * * * *

(12) The disclosure is made, upon request, to a department or agency of any state or political subdivision thereof acting within the scope of its jurisdiction as permitted by Section 8(e) of the Act and subject to the limitations of further dissemination as contained in Section 8(e). Information disclosed pursuant to this paragraph may also include registration information maintained by the Commission on any registrant as authorized to be disclosed by Section 8(g) of the Act. Registration information may be furnished to a department or agency of any state or political subdivision thereof upon reasonable request made by the department or agency or without request whenever the Commission or an employee designated by § 140.75 of this chapter determines that such information may be appropriate for use by the department or agency.

(13) The disclosure is made, upon request, to a department or agency of any foreign government or any political subdivision thereof, acting within the scope of its jurisdiction, provided that, prior to disclosure, the Commission or an employee delegated authority by § 140.73 of this chapter to disclose information pursuant to Section 8(e) of the Act is satisfied that the information will not be disclosed by such department or agency except in connection with an adjudicatory action or proceeding brought under the laws of such foreign government or political subdivision to which such foreign government or political subdivision or any department or agency thereof is a party.

* * * * *

Issued in Washington, D.C. on May 11, 1983, by the Commission.

Jane K. Stuckey,

Secretary to the Commission.

[FR Doc. 83-13178 Filed 5-16-83; 8:45 am]

BILLING CODE 6351-01-M

17 CFR Parts 170 and 180

Regulations Pertaining to Arbitration and Registered Futures Associations

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rules.

SUMMARY: The Commodity Futures Trading Commission is amending its rules governing the arbitration proceedings which must be conducted by contract markets and registered futures associations and the content and effect of the cautionary language which must be included in voluntary pre-dispute arbitration agreements between futures commission merchants ("FCMs"), floor brokers, or associated persons and their customers. The purpose of these amendments is to conform the Commission's rules to recent changes in the Commodity Exchange Act and to further encourage the use of arbitration as a means of dispute resolution by participants in the commodity futures and options markets. The amendments which the Commission is now adopting will: (1) eliminate the $15,000 limitation upon disputes which must be accepted for arbitration by exchanges and registered futures associations; (2) broaden the definition of "customer" to include certain FCMs and floor brokers; (3) continue to authorize the use of binding pre-dispute arbitration agreements (provided that the execution of such an agreement would not eliminate the right of a customer who enters into such an agreement to seek reparations pursuant to section 14 of the Commodity Exchange Act with respect to a dispute arising under the agreement), but only where the customer who executes a voluntary pre-dispute arbitration agreement is given a choice of at least two organizations which provide arbitration as a forum for dispute resolution, with at least one organization offering the customer the opportunity to have the arbitration dispute heard in a location reasonably convenient to the customer; and (4) require contract markets and registered futures associations to provide that their members will bear any incremental costs providing arbitration by a "mixed panel."

EFFECTIVE DATE: The amendments to §§ 170.8, 180.1, 180.4, 180.5 and 180.6 will become effective June 16, 1983. The amendments to §§ 180.2 and 180.3 will become effective on August 15, 1983.

FOR FURTHER INFORMATION CONTACT: Robert Rosenfeld, Attorney, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581 (202) 254-8955.

SUPPLEMENTARY INFORMATION:

I. Background

On December 14, 1981, the Commission published a proposal to amend parts 12 and 180 of its regulations, which govern reparations and arbitration procedures and requested comment thereon by February 12, 1982.[1] On February 26, 1982, the Commission extended the comment period on the proposed rules until March 15, 1982.[2] The Commission received thirty-two letters of comment on the proposed amendments: nine from contract markets; eight from FCMs; eight from floor brokers; three from law firms; one from the National Futures Association ("NFA"); one from the American Arbitration Association ("AAA"); one from the National Association of Securities Dealers ("NASD"); and one from the Futures Industry Association ("FIA"). The Commission has reviewed these comments carefully and, as more fully explained below, modified certain aspects of its original proposal in response to various suggestions made by one or more commentators. In addition, the Commission has modified its proposal to reflect recent amendments to sections 5a(11) and 17(b)(10) of the Commodity Exchange Act made by the Futures Trading Act of 1982, Pub. L. No. 97-444, 96 Stat. 2294, 2307 (1983).[3]

[1] 46 FR 60834 (December 14, 1981).

[2] 47 FR 9225 (March 4, 1982).

II. Conforming Amendments

A Sections 170.8, 180.2 (Introductory Paragraph) and 180.4

The Futures Trading Act of 1982, Pub. L. No. 97-444, § 271, 96 Stat. 2307 (1983), has amended sections 5a(11) and 17(b)(10) of the Commodity Exchange Act, 7 U.S.C. §§ 7a(11), 21(b)(10) by eliminating the $15,000 limitation upon disputes which must be accepted for arbitration by exchanges and registered futures associations. As noted by the House Committee report concerning such legislation, these changes were made in order to enhance the attractiveness of arbitration as an alternative to reparations.[4] The Commission believes that removal from the Commission's rules of the $15,000 limitation upon disputes which must be accepted for arbitration under contract market and registered futures association rules is consistent with the amendments to the Act as well as the purposes which supported the statutory amendments.

The Commission notes that those statutory amendments received broad-based support[5] and that comments on the arbitration rules proposals urged removal of the $15,000 limitation even though such proposal was not included among the rules initially proposed for amendment.[6] Accordingly, the Commission is amending § 170.8, the introductory paragraph of § 180.2, and § 180.4 to delete the $15,000 limit on arbitrable grievances and related counterclaims. The Commission expects that this change may encourage customers with more sizable claims to arbitrate their claims instead of petitioning for reparations hearings. As noted by the House Report on H.R. 5447:

> [a]rbitration is an equally viable forum for resolving customer claims in excess of $15,000 and there is no logical reason why reparations should be the only out-of-court forum for resolution of these disputes.[7]

The Commission also is amending § 170.8 to conform its rule to the underlying requirement of section 17(b)(10) of the Act, as amended by the Futures Trading Act of 1982, that a futures association must provide a fair, equitable, and *expeditious* procedure through arbitration or otherwise for the settlement of customers' claims and grievances against any member or employee thereof. The Commission notes that the national futures Association ("NFA") is the only futures association currently registered with the Commission. The Commission approved NFA's Code of Arbitration when it initially granted NFA's registration [8] the expeditious resolution of disputes always has been an objective of the NFA arbitration program, and the Commission does not believe at this time that any changes in NFA's Code of Arbitration would be required to assure compliance with the newly enacted standard of section 17(b)(10) of the Act or § 170.8 of the Commission's regulations, as amended here. The Commission notes that NFA's arbitration program became operational on March 31, 1983, and that the Commission will monitor that program to assure, among other things, that NFA arbitration provides an expeditious, as well as fair and equitable, means of dispute resolution.

B. Sections 180.5, 180.3(b)(7)

Commission rule 180.5 authorizes a contract market to establish a procedure for settlement of customers' claims and grievances which were heretofore not covered by §§ 180.1 through 180.4, *i.e.*, claims in excess of $15,000. As noted above, the Futures Trading Act of 1982 has eliminated that $15,000 jurisdictional limit. Since all customer claims and grievances are now governed by §§ 180.1–180.4, the language of current § 180.5 is being deleted.

Commission rule 180.5 is also referenced in current § 180.3(b)(5), to assure that any forum for settlement of customer disputes, other than a procedure established pursuant to section 5a(11) of the Act, complies with certain minimal fairness standards. With the elimination of the $15,000 jurisdictional limit, the Commission believes it is appropriate to directly reference the fairness and equitability standards of § 180.2 in new § 180.3(b)(7) (formerly § 180.3(b)(5)), in lieu of the current indirect reference to those standards via § 180.5. In addition, the language of § 180.3(b)(7) has been revised from the former language of § 180.3(b)(5) for purposes of clarity. Accordingly, § 180.5 is, as discussed above, deleted and the fairness standards which it references, insofar as they apply to arbitration forums other than those established under section 5a(11) or 17(b)(10) of the Act are reincorporated in § 180.3(b)(7). With the deletion of § 180.5, § 180.6 is redesignated as § 180.5.

C. Section 180.1(b)

The Futures Trading Act of 1982 amended section 5a(11) of the Act by deleting the exclusion of futures commission merchants and floor brokers from the definition of "customer" under that subsection.[9] The definition of "customer" under section 5a(11) has been broadened to include any person for or on behalf of whom a member of a contract market effects a transaction on such contract market, except another of that contract market.[10] The practical effect of this statutory change is to assure that no person is denied the rights of a customer in arbitration under the Act solely on the basis of that person's registration status. The Commission is amending § 180.1(b) to reflect the statutory definition and, accordingly, thereby require contract market rules adopted in conformance with Part 180 to include as customers futures commission merchants and floor brokers who have a claim based on a customer relationship with a contract

[3] Section 553(b) of the Administrative Procedure Act, 5 U.S.C. 553(b) normally requires that a notice of proposed rulemaking be published in the **Federal Register** and that opportunity for comment be provided when an agency promulgates new regulations. Section 553(b) does not apply when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest. Since the amendments now being made to § 170.8, § 180.1(b), the introductory paragraph of § 180.2, and the amendments to § 180.3(b)(5), § 180.4, and § 180.5 merely conform those sections to recent statutory changes enacted in the Futures Trading Act of 1982, the Commission finds that prior publication and comment are unnecessary with respect to these amendments.

VOL 48 ISS 96 MY 17 1983 UMI

market member, provided the futures commission merchant or floor broker initiating the action is not a member of the same contract market as the respondent.

D. Addition of Introducing Brokers, Commodity Pool Operators, and Commodity Trading Advisors to §§ 180.3(b), 180.3(b)(2), 180.3(b)(3), and 180.3(b)(4)

The Futures Trading Act of 1982 established introducing brokers as a new category of Commission registrant and amended the definition of associated person to include associated persons of introducing brokers, commodity pool operators ("CPOs") and commodity trading advisors ("CTAs"). Most of the functions typically to be performed by introducing brokers are those which otherwise would be performed by FCMs or in some instances their agents, while the functions performed by associated persons ("APs") of CPOs and CTAs in many instances are similar to the functions of APs of FCMs. On March 29, 1983 the Commission determined to publish for comment proposed rules which would establish registration requirements and a regulatory framework for introducing brokers and the new AP registrants.[11]

The notice also observes that the Commission in a separate action would consider application of the Commission's rules governing arbitration procedures to introducing brokers and requests comments concerning such application.[12] The Commission notes that with the identification of introducing brokers as a category of Commission registrant, NFA has proposed rule amendments which would effectively terminate its never-activated agent membership category and substitute in its place an NFA membership category for introducing brokers.[13] Existing NFA Bylaws and Rules require all NFA members, including CPOs and CTAs, and their APs to be subject to NFA arbitration procedures.[14] Given the likely membership of introducing brokers in NFA and the fact that the functional role of introducing brokers and APs of introducing brokers, CPOs and CTAs will place them in frequent contact with commodities customers, the Commission today under separate heading is publishing notice of proposed rules to add introducing brokers, CPOs, CTAs and their APs to the list of Commission registrants subject to the requirements of Part 180.[15]

II. Amendments to Current Regulations

A. Determination Not To Amend § 12.21

When the Commission proposed amendments to Part 180 of its regulations, one of the primary issues upon which the Commission requested comment was whether to permit a customer to waive his right to initiate a reparations proceeding if the customer had executed a pre-dispute arbitration agreement. The Commission received a wide variety of comments concerning the proposed amendment to § 12.21, ranging from outright opposition to strong support for such waiver.[16] These comments included suggestions for improving the reparations system as a means of reducing the reparations caseload,[17] and suggestions which would clarify or expand the permissible scope of the proposed pre-dispute waiver of one's right to proceed in reparations.[18] Other commentors, particularly the contract markets, expressed concern that if pre-dispute arbitration agreements became widely used as a means of obtaining customers' waivers of their right to reparations, the exchanges' own arbitration facilities would become severely overburdened.[19] Finally, a number of commentors suggested that the self-regulatory organizations were best structured to determine how best to promote their own arbitration systems—including the provisions of fair forums—in order to encourage the use of arbitration in lieu of reparations.[20]

These comments, as well as other developments since the amendment to § 12.21 was proposed, have caused the Commission to determine not to permit the use of pre-dispute arbitration agreements by which customers contractually may waive their rights to reparations.[21] The Commission has not, however, adopted any rule which would prohibit the use of voluntary pre-dispute arbitration agreements by which customers contractually may waive their rights under section 22 of the Act or otherwise to seek resolution of commodities disputes through private litigation.

With respect to its reparations program, the Commission notes that it has made significant progress in reducing the pending reparations caseload and that, both as a result of amendments to section 14 of the Act by the Futures Trading Act of 1982 and further rulemaking by the Commission relating to reparations procedures, futher improvements are likely to occur. For example, during 1982, the number of dispositions of reparations proceedings for the first time exceeded the number of new reparations proceedings initiated. Further, the amendments to section 14 of the Act by the Futures Trading Act of 1982 now limit reparations proceedings to those actions involving a violation of the Act, Commission rule or order which is brought only against *actual* Commission registrants, as compared to the previous statutory right to seek reparations against individuals *required* to be registered with the Commission. Finally, the Commission recently published an advance notice of proposed rulemaking suggesting various means by which the conduct of its reparations proceeding might be expedited.[22] The Commission's staff has considered the comments received in response to that notice and will shortly present its recommendations to the Commission concerning specific proposed rules.[23]

[11] 48 FR 14933 (April 6, 1983); *see also* 48 FR 1590 (April 13, 1983).

[12] *Id.* at 14935. The Commission has not yet had an opportunity to consider any such comments, but will address the issue of whether to include introducing brokers under § 180.3 in conjunction with a rule proposal which the Commission is publishing for comment under separate heading today concerning the inclusion of CPOs and CTAs under the provisions of § 180.3.

[13] Proposed amendment to sections 1 and 2 of the NFA Code of Arbitration (March 9, 1983).

[14] *See* Section 2 of the NFA Code of Arbitration.

[15] As noted previously, the Commission already has given notice of this proposal with respect to introducing brokers. Comments received in response to that notice will be considered in conjunction with this publication of the proposed rule amendments and need not be resubmitted.

[16] *See* comments of Gary J. Lekas, M. Van Smith, and Paine Webber Jackson & Curtis Incorporated in opposition. *See* comment of E. F. Hutton & Company, Inc. in support.

[17] *See e.g.*, comments of Drexel Burnham Lambert Incorporated.

[18] *See e.g.*, comments of Merrill Lynch Commodities, Inc., E. F. Hutton & Company, and Memel, Jacobs, Pierno and Gersh on behalf of Monex International, Ltd.

[19] *See* comments of the Chicago Board of Trade; the Coffee Sugar and Cocoa Exchange, Inc. and various members of that Exchange; the New Orleans Commodities Exchange; the MidAmerica Commodities Exchange; and the National Association of Securities Dealers.

[20] *See* comments of the National Futures Association and of the Chicago Board of Trade.

[21] The Commission notes that, contrary to the view of two commentators (Gary J. Lekas and M. Van Smith), it does not believe that any provision of the Community Exchange Act nor any court holdings would preclude the Commission from amending its rules to permit the use of pre-dispute arbitration agreements by which the parties thereto waive their right to reparations. Indeed, the Commission believes that, but for existing provisions in Part 180 of its regulations, such contractual waivers would be permissible.

[22] 48 FR 6720 (February 15, 1983).

[23] Commission consideration of such rule proposals has been scheduled for May 24, 1983.

In the light of the Commission's expectations of further substantial improvements in its ability to hear reparations proceedingsa on an expeditious basis, and the concerns expressed by various commentators, the Commission has determined not to amend § 12.21 and to retain the existing limitation in § 180.3 on the ability of a party to a pre-dispute arbitration agreement to waive his rights to a reparations proceeding. In reaching this conclusion, the Commission also notes the comments of the NFA and the Futures Industry Association to the effect that arbitration has the potential for relieving the pressure of reparations proceedings only if the public perceives it as a just, speedy and inexpensive forum for the resolution of claims, and that such perception can best be realized through the industry's own efforts.

In this regard, the past year has also seen the advent of NFA's arbitration program. That program, which commenced operation on March 31, 1983, directly involves a very large portion of the commodities industry.[24] The NFA program is particularly relevant to consideration of these proposed rules because it requires NFA members to participate in NFA arbitration proceedings initiated by customers, provide customers with the opportunity to have a matter heard by a mixed panel at a cost no greater than the cost of a non-diversified panel, and offers a customer the opportunity to have his complaint heard in a location generally convenient to the customer—typically, most major cities within the United States. In summary, the NFA Code of Arbitration provides customers as a right with the protections which the Commission was proposing to require as a prerequisite to an FCM's use of a pre-dispute arbitration agreement.

Notwithstanding its determination not to remove the existing restrictions on the use of pre-dispute arbitration agreements, the Commission has determined that other reasons support adoption of certain other proposed changes to Part 180. First, the 1982 reauthorization process demonstrated a continuing strong Congressional support for the use of arbitration as a means of dispute resolution and, second, notwithstanding considerable and significant progress in the Commission's ability to process and resolve reparations matters, the Commission continues to believe that it should pursue all fair and viable means of further reducing its burden of resolving disputes in reparations. The Commission believes the rule changes to Part 180 adopted herein will further enhance the attractiveness of arbitration as a means of dispute resolution, assure that FCMs which offer forums other than NFA for arbitraton provide at least one forum with arbitration attributes comparable to NFA,[25] and provide an even greater opportunity to assist in controlling the Commission's burden of reparations proceedings.

B. Section 180.2(a)

The Commission is amending § 180.2(a) to require that customers be provided with the choice of a panel or other decision-making body having at least a majority of the persons serving thereon who are not members of or associated with any member of a contract market, or employee thereof, and who are not otherwise associated with a contract market ("unaffiliated arbitrators"). Numerous commentators have stated that this amendment was overbroad and would eliminate large numbers of individuals with commodities market experience from the pool of available unaffiliated arbitrators. The Commission believes, however, that giving customers a choice of a panel whose unaffiliated arbitrators are not members of any contract market is essential to ensure that customers perceive arbitration to be as impartial as a reparations proceeding before an administrative law judge or litigation before a civil court judge. In this regard, the Commission notes that such a requirement reflects panel selection procedures of the National Association of Securities Dealers as well as draft commodities arbitration rules of the American Arbitration Association.[26]

Moreover, this requirement will have little practical effect if, as anticipated by the Commission, most contract markets designate the National Futures Association as an available arbitration forum under § 180.3(b)(4)(A). Under section 4a of the NFA Code of Arbitration, customers are entitled to the choice of a panel composed of a majority of persons who are not connected with an NFA member or NFA (except as NFA arbitrators). Since most members of contract markets will also be NFA members, such contract market members will in any case be subject to the panel membership restrictions of NFA rule section 4(a) regardless of Commission revision to § 180.3(b). Thus, the revised language of § 180.3(b) merely puts contract market panel selection procedures on an equal basis with that of NFA.

The Commission also has determined to amend § 180.2(a) in order to make clear that an arbitration panel may consist of one arbitrator. The Commission believes that arbitration organizations should be permitted to use one unaffiliated arbitrator as well as a panel with a majority of unaffiliated panelists in dispute resolution. In this regard, the Commission notes that both the New York Stock Exchange and National Association of Securities Dealers successfully use one person panels and that the arbitration rules of the National Futures Association authorize one person panels in cases in which the customer's claim is less than $5,000.[27] Moreover, the Commission has received comments supporting the use of one person panels.[28] Accordingly, the Commission concludes that under appropriate circumstances, one person panels are an acceptable means of arbitration and is amending § 180.2(a) to encourage experimentation by arbitration organizations along these lines. Finally, since § 180.2(e) addresses the issue of costs, the Commission is amending § 180.2(a) to delete the current language which permits costs incurred as a result of electing a mixed panel to be allocated among the parties.

C. Section 180.2(e)

As originally proposed, § 180.2(e) would have provided that contract market rules require contract market members which are parties to an arbitration proceeding to pay all costs other than any applicable initial filing fee, unless the arbitrators in a particular case determine that the customer has acted in bad faith in initiating the proceeding. The Commission has received substantial adverse comment with respect to that proposal. Essentially, the commentators contend that (1) the Commission is without

[24] NFA's arbitration program would apply to all FCMs which handle customer accounts and, through NFA Bylaw 1101 (which restricts the ability of NFA members to handle accounts of non-NFA members) all other introducing brokers, CPOs and CTAs which are members of NFA. It should further be noted that the Commission has under consideration a proposed rule which would require all FCMs to be a member of at least one registered futures association. *See* 47 FR 53031 (November 24, 1982).

[25] If, as anticipated, NFA is designated by one or more contract markets as their forum for arbitration, the amendments to Part 180 would operate to provide customers with the choice of at least two forums with these attributes for all matters relating to such contract markets.

VOL 48 ISS 96 MY 17 1983 UMI

statutory authority to impose such a requirement, (2) the unqualified language in § 180.2(e) could be construed to include such expenses as a customer's travel and attorney expenses, and (3) such a requirement could encourage the filing of frivolous grievances and result in "forced" settlements by exchange members who would seek to avoid the expenses of arbitration.

The Commission believes that sections 5a(11) and 8a(5) of the Commodity Exchange Act provide ample authority for the Commission to require contract market members to bear the costs involved in establishing and maintaining an arbitration program as a condition to contract market designation. Nevertheless, the Commission notes that it never intended the words "all costs" to include expenses which are personal to the customer, such as travel expenses, attorney fees or discovery expenses that are not traditionally awarded as "costs" of a proceeding.[30] The Commission's essential concern is that customers not be required to bear the burden of any additional expenses, such as higher initial filing fees, resulting from their selection of a mixed panel as opposed to a non-diverse panel.

Accordingly, the Commission is amending §180.2(e) to require that the rules of a contract market must provide that a contract market member which is a party to an arbitration proceeding shall pay any incremental fees which a contract market may assess for providing a mixed panel, unless the arbitrators in a particular case determine that the customer has acted in bad faith in initiating or conducting the proceeding. The Commission expects that the applicability of a bad faith standard for such an allocation of costs against the customer would be unusual.[30] The Commission notes that § 180.2(e) currently provides that any other costs may be apportioned among the parties or may be assessed against the losing party as the panel or other decisionmaking body, in its discretion, sees fit. Thus, while contract market members will be required to pay the direct costs associated with a customer's selection of a mixed panel, the arbitration panel may allocate other expenses only under appropriate circumstances.

D. Section 180.3

As proposed, § 180.3(b)(1) would require the pre-dispute arbitration agreement to be contained in a separate document. This requirement was premised on the assumption that a separate document would focus customers' attention on the nature of the agreement and thus possibly ensure that the agreement would be entered knowingly. Numerous commentators, however, objected to this requirement. Essentially, those commentators contended that requiring a separate document would add additional costs without any further measure of protection than would be offered by separate endorsement within the customer agreement. Because the Commission has determined not to permit parties to waive their right to reparations through execution of a predispute arbitration agreement, the Commission does not believe that it is essential to provide the additional focus which would be achieved by requiring execution of a separate agreement. Accordingly, the Commission has determined not to amend § 180.3(b)(1).

The Commission's concern that customers make an informed decision with respect to the pre-dispute agreement, however, is reflected in the revised bold face language required on such agreements. Specifically, the Commission is amending the bold face language required by new § 180.3(b)(6) in order to more clearly and simply convey the significance of the arbitration agreement to the customer. In order to assure that customers comprehend the available alternative dispute resolution forums and fully understand that execution of a pre-dispute arbitration agreement is voluntary, the Commission will require the bold face language to emphasize the availability of both reparations and arbitration as means for dispute resolution and the fact that execution of the agreement may preclude the customer from seeking to litigate any disputes arising under the agreement. Moreover, in order to focus customer's attention on the fact that a customer need not sign the arbitration agreement in order to open an account, the Commission has moved such language to the end of the § 180.3(b)(6) paragraph immediately preceding the customer's signature. The Commission thus believes that such modifications in language will improve customer understanding of the arbitration agreement and its voluntary nature. In this regard, the Commission notes that it received a variety of comments regarding the implications of the bold face language and its placement within the paragraph.[31] The Commission believes however, that the language it is now adopting conveys the essential nature of the agreement and its significance and that further changes are unnecessary.

In order that a customer will not be bound to arbitrate in an unfavorable or distant forum without his or her consent, amended paragraph (b)(4) states that a pre-dispute agreement must advise the customer that he or she may select an arbitration forum when a dispute arises.[32] The FCM, floor broker or AP would be required to supply the customer with a list of at least two arbitration forums and the rules of procedure of those forums within 10 days after the receipt of the customer's notice that he or she intends to submit a dispute to arbitration. Should an FCM, floor broker or AP seek to initiate proceedings, notice to that effect would have to be accompanied by the list of forums and their applicable rules.[33] One of the possible forums on the list would have to be the contract market upon which the transaction giving rise to the dispute was or could have been executed, or a registered futures association designated by such contract market, unless the FCM or AP is not a member of such contract market. Either the contract market, its designee or another organization on the list would have to provide the customer with the opportunity to choose a site for the arbitration proceeding from among several cities throughout the country, in order to permit the customer to cite his preference of a reasonably convenient location. Of course, an FCM, floor broker, or AP would be free to include additional organizations on the list, provided their procedures comply with Commission regulation § 180.2.[34]

Several commentators correctly observed that as proposed, §180.3(b)(3) was silent on the effect of a failure by the customer to timely select an

[30] *See* 46 FR 60834, 60837 n.17 (December 14, 1981).

[30] *See e.g., Alyeska Pipeline Service Company* v. *The Wilderness Society*, 421 U.S. 240, 258–59 (1975).

[31] For example, some commentators believed that the bold face language would imply that arbitration is a biased procedure; some suggested that the pros and cons of arbitration and reparations be included in such language.

[32] One commentator suggested that a customer select a forum at the time of signing the agreement. The Commission believes, however, that customers should retain the right to select a forum at the time the dispute arises in order to be able to make an intelligent selection based upon the nature of the dispute and the current capabilities of the arbitration forums.

[33] Some commentators objected to the requirement of supplying the listed arbitration forums' rules to customers. The Commission believes, however, that such a requirement is necessary to assure an informed selection of a forum by customers. Moreover, the Commission notes that traditionally, arbitration forums provide copies of their rules at no cost.

[34] In addition to NFA, other possible alternative arbitration forums include the AAA, NASD and the New York Stock Exchange.

arbitration forum. In response to these concerns, the Commission is amending §180.3(b)(4) to require a customer to select an arbitration forum within 45 days after receipt of the list of available forums. Failure by the customer to make a selection within the 45 day period will give the opposing party the right to select the organization.

Other commentators stated that giving the customer the right to select the arbitration organization is unfair and may result in an abuse of this right by customers in an attempt to extract unwarranted settlements. The Commission believes, however, that such fears are premised on a misunderstanding of the Commission's intent with respect to the selection of arbitration forums. The Commission requires only that a customer be given the right to select the organization which will conduct the arbitration proceeding. The Commission does not require that the customer be given the absolute right to select the location of the actual proceeding, but rather to select an organization with the capability to provide an opportunity to conduct the proceeding in any of a number of cities. The Commission believes that the selection of the proceeding location should be governed by the rules of the selected organization and that those rules should address how a final determination as to location is made when a complainant and respondent disagree as to the most convenient location. In this regard, the Commission intends to carefully scrutinize the rules of those organizations which provide for arbitration in diverse geographic locations to assure that location selection procedures are fair and are made with due consideration of convenience to all the parties.

Finally, the language of §180.3(b)(4) concerning the requirement to provide a disinterested panel is amended to conform to the language of §180.2(a) (*see* discussion above) and new paragraph (b)(5) of §180.3 is amended from the version of that paragraph initially proposed to reflect the requirement of §180.2(e) that contract market members bear any incremental fees resulting from providing a mixed panel. Accordingly, this requirement for payment of incremental fees would be a condition of any pre-dispute arbitration agreement with a customer, regardless of whether the party making the agreement is a contract market member.

The language of new paragraph (b)(6) of §180.3 reflects certain revisions in the boldfaced language currently required by current §180.3(b)(4) and is designed to clarify the customer's understanding of the pre-dispute arbitration agreement. Finally, existing paragraph (b)(5) is renumbered §180.3(b)(7) and amended as discussed above in conjunction with the deletion of §180.5.

III. Proposals for Further Rulemaking

In proposing these amendments, the Commission had expressed its concern that customers who do not sign pre-dispute arbitration agreements may thereby forfeit the possible advantages which would be conferred by such agreements. Thus, the Commission requested comment on whether §180.3 should be amended further to provide that a customer would have the right to elect arbitration in a forum of his choice when a dispute arises, even though the customer did not enter into a pre-dispute agreement and whether, in any event, the cautionary language as proposed in new §180.3(b)(6) should contain a statement to that effect.[35]

In general, most commentators responding to this request contended that such further rulemaking would be undesirable since it could negate a customer's incentive to enter a pre-dispute agreement by leading the customer to believe he or she has nothing to gain by signing such an agreement. The Commission agrees that such further rulemaking is not necessary. The Commission notes, however, that even if a customer does not sign a pre-dispute arbitration agreement, the customer will retain the right under §180.2 to elect arbitration under the rules of a contract market and, if an NFA member is involved, under NFA arbitration rules. Since most futures commission merchants are NFA members, the resulting arbitration may ultimately be conducted under NFA rules which provide for arbitration on a national basis. Thus, although customers who do not enter a pre-dispute agreement will not be required to be afforded the choice of at least two organizations as provided for in §180.3(b)(4), they will most likely be afforded arbitration through an organization which operates on a national basis and will be subject to direct Commission oversight.

In its 1981 release the Commission also noted that one attribute of reparations is an evolving body of law which may be relied upon by industry participants and customers in ascertaining their rights and responsibilities under the Act and Commission regulations. The Commission questioned whether the use of diverse arbitration forums could result in a non-uniform application of the commodities laws, regulations and applicable self-regulatory rules and invited comments on this question and whether it should propose or implement any additional rules or procedures designed to assure that such questions of law are uniformly determined and subsequently applied.

While several commentators responded that the Commission should promulgate rules that would ensure uniform development and application of the law, the majority of commentators essentially concluded that the benefits of arbitration (*e.g.*, prompt resolution of disputes without the delay and cost of litigation) outweigh any possible drawbacks resulting from non-uniform decisions. The Commission agrees with those commentators who believe that the benefits of arbitration, which is intentionally structured as an informal proceeding, outweigh any potential problems of non-uniformity in decisions. Moreover, any lack of uniformity which may occur in arbitration decisions will not interfere with the uniform development of the law through court or administrative decisions since arbitration decisions by their nature have no precedential value. This is not to imply, however, that the Commission is in any manner limiting recognized grounds to challenge an arbitration award, such as when the award is in manifest disregard of the commodities laws or fundamentally irrational.[36]

The Commission believes that the success of any arbitration program rests in large part upon an informality uncomplicated by the procedural rules and legal maneuverings characteristic of civil and administrative proceedings. Indeed, the promulgation of any restrictive procedural requirements may only blur the distinction between arbitration and other more formal dispute resolution forums, add costs, and thereby offset those incentives which exist to use arbitration in lieu of other means of dispute resolution.[37]

[35] 46 FR 60834, 60837 (December 14, 1981).

[36] *See Wilko* v. *Swan*, 346 U.S. 427, 436–37 (1953); *Shearson Hayden Stone, Inc.* v. *Liang*, 493 F. Supp. 104, 106 (N.D. Ill. 1980), *aff'd* 653 F.2d 310 (7th Cir. 1981).

[37] The Commission notes that the conduct of arbitration proceedings under Part 180 has not been a significant subject of customer complaints to the Commission and that the Commission to date has declined to take review under section 8c of the Act of the very limited number of requests for review of exchange-sponsored arbitration proceedings which it has received. Should the Commission have reason to believe that a self-regulatory organization is not complying with any of its rules or the rules of the Commission, including those rules governing the conduct of arbitration proceedings, the Commission has ample authority under sections 5a(8), 5a(11), 8(a), and 17(b)(10) of the Act and Commission rules 1.51, 1.53, 170.8 and Part 180 to examine the conduct of such arbitration proceedings and to obtain any

VOL 48 ISS 96 MY 17 1983 UMI

Finally, the Commission notes that the body of arbitration decisions resulting from the new program will not, in any case, alter the precedential value of reparations and civil court decisions.

III. Certification Under Regulatory Flexibility Act

In its 1981 proposal, the Chairman certified, on behalf of the Commission and pursuant to section 3(a) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), that if the regulations were promulgated as proposed, there would not be a significant economic impact on a substantial number of small entities.[38] Subsequently, the Commission determined that contract markets, registered futures commission merchants, registered commodity pool operators and large traders are not "small entities" for purposes of that Act and that the requirements of the Regulatory Flexibility Act therefore did not apply to those entities.[39] With respect to other parties affected, the Commission continues to believe that these rules, as subsequently modified, will not have a significant adverse impact.[40] Accordingly, pursuant to section 3(a) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Chairman, on behalf of the Commission, certifies that these rules will not have a significant economic impact on a substantial number of small entities.

IV. Final Rules

List of Subjects

17 CFR Part 170

Arbitration, Futures association.

17 CFR Part 180

Arbitration.

Pursuant to the authority in sections 5(a)(11), 17(b)(10) and 8a(5) of the Commodity Exchange Act, as amended, 7 U.S.C. 7a(11), 21(b)(10) and 12a(5), the Commission is amending §§ 170.8, 180.1, 180.2, 180.3, 180.4, 180.5 and 180.6 of Chapter I of 17 CFR as follows:

PART 170—[AMENDED]

1. Section 170.8 of Part 170 is revised to read as follows:

records maintained by the self-regulatory organization concerning such proceedings.

[38] 46 FR 60634, 60637 (Dec. 14, 1981).

[39] 47 FR 18618 (April 30, 1982).

[40] Those modifications of the original proposal made to conform Parts 170 and 180 to the Futures Trading Act of 1982 do not change this determination. Moreover, Commission modification of its original § 180.2(e) proposal makes clear that contract market members and other parties to pre-dispute arbitration agreements with customers are only required to pay any incremental costs associated with a customer's selection of a mixed panel and not all costs.

§ 170.8 Settlement of customer disputes (Section 17(b)(10) of the Act).

A futures association must be able to demonstrate its capability to promulgate rules and to conduct proceedings which provide a fair, equitable and expeditious procedure, through arbitration or otherwise, for the voluntary settlement of a customer's claim or grievance brought against any member of the association or any employee of a member of the association. Such rules shall conform to and be consistent with Section 17(b)(10) of the Act and be consistent with Part 180 of the Commission's regulations governing contract market arbitration and dispute settlement procedures.

PART 180—[AMENDED]

2. Section 180.1 of Part 180 is amended by revising paragraph (b) as follows:

§ 180.1 Definitions.

* * * * *

(b) The term "customer" as used in this part includes an option customer (as defined in § 1.3(jj) of this chapter) and any person for or on behalf of whom a member of a contract market effects a transaction on such contract market, except another member of that contract market.

3. Section 180.2 of Part 180 is amended by revising the introductory paragraph and paragraphs (a) and (e) as follows:

§ 180.2 Fair and equitable procedure.

Every contract market shall adopt rules which provide for a fair and equitable procedure through arbitration or otherwise for the settlement of customer's claims and grievances against any member or employee thereof which shall include at least the following as *minimum* requirements for a fair and equitable procedure:

(a) The procedure shall be objective and impartial. Customers must be provided with the choice of a panel or other decision-maker composed of one or more persons, of which at least a majority are not members or associated with any member of a contract market, or employee thereof, and are not otherwise associated with a contract market. The rules of a contract market may, with proper notice, require the customer to request such a panel or other such decision-maker at the time of submission of the claim or grievance to the procedure. *Ex parte* contacts by any of the parties with members of any panel or other decision-maker shall not be permitted.

* * * * *

(e) The procedure shall provide adequate notice to the parties in advance of a submission of a claim or grievance, or counterclaim (permitted by § 180.4 of this Part), of the nature and amount of any fees or costs which may be assessed against customers utilizing the procedure. Fees or costs shall be reasonable, particularly in relation to the complexity and amount of the claim or grievance or counterclaim, if any, presented. Costs may be apportioned among the parties or may be assessed against the losing party as the panel or other decision-maker, in its discretion, sees fit. The rules of a contract market, however, must provide that a contract market member which is a party to an arbitration proceeding shall pay any incremental fees which may be assessed by a qualified forum for provision of a panel or other decision-maker which conforms to the requirements of paragraph (a) of this subsection, unless the arbitrators in a particular proceeding determine that the customer has acted in bad faith in initiating or conducting that proceeding.

* * * * *

4. Section 180.3 of Part 180 is amended by redesignating paragraphs (b)(4) and (b)(5) as paragraphs (b)(6) and (b)(7) and revising them, and new paragraphs (b)(4) and (b)(5) are added as follows:

§ 180.3 Voluntary procedure and compulsory payments.

* * * * *

(b)(4) The agreement must advise the customer that, at such time as he or she may notify the futures commission merchant, floor broker or associated person that he or she intends to submit a claim to arbitration, or at such time as the futures commission merchant, or associated person notifies the customer of its intent to submit a claim to arbitration, the customer will have the opportunity to elect a qualified forum for conducting the proceeding. Within ten business days after receipt of such notice from the customer, or at the time the futures commission merchant, floor broker or associated person so notifies the customer, the futures commission merchant, floor broker or associated person must provide the customer with a list of two or more organizations whose procedures qualify them to conduct arbitrations in accordance with the requirements of § 180.2 of this Part, together with a copy of the rules of each forum listed. The list must include: (A) the contract market, if available, upon which the transaction giving rise to the dispute was executed or could have been executed or a registered futures association designated by such contract market; and (B) at least one other organization which will provide the customer with the opportunity to select the location of the arbitration proceeding from among several major cities in diverse geographic regions and which will provide the customer with the choice of a panel or other decision-maker composed of at least one or more persons, of which at least a majority are not members or associated with a member of a contract market or employee thereof, and which are not otherwise associated with a contract market (mixed panel). The customer shall, within forty-five days after receipt of such list, notify the opposing party of the organization selected. A customer's failure to provide such notice shall give the opposing party the right to select an organization from the list.

(5) The agreement must acknowledge that the futures commission merchant, floor broker or associated person will pay any incremental fees which may be assessed by a qualified forum for provision of a mixed panel, unless the arbitrators in a particular proceeding determine that the customer has acted in bad faith in initiating or conducting that proceeding.

(6) The agreement must include the following language printed in large boldface type:

THREE FORUMS EXIST FOR THE RESOLUTION OF COMMODITY DISPUTES: CIVIL COURT LITIGATION, REPARATIONS AT THE COMMODITY FUTURES TRADING COMMISSION (CFTC) AND ARBITRATION CONDUCTED BY A SELF-REGULATORY OR OTHER PRIVATE ORGANIZATION.

THE CFTC RECOGNIZES THAT THE OPPORTUNITY TO SETTLE DISPUTES BY ARBITRATION MAY IN SOME CASES PROVIDE MANY BENEFITS TO CUSTOMERS, INCLUDING THE ABILITY TO OBTAIN AN EXPEDITIOUS AND FINAL RESOLUTION OF DISPUTES WITHOUT INCURRING SUBSTANTIAL COSTS. THE CFTC REQUIRES, HOWEVER, THAT EACH CUSTOMER INDIVIDUALLY EXAMINE THE RELATIVE MERITS OF ARBITRATION AND THAT YOUR CONSENT TO THIS ARBITRATION AGREEMENT BE VOLUNTARY.

BY SIGNING THIS AGREEMENT, YOU: (1) MAY BE WAIVING YOUR RIGHT TO SUE IN A COURT OF LAW; AND (2) ARE AGREEING TO BE BOUND BY ARBITRATION OF ANY CLAIMS OR COUNTERCLAIMS WHICH YOU OR [NAME] MAY SUBMIT TO ARBITRATION UNDER THIS AGREEMENT. YOU ARE NOT, HOWEVER, WAIVING YOUR RIGHT TO ELECT INSTEAD TO PETITION THE CFTC TO INSTITUTE REPARATIONS PROCEEDINGS UNDER SECTION 14 OF THE COMMODITY EXCHANGE ACT WITH RESPECT TO ANY DISPUTE WHICH MAY BE ARBITRATED PURSUANT TO THIS AGREEMENT. IN THE EVENT A DISPUTE ARISES, YOU WILL BE NOTIFIED IF [NAME] INTENDS TO SUBMIT THE DISPUTE TO ARBITRATION. IF YOU BELIEVE A VIOLATION OF THE COMMODITY EXCHANGE ACT IS INVOLVED AND IF YOU PREFER TO REQUEST A SECTION 14 "REPARATIONS" PROCEEDING BEFORE THE CFTC, YOU WILL HAVE 45 DAYS FROM THE DATE OF SUCH NOTICE IN WHICH TO MAKE THAT ELECTION.

YOU NEED NOT SIGN THIS AGREEMENT TO OPEN AN ACCOUNT WITH [NAME]. SEE 17 CFR 180.1–180.5.

Customer

(7) If the agreement specifies a forum for arbitration other than a contract market or registered futures association, the procedures of such forum must be fair and equitable as defined by § 180.2 of this Part.

5. Section 180.4 of Part 180 is revised to read as follows:

§ 180.4 Counterclaims.

A procedure established by a contract market under the Act for the settlement of customers' claims or grievances against a member or employee thereof may permit the submission of a counterclaim in the procedure by a person against whom a claim or grievance is brought. The contract market may permit such a counterclaim where the counterclaim arises out of the transaction or occurrence that is the subject of the customer's claim or grievance and does not require for adjudication the presence of essential witnesses, parties or third persons over whom the contract market does not have jurisdiction. Other counterclaims are permissible only if the customer agrees to the submission after the counterclaim has arisen, and if the aggregate monetary value of the counterclaim is capable of calculation.

§ 180.5 [Removed]

6. Part 180 is amended by removing current § 180.5.

§ 180.6 [Redesignated as § 180.5]

7. Part 180 is amended by redesignating current § 180.6 as § 180.5.

Issued in Washington, D.C., on May 12, 1983.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 628

Job Training Partnership Act (Pub. L. 97-300); Announcement of Procedures for Appeals to the Secretary of Labor on Denial of Service Delivery Area Designation Under Title I, Part A, Section 101(a)(4)(C); Job Training Partnership Act; Service Delivery System.

AGENCY: Employment and Training Administration, Labor.

SUMMARY: This notice announces procedures for appeals to the Secretary of Labor on denial of service delivery area (SDA) designation under Section 101(a)(4)(C) of the Job Training Partnership Act (JTPA), pursuant to § 628.1(c) of the final regulations for Titles I, II and III (48 FR 11080, March 15, 1983).

FOR FURTHER INFORMATION CONTACT: Robert Colombo, Acting Director, Office of Employment and Training Programs, 601 D Street, NW., Room 6402, Washington, D.C. 20213, telephone number: (202) 376-6093.

SUPPLEMENTARY INFORMATION: Section 101(a)(4)(C) of JTPA and § 628.1(c) of the final regulations permit certain entities to appeal a Governor's denial of SDA designation to the Secretary. These entities are defined in Section 101(a)(4)(A) of the Act. As indicated in § 628.1(c)(2) of the regulations, the Secretary will only accept appeals dated no later than 30 days after receipt of written notification of denial by the Governor. Decisions will be based strictly on the basis of whether or not the Governor's denial is inconsistent with Section 101 of the Act. The regulations provide the address for appeal submittal and require simultaneous submittal of the appeal to the Governor.

Section 628.1(c)(3) of the final regulations provides that the appealing party shall explain why it believes denial of designation is contrary to the provisions of Section 101 of the Act. In order for the Secretary to make an informed decision, the appealing party should provide all relevant information

VOL 48 ISS 96 MY 17 1983 UMI

in the appeal. This includes, at a minimum:

- An explanation of the provision of Section 101 that is at issue.
- Documentation that the appealing party is an entity provided for under Section 101(a)(4)(A) of the Act.
- A copy of SDA designation procedures provided by the Governor.
- A copy of the Governor's proposed and final SDA designations.
- A copy of the appealing party's request for designation.
- A copy of the Governor's notification of denial of designation and evidence of the date of receipt of such denial.

Governors may wish to submit similar or additional information with their comments on an appeal. Since the Secretary will make a final decision within 30 days of receipt of an appeal, Governors will need to submit their comments to the Secretary very quickly in order for them to be considered. A letter acknowledging the Secretary's receipt of an appeal and establishing a due date for receipt of comments will be sent to the appropriate Governor by the Assistant Secretary of Labor for Employment and Training.

Paperwork Reduction Act Clearance

This notice was submitted to and approved by OMB under the Paperwork Reduction Act. The control number assigned to this document by OMB is 1205–0202.

21 CFR Part 558

New Animal Drugs For Use in Animal Feeds; Bambermycins

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Walnut Grove Products providing for use of an 0.08-gram-per-pound bambermycins premix for making finished swine feeds used for increased rate of weight gain and improved feed efficiency in growing-finishing swine.

EFFECTIVE DATE: May 17, 1983.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Bureau of Veterinary Medicine (HFV–130), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4913.

SUPPLEMENTARY INFORMATION: Walnut Grove Products, Division of W. R. Grace & Co., 201 Linn St., Atlantic, IA 50022, is sponsor of NADA 132–983 providing for use of an 0.08-gram-per-pound bambermycins premix. The premix is used to manufacture finished feed for growing-finishing swine for increased rate of weight gain and improved feed efficiency. The application is approved and the regulations are amended accordingly. The basis for approval is discussed in the freedom of information (FOI) summary referred to below.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

21 CFR Part 558

New Animal Drugs For Use in Animal Feeds; Pyrantel Tartrate

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed for Good-Life, Inc., providing for use of a 48-gram-per-pound pyrantel tartrate premix to make a 9.6-gram-per-pound pyrantel tartrate intermediate premix for making complete swine feeds.

EFFECTIVE DATE: May 17, 1983.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Bureau of Veterinary Medicine (HFV–130), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4913.

SUPPLEMENTARY INFORMATION: Good-Life, Inc., Good Life Drive, P.O. Box 687, Effingham, IL 62401, is sponsor of NADA 134–286 submitted on its behalf by Pfizer, Inc. The NADA provides for use of a 48-gram-per-pound pyrantel tartrate premix to make a 9.6-gram-per-pound pyrantel tartrate intermediate premix for making complete swine feeds used for aid in prevention of migration and establishment of large roundworm *(Ascaris suum)* infections, for aid in prevention of establishment, removal and control of nodular worm *(Oesophagostomum)* infections, and for removal and control of large roundworm *(Ascaris suum)* infections.

The basis for approval of this NADA is discussed in the freedom of information (FOI) summary. The NADA is approved and the regulations are amended to reflect this approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

BILLING CODE 4160–01–M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[T.D. ATF–134; Re: Notice No. 429]

Merritt Island Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes a viticultural area in Yolo County, California, known as "Merritt Island." The establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising will help consumers better identify wines they purchase. The use of this viticultural area as an appellation of origin will also help winemakers distinguish their products from wines made in other areas.

EFFECTIVE DATE: June 16, 1983.

FOR FURTHER INFORMATION CONTACT: Lori D. Weins, FAA, Wine, and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue, NW., Washington, DC 20226 [202–566–7626].

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF–53 [43 FR 37672, 54624] revising regulations in 27 CFR Part 4. These regulations allow the establishment of definitive viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements.

On October 2, 1979, ATF published Treasury Decision ATF–60 [44 FR 56692] which added a new Part 9 to 27 CFR, providing for the listing of approved American viticultural area, the names of which may be used as appellations of origin.

Section 4.25a(e)(1), Title 27, CFR defines an American viticultural area as a delimited grape-growing region distinguishable by geographic features. Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area.

Mr. Chris Bogle, Secretary of Bogle Vineyards, Incorporated, located on Merritt Island, petitioned ATF for the establishment of a viticultural area in Yolo County, California, to be known as "Merritt Island." In response to this Petition, ATF published a notice of proposed rulemaking [Notice No. 429] in the **Federal Register** on November 3, 1982 [47 FR 49866] proposing the establishment of the Merritt Island viticultural area.

Comments

No comments were received during the 45-day comment period. On the basis of the information contained in the petition, ATF is establishing the Merritt Island viticultural area as proposed. The boundary of the Merritt Island viticultural area is described in § 9.68.

Evidence of the Name

The name of the area, Merritt Island, was well documented by the petitioner. After evaluating the petition, ATF believes that Merritt Island had a unique historical identity and that the viticultural area is known by the name "Merritt Island."

Geographical Evidence

The petition contained geographical and climatic information which distinguished the area from surrounding areas, based on the fact that:

(a) The area consists of an island, bounded on the west and north by Elk Slough, Sutter Slough on the south, and the Sacramento River on the east.

(b) The type of soil primarily consists of Columbian Sandy Loam, while areas to the east consist of Sierra loam type soils, areas to the west consist of adobe and clay type soils, and areas to the south consist of Peat Dirt (an organically structured soil).

(c) The climate of Merritt Island is tempered by cooling southwesterly breezes from the Carquinez Straits near San Francisco. The influence of this breeze creates a 10 degree Fahrenheit

VOL
48
ISS
96
MY
17
1983
UMI

cooler median temperature than the City of Sacramento, located six miles north. The climate of the islands to the south are often influenced by fog cover from San Francisco Bay, whereas, Merritt Island very seldom receives this fog cover since it is the northern most island in the Sacramento Delta.

Executive Order 12291

In compliance with Executive Order 12291, ATF has determined that this regulation is not a "major rule" since it will not result in—

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographical regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. The final rule will not impose, or otherwise cause, a significant increase in the reporting, recordkeeping or other compliance burdens on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this final rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 27 CFR Part 9

Administrative practice and procedures, Consumer protection, Viticultural areas, and Wine.

Drafting Information

The principal author of this document is Lori D. Weins, FAA, Wine, and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority

This regulation is issued under the authority in 27 U.S.C. 205. Accordingly, 27 CFR Part 9 is amended as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The table of sections in 27 CFR Part 9, Subpart C, is amended to add the title of § 9.68 to read as follows:

Subpart C—Approved American Viticultural Areas

Sec.

* * * * *

9.68 Merritt Island.

Par. 2. Subpart C, is amended to add the title of § 9.68 to read as follows:

Subpart C—Approved American Viticultural Areas

* * * * *

§ 9.68 Merritt Island.

(a) *Name.* The name of the viticultural area described in this section is "Merritt Island."

(b) *Approved maps.* The appropriate maps for determining the boundaries of the Merritt Island viticultural area are two U.S.G.S. maps, 7.5 minute series. They are entitled:

(1) "Clarksburg Quadrangle, California," 1967 (Photo revised 1980); and

(2) "Courtland Quadrangle, California," 1978.

(c) *Boundaries.* The Merritt Island viticultural area includes approximately 5,000 acres, located in Yolo County, California, six miles south of the City of Sacramento. The boundaries of the Merritt Island viticultural area, using landmarks and points of reference found on the U.S.G.S. maps submitted with the petition, are as follows: starting at the most southernly point, the intersection of Sutter Slough with the Sacramento River, west along the course of Sutter Slough for 0.54 miles until it intersects Elk Slough; northeast along the course of Elk Slough for 9.58 miles to the community of Clarksburg and the intersection of the Sacramento River; southwesterly along the course of the Sacramento River for 7.8 miles to the beginning point.

Signed: April 12, 1983.

Stephen E. Higgins,

Director.

Approved: April 29, 1983.

David Q. Bates,

Deputy Assistant Secretary (Operations).

BILLING CODE 1505-01-M

DEPARTMENT OF EDUCATION

34 CFR Part 73

Post Employment Conflicts of Interest; Procedures for Enforcement of Disciplinary Actions

AGENCY: Department of Education.

ACTION: Final rule.

SUMMARY: The Secretary amends the Standards of Conduct regulations by establishing procedures to be used in enforcing disciplinary actions in cases where post employment conflicts of interest are found to exist. The Ethics in Government Act of 1978 (the Act) defines and prohibits conflicts of interest that a former Federal employee must avoid. These regulations apply to the Department of Education's management practices and former employees.

EFFECTIVE DATE: May 17, 1983.

FOR FURTHER INFORMATION CONTACT: Richard Werksman, Division of Business and Administrative Law, Office of the General Counsel, Department of Education, 400 Maryland Avenue, S.W. (Room 4129, FOB-6), Washington, D.C. 20202. Telephone: (202) 755-1106.

SUPPLEMENTARY INFORMATION:

Background

Under the sections of the Act that address the problem of post employment conflicts of interest, two prohibitions (sections 207 (a) and (b)(i)) apply to all former Federal employees.

The first prohibition (section 207(a)) permanently prohibits every former Federal employee from serving as another person's representative before the Government on a case, grant, or contractual matter, or other similar proceeding or application in which the employee participated personally and substantially while a Government employee.

The second prohibition (section 207(b)(i)) is basically the same bar as the first, except that it prohibits representation by personal presence on all such matters which were actually pending under the former employee's "official responsibility" in his or her last year of Government service. This prohibition applies for two years from the date of separation.

Briefly, to have participated "personally and substantially" means that the former employee must have been directly involved and that that involvement must have been significant to the matter, i.e., more than just knowledge or perfunctory involvement. "Official responsibility" means the direct authority, either personally or through subordinates, to approve, disapprove, or otherwise direct Government actions. These terms are fully defined in regulations issued by the Office of Government Ethics at 5 CFR Part 737.

The other prohibitions under the Act apply only to "Senior Employees," that is, Presidential Appointees and those designated by the Director of the Office of Government Ethics pursuant to the Act. To be so designated a position must involve significant decisionmaking or supervisory responsibility and be at a basic rate of pay of GS-17 or above or within the Senior Executive Service.

The first of these prohibitions forbids Senior Employees from representing or making any oral or written communication on behalf of anybody in connection with a particular matter before the Department, regardless of the extent of their prior involvement with the matter, for one year from the date of separation. This is known as the "cooling off" requirement.

An important exception to the "cooling off" requirement applies to former Senior Employees whose principal occupation or employment is with an agency of a State or local government, including public school systems, or with an accredited, degree-granting institution of higher education, as defined in section 1201(a) of the Higher Education Act of 1965. The exception also applies to those former Senior Employees elected to a State or local government office.

The second prohibition bars former Senior Employees from representing, or assisting in representing, any person before the Government, or in any proceedings involving the Government, in any particular matter involving specific parties and which was actually pending under the former employee's official responsibility in his last year of Government service. This prohibition lasts for two years.

For violation of these prohibitions, the Act imposes criminal penalties including fines of up to $10,000 or imprisonment of up to two years or both (18 U.S.C. 207 (a), (b), (c)). But, the Act also contemplates that many conflict of interest cases will not be egregious enough to merit criminal prosecution.

As a result, the Act provides that the former employee's agency may take appropriate disciplinary action when the prohibitions are violated (18 U.S.C. 207(j)). Disciplinary action could include barring the former employee from doing business with the agency for up to five years.

Amendment to § 73.735-1207: Restrictions—conflicts-of-interest statutes:

These regulations establish the procedures that the Department will use in enforcing prohibitions under the Act that apply to post employment conflicts of interest. More specifically, they provide—

- Preliminary notification—under the Act whenever the Secretary or the Secretary's designee has reason to believe that a former Department employee has violated the prohibitions in the Act, a disciplinary proceeding may be instituted but not without first providing a written preliminary notice.
- Conferences—a former Department employee may confer with the Secretary's designee concerning allegations of misconduct regardless of whether a disciplinary proceeding has already been instituted against him or her.
- Initiation of Disciplinary Proceedings—if after an investigation is made and preliminary notice is given, it is determined that there is reasonable cause to believe that a former employee has violated any prohibitions in the Act, a copy of formal written charges of the violation is served upon the former employee.
- Hearing—after a former employee receives the notice of charges made, he or she may request a hearing.
- Appeal—after a written decision is made by the Secretary, the former employee has fifteen (15) days in which to appeal the decision.

Exception to Rulemaking Requirements

It is the policy of the Department to allow time for interested parties to participate in the rulemaking process. However, these regulations are excepted from requirements for the publication of proposed rules under 5 U.S.C. 553 (a)(2) and 553(b)(A).

List of Subjects in 34 CFR Part 73

Conflict of interest, Government employees, Standards of conduct, Post employment conflicts of interest, Former Federal employees.

Dated: May 12, 1983.

T. H. Bell,

Secretary of Education.

(Catalog of Federal Domestic Assistance number not applicable)

The Secretary amends Subpart L of Part 73, Subtitle A of Title 34 as follows:

PART 73—STANDARDS OF CONDUCT

Subpart L—Special Provisions Relating to Special Government Employees and Consultants

1. In § 73.735-1207, paragraph (c) is amended by inserting "(1)" following "18 U.S.C. 207", and by adding subparagraphs (2) through (8) to read as follows:

§ 73.735-1207 Restrictions—Conflict-of-interest statutes.

* * * * *

(c) * * *

(2) *Scope.* The Secretary establishes the procedures that will govern the discipline of a former employee of the Department of Education because of his or her involvement in a post employment conflict of interest.

(3) *Definitions.* The following definitions apply to this section—

"Act" means the Ethics in Government Act of 1978.

"Department" means the Department of Education.

"Days" means calendar days.

"Former employee" means any person who had previously worked for the Department whether in a permanent or temporary position, paid or unpaid, e.g., consultants, but does not include an individual who performed services for the Department as an independent contractor under a personal service contract.

"Secretary" means the Secretary of Education.

"Secretary's designee" means the General Counsel of the Department, unless the former employee was a member of the staff of the Office of the General Counsel. In that case, the Secretary designates some other person, not connected with the Office of the General Counsel, but working within the Department, to carry out the duties of the "Secretary's designee."

(4) *Preliminary Notification.* (i) Whenever the Secretary or the Secretary's designee has reason to believe that a former employee of the Department has violated the Act under

VOL
48
ISS
96
MAY
17
1983
UMI

18 U.S.C. 207(a), (b), or (c), the Secretary or the Secretary's designee may institute a disciplinary proceeding against that former employee in accord with these procedures.

(ii) Except in cases of willfulness, or where time, the nature of the proceeding, or the public interest does not permit, a proceeding is not to be instituted under this section until the facts which may warrant such action have been called to the attention of the former employee, in writing, in a preliminary notice, and he or she has been accorded the opportunity to provide, either personally, at a conference, or in writing, his or her position on the matter.

(iii)(A) If the Secretary's designee determines that a former employee has violated the Act under 18 U.S.C. 207(a), (b), or (c), and that a preliminary notice would be appropriate, the Secretary's designee sends, by certified mail return receipt requested, a preliminary notice within ten (10) days of such determination.

(B) If a former employee wishes to provide a statement or arrange for a conference, he or she is to do so within ten (10) days of receipt of the preliminary notice.

(C) If the Secretary's designee receives no answer to the preliminary notice within twenty (20) days of the date it was sent, the Secretary's designee institutes disciplinary proceedings against the former employee in accord with these procedures.

(5) *Conferences.* (i) The Secretary's designee may confer with a former employee of the Department concerning allegations of misconduct regardless of whether a disciplinary proceeding has already been instituted against him or her.

(ii) The former employee is to be permitted to have his or her attorney, or other representative of his or her choosing, present during the conference.

(iii) If such conference results in a stipulation in connection with a proceeding in which the former employee is the respondent, the stipulation may be entered in the record at the instance of either party to the proceeding.

(iv) A former employee, in order to avoid the institution of a disciplinary proceeding, may offer his or her consent to any appropriate disciplinary action suggested during the course of the conference.

(v) A former employee against whom a disciplinary proceeding has already been commenced may consent to any appropriate disciplinary action authorized by paragraph (c)(8)(v) of this section and suggested during the course of the conference.

(vi) The Secretary's designee may discipline the former employee in accord with the consent offered during the conference within the limits of the Act at 18 U.S.C. 207(j).

(6) *Initiation of disciplinary proceedings.* (i) If the Secretary's designee determines, after investigation and preliminary notice where appropriate, that there is reasonable cause to believe that a former employee of the Department has violated the Act under 18 U.S.C. 207 (a), (b), or (c), the Secretary's designee causes a copy of the formal written charges of the violation(s) to be served upon the former employee, either in person or by registered mail.

(ii) The formal charges must incorporate or be accompanied by an order to the former employee to show cause why disciplinary measures should not be taken against him or her under the Act. The show cause order must be answered within thirty (30) days of receipt of the order. If, five (5) days after expiration of the thirty (30) day period, no answer has been received, the Secretary's designee renders a decision by default against the former employee.

(iii) The order to show cause must include:

(A) A statement of allegations, and the bases thereof, sufficiently detailed to enable the former employee to prepare an adequate defense;

(B) Notification of the right to a hearing if requested within thirty (30) days of receipt of the show cause order;

(C) An explanation of the method by which a hearing may be requested; and

(D) Notice that a decision by default may be rendered against the former employee if he or she fails to submit an answer within thirty (30) days of receipt of the order.

(iv) The Secretary's designee takes appropriate disciplinary action, based on the record, in the case of the former employee who answers the charges but fails to request a hearing within thirty (30) days after receiving the notice and order to show cause.

(7) *Hearing.* (i) When the former employee, after receiving the notice of the charges made against him or her, requests a hearing, the Secretary's designee appoints a presiding official, entitled Examiner, to make an initial decision.

(ii) The Examiner is to be a responsible person who—

(A) Is a member of the Bar of a State or of the District of Columbia;

(B) Is impartial; and

(C) Has not participated in any manner in the decision to initiate the proceedings.

(iii) The Examiner establishes the time, date, and place of the hearing, giving due regard to the former employee's need for adequate time to prepare a defense properly, and to the expeditious resolution of the allegations that may be damaging to the former employee's reputation.

(iv) The hearing must include, but is not limited to, the following rights for both parties:

(A) To represent oneself or to be represented by counsel;

(B) To introduce and to examine witnesses and to submit physical evidence;

(C) To confront and to cross-examine adverse witnesses;

(D) To present oral argument; and

(E) To receive a transcript or recording of the hearing on request.

(v) The Department has the burden of proof in any hearing under this section and establishes the violation based on substantial evidence.

(vi) The Examiner has thirty (30) days after the hearing ends in which to submit a written decision based exclusively upon matters of record in the proceedings. The Examiner sets forth in the decision all findings of fact and conclusions of law relevant to the matters in issue.

(vii) The Examiner causes at least one (1) copy of the written decision to be delivered to the Secretary's designee, and one (1) copy to the former employee, either in person or by registered mail.

(viii) The Examiner is provided administrative and secretarial support by the Deputy Under Secretary for Management.

(8) *Appeal.* (i) Either party has fifteen (15) days from the date of the written decision in which to appeal to the Secretary. The Secretary renders a decision, based solely upon the record of the proceedings, or on that portion of the record cited by the parties in order to limit the issues, within forty-five (45) days of receiving the appeal.

(ii) If the Secretary finds, based on the record, that the respondent former employee has not violated the Act under 18 U.S.C. 207 (a), (b), or (c), the Secretary dismisses the case.

(iii) If the Secretary dismisses the case, the former employee may be entitled to an award of attorney's fees and other fees and expenses incurred during the proceedings under the Equal Access to Justice Act, 5 U.S.C. 504.

(iv) If the Secretary finds, based on the record, that the former employee is in violation of the Act under 18 U.S.C. 207 (a), (b), or (c), the Secretary issues an order prescribing appropriate disciplinary action authorized by paragraph (c)(8)(v) of this section.

(v) Appropriate disciplinary action comports with the requirements of the Act under 18 U.S.C. 207(j). Thus, the Secretary may—

(A) Prohibit the former employee from making, on behalf of any other person (except the United States), any informal or formal appearance before, or, with the intent to influence, any oral or written communication to, the Department on a pending matter of business for a period not to exceed five (5) years, or

(B) Take other appropriate disciplinary action, such as issuance of a formal reprimand, designed to deter unlawful conduct and to encourage officials to exercise a high degree of caution in their subsequent activities as private citizens.

(vi) If a former employee is subjected to appropriate disciplinary action, the Secretary's designee issues a directive to all employees of the Department cautioning them not to engage in conduct in regard to the former employee which would contravene the disciplinary order.

(vii) The directive to all employees of the Department will contain the name of the former employee and a statement of the disciplinary action.

(viii) A former employee who is subject to disciplinary action under this section may, within thirty (30) days of the date of the order, appeal such order to an appropriate United States District Court as guaranteed by the Act under 18 U.S.C. 207(j).

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6376

[CA-7377]

California; Revocation of Stock Driveway Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order revokes a Secretarial Order which withdrew 790.20 acres for use as Stock Driveway. This action will restore the public land to operation of the public land laws generally.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT: Elizabeth Hoefler, California State Office, 916-484-4431.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Secretarial Order dated January 15, 1937, which established Stock Driveway No. 249, California No. 18, is hereby revoked:

San Bernardino Meridian

T. 1 N., R. 3 E.,
Sec. 34, lots 1 to 4, inclusive, S½NW¼, and N½S½.
T. 1 S., R. 3 E.,
Sec. 2, lots 3, 4, SW¼NE¼, S½NW¼, and SE¼;
Sec. 12, NW¼NW¼.

The above described lands aggregate 790.20 acres in San Bernardino County.

2. At 10 a.m. on June 14, 1983, the lands will be open to operation of the public land laws generally, subject to any valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on June 14, 1983, shall be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing.

The lands have been and continue to be open to applications and offers under the mineral leasing laws, and to location under the United States mining laws.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, Room E-2841, Federal Building, 2800 Cottage Way, Sacramento, California 95825.

Garrey E. Carruthers,
Assistant Secretary of the Interior.

43 CFR Public Land Order 6377

[W-58830]

Wyoming; Partial Revocation of Phosphate Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes the Executive Order of July 2, 1910, as it affects 13,470.59 acres withdrawn for phosphate classification. This action will restore 12,550.42 acres to such uses as may be made of national forest lands. A total of 12,610.87 acres will be opened to nonmetalliferous mining. The remaining 859.72 acres will not be opened to surface entry or mining due to overlapping withdrawals and private ownership.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT: W. Scott Gilmer, Wyoming State Office, 307-778-2220, extension 2336.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, and the request of the U.S. Geological Survey, it is ordered as follows:

1. The Executive Order of July 2, 1910, creating Phosphate Reserve No. 4 (Wyoming No. 1), is hereby revoked insofar as it affects the following described lands:

Sixth Principal Meridian, Wyoming

T. 39 N., R. 116 W.,
(Partially Surveyed):
Sec. 3, SE¼NW¼ (west part of lot 4), SW¼NW¼, and SW¼;
Sec. 4, NW¼NE¼, S½NE¼, NW¼, and S½;
Secs. 5 to 9, inclusive;
Sec. 10, W½;
Sec. 14, W½;
Secs. 15 to 22, inclusive;
Sec. 23, W½NW¼;
Sec. 27, lot 5, W½NE¼, NW¼, N½SW¼, and SW¼SW¼;
Secs. 28 to 30, inclusive;
Sec. 31, W½E½, and W½;
Sec. 32, lots 1, 2, N½NE¼, and NE¼NW¼;
Sec. 33, E½W½, and NW¼NW¼;
Sec. 34.

The area described aggregates 13,470.59 acres of land in Tenton County, Wyoming.

2. At 10:00 a.m., on June 14, 1983, all of the lands described in paragraph 1, except the following lands, shall be open to nonmetalliferous mineral location. Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Section 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

T. 39 N., R. 116 W.,
Sec. 3, SE¼NW¼ (west part of lot 4), SW¼NW¼, E½SW¼, and E½SW¼ SW¼;
Sec. 14, HES 188;
Sec. 17, E½SE¼;
Secs. 18 and 19, HES 38;
Sec. 19, N½ of lot 1, NE¼, and E½NW¼ of lot 3, SW¼SE¼SW¼NE¼, W½SW¼ NE¼, NW¼NE¼NW¼, S½NE¼NW¼, E½SE¼NW¼, N½NE¼SW¼, NW¼NE¼SW¼, and NW¼NW¼ SE¼;
Secs. 18, 19, 20, 27, 30, and 31; (that part of the lands included in Forest Service withdrawals, PLO's 1923 and 2726)
Sec. 27, S½SW¼NE¼;
Sec. 34, HES 198.

The area being open to nonmetalliferous mineral location contains approximately 12,610.87 acres in Teton County, Wyoming.

3. At 10:00 a.m., on June 14, 1983, all of the lands described in paragraph 1, except as provided in paragraph 2, and those lands included in Powersite Classification Withdrawal No. 286 in Sections 3, 4, 14, 22, 23, 27, 32 and 34; and lot 2, W½SE¼NW¼ of Section 19, which have been conveyed from United States ownership, shall be opened to such forms of disposition as may by law be made of national forest lands.

All of the lands described in paragraph 1, except as provided in paragraph 2, have been and will continue to be open to applications and offers under the mineral leasing laws and to metalliferous mineral location.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyoming 82001.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

May 9, 1983.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6378

[U-0139388]

Utah; Revocation of Reservoir Site No. 9

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes a Secretarial order which withdrew 3,360 acres for the Otter Creek Reservoir Site. This action will restore 1,720 acres to operation of the public land laws generally, including the mining laws. Approximately, 1,560 acres are privately owned and not subject to disposition under the public land laws. Another 80 acres, owned by the State of Utah with all minerals reserved to the United States, will also be opened to mining. All public and State lands affected by this order have been and will remain open to mineral leasing.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT: Deen Bowden, Utah State Office, 801-524-4245.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Secretarial Order dated April 19, 1962, which created Reservoir Site No. 9 is hereby revoked in its entirety as to the following described lands:

Salt Lake Meridian, Utah

T. 30 S., R. 2 W.,
Sec. 1, SW¼NW¼, NW¼SW¼;
Sec. 2, S½NE¼, SE¼;
Sec. 10, E½NE¼, SE¼;
Sec. 11, N½, SW¼, NW¼SE¼;
Sec. 14, N½NW¼, SW¼NW¼, NW¼SW¼;
Sec. 15, E½, E½NW¼, SW¼;
Sec. 21, E½E½, SW¼SE¼;
Sec. 22, N½NE¼, SW¼NE¼, W½, W½SE¼;
Sec. 27, NW¼NE¼, NW¼, W½SW¼;
Sec. 28, N½, NE¼SW¼, N½SE¼, SE¼SE¼.

The area described aggegates 3,360 acres in Piute County.

2. The public lands listed in this paragraph will be open to operation of the public land laws.

Salt Lake Meridian

T. 30 S., R. 2 W.,
Sec. 1, SW¼NW¼, NW¼SW¼;
Sec. 2, S½NE¼, S½SW¼, SE¼;
Sec. 10, E½NE¼, SE¼;
Sec. 11, N½SW¼, NW¼SE¼;
Sec. 14, N½NW¼, SW¼NW¼, NW¼SW¼;
Sec. 15, E½, E½NW¼, SW¼.

The area described aggregates 1,720 acres in Piute County.

3. The lands described in this paragraph are privately owned and will not be restored to operation of the public land laws.

Salt Lake Meridian

T. 30 S., R. 2 W.,
Sec. 1, SW¼NW¼;
Sec. 2, S½NE¼, SE¼;
Sec. 11, W½NE¼, E½NW¼, SW¼;
Sec. 14, N½NW¼, SW¼SE¼, SE¼SW¼;
Sec. 15, NE¼, N½SE¼, SW¼SE¼, SE¼SW¼;
Sec. 21, SE¼SE¼;
Sec. 22, E½NW¼, SW¼NW¼, W½SW¼;
Sec. 27, W½NW¼;
Sec. 28, NE¼NE¼, S½NE¼, N½SE¼, SE¼SE¼.

The area described aggregates 1,560 acres in Piute County.

4. The lands described in this paragraph are owned by the State of Utah with all minerals reserved to the United States.

T. 30 S., R. 2 W.,
Sec. 28, SE¼NW¼, NE¼SW¼.

The area described aggregates 80 acres in Piute County.

5. At 10 a.m. on June 14, 1983, the public lands, except as provided for in paragraphs three and four, shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on June 14, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

6. At 10 a.m. on June 14, 1983 the lands described in paragraphs two and four shall be open to location for minerals under the mining laws. Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Section 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

The lands described in paragraphs 2 and 4 have been and will remain open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the State Director, Bureau of Land Management, University Club Building, 136 East Temple, Salt Lake City, Utah 84111.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

May 9, 1983.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6379

[I-010828]

Idaho; Partial Revocation of a Stock Driveway Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order partially revokes a public land order as it affects 120 acres of land withdrawn for stock driveway purposes. This action will restore the land to surface entry. It has been and will remain open to mining and mineral leasing.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT: William E. Ireland, Idaho State Office, 208-334-1597.

SUPPLEMENTARY INFORMATION: By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order No. 2634 of March 20, 1962, which withdrew land for use as a livestock driveway is hereby partially revoked insofar as it affects the following described lands:

Boise Meridian, Idaho

[I-01828]

Public Land Order No. 2634

T. 14 S., R. 16 E.,
Sec. 10, N½SW¼, SW¼SW¼.

The area described contains 120 acres of public land in Twin Falls County.

2. At 7:45 a.m. on June 14, 1983, the land described will be open to operation of the public land laws subject to valid existing rights, the provisions of existing withdrawals and classifications, and the requirements of applicable law. All valid applications received at or prior to 7:45 a.m. on June 14, 1983, shall be considered simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. The land has been and will remain open to the mining and mineral leasing laws.

Inquiries concerning the land should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Federal Building Box 042, Boise, Idaho 83724.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

May 9, 1983.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6380

[W-41022]

Wyoming; Partial Revocation of Military Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order will partially revoke a military withdrawal insofar as it affects 226.75 acres at Fort Riley, Kansas. This action will restore 13.90 acres to operation of the public land laws, but not the mining laws. The remaining 212.85 acres are located within a Recreation and Public Purposes lease and, as such, will not be subject to other use or disposition under the public land laws. All lands revoked have been and will remain open to mineral leasing.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT: W. Scott Gilmer, Wyoming State Office, 307-772-2540.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Executive Order of May 5, 1855, which withdrew public lands for the Fort Riley Military Reservation is hereby partially revoked insofar as it affects the following described lands:

Sixth Principal Meridian, Kansas

T. 11 S., R. 5 E.,
A tract of land situated in Sections 22 and 27 described by metes and bounds as follows: Commencing at the triangulation station "Corner", having coordinates N. 273,770.15 E. 2,323,384.55, in the Fort Riley Military Reservation, from which station the first angle point northerly in said boundary bears N. 16°25'25" E., 5463 ft., and the northwest corner of said Section 22 bears approximately N. 39°47' W., 4057 ft., horizontal datum herein being the Kansas State (Lambert) Plane Coordinate System, North Zone; thence S. 70°46'20" W. along said boundary, 1,365 ft.; thence S. 4°06'10" E. along said boundary, 367.28 ft.; thence S. 30°24'10" W. along said boundary, 477.98 ft. to the center of U.S. Highway No. 77, being the point of beginning of the tract herein described; thence S. 3°57'20" W. along the center of said highway, approximately 1,827 ft. to the center of the Republican River; thence N. 50°12'40" W. in a northwesterly direction upstream along the center of said river, being said reservation boundary, approximately 818 ft. to a line which bears S. 30°07'40" W. from the point of beginning; thence N. 30°07'40" E. along said reservation boundary, approximately 1,503 ft. to the point of beginning.
T. 11 S., R. 6 E.,
Tract 38 (Section 34).
T. 12 S., R. 6 E.,
Tract 38 (Sections 3 and 4).

The area described contains 226.75 acres in Geary County, Kansas.

2. At 10 a.m. on June 14, 1983, the lands described in T. 11 S., R. 5 E., shall be open to the operation of the public land laws, subject to valid existing rights, the provisions of existing withdrawals and classifications, and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on June 14, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The above described Tract 38 in Tps. 11 and 12 S., R. 6 E., has been classified under the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869 et seq.). Therefore, the land will not be subject to other use or disposition under the public land laws.

All of the lands described in paragraph one have been and will remain open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, P.O. Box 1828, Cheyenne, Wyoming 82001.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

May 9, 1983.

[OR-20291 (WASH)]

Oregon; Revocation of Stock Driveway Withdrawal No. 268

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes a Secretarial order which withdrew 160.45 acres of public land for use as a stock driveway. The land is included in two powersite classifications, a power project and a reclamation project and will remain closed to surface entry and

VOL 48 ISS 96 MY 17 1983 UMI

mining. It has been and remains open to mineral leasing.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT:
Champ C. Vaughan, Jr., Oregon State Office, 503–231–6905.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Secretarial Order of April 6, 1943, which withdrew the following described public land for stock driveway purposes is hereby revoked in its entirety:

Willamette Meridian

Stock Driveway No. 268

T. 17 N., R. 23 E.,
Sec. 20, lots 4 and 5;
Sec. 28, lots 1, 2, 3, and 4.

The area described contains 160.45 acres in Grant County.

2. The land remains closed to operation of the public land laws including location under the United States mining laws by Power Project No. 2114 of July 22, 1952, Columbia Basin Reclamation Project of June 18, 1947, Powersite Classification No. 349 of June 22, 1944, and Powersite Classification No. 405 of April 4, 1950.

3. The land has been and remains open to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

Garrey E. Carruthers,
Assistant Secretary of the Interior.

43 CFR Public Land Order 6382

[U–13099]

Utah; Partial Revocation of Reclamation Withdrawals

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order partially revokes two Secretarial Reclamation Withdrawal Orders for the Central Utah Project. This action will restore 550 acres to surface entry and mining. The land has been and will remain open to mineral leasing.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT:
Deen Bowden, Utah State Office, 801–524–4245.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. The Secretarial First Form Reclamation Withdrawal Orders of June 11, 1943, and November 14, 1955, for the Vernal Unit, Central Utah Project, are hereby revoked insofar as they affect the following described lands:

Salt Lake Meridian, Utah

T. 3 S., R. 21 E.,
Sec. 24, E½SW¼, NW¼SW¼;
Sec. 25, NW¼NW¼, S½NW¼, SW¼.
T. 4 S., R. 21 E.,
Sec. 3 SW¼NE¼, S½SE¼NW¼, S½N½ SE¼NW¼, NW¼SW¼;
Sec. 4, SW¼SE¼.

The area described aggregates 550 acres in Uintah County.

2. At 10 a.m. on June 14, 1983, the public lands described above shall be open to operation of the public land laws generally, subject to valid existing rights, provisions of existing withdrawals, and requirements of applicable law. All valid applications received at or prior to 10 a.m. on June 14, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The public lands described above will be open to location and entry under the United States mining laws at 10 a.m. on June 14, 1983. Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Section 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

The lands have been open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111.

[C–28611]

Colorado; Powersite Restoration No. 777; Partial Revocation of Powersite Reserve No. 496

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order partially revokes an Executive Order, as amended, as to 27.97 acres of land withdrawn for powersite reserve purposes. This action will remove the withdrawal and permit consummation of the pending Forest Service Exchange. The land will remain closed to surface entry and mining by the exchange application, but remains open to mineral leasing.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT:
Richard D. Tate, Colorado State Office, 303–837–2535.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, and pursuant to the determination of the Federal Energy Regulatory Commission in DA–517–Colorado, dated April 14, 1982, it is ordered as follows:

1. The Executive Order of August 25, 1915, as amended by Secretarial Order of July 19, 1930, which withdrew national forest land for powersite reserve purposes is hereby revoked as to the following described land:

Sixth Principal Meridian

Roosevelt National Forest

Powersite Reserve No. 496

T. 1 S., R. 71 W.,
Sec. 6, lots 38 and 48.

The area described contains 27.97 acres.

2. Effective immediately, the 27.97 acres of land herein described shall be available for disposal under the General Exchange Act of March 20, 1922, 44 Stat. 465, as amended, 16 U.S.C. 485, 486, subject to any valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. The land has been and remains open to mineral leasing but is closed to surface entry and entry under the U.S. Mining Laws by Forest Service Exchange Application C–30117.

Inquiries concerning the land should be addressed to the State Director, Bureau of Land Management, 1037—20th Street, Denver, Colorado 80202.

T. 20 N., R. 30 E.,
Sec. 33, S½;
Sec. 34, S½;
Sec. 35, SW¼, W½SE¼.

The area described contain 5,119.78 acres.

Approximately 4,572 acres are located either in the Pyramid Lake Indian Reservation or the Fallon Indian Reservation. The areas described in T. 18 N., R. 29E., and T. 19 N., R. 28 E., contain 548 acres of public land.

2. At 9:00 a.m. on June 15, 1983, the public lands shall be open to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received from the date of publication to 9:00 on June 15, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The public lands have been and will continue to be open to location and entry under the United States mining laws and to applications and offers under the mineral leasing laws. The remaining lands are within the Pyramid Lake and Fallon Indian reservations and will remain segregated from operation of the public land laws generally, including mining and mineral leasing.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 12000, Reno, Nevada 89520.

Garrey E. Carruthers,
Assistant Secretary of the Interior.

Proposed Rules

Federal Register
Vol. 48, No. 96
Tuesday, May 17, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 337

Unsafe and Unsound Banking Practices

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Proposed rule.

SUMMARY: The FDIC, having determined that it is not unlawful under the Glass-Steagall Act for an insured nonmember bank to establish or acquire a bona fide subsidiary that engages in securities activities nor for an insured nonmember bank to become affiliated with a company engaged in securities activities, proposes to: (1) Define bona fide subsidiary, (2) limit a bank's permissible investment in a securities subsidiary, (3) require notice of intent to invest in such a subsidiary, (4) limit the permissible securities activities of nonmember bank subsidiaries, and (5) place certain other restrictions on loans, extensions of credit, and other transactions between nonmember banks and their subsidiaries or affiliates that engage in securities activities.

DATE: Comments must be received by July 18, 1983.

ADDRESS: Send comments to Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. Comments may be hand delivered to Room 6108 between the hours of 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Pamela E. F. LeCren, Senior Attorney, Legal Division (202–389–4171), Room 4126E, 550 17th Street, NW., Washington, D.C. 20429.

SUPPLEMENTARY INFORMATION: On August 23, 1982, the Board of Directors of the FDIC adopted a policy statement concerning the applicability of the Glass-Steagall Act to securities activities of subsidiaries of insured nonmember banks. The policy statement which was published in the **Federal Register** on September 3, 1982 (47 FR 38984) concluded that, in the opinion of the Board of Directors, the Banking Act of 1933 (popularly known as the Glass-Steagall Act and codified in various provisions of title 12 of the United States Code) does not by its express terms prohibit an insured nonmember bank from establishing an affiliate relationship with or organizing or acquiring a subsidiary corporation that engages in the business of issuing, underwriting, selling or distributing stocks, bonds, debentures, notes, or other securities. Although the policy statement was not designed to address the safety or soundness of such activities, it did state that the FDIC recognized its ongoing responsibility to ensure the safe and sound operation of banks and that, depending on the facts, potential risks can be inherent in a bank subsidiary's involvement in particular securities activities. In keeping with that statement, on September 20, 1982, the FDIC adopted an Advance Notice of Proposed Rulemaking (47 FR 42121; September 24, 1982) designed to solicit comment on the need, if any, for rulemaking with regard to securities activities of subsidiaries of nonmember banks and affiliates of nonmember banks. The notice requested comment on "whether or not it is inherently unsafe or unsound for a bank's subsidiaries to engage in securities or whether there is a need to condition or restrict such activities (on a case-by-case basis or by regulation) even though they may not be inherently unsafe or unsound in all instances."

Comment was specifically directed to the following: (1) Whether it is inherently unsafe or unsound for insured nonmember banks to establish or acquire subsidiaries that will engage in securities activities or for insured nonmember banks to be affiliated with the business engaged in securities activities; (2) whether certain securities activities when engaged in by subsidiaries of insured nonmember banks pose safety and soundness problems whereas others do not; (3) whether, and in what circumstances, securities activities of insured nonmember banks should be considered unsafe or unsound; (4) whether securities activities of subsidiaries present conflicts of interest that warrant restricting the manner in which the bank may deal with its securities subsidiary (or its securities affiliate), or the manner in which common officers or employees may function, etc.; (5) should securities activities be limited to subsidiaries of banks of a certain asset size, banks with a certain composite rating, etc.; (6) should nonmember banks obtain FDIC's prior approval before establishing or acquiring subsidiaries that engage in securities activities (in all cases, in some cases, or not at all); (7) do the potential benefits, if any, that would be available to insured nonmember banks as a result of competing in the securities area through subsidiaries offset potential disadvantages to the bank; and (8) are there any perceived public harms in insured nonmember banks embarking on such activities. Additionally, comment was requested on the propriety of defining the term "bona fide subsidiary" and whether certain listed criteria should be included in that definition.

In conjunction with this proposal, and in addition to carefully considering the comments received in response to the advance notice, the FDIC closely reviewed the purposes of the Glass-Steagall Act. The Glass-Steagall Act was, in many respects, a reaction to the collapse of the banking industry in the 1930's. The legislative history of that statute documents numerous securities related practices prevalent at that time which were felt to pose hazards to the safety and soundness of banks and which were further seen as contributing to, if not causing, the banking collapse. The Supreme Court in *Investment Co. Institute* v. *Camp*, 401 U.S. 617, 630–633 (1971) reviewed and determined to be invalid a regulation by the Comptroller of the Currency permitting national banks to establish and operate "collective investment funds". The Court in doing so discussed the legislative history of the Glass-Steagall Act and articulated the hazards associated with the direct and indirect involvement of banks in securities activities.

The legislative history of the Glass-Steagall Act shows that Congress * * * had in mind and repeatedly focused on the more subtle hazards that arise when a commercial bank goes beyond the business of acting as fiduciary or managing agent and enters the investment banking business either directly or indirectly by establishing an affiliate to hold and sell particular investments. The course places new promotional and other

VOL 48 ISS 96 MY 17 1983 UMI

pressures on the bank which in turn create new temptations. *Camp* at 630.

The temptations identified by the Supreme Court were: (1) The association of the affiliate and the bank in the public's mind could impair public confidence in the bank should the affiliate fare badly; (2) the temptation to shore up the affiliate through bad loans; (3) the temptation to readily make the bank's credit facilities available and make unsound loans to companies in whose stock the affiliate has invested; (4) loss of customer good will if a customer suffers loss after investment in a stock or security associated with a bank affiliate; (5) the promotional interest of investment banking might cause a bank to lend its reputation to the sale of particular stocks and thus risk the undercutting of its reputation; (6) the temptation to make loans for the purpose of acquiring stock or securities sold by the bank's affiliate; (7) the inherent conflict between a bank's promotional interest and its obligation to render impartial investment advice; and (8) the unloading of poor issues by securities affiliates into the trust department of the bank.

The propriety of, and hazards associated with, direct and indirect involvement of banks in securities activities has been the focus of recent legislative proposals, much debate and testimony, and several legal challenges. This proposal is a recognition by the FDIC that at least some of those hazards can and do exist even though, in the FDIC's opinion, a bank's involvement in securities activities is not unsafe or unsound in all instances. This is so especially in view of the highly regulated atmosphere in which the banking and securities industries function today which was not present in 1930. Rather than deny insured nonmember banks the opportunity of acquiring or forming securities subsidiaries because of the presence of some risk, the FDIC is proposing to eliminate or lessen the risks that can be present by placing a number of restrictions on a nonmember bank's indirect involvement in the securities area.

The proposed regulation was prepared with the aid of comments submitted in response to FDIC's Advance Notice of Proposed Rulemaking. Thirty-eight comments were received over the sixty-day comment period which ended on October 25, 1982. The comments were generally favorable to FDIC's position as set forth in the September 3 policy statement. Three comments were received, however, that were of the opinion that FDIC's policy statement is legally incorrect. The comments were about evenly divided on the need for rulemaking. The most prevalent comment from those opposing any rulemaking was that existing supervisory mechanisms (including FDIC's cease-and-desist authority) are sufficient tools to safeguard bank safety in light of existing securities law and regulations. Some commentors rejected rulemaking as premature and recommended that the FDIC strike a wait-and-see attitude. Those who recognized some purpose to be served by a regulation at this point in time generally observed that securities activities by bank subsidiaries (and/or a bank's relationship with a securities affiliate) are not necessarily unsafe or unsound but can present conflicts of interest.

The conflicts of interest were generally identified by the commentors as connected with the lending function of a bank. Suggested ways to deal with the conflict of interests and ensure the safe and sound operation of banks that are affiliated with and/or have subsidiaries that engage in securities activities included: (1) Disclosure, (2) limiting insider dealing, (3) limiting permissible investments in a securities subsidiary, (4) simply requiring that all dealings with the subsidiary or affiliate be on an "arms length basis", (5) establishing capital guidelines for the subsidiary, (6) prohibiting a bank with a securities subsidiary or affiliate from giving investment advice to its customers, (7) restricting bank entry into the securities area by use of composite rating, asset size, etc., (8) prohibiting a bank from establishing or acquiring a subsidiary that underwrites securities, (9) prohibiting a bank from establishing or acquiring a subsidiary that underwrites equity securities, (10) requiring banks to obtain FDIC approval prior to establishing or acquiring a securities subsidiary, and (11) requiring banks to establish written procedures governing the operation of the subsidiary and the bank's relationship thereto. Five commentors opposed any approval requirement as well as the use of asset size or composite rating to limit entry.

On the issue of defining "bona fide subsidiary" only four of those commenting felt a definition was inappropriate. Seven commentors felt that the bank's subsidiary should be able to use the bank's facilities in order to reduce the cost of operation. All those addressing a capital requirement and the need for separate corporate formalities were in favor of both. Five commentors felt that the bank and the subsidiary should be able to use the same or similar names and the same management. Three commentors suggested that the FDIC adopt the standard corporate law test in determining whether a corporation is a separate entity similar names and the same management. Three commentors suggested that the FDIC adopt the standard corporate law test in determining whether a corporation is a separate entity or an alter ego of another corporation.

After due consideration, the FDIC has determined to propose a regulation the basic features of which are: (1) Notice of intent to invest in a securities subsidiary; (2) no prior approval requirement; (3) no formalized restrictions on bank entry based on asset size or composite rating; (4) a prohibition on a nonmember bank establishing or acquiring a subsidiary that underwrites securities unless the underwriting activity is on a "best efforts" basis, is restricted to top rated debt securities, or is the underwriting of a money market fund type mutual fund; (5) a twenty percent of capital ceiling on a bank's investment in one or more securities subsidiaries; (6) a limit on the amount of loans or extensions of credit that a bank may make to its securities subsidiary or affiliate; (7) a prohibition on loans for the purpose of acquiring securities underwritten or distributed by the bank's subsidiary or affiliate or the acceptance of such securities as collateral on a loan or extension of credit; (8) prohibiting loans or extensions of credit to companies whose securities are underwritten by the bank's subsidiary or affiliate unless the securities are highly rated; (9) prohibiting the purchase by the bank's trust department in its sole discretion of securities distributed, underwritten or issued by the bank's subsidiary or affiliate; and (10) prohibiting the transaction of business through the bank's trust department with the bank's securities subsidiary or affiliate unless those transactions are comparable to transactions with an unaffiliated securities company. Additionally, the proposed regulation contains a definition of bona fide subsidiary which requires that, in order for the subsidiary to be considered bona fide, the subsidiary be adequately capitalized; its operations be physically separate from that of the bank; separate records and corporate formalities be observed; separate employees be maintained; and that the subsidiary function independently from, and not be identified with the bank. Further

explanation of the provisions of the proposed regulation follow.

1. Bona Fide Subsidiary

The proposed definition of bona fide subsidiary includes elements typically used by courts in determining whether or not an entity is the alter ego of another corporation. In defining bona fide subsidiary as it has, the FDIC is not necessarily indicating that any association between a bank and its securities subsidiary in the public mind could harm the reputation of the bank. The definition is designed rather to ensure the separateness of the subsidiary and the bank inasmuch as the bank is prohibited by the Glass-Steagall Act from engaging in many securities activities that would otherwise be permissible to a nonbanking corporation. If the subsidiary is not sufficiently distinct from the parent bank, the subsidiary may be found to be the alter ego of the bank and the bank held to be engaging in securities activities in violation of the Glass-Steagall Act.

Among the listed criteria contained in the definition is that the operation of the subsidiary be physically separate from that of the bank. The subsidiary's operations need not be conducted in a building other than the one in which the parent bank is located or one not owned or leased by the parent bank so long as it is clear from the location of the subsidiary's offices, and access thereto, that the subsidiary's operation is distinct from that of the bank. Just how physically separate the operations are will play a role in determining whether or not the subsidiary conducts business separately from, and is not identified with, the banking business of the parent bank. Separate employees, observance of separate corporate formalities, and maintenance of separate records also play a role in that determination.

The FDIC is presently of the opinion that the subsidiary should have a different name from the bank in order for the subsidiary's business not to be identified with the banking operations of its parent. A different name is not only relevant in determining whether the subsidiary will be considered an alter ego of the bank, it is seen by the FDIC as important in preventing public confusion as to the insured status of investments placed with the subsidiary. Insured nonmember banks should note that if the subsidiary conducts only activities that the bank could itself conduct, the need for the subsidiary not to be identified with the bank is reduced. The FDIC would still, however, require that there be sufficient differentiation between the bank and its subsidiary in advertisements, promotions, etc. so as to avoid any public misconception as to the insured status of any accounts or other investments held by the subsidiary. Comment is specifically requested as to whether or not the proposed regulation should expressly reflect the above or whether a different name than the parent bank is not necessary in order for the securities activities of the subsidiary not to be identified with the bank.

As articulated by the courts, the presence of adequate capital is one of the most important factors in the inquiry as to the bona fide status of a separate corporation. Adequate capital is also very important from a safety and soundness point of view as the parent bank is less likely to be harmed if the subsidiary has adequate capital and thus can itself absorb losses as well as liabilities arising from the securities operations. The FDIC has not proposed a definition of adequate capital inasmuch as the adequacy of any particular subsidiary's capital can vary from a safety and soundness point of view. The FDIC would, of course, expect that the bank's subsidiary will comply with any applicable capital requirements imposed by the Securities and Exchange Commission ("SEC") or imposed under State law. This is merely a starting point, however, and the FDIC reserves the right to determine that the subsidiary's activities and/or the parent bank's condition warrant that the subsidiary be capitalized over and above any such requirement. It is FDIC's intention to make such an assessment during the "notice" period (see subparagraph d of the proposal) and to inform the bank whether in FDIC's opinion the capital position of the subsidiary is adequate. It is FDIC's belief that such a flexible approach will better serve FDIC's supervisory interest of ensuring the safety and soundness of insured nonmember banks.

2. Underwriting

The proposal is designed, in part, to limit a bank's indirect exposure to the risks associated with the underwriting of securities. Subparagraph b(1)(i) of the proposal prohibits a bank from establishing or acquiring a subsidiary that underwrites securities unless the subsidiary's underwriting activities in which the bank itself cannot lawfully engage meet one of three alternative requirements: (1) The subsidiary's underwriting activities are on a "best efforts" basis; (2) the subsidiary's underwriting activities are confined to underwriting of top rated debt securities, or (3) the subsidiary underwrites shares in mutual funds that invest solely in investments traditionally associated with money market funds.

"Best efforts" underwriting within the meaning of this proposal is an underwriting wherein the underwriter agrees only to use best efforts to sell an issue but does not agree to purchase any unsold securities for its own account. Inasmuch as the subsidiary will not be at risk in underwriting a security (be it debt or equity, rated or unrated) if the underwriting is on a "best efforts" basis, the possibility of any adverse impact to the parent bank arising from the "best efforts" underwriting of its subsidiary is lessened, if not removed. Furthermore, the conflicts of interest as articulated by the Supreme Court in *ICI* v. *Camp* are also minimized especially when the lending restrictions contained elsewhere in this proposal are taken into consideration.

If a bank subsidiary chooses to engage in firm commitment or any other non-"best efforts" underwriting, the proposal limits the underwriting to top rated debt obligations. Equity securities may not be underwritten on other than a "best efforts" basis. Equity securities as a class pose more risk to an underwriter than do debt securities. It is because of the relative safety of debt obligations, coupled with the fact that many insured nonmember banks are themselves familiar with the underwriting of debt obligations, that the FDIC opted to distinguish between debt and equity securities and prohibit nonmember banks from establishing or acquiring a subsidiary that underwrites the latter. No similar restriction on the affiliation of nonmember banks with securities companies that underwrite equity securities is being proposed. There would appear to be less of a possibility that losses suffered by the bank's parent or sister affiliate due to the underwriting of equity securities will have adverse impact on the bank. This is so especially if the parent's ability to move funds out of the bank is limited. One of the purposes of the restrictions imposed by this proposal on insured nonmember banks when lending to securities affiliates is to limit the parent's ability to do so.

The proposal alternatively permits the establishment or acquisition of a subsidiary that underwrites mutual funds if the fund's investments are exclusively limited to the types of investments associated with money market funds, *i.e.*, bank certificates of deposit, bankers' acceptances, United States government obligations, obligations of the United States government agencies, etc. Mutual funds that are more speculative in nature, *i.e.*,

VOL 48 ISS 96 MY 17 1983 UMI

whose value per share tend to fluctuate more due to the nature of the investments (commodities, futures contracts, oil leases, equity securities) may not be underwritten other than on a "best efforts" basis. The distinction is being drawn as to money market fund type mutual funds under the proposal as it is FDIC's belief that such funds tend to be more stable. The underwriting of such funds by insured nonmember bank subsidiaries should therefore pose less risk to insured nonmember banks.

The proposal represents a compromise from among a number of alternatives which included prohibiting securities underwriting altogether or limiting underwriting solely to "best efforts". The proposal as structured permits insured nonmember bank subsidiaries some flexibility in their securities activities and yet offers more protection to the parent bank than would, for example, a totally open-ended approach. The FDIC is specifically interested in receiving comments on whether an insured nonmember bank's ability to establish or acquire a securities underwriting subsidiary should be limited in the fashion described above, should be limited in some other manner, should be prohibited entirely, or does not need to be restricted so long as the subsidiary is bona fide.

3. Filing of Notice

The written notice requirement is designed to apprise the FDIC of a bank's intent to establish or acquire a subsidiary that engages in any securities activity including acting as an adviser to an investment company. Notice is to be filed with the regional office for the region in which the bank is located. Notice of intent is not limited to underwriting activities as from a supervisory standpoint, the FDIC has an interest in being aware of any indirect securities activities of an insured nonmember bank. The proposal further requires that, in addition to the 60-day advance notice, a bank file written notice with the regional office within 10 days after the acquisition is consummated or the subsidiary commences operation, whichever is first. This will provide FDIC with information as to which insured nonmember banks pursued to completion their planned acquisition or establishment of a securities subsidiary.

The proposal does not specify the content of the written notice of intent. By not specifying the content of the notice, the FDIC is permitting a bank to satisfy the notice requirement in any way it finds most convenient. For example, if the subsidiary will be registered with the SEC, a copy of the SEC filing may simply be forwarded to the appropriate FDIC regional office.

It is the FDIC's intent to use the notice as a point of reference and for the regional office to contact the bank seeking further information if the bank's condition or other facts warrant a closer review. The proposal thus requires that the notice be received in the regional office at least 60 days prior to the acquisition or commencement of operation, whichever is first. The 60-day notice period can be waived at the FDIC's discretion where such period is impracticable, *i.e.*, where the acquisition is the result of a purchase and assumption transaction or an emergency merger. The notice requirement is not an approval process although the FDIC would not be precluded from intervening in the intended acquisition or establishment of the subsidiary if such intervention was warranted (for example, if the subsidiary would not appear to meet the requirements for a bona fide subsidiary).

The proposal does not require written notice when a bank becomes affiliated with a securities company. For the most part, affiliation with a securities company will arise out of a change in bank control or come to FDIC's attention when a bank seeks deposit insurance. As the FDIC will become aware of the affiliation in both instances prior to consummation, there is no need to create an additional notice requirement under this proposal.

4. Lending Restrictions

Paragraph (e) contains several restrictions designed to prevent the abuse of a bank's credit facilities. Such abuse can arise in several ways, such as, the making of loans in order to maintain or create a market for securities underwritten or distributed by the bank's subsidiary or affiliate. The proposal thus prohibits both the acceptance of securities distributed or underwritten by the bank's subsidiary or affiliate as collateral on loans and the making of loans for the purpose of acquiring such securities. It also seeks to address the temptation for a bank to make unsound loans to companies whose securities are underwritten or distributed by the bank subsidiary or affiliate in an effort to improve the condition of the company and the marketability of the securities that are underwritten or distributed. The FDIC considered prohibiting all loans to companies whose securities are underwritten by a bank's subsidiary or affiliate but rejected that approach as overly broad. Instead the proposal prohibits a bank from lending to any such company unless the securities are rated (prior to the loan) by a nationally recognized rating service and the rating is in the top four rating categories. As there would seem to be less of an incentive to make questionable loans for the purpose of maintaining or creating a market for a company's securities where the securities are highly rated and thus marketable, there would appear to be little or no reason to prohibit lending to such companies.

It should be noted that paragraph (e)(3) of the proposal will have the effect of prohibiting loans to mutual funds whose shares are underwritten or distributed by a bank's subsidiary or affiliate. This is so because a mutual fund is a "company" within the meaning of that term under the proposal and the shares of a mutual fund are not rated. Loans to mutual funds that are money market funds are separately treated under paragraph (e)(4). Consideration was given to exempting mutual funds and money market funds from the reach of paragraphs (e)(3) and (e)(4). Such an exemption was rejected inasmuch as such a fund's credit needs are most likely to arise when the fund is having liquidity problems. (If interest rates should rise sharply and large numbers of shareholders, especially institutional investors, redeem their shares to put their money directly into higher-paying investments, a fund could face a liquidity crisis.) A bank may be tempted a make an unsound loan to the fund in order to prevent the fund from suffering a loss by selling portfolio assets at a depressed price to meet liquidity needs.

Money market funds have been targeted within the lending prohibition despite the relative stability of most money market funds. At present there is no self-regulatory organization such as the National Association of Securities Dealers ("NASD") to watchdog money market funds, *i.e.*, inspect funds to make sure their books are in order and that they are obeying SEC rules barring such things as management self-dealing and misleading advertising. The SEC has urged that such a group be formed so that bookkeeping problems and fraudulent conduct can be detected early, avoiding loss to investors. Presently the SEC has only 45 fund inspectors to cope with 1,830 mutual funds (including money market funds) registered with the SEC as of September 1982. As of that date those funds had total assets of $315 billion which represented a growth from $74 billion in assets over a seven-year period. (As of February 1983 the total asset figure for mutual funds dropped to $291.1 billion.)

Paragraph (e)(7), rather than (e) (3) or (4), is controlling when considering loans or extensions of credit to a mutual fund or a money market fund that is a subsidiary of an insured nonmember bank as that term is defined in the proposal. The bank is permitted to lend to the fund but the loans are subject to the restrictions found in section 23A of the Federal Reserve Act (12 U.S.C. 371c). The difference in treatment is being proposed as it was initially felt that the protections supplied by the restrictions of section 23A when a bank lends to a related mutual fund, that are not present when lending to an unrelated fund, may warrant permitting loans to the former under paragraph (e)(7) while not permitting loans to the latter under subparagraphs (e) (3) or (4). Comment is specifically directed to whether unrelated and related funds alike should be treated the same and given the benefit of being able to obtain loans if the provisions of section 23A are observed.

Paragraphs (b)(1)(i), (e)(3), and (e)(4) of the proposal when read together provide that a bank may lend to all companies whose debt securities are underwritten by the bank's subsidiary and all companies whose non-debt securities are rated and are underwritten by the bank's subsidiary. (The non-debt securities must be underwritten on a "best efforts" basis in order to comply with (b)(1)(i)). Paragraphs (e)(3) and (e)(4) also expressly cover indirect as well as direct loans. The prohibition thus covers a situation where an individual obtains a loan and transfers the proceeds to a comply whose securities are underwritten or distributed by the bank's subsidiary or affiliate, *i.e.*, the language of paragraphs (e)(3) and (e)(4) is designed to prevent evasion of the prohibition simply by running the loan through another party.

Paragraph (e)(7) subjects extensions of credit to the bank's subsidiary to the same loan ceiling that would be applicable under section 23A of the Federal Reserve Act if the subsidiary were an affiliate for the purposes of that statute. Loans or extensions of credit to the bank's affiliate as that term is defined herein are already covered by the language of section 23A and thus placing affiliates under the restrictions of paragraph (e)(7) does not establish any additional requirements. Paragraph (e)(8) covers loans or extensions of credit to an investment company advised by a bank's subsidiary and places those extensions of credit under the same restrictions that would have been applicable under section 23A of the Federal Reserve Act had that subsidiary been an affiliate within the meaning of section 23A. Risks can be present even where a bank subsidiary merely advises an investment company. Section 23A covers extensions of credit to investment companies advised by bank affiliates thus placing affiliates under the restrictions of subparagraph (e)(8) does not establish any additional requirements. The FDIC is interested in receiving public comment on whether or not the proposed regulation should prohibit the making of any extension of credit to the bank's securities subsidiary or a subsidiary that acts as an investment adviser to an investment company rather than permitting such extensions of credit if they comply with section 23A.

5. Trust Department Restrictions

One of the safety and soundness problems associated with securities activities of subsidiaries and affiliates of nonmember banks is dumping of poor securities into the bank's trust department. The proposal seeks to eliminate that risk by prohibiting an insured nonmember bank from purchasing, in its sole discretion as fiduciary or co-fiduciary on behalf of any trust account, securities distributed, underwritten or issued by the bank's subsidiary or affiliate. Purchasing of securities distributed or underwritten by an investment company advised by the bank's subsidiary or affiliate is also prohibited. The proposal would permit either purchase if the bank is directed to do so. This provision of the proposal, as well as the provision which requires all trust department transactions with the bank's subsidiary or affiliate to be comparable to transactions with unrelated securities companies (see paragraph (e)(2)), merely restates the common law obligation of a fiduciary to refrain from any self-dealing in the administration of a trust account. As stated in FDIC's manual of examination policies with respect to trust department examinations, "It is a general axiom that a bank has a definite moral responsibility, as well as legal, not to deal with itself in the administration of a fiduciary account." The manual also goes on to state that a bank should not invest fiduciary funds in its own obligations or stock unless court order, local law or the trust instrument authorizes the purchase and retention of the obligation or stock or specific authority for the investment is obtained from all interested parties.

The proposal does not prohibit a bank's trust department from using the broker/dealer services of its subsidiary or affiliate to execute transactions on behalf of its fiduciary accounts. The trust department's decision to utilize the related broker/dealer must fully comport, however, with the bank's fiduciary obligation to its trust department customers. The transactions must also be excuted on comparable terms with transactions with unrelated securities companies so that the trust department will not derive any additional benefits from the administration of the trust above and beyond its normal fee for trust account administration. This requirement will also insulate the bank from the possibility that its securties affiliate will drain off profits from the bank by setting a higher than normal fee for executing transactions.

6. Investment Ceiling

Paragraph (b)(2) limits the permissible investment by an insured nonmember bank in one or more securities subsidiaries to twenty percent of the bank's equity capital as defined by FDIC's statement on capital adequacy. The limit is subject, however, to any lesser investment cap established by State law. The proposed investment limitation is designed to create a buffer between the operation of a subsidiary (or subsidiaries) and the bank in addition to the buffer provided by the subsidiary's capital position. Although the FDIC will have the authority under section 10 of the FDI Act (12 U.S.C. 1820) to examine the affairs of the securities subsidiaries or affiliate as shall be necessary to disclose fully the relations between the bank and those subsidiaries or affiliates and the effect of such relations upon the bank, the FDIC does not actually "supervise" the subsidiaries or affiliates. It will be difficult for the FDIC to accurately judge the adequacy of a subsidiary's capital from a safety and soundness point of view on a daily basis, especially as factual circumstances may vary. The FDIC therefore has determined that the possibility of adverse impact to the bank should the subsidiary fail or suffer extreme loss is appropriately limited by placing a limit on the bank's investment in the subsidiary. Twenty percent of equity capital was chosen rather than a smaller figure in order to accommodate smaller banks that would otherwise be precluded from investing, *i.e.*, the resulting investment ceiling would have been unrealistically small thus precluding any investment by smaller insured nonmember banks. An insured nonmember bank's investment in a securities subsidiary will not be counted toward the bank's regulatory capital.

VOL 48 ISS 96 MY 17 1983 UMI

7. Affiliation with a Securities Company

Paragraph (c) of the proposal is merely a restatement of FDIC's interpretive ruling that the Glass-Steagall Act does not reach the affiliation of an insured nonmember bank with a securities company. The lawfulness of such an affiliation is subject, however, to any other applicable Federal or State law. For example, the Change of Bank Control Act (12 U.S.C. 1817) or the Bank Holding Company Act (12 U.S.C. 1841) may be applicable where a securities company seeks to acquire control of an insured nonmember bank. Insured nonmember banks are reminded that the securities activities of any affiliate should be separate and distinct from the bank in order to avoid any public confusion and/or a finding that the bank is itself engaging in securities activities not permitted to it under the Glass-Steagall Act.

8. Construction of the Terms "Underwrite", "Distribute", and "Security"

It is not FDIC's intent by this proposal to prevent a bank subsidiary from engaging in any securities underwriting activity that an insured nonmember bank may itself lawfully pursue. Those activities are set forth in 12 U.S.C. 24(7th) and include underwriting obligations of the United States, general obligations of any state or political subdivision thereof, and numerous other obligations specifically named therein. Insured nonmember banks should keep in mind while assessing this proposal that the terms "underwrite" and "distribute", and the phrase "stocks, bonds, debentures, notes, or other securities" are to be construed consistently with the securities laws and regulations except where the context requires otherwise. A securities subsidiary or affiliate of an insured nonmember bank while engaged in the conduct of securities activity will be subject to the securities laws and regulations, the oversight of the Securities and Exchange Commission, and oversight by entities such as the NASD. The above terms are therefore to have the meaning proscribed by the securities laws and regulations when used in connection with the subsidiary or affiliate. References in the proposal to these terms as used in conjunction with an insured nonmember bank (see paragraphs (b)(1) (i), (f) and (g)) are to be construed consistently with the Glass-Steagall Act.

The courts have repeatedly stated that the prohibitions of the Glass-Steagall Act are to be defined with reference to the purposes of that statute and that the definitions of the terms used therein (*i.e.*, distribute, underwrite, security) do not necessarily coincide with the definition of the same terms as used in the securities laws. (See *A. G. Becker Inc.* v. *Board of Governors of the Federal Reserve System*, 693 F.2d 136 (D.C. Cir. 1982); *National Association of Securities Dealers Inc.* v. *Securities and Exchange Commission*, 420 F.2d 83 (D.C. Cir. 1969); *New York Stock Exchange Inc.* v. *Smith*, 404 F. Supp. 1091 (D.D.C. 1975), *vacated on other grounds*, 562 F.2d 736 (D.C. Cir. 1977)). The FDIC therefore intends to utilize a functional analysis in determining whether a particular activity constitutes underwriting or distributing of a security under the Glass-Steagall Act. In this regard, insured nonmember banks should note that the United States District Court for the District of Columbia recently concluded that short term commercial paper does not constitute a security for the purposes of the Glass-Steagall Act and therefore it is not unlawful for a bank to act as an agent in the sale thereof if the guidelines established by the Federal Reserve Board are observed. (See *A. G. Becker, supra.*) The FDIC will follow this and any interpretive ruling by the courts concerning the scope of the Glass-Steagall Act in applying this regulation.

9. Definition of "Affiliate", "Subsidiary", and "Extension of Credit"

The proposal defines the term "affiliate" to mean a company that directly or indirectly controls an insured nonmember bank and any company that is in turn controlled by such a company. "Control" is defined as the power to directly or indirectly vote 25 percent of a bank or company's stock; the ability to control the election of a majority of a bank's or company's directors or trustees; or the ability to exercise a controlling influence over the management and policies of a bank or company. At a minimum the proposal would reach a bank's parent company, a company that controls 25% or more of the bank's stock, and companies controlled by either of the above, *i.e.*, sister affiliates.

The term "subsidiary" is defined to mean a company controlled by a bank. As "company" is defined to include corporations other than banks, partnerships, business trusts, associations, joint ventures, pool syndicates or other similar business organizations, a mutual fund (*i.e.*, a business trust) can be a subsidiary of a bank and a securities company operated by several banks in a co-operative effort can be considered a subsidiary of each of the banks. The term "extension of credit" has the same meaning as found in Federal Reserve Board Regulation O (12 CFR 215.3) which concerns insider transactions.

10. Public Hearing on Proposed Regulation

The Board of Directors has concluded that it is appropriate for the FDIC to hold a public hearing at which it will accept both oral and written comments regarding this proposal. A formal notice of agency hearing setting forth the date, time, and other particulars regarding that hearing appears elsewhere in today's **Federal Register.**

11. Regulatory Flexibility Analysis/ Paperwork Reduction Act

In accordance with FDIC's policy statement entitled "Development and Review of FDIC Rules and Regulations" and the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the FDIC conducted an analysis of the impact of the proposed regulation. The result of that analysis follows:

The proposed regulation would prohibit a nonmember bank from establishing or acquiring a subsidiary that underwrites equity securities. As equity underwriting is, on the average, more profitable than underwriting of debt securities, limiting the bank subsidiary's ability to underwrite securities to underwriting of debt obligations reduces the subsidiary's potential income. The increased income associated with equity underwriting is, however, directly a measure of the increased difficulty of a successful underwriting, *i.e.*, debt issues are easier to move and thus the underwriter tends to receive less compensation. Underwriting profits range from less than 1% to 5% of issue size for debt, with the average being less than 1%, and from 4% to 10% for common stock with preferred stock being less profitable than common stock. Profits will depend upon issue size (economies of scale reduce the percentage as issue size increases) and risk (credit rating of issuer). Although a bank subsidiary could underwrite equity securities on a "best efforts" basis, the underwriting profits from any best efforts undertaking would be lessened (even in the case of an equity issue), as a "best efforts" underwriting involves less risk to the underwriter and thus generates a smaller fee.

Setting the investment cap in the subsidiary at 20% of equity capital will enable even relatively small nonmember banks to indirectly compete in the securities market through a subsidiary. These new entrants into the market can be expected to: (1) Provide increased access to capital markets where access may have been previously limited (*i.e.*, the smaller issuer generally finds it difficult to attract underwriters), and (2) lower issuer cost of tapping into the capital markets. As the number of entrants increases, competitive bid offerings are likely to increase. Competitive bid offerings tend to be less expensive than negotiated offerings.

Additionally, the increase of entrants into the securities underwriting market would tend to increase the liquidity of any new issue thus permitting underwriters (bank related and non-bank related alike) to distribute securities at higher prices as the securities will be more attractive. The resulting increased activity in the secondary market raises the possibility than an investor can unload a security quickly at a reasonable price. This should mean that an investor is willing to pay more for the security.

We expect most nonmember banks to form subsidiaries that engage in some form of discount brokerage rather than underwriting. The presence of new entrants into this market can be expected to further decrease costs to investors (both users of discount brokerage and full service brokerage) as fee and service competition increases. A bank subsidiary would not appear to have any advantage in this area. Increased advertising that should result from the increased competition should raise investor awareness and participation with an overall benefit to the economy as more money moves into the capital markets.

Under the proposal a bank subsidiary will be able to underwrite or distribute shares in a money market fund and/or act as an investment adviser to a money market fund. If the new money market funds that are established as a result of the proposal invest in bank certificates of deposits or other bank-issued money instruments such as repurchase agreements, we can expect an increase in the amount of loanable funds. Additionally, it can be expected that the presence of new bank-related money market funds would reduce the existing flow of funds to the money center banks. A bank subsidiary-sponsored money market fund should not have any advantages over a non-bank related money market fund as competition between the two types of funds should be on the basis of competitive pricing and services. Banks cannot lawfully utilize their market power to obtain any advantages for their underwriting subsidiary as banks are subject to the anti-tying provisions of the Bank Holding Company Act Amendments of 1970 (12 U.S.C. 1972).

Although some observers have alleged that banks, if permitted to underwrite municipal revenue bonds or other securities, would have an unfair tax advantage as banks may deduct interest paid on funds borrowed to hold tax-exempt securities, that advantage would not extend to the bank's subsidiary. Nor can the bank subsidiary use the liberal loan loss calculation available to banks that will itself be phased out for banks by 1988. Nor do we find that banks will have lower capital costs in establishing or acquiring securities subsidiaries. Although in the past banks have had lower average interest costs due to Regulation Q ceilings, those ceilings will be completely phased out on or before January 1, 1984 and the advent of the new money market rate account authorized by the Garn-St Germain Depository Institutions Act increases the cost of funds available to banks. Even then the relevant cost consideration is not the average cost of funds but the marginal cost. Commercial banks that enter new product markets by establishing or acquiring subsidiaries must borrow at market rates and therefore do not have a lower marginal cost of funds. Last, the charge that a bank subsidiary would have an unfair advantage in attracting investors because of the bank's name recognition and the bank's knowledge of existing customers' is not valid due to the restrictions in the proposal.

There might be overall cost to the economy if the advent of bank securities subsidiaries can be expected to jeopardize the viability of the nation's banking institutions. That does not appear to be the case, however, and certainly is not the case when the structure of the proposal is taken into consideration. For example, the proposal is structured so as to insulate the bank from the activities of the subsidiary as well as any financial repercussions generated by losses on the part of the subsidiary. The subsidiary will only be able to underwrite top rated debt securities; underwrite on a "best efforts" basis which does not put its capital at risk; or underwrite shares in money market funds which are recognized as relatively sound investments. There is, thus, less of a likelihood that the subsidiary will incur losses that it could not safely absorb. The bank is further insulated as it will not be able to make purpose loans; prop up companies whose securities are underwritten by the bank's subsidiary or affiliate; make excessive loans to its securities subsidiary or affiliate; invest an excessive amount of capital in the subsidairy; or move poor issues into the bank's trust department.

The notice requirements contained in this proposal do not constitute "collections of information" for purposes of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.) and therefore are not subject to the Office of Management and Budget ("OMB") clearance provisions of that Act. This is because the notice requirements fall within the exception to the definition of "information" set out in § 1320.7(k)(1) of the recently issued OMB regulations implementing the "collection of information clearance" provisions of the Act (5 CFR 1320). It is recognized, however, that the notice requirements do place an affirmative obligation on a bank to notify the FDIC of its intended action and to confirm whether or not the subsidiary was acquired or established. Costs associated with these notices would appear to be minimal. The proposed regulation does not specify the content of the written notices or require the bank to provide any specific information. Inasmuch as the bank subsidiary will likely be filing with the Securities and Exchange Commission, no additional paperwork burdens of any kind should be created.

The proposal may duplicate, overlap, or conflict with existing Federal laws and regulations governing the establishment and operation of securities companies; Section 23A of the Federal Reserve Act (12 U.S.C. 371c); the Bank Service Corporation Act, as amended by the Garn-St Germain Depository Institutions Act (12 U.S.C. 1861 *et seq.*); and the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*).

List of Subjects in 12 CFR Part 337

Banks, banking, Securities, State nonmember banks.

In consideration of the foregoing, the FDIC hereby proposes to amend Part 337 of title 12 of the Code of Federal Regulations as follows:

PART 337—UNSAFE AND UNSOUND BANKING PRACTICES

1. The authority citation for Part 337 is as follows:

Authority: Sec. 6, 64 Stat. 876, 12 U.S.C. 1816; sec. 9, 64 Stat. 881–882, 12 U.S.C. 1819; sec. 18(j)(2); 92 Stat. 3664, 12 U.S.C. 1828(j)(2). sec. 422, 96 Stat. 1469, (Pub. L. 97–320).

2. It is proposed that Part 337 be amended by adding the following new § 337.4:

VOL
48
ISS
96
MY
17
1983
UMI

§ 337.4 Securities activities of subsidiaries of insured nonmember banks: Bank transactions with affiliated securities companies.

(a) Definitions: for the purposes of this section,

(1) "Affiliate" shall mean any company that directly or indirectly, through one or more intermediaries, controls an insured nonmember bank and shall include any company controlled by a company that controls an insured nonmember bank.

(2) "Bona fide subsidiary" means a subsidiary of an insured nonmember bank that at a minimum: (i) Is adequately capitalized; (ii) is physically separate in its operations from the operation of the bank; (iii) maintains separate accounting and other corporate records; (iv) observes separate formalities such as separate board of directors meetings; (v) maintains separate employees who are compensated by the subsidiary; and (vi) conducts business separately from, functions independently of, and is not identified with, the banking business of the insured nonmember bank.

(3) "Company" shall mean any corporation (other than a bank), any partnership, business trust, association, joint venture, pool syndicate, or other similar business organization.

(4) "Control" shall mean the power to directly or indirectly vote 25 per centum or more of the voting stock of a bank or company; the ability to control in any manner the election of a majority of a bank's or company's directors or trustees; or the ability to exercise a controlling influence over the management and policies of a bank or company.

(5) "Extension of credit" shall mean the making or renewal of any loan, a grant of a line of credit, or an extending of credit in any manner whatsoever and includes, but is not limited to:

(i) A purchase whether or not under repurchase agreement, of securities, other assets, or obligations;

(ii) An advance by means of an overdraft, cash item, or otherwise;

(iii) Issuance of a standby letter of credit (or other similar arrangement regardless of name or description);

(iv) An acquisition by discount, purchase, exchange, or otherwise of any note draft, bill of exchange, or other evidence of indebtedness upon which a natural person or company may be liable as maker, drawer, endorser, guarantor, or surety;

(v) A discount of promissory notes, bills of exchange, conditional sales contracts, or similar paper, whether with or without recourse;

(vi) An increase of an existing indebtedness, but not if the additional funds are advanced by the bank for its own protection for: (A) Accrued interest or (B) taxes, insurance, or other expenses incidental to the existing indebtedness;

(vii) And any other transaction as a result of which a natural person or company becomes obligated to pay money (or its equivalent) to a bank, whether the obligation arises directly or indirectly, or because of an endorsement on an obligation or otherwise, or by any means whatsoever.

(6) "Investment quality debt security" shall mean a marketable obligation in the form of a bond, note, or debenture the investment characteristics of which are not predominantly speculative and shall include obligations rated by a nationally recognized rating service that have a rating in the top four rating categories.

(7) "Subsidiary" shall mean any company controlled by an insured nonmember bank and any company a majority of whose directors or trustees are directors or trustees of an insured nonmember bank.

(b) Investment in securities subsidiaries.

(1) An insured nonmember bank may not establish or acquire a subsidiary that engages in the sale, distribution, or underwriting of stocks, bonds, debentures, notes or other securities; conducts any activities for which the subsidiary is required to register with the Securities and Exchange Commission as a broker/dealer; acts as an investment adviser to any investment company; or engages in any other securities activity unless:

(i) The subsidiary's underwriting activities that would not be authorized to the bank under section 16 of the Glass-Steagall Act (12 U.S.C. 24(7th)) as made applicable to insured nonmember banks by section 21 of the Glass-Steagall Act (12 U.S.C. 378) are, and thereafter continue to be: (A) On a "best efforts" basis, or (B) are limited to, and thereafter continue to be limited to, underwriting of investment quality debt securities or underwriting of mutual funds whose investments are exclusively limited to obligations of the United States or United States government agencies, repurchase agreements involving such obligations, bank certificates of deposit, banker's acceptances and other bank money instruments, short-term corporate debt instruments, and other similar investments normally associated with a money market fund.

(ii) The subsidiary is, and thereafter continues to be, a bond fide subsidiary.

(2) An insured nonmember bank's investment in a subsidiary under (b)(1) shall not exceed in the aggregate 20 per centum of the bank's equity capital as defined in FDIC's statement on capital adequacy (46 FR 62694) unless prior approval for a greater investment is obtained from the FDIC.

(c) *Affiliation with securities company.* Subject to any other applicable federal or state law, an insured nonmember bank is not prohibited by anything in this section from becoming affiliated with any company that directly or indirectly engages in the sale, distribution, or underwriting of stocks, bonds, debentures, notes, or other securities; acts as an investment adviser to any investment company; conducts any activity for which the affiliate must register with the Securities and Exchange Commission as a broker/dealer; or engages in any other securities activity so long as the securities business of the affiliate is kept separate and distinct from the banking business of the insured nonmember bank.

(d) *Filing of Notice.* Every insured nonmember bank that intends to acquire or establish a subsidiary that: (1) Engages in the sale, distribution, or underwriting of stocks, bonds, debentures, notes, or other securities; (2) acts as an investment adviser to any investment company that sells, distributes, or underwrites any such security; (3) conducts any activity for which the subsidiary is required to register with the Securities and Exchange Commission as a broker/dealer; or (4) engages in any other securities activity, shall notify the regional director of the region in which the bank is located. Notice shall be in writing and must be received in the regional office at least 60 days prior to consummation of the acquisition or commencement of the operation of the subsidiary, whichever is earlier. The bank shall also notify the regional office in writing within 10 days after the consummation of the acquisition or commencement of the operation of, the subsidiary, whichever is earlier. The 60-day notice requirement may be waived, in FDIC's discretion, where such notice would be impracticable such as in the case of a purchase and assumption transaction or an emergency merger.

(e) *Restrictions.* An insured nonmember bank which has a subsidiary or affiliate that engages in the sale, distribution, or underwriting of stocks, bonds, debentures, notes, or other securities; or acts as an investment adviser to any investment company that sells, distributes, or underwrites any such security shall not:

(1) Purchase *in its sole discretion* as fiduciary or co-fiduciary any security currently being distributed, underwritten, or issued by such subsidiary or affiliate or purchase *in its sole discretion* as fiduciary or co-fiduciary any security currently being distributed, underwritten or issued by any investment company advised by such subsidiary or affiliate;

(2) Transact business through its trust department with such subsidiary or affiliate unless the transactions are comparable to transactions with an unaffiliated securities company or a securities company that is not a subsidiary of the bank;

(3) Extend credit or make any loan directly or indirectly to any company the stocks, bonds, debentures, notes, or other securities of which are currently being underwritten or distributed by a subsidiary or affiliate of the bank unless the company's stocks, bonds, debentures, notes, or other securities that are underwritten or distributed are rated by a nationally recognized rating service and fall within the top four rated categories;

(4) Extend credit or make any loan directly or indirectly to any money market fund whose shares are currently being distributed or underwritten by a subsidiary or affiliate of the bank;

(5) Make loans for the purpose of acquiring: (i) Any stock, bond, debenture, note, or other security currently being distributed or underwritten by such subsidiary or affiliate; (ii) any stock, bond, debenture, note, or other security currently being distributed or underwritten by an investment company advised by such subsidiary or affiliate; or (iii) stock in, or shares of, such subsidiary or affiliate;

(6) Accept as collateral on a loan: (i) Stock or shares of any company whose stock or shares are currently being distributed or underwritten by such subsidiary or affiliate or (ii) stock or shares of any company which are currently being distributed or underwritten by an investment company advised by such subsidiary or affiliate;

(7) Make any loan or extension of credit to a subsidiary or affiliate of the bank that: (i) Distributes or underwrites stocks, bonds, debentures, notes, or other securities, or (ii) advises any investment company that distributes or underwrites stocks, bonds, debentures, notes, or other securities, if such loans or extensions of credit would be in excess of the limit as to amount, and not in accordance with the restrictions as to collateral, etc., imposed on "covered transactions" established by section 23A of the Federal Reserve Act (12 U.S.C. 371c);

(8) Make any loan or extension of credit to any investment company for which the bank's subsidiary or affiliate acts as an investment adviser if the loan or extension of credit would be in excess of the limit as to amount, and not in accordance with the restrictions as to collateral, etc., imposed on "covered transactions" established by section 23A of the Federal Reserve Act (12 U.S.C. 371c).

(f) Nothing in this section prohibits an insured nonmember bank from establishing or acquiring a subsidiary that sells, distributes, or underwrites stocks, bonds, debentures, notes, or other securities or engages in any other securities activity, if those activities would be permitted to an insured nonmember bank by sections 16 and 21 of the Glass-Steagall Act (12 U.S.C. 24(7th) and 378).

(g) Nothing in this section authorizes an insured nonmember bank to directly engage in any securities activity not authorized to it under section 16 and 21 of the Glass-Steagall Act (12 U.S.C. 24(7th) and 378).

By Order of the Board of Directors, this 9th day of May 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

12 CFR Part 337

Unsafe and Unsound Banking Practices; Public Hearing

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Notice of public hearing on proposed amendments to agency regulations.

SUMMARY: This notice sets forth the time and other particulars concerning a public hearing on proposed amendments to Part 337 (Unsafe and Unsound Banking Practices) of FDIC's regulations. The proposed amendments to Part 337 are set out as a notice of proposed rulemaking elsewhere in today's **Federal Register**.

DATE: Friday, June 17, 1983, 9:00 a.m.–5:00 p.m.

ADDRESS: Written requests to participate should be sent to Hoyle L. Robinson, Executive Secretary, Room 6108, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. or hand delivered to the same address between the hours of 9:00 a.m. and 5:00 p.m. Monday through Friday.

Hearing location: FDIC's Board of Directors Room, 6th Floor, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. 20429.

FOR FURTHER INFORMATION CONTACT: Pamela E. F. LeCren, Senior Attorney, Legal Division, (202–389–4171), or Alan J. Kaplan, Deputy Executive Secretary, (202–389–4446), Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. 20429.

SUPPLEMENTARY INFORMATION: On May 9, 1983 the Board of Directors of the FDIC authorized for publication for comment a proposed amendment to Part 337 of FDIC's regulations (12 CFR Part 337). The proposal, which is set forth as a notice of proposed rulemaking elsewhere in today's **Federal Register**, deals with securities activities of subsidiaries of insured nonmember banks and transactions by insured nonmember banks with their affiliated securities companies. The basic features of the proposal are: (1) Notice of intent to invest in a securities subsidiary; (2) no prior approval requirement; (3) no formalized restrictions on bank entry based on asset size or composite rating; (4) a prohibition on a nonmember bank establishing or acquiring a subsidiary that underwrites securities unless the underwriting activity is on a "best efforts" basis, is restricted to top rated debt securities, or is the underwriting of a money market fund type mutual fund; (5) a twenty percent of capital ceiling on a bank's investment in one or more securities subsidiaries; (6) a limit on the amount of loans or extensions of credit that a bank may make to its securities subsidiary or affiliates; (7) a prohibition on loans for the purpose of acquiring securities underwritten or distributed by the bank's subsidiary or affiliate or the acceptance of such securities as collateral on a loan or extension of credit; (8) a prohibition on loans or extensions of credit to companies whos securities are underwritten by the bank's subsidiary or affiliate unless the securities are highly rated; (9) prohibiting the purchase by the bank's trust department in its sole discretion of securities distributed, underwritten or issued by the bank's subsidiary or affiliate; (10) prohibiting the transaction of business through the bank's trust department with the banks; securities subsidiary or affiliate unless those transactions are comparable to transactions with an unaffiliated

VOL 48 ISS 96 MY 17 1983 UMI

securities company; and (11) a requirement that the bank subsidiary be a "bona fide" subsidiary. The proposed regulation contains a definition of bona fide subsidiary which requires that, in order for the subsidiary to be considered bona fide, the subsidiary be adequately capitalized; its operations be physically separate from that of the bank; separate records and corporate formalities be observed; separate employees be maintained; and that the subsidiary function independently from, and not be identified with the banking business of the bank.

The Board, at its May 9, 1983 meeting, voted to hold a one-day public hearing at which representatives of the Board of Directors (the Director of the Division of Bank Supervision and the General Counsel) would receive the oral comments of any interested person with regard to the proposed amendment to Part 337. Persons wishing to participate in the hearing should send a written request to participate to Hoyle L. Robinson, Executive Secretary, Room 6108, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. 20429. Requests may be hand delivered between the hours of 9:00 a.m. and 5:00 p.m. Monday through Friday. All requests will be time and date stamped upon receipt and oral presentations will be scheduled in the order in which requests are received. Participants will be limited to a fifteen minute oral presentation and will be advised in writing of the time scheduled for their presentation. All requests to participate must be received no later than the close of business Friday, June 10. This requirement is necessary so that: (1) The hearing officers may adjust their schedules accordingly, (2) alternative arrangements for the hearing may be made if more persons are expected to attend than the Board of Directors room will accommodate, and (3) sufficient time is available to acknowledge receipt of the notices and inform participants of scheduling.

Copies of the notice of proposed rulemaking can be obtained upon request from FDIC's Office of Public Information, (202–389–4221), Room 6061, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. 20429.

By Order of the Board of Directors this 9th day of May 1983.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 821–0047]

Michigan Association of Osteopathic Physicians & Surgeons, Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition,this consent agreement, accepted subject to final Commission approval, would require a Michigan professional association, among other things, to cease inhibiting competition by restricting or advising member physicians against the truthful advertising of fees and services, and by declaring such activities unethical. The association would be required to timely repeal any provision of its Code of Ethics and policy statements which are inconsistent with the prohibitions contained in the order, and publish revised versions of these documents. The order would also require the Association to mail to all present and future members a letter notifying them of the consent agreement and its provisions, and send to each of its component and affiliate societies a copy of the order.

DATE: Comments must be received on or before July 18, 1983.

ADDRESS: Comments should be directed to: FTC/S, Office of the Secretary, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Barbara E. Arnold, Acting Director, 4R, Cleveland Regional Office, Federal Trade Commission, Suite 500-Mall Bldg., 118 St. Clair Ave., Cleveland, OH 44114. (216) 522–4207.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Advertising, Physicians.

In the Matter of Michigan Association of Osteopathic Physicians & Surgeons, Inc., a corporation; File No. 821 0047; agreement containing consent order to cease and desist.

The Federal Trade Commission having initiated an investigation of certain acts and practices of the Michigan Association of Osteopathic Physicians & Surgeons, Inc., a non-profit corporation, and it now appearing that the Michigan Association of Osteopathic Physicians & Surgeons, Inc. ("MAOP&S") is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between MAOP&S, by its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

1. MAOP&S is a non-profit corporation organized, existing, and doing business under and by virtue of the laws of the State of Michigan, with its mailing address at 33100 Freedom Road, Farmington, Michigan 48024.

2. MAOP&S admits all the jurisdictional facts set forth in the draft of the complaint here attached.

3. MAOP&S waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify MAOP&S, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by MAOP&S that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of Section 2.34 of the Commission's Rules, the Commission may, without further notice to MAOP&S: (1) Issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to MAOP&S' address as stated in this agreement shall constitute service. MAOP&S waives any right it may have to any manner of service. The complaint attached hereto, and the Commission's Opinion in *American Medical Association*, 94 F.T.C. 701 (1980) (hereinafter, "AMA"), as modified by the opinion of the U.S. Court of Appeals for the Second Circuit, 638 F.2d 443 (1980), may be used in construing the terms of the order. No agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. MAOP&S has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. MAOP&S further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I. For purposes of this Order, the following definitions shall apply:

A. " MAOP&S" means respondent Michigan Association of Osteopathic Physicians & Surgeons, Inc., its component and affiliate societies, its delegates, trustees, councils, committees, Bureau of Ethics, officers, representatives, agents, employees, successors, and assigns.

B. "Physician" means any individual duly licensed to engage in the practice of osteopathic medicine and/or surgery.

II. *It is ordered* that MAOP&S shall cease and desist from, directly or indirectly or through any corporate or other device:

A. Restricting, regulating, impeding, declaring unethical, interfering with, or advising against the advertising or publishing by any person of the prices, terms, or conditions of sale of physicians' services, or of information about physicians' services, facilities, or equipment which are offered for sale or made available by physicians or by any organization with which physicians are affiliated;

B. Restricting, regulating, impeding, declaring unethical, interfering with, or advising against the solicitation, through advertising or by any other means, of patients, patronage, or contracts to supply physicians' services, by any physician or by any organization with which physicians are affiliated; or

C. Inducing, urging, encouraging, or assisting any physician or any medical association, group of physicians, hospital, insurance carrier, telephone company, or any other non-governmental organization, to take any of the actions prohibited by this part of the Order.

Nothing contained in this part of the Order shall prohibit MAOP&S from formulating, adopting, disseminating to its members, and enforcing reasonable ethical guidelines governing the conduct of its members with respect to representations, including unsubstantiated representations, that MAOP&S reasonably believes would be false or deceptive within the meaning of Section 5 of the Federal Trade Commission Act, or with respect to uninvited, in-person solicitation of actual or potential patients who, because of their particular circumstances, are vulnerable to undue influence.

III. *It is further ordered that MAOP&S shall:*

A. For a period of three (3) years after this Order becomes final, provide each new member of MAOP&S with a copy of the letter in the form shown in Appendix A at the time the member is accepted into membership;

B. Within sixty (60) days after this Order becomes final, send by first-class mail to each of its present members a copy of the letter in the form shown in Appendix B;

C. Within sixty (60) days after this Order becomes final, send by first-class mail to the Michigan Bell Telephone Company supervisor in charge of professional advertising a copy of the letter in the form shown in Appendix C;

D. Within sixty (60) days after this Order becomes final, publish a copy of the Order, with such prominence as feature articles are regularly published, in the *Michigan Osteopathic Journal* and the MAOP&S *Newsletter*, or in any successor publications;

E. Within sixty (60) days after this Order becomes final, send by first-class mail to each of its component and affiliate societies, a copy of this Order;

F. Within ninety (90) days after this Order becomes final, remove from its *Code of Ethics*, its *Interpretations of the Code of Ethics*, and any other existing policy statements or guidelines of MAOP&S, any provision, interpretation, or policy statement which is inconsistent with this Order; and, within one hundred twenty (120) days after this Order becomes final, publish in the *Michigan Osteopathic Journal* and the MAOP&S *Newsletter* or in any successor publications, the revised versions of such documents, statements, or guidelines;

G. Within one hundred twenty (120) days after this Order becomes final, file a written report with the Federal Trade Commission setting forth in detail the manner and form in which MAOP&S has complied with this Order;

H. For a period of five (5) years after this Order becomes final, maintain records adequate to describe in detail any action taken in connection with the activities covered by Part II and Part III.A of this Order, including, but not limited to, any advice or interpretations rendered with respect to advertising or solicitation involving any of its members;

I. One year after this Order becomes final, and annually thereafter for a period of two (2) years, file a written report with the Federal Trade Commission setting forth in detail any action taken in connection with the activities covered by Part II and Part III.A of this Order, including, but not limited to, any advice or interpretations rendered with respect to advertising or solicitation involving any of MAOP&S' members; and

J. Include in all compliance reports, as required by Part III. G and I, such information and documentation as may be required to show compliance with this Order.

IV. *It is further ordered* that MAOP&S shall notify the Commission at least thirty (30) days prior to any proposed change in the respondent, such as dissolution, assignment, or sale resulting in the emergence of a successor corporation or association, or any other change in the corporation or association which may affect compliance obligations arising out of this Order.

VOL 48 ISS 96 MY 17 1983 UMI

Appendix A

Dear Doctor: This letter is to inform you of recent developments concerning the issue of physician advertising. In March, 1982, the Supreme court upheld the Federal Trade Commission's Order prohibiting the American Medical Association from restricting physician advertising and solicitation.

In recognition of this precedent, the Michigan Association of Osteopathic Physicians & Surgeons, Inc. entered into a Consent Agreement with the Federal Trade Commission on November 1, 1982. This Agreement was entered into as a result of an investigation initiated by the FTC concerning MAOP&S' alleged restraint of competition by means of its ethical restrictions on physician advertising and solicitation. The Agreement is for settlement purposes only and does not constitute an admission by MAOP&S that the law has been violated.

In accordance with this Consent Agreement, MAOP&S revised its Code of Ethics in October, 1982. Under the revised code, MAOP&S does not restrict its members from advertising or soliciting patients. MAOP&S does not restrict its members from advertising the prices, terms, or conditions of sale of physicians' services, facilities, or equipment. MAOP&S may, however, enforce reasonable guidelines governing advertising or solicitation which MAOP&S reasonably believes to be false or deceptive.

As a new member, you have received a copy of the revised Code of Ethics.

Thank you for your cooperation.

Sincerely,

President.

Appendix B

Dear Doctor: This letter is to inform you of recent developments concerning the issue of physician advertising. The Supreme Court recently affirmed the Federal Trade Commission's Order, as modified by the U.S. Court of Appeals for the Second Circuit, prohibiting the American Medical Association from restricting physician advertising and solicitation.

In recognition of this precedent, the Michigan Association of Osteopathic Physicians & Surgeons, Inc. is in the process of revising its Code of Ethics.

Under the new code, MAOP&S will not restrict its members from advertising or soliciting patients. MAOP&S will not restrict its members from advertising the prices, terms, or conditions of sale of physicians' services, or information about physicians' services, facilities, or equipment. MAOP&S may, however, enforce reasonable guidelines governing advertising or solicitation which MAOP&S reasonably believes to be false or deceptive.

The revisions to the Code of Ethics will appear in the *Michigan Osteopathic Journal* and in MAOP&S *Newsletter*.

Thank you for your cooperation.

Sincerely,

President.

Appendix C

Dear ———: This letter is to inform you of recent developments concerning the issue of physician advertising. The Supreme Court recently affirmed the Federal Trade Commission's Order, as modified by the U.S. Court of Appeals for the Second Circuit, prohibiting the American Medical Association from restricting physician advertising and solicitation.

In recognition of this precedent, the Michigan Association of Osteopathic Physicians & Surgeons, Inc. is in the process of revising its Code of Ethics.

Under the new code, MAOP&S will not restrict its members from advertising or soliciting patients. MAOP&S will not restrict its members from advertising the prices, terms, or conditions of sale of physicians' services, or information about physicians' services, facilities, or equipment. MAOP&S may, however, enforce reasonable guidelines governing advertising or solicitation which MAOP&S reasonably believes to be false or deceptive.

Accordingly, MAOP&S will not seek to restrict truthful advertising in the telephone book. In particular, MAOP&S will not seek to restrict such things as the size, color, or format of such advertising.

Thank you for your cooperation.

Sincerely,

Chairman, Department of Judiciary and Ethics.

File No. 821 0047, Michigan Association of Osteopathic Physicians & Surgeons, Inc.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an Agreement to a Proposed Consent Order from the Michigan Association of Osteopathic Physicians & Surgeons, Inc. ("MAOP&S").

The proposed Consent Order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the Agreement and the comments received and will decide whether it should withdraw from the Agreement or make final the Agreement's proposed Order.

The Complaint. A Complaint prepared for issuance by the Commission along with the proposed Order alleges that:

- MAOP&S has acted as a combination of at least some of its members, or has conspired with at least some of its members, to restrain competition among osteopathic physicians and surgeons in Michigan by prohibiting its members from truthfully advertising their fees and services to the public and from otherwise soliciting patients' business, and by coercing individual members into abandoning their efforts to truthfully advertise and to otherwise solicit patients' business. These activities are alleged to be unfair methods of competition or unfair or deceptive acts or practices in violation of Section 5 of the Federal Trade Commission Act.
- MAOP&S is a professional association formed to represent the interests of osteopathic physicians and surgeons who practice in Michigan. MAOP&S has approximately 2,147 members, constituting a substantial majority of the osteopathic physicians and surgeons in Michigan.
- Members of MAOP&S are engaged in the business of providing medical health care services for a fee, and that, except to the extent that competition has been restrained as alleged in the Complaint, MAOP&S members have been, and are now, in competition among themselves and with other physicians and surgeons.
- In furtherance of the combination or conspiracy, MAOP&S adopted and implemented written and unwritten codes of ethics that prohibit efforts by its members to truthfully advertise their services in the Yellow Pages or in other media, or to otherwise distribute to the public truthful information, including, among other things: their fees, whether they accept Medicare assignment of benefits or credit cards, their professional training and experience, their business hours and office locations, and their knowledge of languages other than English.
- MAOP&S allegedly published statements by some of its officials advising members that advertising was unethical. The Complaint further asserts that MAOP&S sent letters to members who truthfully advertise or otherwise solicit their patients' business that tended to discourage such advertising, and that MAOP&S summoned members to certain of its meetings at which disciplinary actions were threatened against these members in order to compel them to cease truthfully advertising or otherwise soliciting patients' business.
- MAOP&S attempted to prohibit sellers of advertising space from accepting truthful advertisement from MAOP&S members.
- As a result of MAOP&S' actions, its members have agreed not to, and do not, advertise their services or otherwise solicit patients' business, and its members have been coerced into abandoning efforts to advertise or otherwise solicit patients' business.
- Truthful advertising and solicitation enable physicians to compete on the basis of price, quality, and convenience and enable individual patients to choose among osteopathic physicians and surgeons on the basis of price, quality, or convenience. Consequently, it is alleged, competition among osteopathic physicians and surgeons for patients has been frustrated and eliminated, and consumers have been deprived of truthful information about osteopathic physicians' and surgeons' fees and services and the benefits of competition among such physicians and surgeons.

The Proposed Consent Order. The proposed Order would:

- Prohibit MAOP&S from restricting, regulating, impeding, declaring unethical, interfering with, or advising against the advertising of osteopathic physicians' and surgeons' services or the solicitation by osteopathic physicians and surgeons of patients, patronage, or contracts.
- Prohibit MAOP&S from inducing, urging, encouraging, or assisting others to take any of the actions prohibited by the Order.
- Permit MAOP&S to formulate, adopt and disseminate to its members, and enforce reasonable ethical guidelines governing advertising which would be false or deceptive within the meaning of Section 5 of the Federal Trade Commission Act, or with respect to uninvited, in-person solicitation of patients who, because of their particular circumstances, are vulnerable to undue influence.
- Require that MAOP&S remove from its Code of Ethics, policy statements, and guidelines any provision or statement which is inconsistent with the prohibitions of the Order and thereafter publish revised versions of such documents, statements, or guidelines.
- Require that MAOP&S, within sixty (60) days after the Order becomes final, publish a copy of the Order in its official publications and send letters, by first-class mail, to each current MAOP&S member and to the Michigan Bell Telephone Company.
- Require that, for a period of three (3) years, MAOP&S provide each of its new members with a letter notifying them of the Consent Agreement and stating that osteopathic physicians and surgeons may advertise so long as it is not false or deceptive. To ensure compliance with the proposed Order, MAOP&S would be required, within one hundred twenty (120) days after the Order becomes final, to file a written report with the Commission setting forth the manner and form of its compliance with the Order. MAOP&S would also be required, for a period of five (5) years, to maintain records and, annually for a period of three (3) years, to file a written report with the Commission setting forth any action taken in connection with the activities covered by the Order.

The purpose of this analysis is to facilitate public comment on the proposed Order, and it is not intended to constitute an official interpretation of the Agreement and proposed Order or to modify in any way their terms.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 180

Regulations Pertaining to Arbitration

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rules.

SUMMARY: The Commodity Futures Trading Commission ("Commission") is proposing to amend its rules governing the content of pre-dispute arbitration agreements entered into by futures commission merchants ("FCMs"), floor brokers or associated persons and their customers. The proposed amendments would extend the requirements of such rule to introducing brokers ("IBs"), commodity pool operators ("CPOs") and commodity trading advisors ("CTAs") and make clear that the rules apply to the associated persons ("APs") of such registrants.[1]

DATE: Comments must be received by July 18, 1983.

ADDRESS: Comments on the proposal should be sent to: Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581.

FOR FURTHER INFORMATION CONTACT: Robert H. Rosenfeld, Attorney, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581 (202) 254–8955.

SUPPLEMENTARY INFORMATION:

I. Background

As part of its recently adopted final rules concerning arbitration procedures provided by contract markets and registered futures associations,[2] the Commission amended § 180.3 governing the content and effect of pre-dispute arbitration agreements entered into by FCMs, floor brokers or APs and their customers. During the period within which such rules were being considered by the Commission, Congess amended sections 4d, 4f and 4k of the Commodity Exchange Act to require, *inter alia*, the registration of introducing brokers and three new categories of associated persons: APs of introducing brokers, commodity pool operators and commodity trading advisors.[3] The Commission recently proposed rules to implement those new registration requirements by, *inter alia*, amending the definition of "associated person" in rule 1.3(aa) to include APs of introducing brokers, commodity pool operators and commodity trading advisors.[4] The adoption by the Commission of such proposed rules could result in the following anomolous interpretation of § 180.3(b): APs of IBs, CPOs and CTAs would apparently be required to comply with the requirements of § 180.3(b) in the event they enter a pre-dispute arbitration agreement with their customers,[5] while their principles would not be under any direct requirement to comply with that rule.[6]

In order to avoid such an inconsistent application of its rules, and to assure that all classes of registrants who deal with the trading public will be subject to the same constraints concerning the use of pre-dispute arbitration agreements, the Commission is proposing to amend § 180.3(b) to include pre-dispute arbitration agreements entered into by introducing brokers, commodity pool operators and commodity trading advisors and to make clear that the rule applies to APs of such registrants.

The Commission notes that the proposed amendment would not require that any registrant enter into a pre-dispute arbitration agreement. The proposed amendment would require, however, that in the event a registrant enters into such an agreement, the agreement comply with the provisions of §180.(3). Moreover, the Commission believes that as a practical matter, adoption of the proposed amendment would not result in any unreasonable regulatory burdens since, as previously noted, most members of the registrant class are already indirectly subject to the requirements of Part 180 of the Commission's regulations by virtue of their membership in the National Futures Association ("NFA").[7] Finally, the Commission notes that it cannot make any regulatory distinctions among the above-mentioned registrant classes that would warrant their exclusion from the requirements of rule 180.3(b) The Commission welcomes comments, however, from any affected party which

[1] The Commission previously requested comment on whether introducing brokers and their associated persons similarly should be subject to these requirements of Part 180 of the Commission's regulation. *See* 48 FR 14933, 14935 (April 6, 1983).

[2] The Commission is publishing notice of these final rules under separate heading in today's **Federal Register.**

[3] 7 U.S.C. 6d, 6f, 6k, as amended by the Futures Trading Act of 1982, Pub. L. No. 97–444, sections 207, 208 and 212.

[4] *See* 48 FR 14933, 14956 (April 6, 1983).

[5] This result is consistent with the Congressional recognition that such persons essentially function in the same capacity with respect to IBs, CPOs, and CTAs, as persons associated with FCMs. *See* H. Rep. NO. 97–565, Pt. 1, 97th Cong., 2d Sess. 48–49 (1982).

[6] Members of the National Futures Association, however, are required to comply with § 180.3(b) pursuant to § 170.8, which requires that such a futures association's rules concerning arbitration conform to and be consistent with Part 180 of the Commission's regulations. Thus, some of the above new registrants as well as their principles are already indirectly subject to § 180.3(b).

[7] *See* n. 6 above. NFA Bylaw 1101, which prohibits NFA members from doing business with any non-members of NFA, acts as an incentive for FCMs, CPOs, and CTAs to become members. The Commission also understands that NFA intends to submit for Commission consideration an amendment to Bylaw 1101 which would extead the applicability of that Bylaw to IBs. The membership incentive of Bylaw 1101 also would increase in the event the Commission adopts a rule, petitioned for by NFA, requiring all FCMs to become members of a registered futures association. *See* NFA petition for commission rulemaking, 47 FR 53031 (November 24, 1982).

VOL 48 ISS 96 MY 17 1983 UMI

believes it should not be included within the scope of this rule.

II. Regulatory Flexibility

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601 *et seq.*, requires that agencies, in proposing rules, consider the impact of those rules on small business. In this regard, the Commission has already established that neither FCMs nor registered CPOs should be considered to be small entities for purposes of the RFA.* Accordingly, the requirements of the RFA do not apply to those entities. With respect the remaining entities, the Commission believes, as noted above, that the proposed rule would not impose an unreasonable burden upon such parties since most members of the registrant class are already indirectly subject to the requirements of Part 180 of the Commission's regulations by virtue of their membership in NFA. Furthermore, the Commission again notes that the proposal would not require any of the affected parties to offer a pre-dispute arbitration agreement. Accordingly, pursuant to section 3(a) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Chairman certifies that § 180.3(b), as amended, would not have a significant economic impact on a substantial number of small entities. The Commission, however, particularly invites comment from any firm which believes that this proposal would have a significant economic impact on it.*

List of Subjects in 17 CFR Part 180

Arbitration.

In consideration of the foregoing, and pursuant to the authority of the Commodity Exchange Act, and in particular, sections 4d, 4f, 4k, 5a(11) and 8a, thereof, 7 U.S.C. 6d, 6f, 6k, 7a(11) and 12a, as amended by the Futures Trading Act of 1982, Pub. L No. 97–44, 96 Stat. 2294 (1983), the Commission proposes to amend Chapter I of Title 17 of the CFR as follows:

PART 180—ARBITRATION OF OTHER DISPUTE SETTLEMENT PROCEDURES

1. The authority citation for Part 180 is proposed to be revised to read as follows:

Authority: 7 U.S.C. 6c, 6d, 6f, 6k, 7a(11) and 12a.

2. Section 180.3 Part 180 is proposed to be amended by revising the introductory paragraph (b) and paragraphs (b)(1), (3), (4) and (5) as follows:

§ 180.3 Voluntary procedure and compulsory payments.

* * * * *

(b) No futures commission merchant, introducing broker, floor broker, commodity pool operator, commodity trading advisor, or associated person shall enter into any agreement or understanding with a customer in which the customer agrees, prior to the time the claim or grievance arises, to submit such claim or grievance to any settlement procedure except as follows:

(1) Signing the agreement must not be made a condition for the customer to utilize the services offered by the futures commission merchant, introducing broker, commodity pool operator, commodity trading advisor or associated person.

* * * * *

(3) The agreement may not require the customer to waive the right to seek reparations under Section 14 of the Act and Part 12 of these regulations. Accordingly, the customer must be advised in writing that he or she may seek reparations under Section 14 of the Act by an election made within 45 days after the futures commission merchant, introducing broker, floor broker, commodity pool operator, commodity trading advisor or associated person notifies the customer that arbitration will be demanded under the agreement. This notice must be given at the time when such person notifies the customer of an intention to arbitrate. The customer must also be advised that if he or she seeks reparations under Section 14 of the Act and the Commission declines to institute reparation proceedings, the claim or grievance will be subject to the preexisting arbitration agreement and must also be advised that aspects of the claims or grievances that are not subject to the reparations procedure (i.e. do not constitute a violation of the Act or rules thereunder) may be required to be submitted to the arbitration or other dispute settlement procedure set forth in the preexisting arbitration agreement.

(4) The agreement must advise the customer that, at such time as he or she may notify the futures commission merchant, introducing broker, floor broker, commodity pool operator, commodity trading advisor or associated person that he or she intends to submit a claim to arbitration, or at such time as such person notifies the customer of its intent to submit a claim to arbitration, the customer will have the opportunity to elect a qualified forum for conducting the proceeding. Within ten business days after receipt of such notice from the customer, or at the time the futures commission merchant, introducing broker, floor broker, commodity pool operator, commodity trading advisor or associated person so notifies the customer, the futures commission merchant, introducing broker, floor broker, commodity pool operator, commodity trading advisor or associated person must provide the customer with a list of two or more organizations whose procedures qualify them to conduct arbitrations in accordance with the requirements of § 180.2 of this Part, together with a copy of the rules of each forum listed. The list must include: (A) the contract market, if available, upon which the transaction giving rise to the dispute was executed or could have been executed or a registered futures association designated by such contract market; and (B) at least one other organization which will provide the customer with the opportunity to select the location of the arbitration proceeding from among several major cities in diverse geographic regions and which will provide the customer with the choice of a panel or other decision-maker composed of at least one or more persons, of which at least a majority are not members or associated with a member of a contract market or employee thereof, and which are not otherwise associated with a contract market (mixed panel). The customer shall, within forty-five days after receipt of such list, notify the opposing party of the organization selected. A customer's failure to provide such notice shall give the opposing party the right to select an organization from the list.

(5) The agreement must acknowledge that the futures commission merchant, introducing broker, floor broker, commodity pool operator, commodity trading advisor or associated person will pay any incremental fees which may be assessed by a qualified forum for provision of a mixed panel, unless the arbitrators in a particular proceeding determine that the customer has acted in bad faith in initiating or conducting that proceeding.

* * * * *

* See 47 FR 18618 (April 30, 1982).

* Commission rule 180.3 has been assigned OMB Control No. 3038–0022, for purposes of the Paperwork Reduction Act, 44 U.S.C. A copy of this proposal has been submitted to the Director of the Office of Management and Budget. Interested members of the public may obtain a complete copy of the information collection proposals relating to the proposed rules contained herein by contacting Joseph Salazar at (202) 254–9735. Persons wishing to comment on the Paperwork Reduction Act implications of this proposal are asked to send a copy of their comments to Mr. Salazar at the Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C., 20581, and to the OMB Desk Officer for the agency, Robert Veeder, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

Issued in Washington, D.C. on May 12, 1983.

Jane K. Stuckey,

Secretary of the Commission.

21 CFR Part 184

[Docket No. 82N-0393]

Sodium Metasilicate and Sodium Zinc Metasilicate; Proposed GRAS Status

Correction

In FR Doc. 83–10995, beginning on page 18831, in the issue of Tuesday, April 26, 1983, make the following corrections:

1. On page 18831, in the second column, in the fourth full paragraph, in the third line, "(NAS/FRC)" should read "(NAS/NRC)"

2. On page 18833, in § 184.1769a(a), the fourth line from the top of the second column of the page should read "$(Na_2Sio_3 \cdot 9H_2O)$."

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 914

Permanent State Regulatory Program of Indiana

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for the public comment period and for a public hearing on the substantive adequacy of a program amendment submitted by Indiana to satisfy certain conditions imposed by the Secretary of the Interior on the approval of the Indiana State Program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The amendment consists of a set of modifications to Indiana's surface and underground coal mining statute and is intended to satisfy specific parts of three conditions of the Secretary's approval relating to petitions to designate lands unsuitable for mining, award of attorney and expert witness fees, and administrative review of a permit or any final decision of the regulatory authority. The amendment also consists of other changes to the Indiana statute, not related to the conditions of approval, which deal with conflict of interest rules and coal exploration.

This document sets forth the times and locations that the Indiana program and proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment (IN–0325), and information pertinent to the public hearing.

DATE: Written comments relating to Indiana's proposed modification of its program not received on or before 4:00 p.m. on June 16, 1983, will not necessarily be considered in the Secretary's decision on whether the proposed program amendment satisfies the above conditions.

If requested, a public hearing will be held on June 13, 1983, beginning at 10:00 a.m. at the location shown below under **"ADDRESSES."**

ADDRESSES: Written comments should be mailed or hand-delivered to:

Mr. Richard D. McNabb, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204. Telephone: (317) 269–2600.

If a public hearing is held, its location will be at: OSM Indianapolis Field Office, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana. Telephone: (317) 269–2600.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard D. McNabb, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204. Telephone: (317) 269–2600.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

Availability of Copies

Copies of the Indiana program, the proposed amendment, and a listing of any scheduled public meeting and all written comments received in response to this notice will be available for review at the OSM offices and the Office of the State Regulatory Authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays.

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 L Street, NW., Washington, D.C. 20240

Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana

Indiana Department of Natural Resources, 608 State Office Building, Indianapolis, Indiana 46204

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under **"DATES"** or at locations other than Indianapolis, Indiana, will not necessarily be considered and included in the Administrative Record for the final rulemaking.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under **"FOR FURTHER INFORMATION CONTACT"** by the close of business three working days before the date of the hearing. If no one requests to comment at the public hearing, the hearing will not be held.

If only one person requests to comment, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

Filing of a written statement at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment, have been heard.

Public Meeting

Persons wishing to meet the OSM representatives to discuss the proposed amendment may request a meeting at the OSM office listed in **"ADDRESSES"** by contacting the person listed under **"FOR FURTHER INFORMATION CONTACT."**

All such meetings are open to the public and, if possible, notices of meetings will be posted in advance in the Administrative Record. A written

VOL
48
ISS
96
MY
17
1983
UMI

summary of each public meeting will be made a part of the Administrative Record.

II. Background on Conditional Approval

Under 30 CFR 727.13(j), the Secretary may conditionally approve a State permanent regulatory program which contains minor deficiencies where the deficiences are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with the steps to correct the deficiencies, and the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval.

III. Background on the Indiana State Program

Information regarding the general background on the Indiana State Program, including the Secretary's Findings, the disposition of comments and a detailed explanation of the conditions of approval of the Indiana program can be found in the July 26, 1982, **Federal Register** (47 FR 32071–32108).

At the time of the Secretary's conditional approval, Indiana agreed to meet nine minor conditions, many of which contained several parts. Most of the conditions and their parts have been removed through the approval of amendments to the Indiana program. For additional information on the prior removal of conditions, see the December 17, 1982, **Federal Register** at 47 FR 56493, and the March 4, 1983, **Federal Register** at 48 FR 9248.

The remaining conditions on the Indiana program are as follows:

Condition (a)(2) requires Indiana to require the design criteria for stream channel diversions as required by 30 CFR 816.44 and 817.44.

Condition (b)(3) requires Indiana to require that each permit application contain a list of all other licenses and permits needed by the applicant to conduct the proposed surface or underground mining activities indicating all the information required by 30 CFR 782.19.

The deadline for Indiana to address these conditions is July 1, 1983. Both of these conditions have been proposed to be addressed by Indiana modifications (IN–0323) announced in a separate **Federal Register** notice which was published recently.

Condition (g)(1) requires Indiana to amend its statute to require that a petitioner would only have to present evidence which would "tend to establish allegations of fact" in a petition to designate lands as unsuitable for mining in accordance with the provisions of Section 527(c) of SMCRA and in a manner no less effective than the requirements of 30 CFR 764.13(b)(2).

Condition (h)(1) requires Indiana to amend its statute to provide for the award of attorney and expert witness fees in surface mining related common law damage actions in accordance with the provisions of Section 510(f) of SMCRA.

Condition (h)(2) requires Indiana to amend its statute to provide for administrative review of a permit or any final decision of the regulatory authority in accordance with the provisions of Section 514(c) of SMCRA and in a manner no less effective than the requirements of 30 CFR 787.

The deadline for Indiana to address these conditions is September 30, 1983. These three conditions are proposed to be addressed by the Indiana modifications being announced in this notice.

IV. Discussion of the Proposed Amendment

On April 28, 1983, OSM received a set of statutory amendments from the Indiana Department of Natural Resoures intended to meet conditions (g)(1), (h)(1) and (h)(2). See IN–0325. Indiana has proposed changes to its statute at IC 13–4.1–14–2(a) to meet condition (g)(1), added a new Section (i) to IC 13–4.1–11–11 to meet condition (h)(1), and proposed changes to IC 13–4.1–4–5(c) to meet condition (h)(2).

In addition, Indiana has proposed changes to other statutory sections that are unrelated to the conditions. These provisions are:

1. IC 13–4.1–2–3 to provide an exception to the conflict of interest rules for appointees to the Indiana Natural Resources Commission (a multi-interest board established by State law); and
2. IC 13–4.1–7–5 to provide that persons engaging in coal exploration that substantially disturbs the natural land surface are subject to the inspection and civil penalty provisions of State law at IC 13–4.1–11 and IC 13–4.1–12.

Thus, the Secretary requests comments on the substantive adequacy of the proposed amendments to satisfy the conditions listed above and on the substantive adequacy of the proposed changes to the other Indiana statutory provisions.

Procedural Matters

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310–05–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SWH–FRL 2363–6]

Hazardous Waste Management System: Indentification and Listing of Hazardous Waste

AGENCY: Environmental Protection Agency.

ACTION: Reopening of comment period.

SUMMARY: On October 30, 1980, EPA proposed to amend the Extraction Procedure (EP) toxicity characteristic to apply to hexavalent chromium instead of total chromium. After evaluating both the information available to the Agency as well as the comments received, the Agency was still left with a number of unanswered questions. Today's action reopens the comment period in order to solicit any information the public may have which will help to resolve the questions.

DATE: Comment Date: EPA will accept comments on this proposed amendment until August 15, 1983.

ADDRESSES: Comments on this proposed rule should be sent to the Docket Clerk, Docket No. 261–83–4 Hexavalent Chromium, Office of Solid Waste (WH–565), U.S. Environmental Protection Agency, 401 M Steet, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: David Friedman, Office of Solid Waste (WH–565B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 382–4770.

SUPPLEMENTARY INFORMATION: On October 30, 1980, EPA proposed to amend the Extraction Procedure (EP) toxicity characteristic (40 CFR 261.24) to apply to hexavalent chromium instead of total chromium (45 FR 72029–72033). EPA proposed this amendment because the two normally occurring valence states of chromium, tri- and hexavalent, present sufficiently different levels of environmental risk to warrant a regulatory distinction. Trivalent chromium is less toxic than the hexavalent form and the the Agency did not believe it to be of regulatory concern at EP characteristic levels. The carcinogenicity and mutagenicity of hexavalent chromium are well established; the only well-documented adverse consequence of exposure to trivalent chromium is allergic dermatitis. In addition, trivalent chromium has significantly lower migratory potential than hexavalent chromium, and is less mobile should it migrate from a waste matrix. Moreover, there appears to be little likelihood that trivalent chromium will oxidize to hexavalent chromium under most plausible occurring types of improper waste management.

After evaluating the information that was available to the Agency (including the comments submitted in response to the October 30, 1980 proposal) the Agency believes that additional comment would be of assistance in clarifying several issues. The Agency therefore is today soliciting from the public any information which would answer the following questions:

1. There may be some environmental settings in which trivalent chromium would be converted to hexavalent chromium if released from a land disposal or storage site. Are there documented instances where this has actually occurred?
2. The Agency has some data showing that trivalent chromium is apparently not migrating out of land disposal sites, or, if it is, the migration is very slow. Are there documented instances where trivalent chromium has, in fact, been found to leach from a landfill, surface impoundment or land treatment facility?
3. Trivalent chromium appears not to pose a health risk to humans. Is there any evidence to indicate that trivalent chromium is toxic to humans when ingested?
4. Is the hazard posed by trivalent chromium to the aquatic environment of sufficient magnitude to warrant regulations under RCRA? What is the risk posed by trivalent chromium? What would be an appropriate RCRA threshold to prevent such damage?

BILLING CODE 6560–50–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 36

Indian Health Care Improvement Act Programs

AGENCY: Public Health Service, HHS.

ACTION: Proposed rule.

SUMMARY: These rules propose requirements for a new Indian health pregraduate scholarship program of up to four years which is intended to encourage Indians to enter the health professions and to insure the availability of Indian health professionals to serve Indians. The proposal would also change the current regulation governing the Preparatory Scholarship Program: (1) To provide for the contingency that the stipend could be reduced if Federal salaries were reduced; and (2) to remove the requirement that an annual list of scholarship recipients be published in the **Federal Register**.

DATE: Comments must be received on or before July 1, 1983.

ADDRESS: Address written comments to: Richard J. McCloskey, Indian Health Service, Room 6A–14, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

FOR FURTHER INFORMATION CONTACT: Pierre Colombel, Indian Health Service, 5600 Fishers Lane, Room 6A–23, Rockville, Maryland 20857, Telephone (301) 443–5441.

SUPPLEMENTARY INFORMATION: The Indian Health Service (IHS) is proposing editorial and technical changes to Subpart J and to add a new Subdivision J–8 to implement the new pregraduate scholarship program authorized by the Indian Health Care Amendments of 1980, section 3(b)(1) of Pub. L. 96–537. That section (which amended section 103(b) of the Indian Health Care Improvement Act (25 U.S.C 1613(b)), left unchanged the two-year scholarship program for "compensatory preprofessional education" but added a new scholarship program for persons enrolled in preprofessional curricula leading to a baccalaureate degree in an approved premedicine, predentistry, preosteopathy, preveterinary medicine, preoptometry, or prepodiatry program. Up to four years of scholarship assistance is authorized by the new law.

The application and selection criteria that we are proposing for the new scholarship program are essentially the same as for the two-year Health Professions Preparatory Scholarship Program contained in Subdivision J–3. An incorrect cross-reference contained in § 36.322(a)(2) is changed from § 36.333 to § 36.332. This was an inadvertent typographical error.

The current regulation for the two-year scholarship program at § 36.323 provides for a stipend of $400 per month subject to annual increases based on rates of pay in the General Schedule (5 U.S.C. 5332). It is proposed to correct § 36.323(c) to provide that the stipend shall be "adjusted" rather than "increased" to take into account the possibility of reductions as well as increases in the rates of pay under the General Schedule. The proposed regulation for the four-year pregraduate scholarship program will have a similar provision. The amount of the monthly stipend would be the same for both scholarship programs.

The current regulation at § 36.324 requires the Agency to publish an annual list of scholarship recipients in the **Federal Register**. It is proposed to amend § 36.324 to provide that an annual list of scholarship recipients, showing their tribal affiliation and school attended, will be provided to anyone requesting a copy. The proposed regulation for the pregraduate scholarship program will have a similar provision. Experience shows that anyone interested in such information is more likely to request it from the Agency rather than to read the **Federal Register**.

The Secretary certifies, pursuant to section 605(b) of the Regulatory Flexibility Act, that this regulation will

VOL 48 ISS 96 MY 17 1983 UMI

not have a significant economic impact or a substantial number of small entities. The reason for the Secretary's certification is that this regulation will affect relatively few students at colleges and universities and thus will not have a significant impact on educational institutions.

The reporting requirements in § 36.372 will be submitted to the Office of Management and Budget for review and approval under section 3507 of the Paperwork Reduction Act of 1980.

Of an FY 1983 Appropriation of $5.8 million for both the two year preparatory and the four year pregraduate program, about 60 percent is estimated to be allocated for the four year pregraduate scholarship program. Therefore, the Secretary has determined that this rule does not meet the criteria specified in Executive Order 12291 for a major rule and no regulatory impact analyses is required.

List of Subjects in 42 CFR Part 36

Grant programs—education, Health, Indians, Health care, Indians; Indians—education, Scholarships and fellowships, Student aid.

Dated: February 9, 1983.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

Approved: April 26, 1983.

Margaret M. Heckler,

Secretary.

PART 36—[AMENDED]

For the reasons set out in the preamble, it is proposed to amend 42 CFR Part 36, Subpart J as follows:

1. The Table of Contents for Subpart J is amended to add a new subdivision J–8 to read as follows:

Subdivision J–8—Health Professions Pregraduate Scholarship Program for Indians

Sec.
36.370 Pregraduate scholarship grants.
36.371 Eligibility.
36.372 Application and selection.
36.373 Scholarship and tuition.
36.374 Availability of list of recipients.

2. The Authority citation is amended by removing the last period, inserting in its place a semicolon, and adding thereafter "sec. 3(b)(1) of Pub. L. 96–537, which amended sec. 103(b) of Pub. L. 94–437 (25 U.S.C. 1613(b))."

§ 36.301 [Amended]

3. Paragraph (b)(2) of § 36.301 is revised to read as follows:

* * * * *

(b) * * *

(2) The award of preparatory scholarship grants and pregraduate scholarship grants under section 103 of the Act, as amended, to Indians undertaking compensatory and preprofessional education (Subdivisions J–3 and J–8);

* * * * *

4. Paragraph (b)(3) of § 36.301 is revised to read as follows:

* * * * *

(b) * * *

(3) The award of Indian Health Scholarship grants pursuant to section 338G of the Public Health Service Act, initially added by section 104 of the Act, to Indian or other students in health professions schools (Subdivision J–4);

* * * * *

§ 36.302 [Amended]

5. Paragraph (h) of § 36.302 is amended by removing the word "and" after "J–3" and inserting a comma and the words "and J–8" after "J–4".

§ 36.322 [Amended]

6. Paragraph (a)(2) of § 36.322 is amended by removing "36.333" and inserting in its place "36.332."

7. Paragraph (c) of § 36.323 is revised to read as follows:

§ 36.323 Scholarship and tuition.

* * * * *

(c) The amount of the monthly stipend specified in paragraph (a)(1) of this section shall be adjusted by the Secretary for each academic year ending in a fiscal year beginning after September 30, 1978, by an amount (rounded down to the next lowest multiple of $1) equal to the amount of such stipend multiplied by the overall percentage (as set forth in the report transmitted to the Congress under section 5305 of Title 5, United States Code) of the adjustment in the rates of pay under the General Schedule made effective in the fiscal year in which such academic year ends.

8. Section 36.324 is revised to read as follows:

§ 36.324 Availability of list of recipients.

The Indian Health Service will provide to any person requesting it a list of the recipients of scholarship grants under this subdivision, including the school attended and tribal affiliation of each recipient.

9. Subpart J, is amended by adding a new Subdivision J–8 to read as follows:

Subdivision J–8—Health Professions Pregraduate Scholarship Program for Indians

§ 36.370 Pregraduate scholarship grants.

(a) Pregraduate scholarship grants may be awarded under this subdivision and section 103 of the Act for the period (not to exceed four academic years) necessary to complete a recipient's pregraduate education leading to a baccalaureate degree in a premedicine, preoptometry, predentistry, preosteopathy, preveterinary medicine, or prepodiatry curriculum or equivalent.

(b) Students enrolled in accredited health professional or allied health professional programs which lead to eligibility for licensure, certification, registration or other types of credentials required for the practice of a health or allied health profession are ineligible for scholarships under this subdivision. Examples of health professions and allied health professions that will not be considered for funding include but are not limited to: nursing, audiology, medical technology, dental hygiene, dental technicians, engineering, radiologic technology, dietitian, nutritionist, social work, health education, physical therapy, occupational therapy and pharmacy. Scholarships for students in these programs are provided under Subdivision J–4.

§ 36.371 Eligibility.

To be eligible for a pregraduate scholarship grant under this subdivision an applicant must:

(a) Be an Indian;

(b) Have successfully completed high school education or high school equivalency;

(c) Have demonstrated to the satisfaction of the Secretary the desire and capability to successfully complete courses of study in a pregraduate education program meeting the criteria in § 36.370;

(d) Be accepted for enrollment in or be enrolled in any accredited pregraduate education curriculum meeting the criteria in § 36.370 of this subdivision; and

(e) Be a citizen of the United States.

§ 36.372 Application and selection.

(a) An application for a pregraduate scholarship grant under this subdivision shall be submitted in such form and at such time as the Secretary may prescribe. However, an application must indicate:

(1) The pregraduate program in which the applicant is or wishes to enter, and

(2) Whether the applicant intends to provide health services to Indians upon completion of health professions education or training by serving as described in § 36.332 or otherwise as indicated on the application.

(b) Within the limits of available funds, the Director, IHS shall make pregraduate scholarship grant awards for a period not to exceed four academic years of an individual's pregraduate eduaction to eligible applicants taking into consideration:

(1) Academic performance;

(2) Work experience;

(3) Faculty or employer recommendation;

(4) Stated reasons for asking for the scholarship; and

(5) The relative needs of the IHS and Indian health organizations for persons in specific health professions.

§ 36.373 Scholarship and tuition.

(a) Scholarship grant awards under this subdivision shall consist of:

(1) A stipend of $400 per month adjusted in accordance with paragraph (c) of this section; and

(2) An amount determined by the Secretary for transportation, tuition, fees, books, laboratory expenses and other necessary educational expenses.

(b) The portion of the scholarship for the costs of tuition and fees as indicated in the grant award will be paid directly to the school upon receipt of an invoice from the school. The stipend and remainder of the scholarship grant award will be paid monthly to the grantee under the conditions specified in the grant award.

(c) The amount of the monthly stipend specified in paragraph (a)(1) of this section shall be adjusted by the Secretary for each academic year ending in a fiscal year beginning after September 30, 1978, by an amount (rounded down to the next lowest multiple of $1) equal to the amount of such stipend multiplied by the overall percentage (as set forth in the report transmitted to the Congress under section 5305 of Title 5, United States Code) of the adjustment in the rates of pay under the General Schedule made effective in the fiscal year in which such academic year ends.

§ 36.374 Availability of list of recipients.

The IHS will provide to any person requesting it a list of the recipients of scholarship grants under this subdivision, including the school attended and tribal affiliation of each recipient.

[FR Doc. 83-13137 Filed 5-16-83; 8:45 am]

BILLING CODE 4160-16-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 83–153; RM–4219]

FM Broadcast Station in Cuba, New Mexico; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment/reply comment period.

SUMMARY: Action taken herein extends the time for filing comments and reply comments in response to a request filed by counsel for D. Matthew Runnels, in a proceeding involving the proposed assignment of an FM channel to Cuba, New Mexico. Runnels has indicated an interest in the assignment of an FM channel to Cuba, New Mexico, but states that additional time is needed to evaluate the Commission's proposal and to formulate a proper response.

DATES: Comments must be filed on or before May 16, 1983, and reply comments on or before May 31, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

Order Extending Time for Filing Comments and Reply Comments

In the matter of: Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Cuba, New Mexico), MM Docket No. 83–153, RM–4219.

Adopted: April 26, 1983.
Released: May 5, 1983.

By the Chief, Policy and Rules Division.

1. On March 10, 1983, the Commission issued a *Notice of Proposed Rule Making* ("*Notice*"), 48 FR 11472, published March 18, 1983, in the above-referenced proceeding. Comments were due April 25, 1983, and reply comments are currently due May 10, 1983.

2. We now have before us a motion for extension of time in which to file comments and reply comments herein filed by counsel for D. Matthew Runnels ("Runnels"). In response to the *Notice*, Runnels also indicates an interest in applying for a new FM channel at Cuba, New Mexico, but states that additional time is necessary to review the Commission's proposal and relevant facts pertinent thereto.

3. Runnels asserts that he has been unable to contact petitioner by telephone to obtain his consent to this requested extension. However, Runnels certifies that he has served petitioner with a copy of the motion.

4. Section 1.46(b) of the Commission's Rules states that extension requests must be filed seven days in advance of the deadline. Counsel states that since it has been retained only recently, it was not possible to file an extension in advance of the deadline. In view of the circumstances we will waive the requirements of Section 1.46(b) since such extension will assure development of a sound and comprehensive record on which to base a decision in this proceeding. Additionally, such extension will afford the petitioner an opportunity to respond to Runnels comments by the date set forth below for filing reply comments.

5. Accordingly, *it is ordered*, That the time for filing comments and reply comments in MM Docket No. 83–153 (RM–4219), *is extended* to and including May 16 and May 31, 1983, respectively.

6. This action is taken pursuant to authority contained in Sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and Sections 0.204(b) and 0.281 of the Commission's Rules.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

Little Elk Creek Critical Area Treatment RC&D Measure, Oklahoma; Environmental Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Little Elk Creek Critical Area Treatment RC&D Measure, Kiowa County, Oklahoma.

FOR FURTHER INFORMATION CONTACT: Roland R. Willis, State Conservationist, Soil Conservation Service, Agricultural Center Building, Stillwater, Oklahoma 74074, telephone 405–624–4360.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Roland R. Willis, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns reducing the rate of soil erosion and sedimentation. The planned works of improvement include gully shaping, grade stabilization structures, diversions, etc., with vegetation planned after installation.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Roland R. Willis.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: May 9, 1983.

Billy R. Littlefield,

Assistant State Conservationist.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-583-080]

Carbon Steel Plate From Taiwan; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on carbon steel plate from Taiwan. The review covers the only known exporter of this merchandise to the United States, China Steel Corporation, and the period June 1, 1981 through May 31, 1982. The review indicates the existence of no dumping margins for the period.

As a result of the review, the Department has preliminarily determined not to assess dumping duties on entries with purchase dates during the period of review nor to require cash deposits of estimated antidumping duties on future entries. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 17, 1983.

FOR FURTHER INFORMATION CONTACT: Alfredo Montemayor or Susan M. Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-5505/5255.

SUPPLEMENTARY INFORMATION:

Background

On March 31, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 13547) the final results of its last administrative review of the antidumping finding on carbon steel plate from Taiwan (38 FR 33877-8, June 13, 1979) and announced its intent to conduct the next administrative review by the end of June 1983. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of hot rolled carbon steel plate, 0.1875 inch or more in thickness, over 8 inches in width, not in coils, not pickled, not coated or plated with metal, not clad and not pressed or stamped to a non-rectangular shape. Carbon steel plate is currently classifiable under item 607.6615 of the Tariff Schedules of the United States Annotated.

The review covers the only known exporter of Taiwanese carbon steel plate to the United States, China Steel Corporation, and the period June 1, 1981 through May 31, 1982.

United States Price

In calculating United States price, the Department used purchase price, as defined in section 772 of the Tariff Act since all sales were made to unrelated purchasers in the United States prior to the date of importation. Purchase price was based on the CIF or C&F price with deductions, where applicable, for ocean freight and insurance. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value, the Department used home market price, as defined in section 773 of the Tariff Act, since sufficient quantities of such or similar merchandise were sold in the home market to provide a basis of comparison. Home market price was based on the home market list base price for shipbuilding plate. We made an adjustment for differences in phyical characteristics using the list prices for extras. Our review indicates that China Steel Corporation adhered to its list prices for the base price and extras during the review period. No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that no dumping margins exist for the period June 1, 1981 through May 31, 1982.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than five days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall instruct the U.S. Customs Service not to assess dumping duties on entries made with purchase dates during the period of review.

Further, the Department shall not require a cash deposit of estimated antidumping duties, as provided for in § 353.48(b) of the Commerce Regulations, on shipments of Taiwanese carbon steel plate entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This administative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

May 9, 1983.

[FR Doc. 83-13224 Filed 5-16-83; 8:45 am]

BILLING CODE 3510-25-M

[A-122-057]

Replacement Parts for Self-Propelled Bituminous Paving Equipment From Canada; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on replacement parts for self-propelled bituminous paving equipment from Canada. The review covers six of the seven known exporters of this merchandise to the United States and generally the period September 1, 1980 through August 31, 1981. Due to additional time needed for analysis, we are deferring National Paver Parts until our next review. The review indicates the existence of dumping margins for certain firms.

As a result of this review, the Department has preliminarily determined to assess dumping duties for individual exporters equal to the calculated differences between United States price and foreign market value on each of the shipments during the period of review.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 17, 1983.

FOR FURTHER INFORMATION CONTACT: Betty H. Laxague or Susan Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-3601.

SUPPLEMENTARY INFORMATION:

Background

On February 16, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 6681-2) the final results of its last administrative review of the antidumping finding on replacement parts for self-propelled bituminous paving equipment from Canada (42 FR 44811, September 7, 1977) and announced its intent to conduct its next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review. The substantive provisions of the Antidumping Act of 1921 ("the 1921 Act") and the appropriate Customs Service regulations apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by the review are shipments of replacement parts for self-propelled bituminous paving equipment. The review covers six of the seven known exporters of this merchandise to the United States and generally the period September 1, 1980 through August 31, 1981. In addition we are publishing revised preliminary results for the period December 1, 1979 through August 31, 1980 for one exporter, Babcock Allatt, Ltd., which we deferred in our last review. Due to additional time needed for analysis, we are deferring National Paver Parts until our next review.

Five firms had no shipments of replacement parts for self-propelled bituminous paving equipment to the U.S. during the period reviewed. The estimated antidumping duty cash deposit rates for these firms will be the most recent information for each firm.

United States Price

In calculating United States price, the Department used purchase price or exporter's sales price ("ESP"), as defined in section 772 of the Tariff Act or sections 203 or 204 of the 1921 Act, as appropriate.

Purchase price was based on the packed, f.o.b. price to unrelated purchasers in the United States. ESP was based on the packed, f.o.b. warehouse price to unrelated purchasers in the United States. Where applicable, deductions were made for U.S. and foreign inland freight, U.S. duty, brokerage charges, discounts, commissions to unrelated parties, and selling expenses. We added Canadian sales tax not collected by reason of the exportation of the merchandise to the United States. All deductions and additions, where applicable, are in accordance with § 353.10 of the Commerce Regulations. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price as defined in section 773 of the Tariff Act, or section 205 of the 1921 Act, as appropriate, since sufficient quantities of such or similar merchandise were sold in the home market to provide a basis of comparison. Home market price was based on the packed, ex-factory price to unrelated customers. We adjusted home market prices downward using commissions to unrelated parties and indirect selling expenses to offset U.S. selling expenses for ESP calculations, in accordance with § 353.15 of the Commerce Regulations and § 153.10 of the Customs Regulations (1979). Claims that further downward adjustments be made to offset expenses incurred for selling in the U.S. were disallowed because the expenses were either not indirect selling expenses, or were not applicable to sales solely in the home market. No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist:

Manufacturer	Time period	Margin (percent)
Anvil Manufacturing Co.	9/1/80 to 8/31/81	[1] 20.12
Babcock Allatt, Ltd.	12/1/78 to 8/31/79	0
	9/1/79 to 8/31/81	5.30
Barber-Greene Canada Ltd.	9/1/80 to 8/31/81	[1] 0
General Construction Equipment Manufacturing Ltd.	9/1/80 to 8/31/81	[1] 0
Parker Hannifin	9/1/80 to 8/31/81	[1] 20.12
S.F. Tubing Ltd.	9/1/80 to 8/31/81	[1] 0

[1] No shipments during the period.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an adminstrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the adminstrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all entries made with purchase dates or export dates, as appropriate, during the time periods involved. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement

VOL
48
ISS
96
MY
17
1983

instructions directly to the Customs Service.

Further, as provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the above margins shall be required on all shipments of Canadian replacement parts for self-propelled bituminous paving equipment from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. The deposit rate for National Paver Parts shall be 1.05 percent, based on our preliminary analysis of shipments made between February 1, 1981 and May 31, 1981. For any future shipment from a new exporter not covered in this or prior reviews, whose first shipments occurred after August 31, 1981 and who is unrelated to any reviewed firm, a deposit shall be required at the highest rate for responding firms with shipments during the review period, that is 5.30 percent. These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

May 9, 1983.

Steel Reinforcing Bars From Canada; Preliminary Results of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on steel reinforcing bars from Canada. The review covers the only manufacturer covered by the finding, Western Canada Steel Limited, and the two other known exporters to the United States of this merchandise manufactured by Western Canada Steel Limited. The review period is April 1, 1981 through March 31, 1982.

As a result of the review, because Western Canada Steel did not respond to the Department's questionnaire, the Department has preliminarily determined to assess dumping duties on that firm's sales during the period of review using the best information available. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 17, 1983.

FOR FURTHER INFORMATION CONTACT: Alfredo R. Montemayor or Susan M. Crawford, Office of Compliance, International Trade Administration, Department of Commerce, Washington, D.C. 20230, telephone: 202-377-3601/5255.

SUPPLEMENTARY INFORMATION:

Background

On December 8, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 55261) the final results of its last administrative review of the antidumping finding on steel reinforcing bars from Canada (29 FR 5341-42, April 21, 1964) and announced its intent to conduct the next administrative review by the end of April 1983. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of steel reinforcing bars from Canada, manufactured by Western Canada Steel Limited, currently classifiable under items 606.7900 and 606.8100 of the Tariff Schedules of the United States Annotated.

The review covers Western Canada Steel Limited and the two other known exporters to the United States of Canadian steel reinforcing bars manufactured by Western Canada Steel Limited. The review period is April 1, 1981 through March 31, 1982.

Western Canada Steel failed to respond to the Department's questionnaire. For this non-responsive firm, the Department will use the best information available for assessment and estimated antidumping duty cash deposit rate purposes. The best information available is the most recent rate for this firm.

The other exporters did not export this merchandise to the United States during the review period. The Department will use the most recent information for each exporter for the estimated antidumping duty cash deposit rates.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the following margins exist for the period April 1, 1981 through March 31, 1982:

Manufacturer/exporter	Margin (percent)
Western Canada Steel Limited	6.40
Western Canada Steel Limited/Rhodes Vaughan & Co., Ltd	[1] 6.40
Western Canada Steel Limited/Russelsteel Limited	[1] 6.40

[1] No shipments during the period.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made within 5 days of the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries with purchase dates during the time period involved. The Department will issue assessment instructions on each exporter directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties of 6.40 percent shall be required on all shipments of Canadian steel reinforcing bars manufactured by Western Canada Steel Limited entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Unrefined Montan Wax From the German Democratic Republic; Preliminary Results of Administrative Review of Antidumping Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Antidumping Duty Order.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping duty order on unrefined montan wax from the German Democratic Republic. The review covers the one known exporter of this merchandise to the United States and the period september 1, 1981 through August 31, 1982. The review indicates the existence of no dumping margins for the period.

As a result of the review, the department has preliminarily determined not to assess dumping duties on entries with purchase dates during the period of review nor to require cash deposits of estimated antidumping duties.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 17, 1983.

FOR FURTHER INFORMATION CONTACT: Linda L. Pasden or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On September 10, 1981, the department of Commerce ("the Department") published in the **Federal Register** (46 FR 45177-8) the antidumping duty order on unrefined montan wax from the German Democratic Republic ("the GDR"). On January 26, 1982, the Department published in the **Federal Register** (47 FR 3579-80) an early determination of antidumping duty and announced its intent to conduct the next administrative review by the end of September 1983. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act") the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of unrefined montan wax which is a non-oxidized mineral extracted from lignite, not advanced beyond extraction or cleaning by solvent. This product is primarily used in the United States as a flow agent in one-time carbon ink formulas. It is also used for producing polishes, mold release agents and for casting, and is currently classifiable under item 494.2000 of the Tariff Schedules of the Unites States Annotated.

The Department knows of only one exporter of unrefined montan wax from the GDR, VEB Braunkohlenkombinat "Gustav Sobottka". The review covers the period September 1, 1981 through August 31, 1982.

United States Price

In calculating United States price the department used purchases price, as defined in section 772 of the Tariff Act. Purchase price was based on the FOB price to unrelated purchasers in the United States. Where applicable, deductions were made for foreign inland freight and harbor charges. No other adjustments were claimed or allowed.

Foreign Market value

Since the GDR is a state-controlled-economy country, the department used the provisions in section 773(c) of the Tariff Act to establish foreign market value. We constructed a value based on specific components or factors of production in the GDR, valued on the basis of prices in the Federal Republic of Germany, a non-state-controlled-economy country. For purposes of the review we constructed a value for unrefined wax, equal to the sum of materials, fabrication costs, general expenses, profit, and the cost of packing. The amount added for general expenses constituted at least ten percent of the sum of materials and fabrication costs. Because profit in the Federal Republic of Germany was less than eight percent, we used the statutory minimum as provided for in section 773(e) of the Tariff Act.

Preliminary Results of the Review

As a result of our review, we preliminary determine that no dumping margins exist for the period.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall instruct the Customs Service not to assess dumping duties on entries made with purchase dates during the period of review.

Further, the Department shall not require a cash deposit of estimated antidumping duties, as provided for in section 353.48(b) of the Commerce Regulations, on any shipments of unrefined montan wax from the GDR entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Initiation of Antidumping Investigations; Certain Welded Carbon Steel Pipes and Tubes From the Republic of Korea and Taiwan

AGENCY: United States Department of Commerce, International Trade Administration.

ACTION: Initiation of antidumping investigations.

SUMMARY: On the basis of a petition filed in proper form with the United States Department of Commerce, we are initiating antidumping investigations to determine whether certain welded carbon steel pipes and tubes from the Republic of Korea (Korea) and Taiwan are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of these actions so that it may determine whether imports of this merchandise are materially injuring, or threatening to materially injure, a United States industry. If the investigations proceed noramally, the ITC will make its preliminary determinations on or before June 6, 1983 and we will make ours on or before September 28, 1983.

EFFECTIVE DATE: May 17, 1983.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230 telephone: (202) 377-2438.

SUPPLEMENTARY INFORMATION: On April 21, 1983, we received a petition in proper form from counsel for the Committee on Pipe and Tube Imports (CPTI). The CPTI represents the following domestic manufacturers of welded carbon steel

UMI

VOL 48 ISS 96 MY 17 1983 UMI

pipes and tubes: Allied Tube and Conduit Corp., American Tube Co., Inc., Bull Moose Tube Co., Copperweld Tubing Group, Kaiser Steel Corp., Merchants Metals, Inc., Pittsburgh-International, Southwestern Pipe, Inc., and Western Tube and Conduit.

In compliance with the filing requirements of section 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from Korea and Taiwan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act), and that these imports are materially injuring, or are threatening to materially injure, a United States industry. The allegation of sales at less than fair value of the merchandise under investigation from Korea is supported by comparisons of offered United States prices with the foreign market value based on the constructed value of the merchandise using publicly available financial statements of two Korean producers of pipes and tubes. The allegation of sales at less than fair value of the merchandise under investigation from Taiwan is supported by comparisons of offered United States prices with the foreign market value based on an average of home market sale prices for pipes and tubes.

Initiation of Investigations

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether it sets forth the allegations necessary for the initiation of an antidumping investigation and whether it contains information reasonably available to the petitioners supporting the allegations. We have examined the petition filed by the representatives of the domestic manufacturers of welded carbon steel pipes and tubes, and we have found that it meets the requirements of section 732(b) of the Act. Therefore, we are initiating antidumping investigations to determine whether certain welded carbon steel pipes and tubes from Korea and Taiwan are being, or are likely to be, sold at less than fair value in the United States. If our investigations proceed normally, we will make our preliminary determinations by September 28, 1983.

Scope of the Investigations

The merchandise covered by these investigations are certain welded carbon steel pipes and tubes, which are defined for purposes of this proceeding as: welded carbon steel pipes and tubes, of circular cross section, with walls not thinner than 0.065 inch, 0.375 inch or more but not over 4.5 inches in outside diameter, provided for in items 610.3231, 610.3232, 610.3241 and 610.3244 of the Tariff Schedules of the United States Annotated (1983) (TSUSA) or of rectangular (including square) cross section, provided for in TSUSA items 610.3955 and 610.4975.

Notification to the ITC

Section 732(d) of the Act requires us to notify the United States International Trade Commission of these actions and to provide it with the information we used to arrive at these determinations. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determinations by ITC

The ITC will determine within 45 days of the date the petition was received whether there is a reasonable indication that imports of certain welded carbon steel pipes and tubes from Korea and Taiwan are materially injuring, or are likely to materially injure, a United States industry. If its determinations are negative, these investigations will terminate; otherwise they will proceed according to the statutory procedures.

Dated: May 11, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Minority Business Development Agency

Financial Assistance Application; New York

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Technology Commercialization Center (TCC) Program to operate a Technology Commercialization Center for a period of 12 months beginning on or about September 1, 1983 in the New York City Area. Federal funds are estimated at $150,000 for the center with a 10% cost sharing requirement (any combination of cash, in-kind or fees for services). Reference may be made to Catalog of Federal Domestic Assistance—11.814 Minority Business Development. It is anticipated that the funding instrument will be a grant as defined by the Federal Grant and Cooperative Agreement Act of 1977. The applicant shall be expected to provide and/or broker those services necessary to move technology-based projects from the initial evaluation stage through the product development phase into commercialization. These services shall benefit those minorities capable of engaging in technology-based and growth oriented businesses, inventors, innovators and sources of financial assistance. Experience/capability is required in technology commercialization. There are no restrictions (any profit or non-profit institution is eligible to submit an application.

CLOSING DATE: The closing date for receipt of applications is June 24, 1983 with a postmark date on or before June 24, 1983.

ADDRESS: New York Regional Office, Minority Business Development Agency, 26 Federal Plaza, Room 36-116, New York, New York 10278.

FOR FURTHER INFORMATION CONTACT: Joseph F. Korpsak, Telephone: (212) 264-3262.

SUPPLEMENTARY INFORMATION: This program is subject to OMB Circular A-95 requirements.

Questions concerning the preceding information, copies of application forms, and applicable regulations can be obtained at the above address.

(Catalog of Federal Domestic Assistance: 11.814 Minority Business Development)

Dated: May 10, 1983.

BILLING CODE 3510-21-M

National Oceanic and Atmospheric Administration

Issuance of Permit; Dolphin Biology Research Associates, Inc.

On March 11, 1983, Notice was published in the **Federal Register** (48 FR 10421), that an application had been filed with the National Marine Fisheries Service by Mr. Randall S. Wells, Dolphin Biology Research Associates, Inc., 163 Siesta Drive, Sarasota, Florida 33581, to capture, sample, mark and release up to 105 Atlantic bottlenose dolphins (*Tursiops truncatus*) for the purpose of scientific research.

Notice is hereby given that on May 10, 1983, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Scientific Research Permit for the above taking to Mr. Randall S. Wells subject to certain conditions set forth therein.

The Permit is available for review in the following offices: Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and Regional Director, Southeast Region, National Marine Fisheries Service, Duval Building, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Dated: May 10, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83-13206 Filed 5-16-83; 8:45 am]

BILLING CODE 3510-22-M

Receipt of Application for Permit; Sherman C. Jones

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name: Mr. Sherman C. Jones (P321).

b. Address: P.O. Box 1981, Room 4-270, Galveston, Texas 77553.

2. Type of Permit: Scientific Research.

3. Name and Number of Animals:

Bottlenose dolphins (*Tursiops truncatus*)—Unspecified.

Spinner dolphins (*Stenella longirostris*)—Unspecified.

4. Type of Take:

An unspecified number of the dolphins may be potentially harassed while studying population densities, group movements and migrations and behavior.

5. Location of Activity: Galveston Bay area; Texas.

6. Period of Activity: 2 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is fowarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Dated: May 11, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Office of the Secretary

President's Private Sector Survey on Cost Control

AGENCY: U.S. Department of Commerce, Office of the Secretary.

ACTION: Notice of Open Meeting of the Subcommittee of the President's Private Sector Survey on Cost Control (PPSSCC).

SUMMARY: The Subcommittee was established by the Executive Committee of the PPSSCC to: (i) review the recommendations submitted, including task force reports and public comments, and (ii) determine which recommendations should be made to the President and the Departments and Agencies.

Time and place: May 26, 1983, beginning at 11 a.m. The meeting will be held at the U.S. Department of Commerce Auditorium, First Floor, Herbert C. Hoover Building, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

Agenda

1. Draft reports from the following Task Forces of the Survey will be discussed by Subcommittee members:

A. Boards/Commissions—Business.

B. Boards/Commissions—Banking.

VOL
48
ISS
96
MY
17
1983
UMI

C. User charges.
D. Low Income Standards.
E. Department of State/AID/USIA.
F. Land/Facilities/Personal Property.

2. Comments and recommendations received from public and other interested parties will be discussed by Subcommittee members.

In compliance with Federal Advisory Committee Act and Freedom of Information Act requirements, copies of the draft reports will be available on May 16 at the Department's Central Reference and Records Inspection Facility, Room 628, Hoover Building, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Please call Ms. Geraldine P. LeBoo on (202) 377–3271 for information concerning fees and procedures for obtaining copies by mail.

SUPPLEMENTARY INFORMATION: The Subcommittee will hold additional public meetings in May and June, 1983. Exact dates will be noticed in the **Federal Register**. Copies of all materials, including Task Force reports, to be considered at these meetings will be available approximately two weeks prior to each meeting at the Department's Central Reference and Records Inspection Facility, address above.

Public Participation

The May 26 meeting will be open to the public. Seating will be on a first-come, first-served basis, up to the safe capacity of the meeting room. Media representatives are encouraged to call Mr. Malcolm Barr, Director, News Relations, Department of Commerce, 377–4901 to arrange for coverage of the meeting.

The public may file written statements for consideration by the Subcommittee any time before, at, or after the meeting. It is strongly recommended that statements concerning the matters to be considered at each meeting be filed before such meeting to ensure that they are considered by the Subcommittee before adoption of a report. The statements should be filed at the Department of Commerce's Central Reference and Records Inspection Facility, address and phone number as above. Because of the number of recommendations to be discussed, the meeting agenda will not include time for oral statements from public attendees. All public statements received will be available for public review.

FOR FURTHER INFORMATION CONTACT: Ms. Janet Colson, Committee Control Officer for the Executive Committee of the President's Private Sector Survey on Cost Control, telephone (202) 466–4665.

Dated: May 13, 1983.

Marilyn S. McLennan,

Chief, Information Policy and Management Division, Office of the Secretary.

BILLING CODE 3510-CW-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcement of Increase in the Import Restraint Level for Certain Cotton Apparel from Indonesia

May 11, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing the import level of men's and boys' woven cotton shirts in Category 340 from 321,000 dozen to 340,260 dozen, produced or manufactured in Indonesia and exported during the twelve-month period which began on July 1, 1982 by the application of carryforward.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175) and May 3, 1983 (48 FR 19924).

SUMMARY: The Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of November 9, 1982 between the Governments of the United States and Indonesia provides, among other things, for the borrowing of yardage from the succeeding year's level (carryforward) with the amount used being deducted from the level in the succeeding year. At the request of the Government of Indonesia, an increase for carryforward is being applied to the level of restraint for cotton textile products in Category 340.

EFFECTIVE DATE: May 17, 1983.

FOR FURTHER INFORMATION CONTACT: Claire McDermott, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

SUPPLEMENTARY INFORMATION: On November 17, 1982, there was published in the **Federal Register** (47 FR 51782) a letter dated November 15, 1982 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established levels of restraint for certain categories of cotton textile products, including Category 340, produced or manufactured in Indonesia and exported to the United States during the twelve-month period which began on July 1, 1982 and extends through June 30, 1983. In accordance with the terms of the bilateral agreement, and at the request of the Government of Indonesia, the United States Government has agreed to increase the level for cotton textile products in Category 340. Accordingly, in the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the level to 340,260 dozen.

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

May 11, 1983.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: On November 15, 1982, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning on July 1, 1982 and extending through June 30, 1983 of certain cotton textile products, produced or manufactured in Indonesia, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Effective on May 17, 1983, paragraph 2 of the directive of November 15, 1982 is amended to include an adjusted twelve-month level of restraint of 340,260 dozen[2] for cotton textile products in Category 340, produced or manufactured in Indonesia and exported during the twleve-month period which began on July 1, 1982.

The action taken with respect to the Government of Indonesia and with respect to cotton textile products from Indonesia has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83–13120 Filed 5–16–83; 8:45 am]

BILLING CODE 3510–25–M

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of November 9, 1982, between the Governments of the United States and Indonesia, which provide, in part, that: (1) specific levels of restraint may be increased for carryover and carryforward up to 11 percent of the applicable category limit; and (2) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

[2] The level of restraint has not been adjusted to reflect any imports after June 30, 1982.

Request for Public Comments on Bilateral Textile Consultations With the Government of Mexico To Review Trade in Category 604 pt. (Only T.S.U.S.A. 310.5049)

May 12, 1983.

On March 31, 1983 the Government of the United States requested consultations with the Government of Mexico with respect to acrylic spun yarn in Category 604 pt (only T.S.U.S.A. No. 310.5049). This request was made on the basis of paragraph 6 of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of February 26, 1979, as amended, between the two governments. Paragraph 6 provides for consultations when the orderly development of trade between the two countries may be impeded by imports due to market disruption or the threat thereof.

The purpose of this notice is to advise the public that if no solution is agreed upon in consultation between the two governments within 90 days of the request for consultations, the Committee for the Implementation of Textile Agreements, pursuant to paragraph 6 of the agreement, may establish a limit of 759,421 pounds for the entry and withdrawal from warehouse for consumption of man-made fiber textile products in Category 604 pt. (only T.S.U.S.A. Number 310.5049), produced or manufactured in Mexico and exported to the United States during the twelve-month period beginning on January 1, 1983 and extending through December 31, 1983.

The Government of the United States reserves the right under the agreement to invoke import controls on this category during the 90-day consultation period (April 1, 1983—June 29, 1983) at a level of 256,609 pounds and during the twelve-month period which began on January 1, 1983 at a level of 759,421 pounds.

Any party wishing to comment or provide data or information regarding the treatment of Category 604 pt. (only T.S.U.S.A. Number 310.5049) under the bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement with the Government of Mexico, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in Category 604 pt. (only T.S.U.S.A. Number 310.5049), is invited to submit such comments or information in ten copies to Walter C. Lenahan, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Since the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreements or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83–13228 Filed 5–16–83; 8:45 am]

BILLING CODE 3510-25-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Board of Trade Treasury Repo Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contract.

SUMMARY: The Chicago Board of Trade ("CBOT") has applied for designation as a contract market in Treasury Repos. The Commission has determined that the terms and conditions of the proposed futures contract are of major economic significance and that, accordingly, making available the proposed contract for public inspection and comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before July 18, 1983.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to the CBOT Treasury Repo futures contract.

FOR FURTHER INFORMATION CONTACT: Ronald Hobson, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C., (202) 254–7303.

A copy of the terms and conditions of the CBOT proposed Treasury Repo futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Other materials submitted by the CBOT in support of its application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1982)), except to the extent that they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOIA, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures contract, or with respect to other materials submitted by the CBOT in support of its application, should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, by July 18, 1983. Such comment letters will be publicly available except to the extent that they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C., on May 12, 1983.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Intent To Prepare Draft Environmental Impact Statement (DEIS) for Hydropower Development of the North Santiam River, Oregon

LEAD AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a DEIS.

The Corps of Engineers, Portland District, is currently investigating the feasibility of additional hydropower

VOL 48 ISS 96 MY 17 1983 UMI

development on North Santiam River, Marion County, Oregon. Alternatives being considered include the Mill City Diversion, Minto Dam, and a combination of both. The Mill City Diversion would consist of diverting water from the Big Cliff Reservoir, carrying it along the hillside to the north of the river to a headpond where it would be dropped about 400 feet to a powerhouse on North Santiam River about 2 miles west (downstream) of Mill City. The Minto Dam is an impoundment and powerhouse on the North Santiam River approximately 2 miles downstream from Big Cliff Dam being considered independently by the Eugene Water and Electric Board (EWEB). EWEB is also preparing an Environmental Impact Statement (EIS) to assess the possible impacts of the Minto Dam. The Corps EIS will take into consideration information made available by the EWEB EIS.

The scoping process will formally commence in the summer (May/June) of 1983, with the issuance of a public notice containing a draft outline of alternatives and potential effects which will be discussed in the DEIS. Federal, State, and local agencies, Indian tribes, and interested organizations and individuals will be asked to comment on the draft outline and to identify significant issues relating to the effects of the alternatives. The DEIS is scheduled for agency and public review in the fall of 1985. The Final EIS is scheduled for publication in the fall of 1986.

ADDRESS: If you have any questions or need additional information, please contact Mr. Eric Braun, telephone (503) 221–6438, (FTS 423–6438), U.S. Army Corps of Engineers, Natural Resources Branch, P.O. Box 2946, Portland, Oregon 97208.

Dated: May 9, 1983.

R. L. Friedenwald,

Colonel, Corps of Engineers, District Engineer.

Department of the Navy

Navy Resale System Advisory Committee; Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is hereby given that the Navy Resale System Advisory Committee will meet on June 13, 1983, at the Maile Terrace Room, the Kahala Hilton Hotel, 5000 Kahala Avenue, Honolulu, Hawaii. The meeting will consist of two sessions; the first from 8:00 a.m. to 8:50 a.m., and the second from 9:00 a.m. until 1:00 p.m. Topics to be discussed at the meeting will include organization of the Resale System, planning, financial management, merchandising, field support, and industrial relations.

The Secretary of the Navy has determined in writing that the public interest requires that the second session of the meeting be closed to the public because it will involve discussion of matters relating solely either to internal agency personnel rules and practices, or to trade secrets and confidential commercial or financial information. These matters fall within the exemptions listed in sections 552b (c)(2), (c)(4), and (c)(9)(B) of title 5, *United States Code*. The first session of the meeting, which will involve other nonprivileged matters relating to the Navy Exchange Resale System, will be open to the public.

For further information concerning this meeting, contact: Captain J. R. Akers, SC, USN, Naval Supply Systems Command, NAVSUP 09B, Room 516, Crystal Mall, Building No. 3, Arlington, Virginia 22202. Telephone: (202) 695–5457.

Dated: May 12, 1983.

F. N. Ottie,

Lieutenant Commander, JAGC, U.S. Navy, Alternate Federal Register, Liaison Officer.

[FR Doc. 83–13160 Filed 5–16–83; 8:45 am]

BILLING CODE 3810–AE–M

Naval Research Advisory Committee; Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is hereby given that the Naval Research Advisory Committee will meet on June 14, 1983, at the Office of Naval Research, Arlington, Virginia, and on June 15, 1983, at the Naval Research Laboratory, Washington, D.C. The meeting will consist of five sessions. The first session will commence at 8:30 a.m. and terminate at 10:10 a.m. on June 14, 1983. The second session will commence at 10:10 a.m. and terminate at 11:10 a.m. on June 14, 1983. The third session will commence at 11:10 a.m. and terminate at 4:00 p.m. on June 14, 1983. The fourth session will commence at 4:00 p.m. and terminate at 5:00 p.m. on June 14, 1983. Finally, the fifth session will commence at 8:00 a.m. on June 15, 1983, and continue to completion. The first, second, third and fourth sessions of the meeting will be held in Room 915, Office of Naval Research. The fifth session will be held at the Naval Research Laboratory. The second and fourth sessions will be open to the public. The first, third, and fifth sessions will be closed to the public.

The purpose of the meeting is to discuss basic and advanced research in the Navy as well as a review of the status of all ongoing Committee studies and discussion of the 1983 Summer Study. The open sessions will generally cover presentations and discussions relating to environmental hazards onboard ship, evaluation of hospital care, acquisition directives, future training space, and laboratory oversight. The remaining sessions of the meeting will consist of classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and is in fact properly classified pursuant to such Executive order. The Secretary of the Navy has therefore determined in writing that the public interest requires the first, third, and fifth sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander P. D. Quinton, U.S. Navy, Office of Naval Research (Code 100N), 800 North Quincy Street, Arlington, VA 22217, Telephone number (202) 696–4870.

Dated: May 12, 1983.

F. N. Ottie,

Lieutenant Commmander, JAGC, U.S. Navy, Alternate Federal Register Liaison Officer.

[FR Doc. 83–13165 Filed 5–16–83; 8:45 am]

BILLING CODE 3810–AE–M

DELAWARE RIVER BASIN COMMISSION

Commission Meeting and Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, May 25, 1983, beginning at 1:30 p.m. The hearing will be part of the Commission's regular May business meeting, which is open to the public.

An informal pre-meeting conference among the Commissioners and staff will be open for public observation beginning at 11:00 p.m.

The hearing, meeting and conference will be held in the Pennsylvania West Room of the Philadelphia Centre Hotel, 1725 Kennedy Boulevard, Philadelphia, Pennsylvania.

The subjects of the hearing will be as follows:

Applications for approval of the following projects pursuant to Article 10.3, Article II, and/or Section 3.8 of the Compact:

1. *Holdover Project—Pennsylvania Fish Commission (D–80–32 CP).* A well water supply project at the Fish Commission's Pleasant Mount Fish Cultural Station in Mount Pleasant Township, Wayne County, Pennsylvania. Well Nos. 2 and 3 will provide a combined yield of about 403,000 gallons per day (gpd) for augmented supply during spring months, and as a backup for an existing well. This hearing continues that of April 20, 1983.

2. *Indian Rock Water Company—Newtown Artesian Water Company (D–80–78 CP).* A ground water withdrawal project to supply approximately 252,000 gpd of water to the proposed Golden Acres residential development in the applicant's service area. Designated as Well No. 21, the project is located in Newtown Township, Bucks County, Pennsylvania and is in the Southeastern Pennsylvania Ground water Protected Area.

3. *Schuylkill Haven Bleach and Dye Works, Inc., (D–81–30).* A well water supply project to serve the applicant's bleach and dye plant in Schuylkill Haven Borough, Schuylkill County, Pennsylvania. Three wells would be utilized to supplement water supplied by the Borough of Schuylkill Haven. The new wells are expected to supply up to 237,000 gpd during periods of municipal water shortage.

4. *U.S. Department of Justice—Otisville FCI (D–83–7 CP).* A ground water withdrawal project to supply approximately 0.24 million gallons per day (mgd) of water to the Otisville Federal Correctional Institution in the Town of Mt. Hope, New York. The new wells, designated as PW–1, PW–2 and ES–1, will replace existing wells which have proven unreliable. the wells are located in the Town of Deerpark, in Orange County, New York.

5. *Diamond Shamrock Corporation (D–83–9).* Modification of an industrial waste treatment facility at the applicant's Delaware City plant in New Castle County, Delaware. Diamond Shamrock has sold its polyvinyl chloride manufacturing plant and will no longer treat wastes from this facility. The applicant will continue to operate its chlorine plant and associated waste treatment facility—designed to remove mercury from a waste stream of approximately 0.3 mgd. Treated effluent will continue to discharge to the Delaware River.

6. *Ethyl Corporation (D–83–13).* Modification of an industrial waste treatment facility at the applicant's newly acquired polyvinyl chloride plant near Delaware City, New Castle County, Delaware. Ethyl Corporation has purchased the PVC portion of the existing Diamond Shamrock Corporation facilities. The project will include piping modifications to allow Ethyl to treat the waste water streams from the PVC plant and the incinerator neutralization. New chlorination facilities will be added to the treatment units purchased by Ethyl. Up to 0.3 mgd of waste water from the Ethyl facilities will be mixed with the waste water from Diamond Shamrock and discharged via the existing outfall line to the Delaware River.

Documents relating to these projects may be examined at the Commission's offices and are available in single copies upon request. Please contact David B. Everett. Persons wishing to testify at this hearing are requested to register with the Secretary prior to the hearing.

Dated: May 10, 1983.

Susan M. Weisman,

Secretary.

[FR Doc. 83–13144 Filed 5–16–83; 8:45 am]

BILLING CODE 6360–01–M

DEPARTMENT OF ENERGY

Energy Information Administration

Proposal for "Annual Report of the Origin of Natural Gas Liquids Production," Form EIA–64A

AGENCY: Energy Information Administration, DOE.

ACTION: Request for Comments on Revised Form EIA–64A, "Annual Report of the Origin of Natural Gas Liquids Production."

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy (DOE), is proposing a revision to Form EIA–64A, "Annual Report of the Origin of Natural Gas Liquids Production." If approved by the Office of Management and Budget, EIMA would implement the revised for the 1983 annual filing which will be due on April 1, 1984.

DATE: Written comments must be received by EIA within 30 days following the publication of this notice.

VOL
48
ISS
96
MY
17
1983
UMI

ADDRESS: Comments should be sent to Ms. Nancy Leach at the address listed immediately below.

FOR FURTHER INFORMATION CONTACT:
Ms. Nancy L. Leach, EI–441, Office of Oil and Gas, Energy Information Administration, Room BE–064, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–6018.

SUPPLEMENTARY INFORMATION:
I. Current Action
II. Changes in the Revised Form EIA–64A
III. Request for Comments

I. Current Action

EIA proposes implementation of revised Form EIA–64A, "Annual Report of the Origin of Natural Gas Liquids Production," which expires August 1983. Clearance of this form will enable EIA to continue the data series. The data will be collected and processed by the Reserves and Natural Gas Operations Office at Norman, Oklahoma. After processing is completed, the aggregation of the natural gas receipts, natural gas liquids production, and gas shrinkage volumes is performed by EIA. These volumes are used in conjunction with lease condensate and natural gas reserves and production data collected independently on Form EIA–23, "Annual Reserves of Domestic Oil and Gas Reserves," to develop national and regional estimates of proved reserves of crude oil, dry natural gas, and natural gas liquids. EIA will publish these data in the annual report entitled "U.S. Crude Oil, Natural Gas, and Natural Gas Liquids Reserves." The aggregate data are now widely used by Federal and State agencies, by industry, and by other interested parties for analysis.

II. Changes in the Revised Form EIA–64A

A number of changes have been made in the form which should lower respondent burden, improve the quality of the information submitted, and increase the compatibility of the required volumes with other EIA forms. Among these changes are:

- Item 1.0, "Plant and Report Identification," has been expanded to collect current operational status information for the plant, and to establish whether or not the reported data covers the entire report year.
- Item 3.0 has been expanded to facilitate the reporting of up to twelve areas of origin.
- Two previously required data items have been eliminated: "Total Dry Natural Gas Processed" and "Dry Natural Gas Delivered for Cycling or Reinjection."
- A newly designated Item 4.0 is now required: "Gas Shrinkage Resulting from Natural Gas Liquids Extracted."
- Natural gas liquid volumes previously reported in barrels, are now required to be reported in thousands of barrels in order to the consistent with the reporting requirements of Form EIA–816 (formerly EIA–64), "Monthly Natural Gas Liquids Report."

III. Request for Comments

Form EIA–64A is reproduced following the notice, with the exception of the area of origin codes and subdivision maps which remain unchanged. Prospective respondents and other interested parties should comment on the planned revisions within 30 days following the publication of this notice. The following general guidelines are provided to assist in the preparation of responses:

As a potential data provider:

A. Are the instructions and definitions clear and sufficient?

B. Can the data be submitted using definitions included in the instructions?

C. Can the data be submitted in accordance with the response time specified in the instructions?

D. How many hours, including time for preparation and administrative review, will your company require to complete and submit the form?

E. What is the estimated cost of completing this form, including direct and indirect costs associated with the data collections? Direct costs should include all costs, such as administrative costs, directly attributable to providing this information.

F. How can the form be improved?

G. Do you know of other Federal, State, or local agencies that collect similar data?

As a potential data user:

A. Can your company analysts use data at the levels of detail indicated on the form?

B. For what purposes would you use these data? (Be specific)

C. How could the form be improved to better meet your specific data needs?

D. Are there alternative sources of data and do you now use them? What are their deficiencies?

EIA is also interested in receiving comments from persons as to their views on the need for the collection of this information at all.

Comments submitted in response to this Notice will be included in the request for Office of Management and Budget approval of this data collection and will become a matter of public record.

Issued in Washington, D.C., May 10, 1983.

Yvonne M. Bishop,
Director, Statistical Standards, Energy Information Administration.

DEPARTMENT OF ENERGY—ENERGY INFORMATION ADMINISTRATION OFFICE OF OIL AND GAS

Annual Report of the Origin of Natural Gas Liquids Production Form EIA–64A for Report Year 1983

General Instructions

A. Purpose

The collection of basic, verifiable information on the Nation's reserves and production of natural gas liquids (NGL) is mandated by the Federal Energy Administration Act of 1974 (FEAA, Pub. L. 93–275). NGL production and gas shrinkage volumes reported on Form EIA–64A by natural gas processing plant operators are used in conjunction with lease condensate and natural gas reserves and production data collected independently on Form EIA–23, "Annual Survey of Domestic Oil and Gas Reserves." The Energy Information Administration of the Department of Energy (DOE) develops, from the information collected on these two companion forms, national and regional estimates of proved reserves of crude oil, natural gas, and natural gas liquids. This basic energy information is required by DOE to assist in the formulation of national energy policies.

The data collected on Form EIA–64A include the volumes of natural gas received and the nature gas liquids extracted at gas processing plants, by areas of origin, and the total gas shrinkage resulting from the natural gas liquids extracted by the plants.

B. Who Must Submit

Each operator of one or more domestic natural gas processing plant(s) is required to file a Form EIA–64A for each plant operated as of December 31 of the report year. If a plant was shut down as of December 31 of the report year but was operated earlier in the report year, a Form EIA–64A must be submitted for that plant. In cases in which a plant was operated by two or more operators during the report year, the operator as of December 31 of the report year should file a Form EIA–64A that covers the entire report year. If the operator is unable to obtain from previous operators the information required to compile accurate data covering the entire report year, The operator should file a Form EIA–64A covering only that portion of the report year during which he operated the plant.

If there is some question whether a plant is a "natural gas processing plant" or "field separation facility," contact your company's responsible preparer for Form EIA–23, "Annual Survey of Domestic Oil and Gas Reserves," in order to internally coordinate your responses. This will ensure that double reporting or nonreporting of liquids data does not occur. If you need assistance in identifying the EIA–23 responsible preparer, contact the EIA–64A Coordinator at (405) 360–3614.

C. What Must be Submitted

Each operator is required to complete a *separate* Form EIA–64A for *each gas processing plant.* If you had a plant in operation as of December 31 of the report year and did not receive a Form EIA–64A for it, a completed form should still be filed for the plant. Additional forms may be obtained by contacting the EIA–64A Coordinator at (405) 360–3614, or photocopies of the schedule may be used. Respondents need submit only one copy of the completed form for each plant. Form EIA–64A solicits annual data by area of origin not required on Form EIA–816, "Monthly Natural Gas Liquids Report" (formerly Form EIA–64). Form EIA–64A does not replace or supersede Form EIA–816 which is still required on a monthly basis.

D. When and Where to Submit

Form EIA–64A must be submitted on or before April 1, 1984 for the 1983 report year data. Completed forms should be addressed to: U.S. Department of Energy, Box OK, Norman, Oklahoma 73070..

For information concerning requests for extension of time to file or for exception from filing Form EIA–64A, contact the EIA–64A Coordinaor at (405) 360–3614.

E. Record Keeping Requirements

All records necessary to reconstruct the data reported on this form must be kept for a period of three (3) years.

F. Sanctions

Failure to make the information requested on Form EIA–64A available to the Secretary of DOE, or failure to allow the Secretary to verify the accuracy of the information submitted on that form, will result in penalties as provided in the FEAA of 1974 (FEAA, Pub. L. 93–275), Section 13(i) as amended.

G. Confidentiality

The information contained on these forms may be (i) information which is exempt from disclosure to the public under the exemption for trade secrets and confidential commercial information specified in the Freedom of Information Act, 5 U.S.C. 552(b)(4) (FOIA) or (ii) prohibited from public release by 18 U.S.C. 1905. However, before a determination can be made that particular information is within the coverage of either of these statutory provisions, the person submitting the information must make a showing satisfactory to the Department concerning its confidential nature.

Therefore, respondents should state briefly and specifically (on an element-by-element basis if possible), in a letter accompanying submission of the form why they consider the information concerned to be a trade secret or other proprietary information, whether such information is customarily treated as confidential information by their companies and the industry, and the type of competitive hardship that would result from disclosure of the information. In accordance with the provisions of 10 CFR 1004.11 of DOE's FOIA regulations, DOE will determine whether any information submitted should be withheld from public disclosure.

If DOE receives a response and does not receive a request, with substantive justification, that the information submitted should not be released to the public, DOE may assume that the respondent does not object to disclosure to the public of any information submitted on the form.

A new written justification need not be submitted each time the Form EIA–64A is submitted if:

a. Views concerning information items identified as privileged or confidential have not changed; and

b. A written justification setting forth respondent's views in this regard was previously submitted.

In accordance with the cited statutes and other applicable authority, the information must be made available, upon request, to the Congress or any committee of Congress, to the General Accounting Office, and other Congressional agencies authorized by law to receive such information.

H. Data Entry Standards

1. *Total Operated Basis*—All data are to be reported on a total operated basis (commonly known as the "gross operated" or "6/8ths" basis) by the operator of the natural gas processing plant.

2. *Units of Measurement*—Natural gas liquid volumes are to be reported in thousands of barrels (MBbls) of 42 U.S. gallons at 60° Fahrenheit. Natural gas volumes are to be reported in millions of cubic feet (MMcf) at 14.73 psia and 60° Fahrenheit.

3. *Rounding*—Liquid volumes should be rounded to the nearest thousand barrels. When rounding liquid volumes, round quantities of 500 barrels and above to the next higher MBbl, and round quantities of less than 500 barrels down to the next lower MBbl. Similarly, when rounding natural gas volumes, round quantities of 500 Mcf and above to the next higher MMcf and round quantities of less than 500 Mcf down to the next lower MMcf.

Examples

For Liquids, report: 7,500 barrels as: 8 MBbls;
467 barrels as: 0 MBbls
For Gas, report: 8,500,000 cubic feet as: 9
MMcf; 10,459,000 cubic feet as: 10 MMcf

4. *Schedule Preparation*—In order to facilitate the processing of data, reproduced forms are requested to be on the same size paper (8½ x 11"). Enter responses by typing, or by printing in black ink using all capital letters.

Specific Instructions

Section 1.0: Plant and Report Identification

Item 1.1. Insert an "X" in the appropriate box to indicate whether this Form EIA–64A report reflects active natural gas processing at the facility for the *entire* report year. If you check "No", enter the months to which the data filed in this report pertain and explain in detail. Specify the facility type (e.g., fractionator, compressor station, etc.) if the facility is not a natural gas processing plant as defined in the Glossary on page 9. Specify if the plant was shut down, and the anticipated start-up date, if known. Specify if the plant was dismantled. If there was a change in operatorship during the year and this report does not cover operations for the entire year, please supply any specific information concerning the previous operator which you may have, such as corporate name, mailing address, and telephone number.

Item 1.2, *Plant Identification Number*—Copy from the mailing label into this space the six-digit DOE plant identification number assigned to your facility.

Item 1.3, *Plant Name*—Enter the name of the natural gas processing facility covered by this report. (See NATURAL GAS PROCESSING PLANT in the Glossary.)

Item 1.4, *Geographic Location of Plant*—Enter the Area of Origin Code pertaining to the State or State subdivision in which the reporting plant is located. (See AREA OF ORIGIN CODES AND SUBDIVISION MAPS, pages 10–17.)

Item 1.5a. If the company name or address as it appears on the mailing label does not match your response to Items 1.5b through 1.5f, insert an "X" in the box.

Items 1.5b through 1.5g, *Operator's Name and Address*—Provide the corporate name of the facility operator responsible for the day-to-day operation of the plant including street address, city, State, and Zip Code. Future forms will be mailed to this address. Enter the name of the parent company, if any, in Item 1.5g.

Item 1.6, *Responsible Preparer*—Enter the name, title and business telephone number of the individual who is responsible for the preparation of the data submitted. This person should be familiar with the data provided and will be the person to whom inquiries will be directed, if necessary, and to whom Form EIA–64A will be mailed in the future at the above address.

Item 1.7, *Submission Status: Original/Amended*—Insert an "X" in the proper box to indicate that this is the first submission of data for the report year or that it amends data previously submitted for this report year.

Section 2.0: Certification

The certification must be completed for each form that is submitted. Enter the name and title of the individual designated by the company to sign the certification. This individual must sign in the space provided on the form and enter the date of signing.

Section 3.0: Origin of Natural Gas Received and Natural Gas Liquids Produced

The total volume of natural gas received by this natural gas processing plant during the report year, and the natural gas liquids extracted from this gas, should be attributed to the State(s) or State subdivision(s) of origin as accurately as possible.

Items 3.1 through 3.12, *Area of Origin Code,* Column (A)—Columns (A) is to be used to indicate the areas of origin as specified in the list of areas contained in AREA OF ORIGIN CODES AND SUBDIVISION MAPS, pages 10–17. Please enter the correct code for each geographic area which contributed gas to be processed during the report year. If there are more than twelve areas of origin involved for the same plant, complete an additional Form EIA–64A schedule, and return the two schedules as one filing.

VOL 48 ISS 96 MY 17 1983 UMI

Items 3.1 through 3.13, *Natural Gas Received (MMcf)*, Column (B)—Estimate as accurately as possible the volumes of gas received for processing by area of origin and report these volumes in Column (B) adjacent to the appropriate Area of Origin Code in Column (A). These estimates should consider all relevant information available to the respondent and should be as precise as possible. Do not include refinery offgases. The total gas processed by the plant during the report year should be entered on line 3.13. The sum of the volumes reported in lines 3.1 through 3.12 should be the same as the total volume reported on line 3.13. (See NATURAL GAS in the Glossary).

Items 3.1 through 3.13, *Natural Gas Liquids Production (MBbls)*, Column (C)—Estimate as accurately as possible the volumes of natural gas liquids attributed to the gas volumes reported in Column (B) and enter these amounts on the appropriate line of Column (C). The estimates of natural gas liquids recovered by area of origin should consider, to the fullest extent practical, all information available to the respondent concerning the relative liquid yields of the gas processed. Report on line 3.13 the total natural gas liquids recovered from the natural gas processed by the plant during the report year. Include only liquids production resulting from *on-site* processing. Include all volumes of plant condensate and scrubber oil recovered from natural gas at the plant.

The sum of the volumes reported in lines 3.1 through 3.12 should be the same as the total volume on line 3.13. This total should also equal the sum of the monthly volumes reported on Form EIA–816, "Monthly Natural Gas Liquids Report" (formerly Form EIA–64), unless the plant processed unfractionated streams. If these volumes are not equal, Form EIA–816 should be resubmitted to properly reflect the correct volumes for those months in which volumes have been revised. (See NATURAL GAS LIQUIDS in the Glossary.)

Section 4.0: Gas Shrinkage Resulting From Natural Gas Liquids Extracted (MMcf)

Estimate the volume of gas shrinkage resulting *only* from the removal of natural gas liquids from the natural gas received at the plant. Do *not* include gas shrinkage attributable to nonhydrocarbon gases, gas used for fuel, gas which was vented or flared, or gas which was unaccounted for.

The ratio of the shrinkage volume to the total plant NGL volume reported in Item 3.13 (Column C) should range from 1.558 MMcf per thousand barrels, which is the vapor equivalent for pure ethane, to about .900 MMcf per thousand barrels, which is the approximate vapor equivalent for natural gasolines, and plant condensate.

Glossary

Field Separation Facility—A surface installation designed to recover lease condensate from a produced natural gas stream, frequently originating from more than one lease, and managed by the operator of one or more of these leases.

Natural Gas—A mixture of hydrocarbon compounds and small quantities of various nonhydrocarbons existing in the gaseous phase or in solution with crude oil in natural underground reservoirs at reservoir conditions. The principal hydrocarbons usually contained in the mixture are methane, ethane, propane, butanes, and pentanes. Typical nonhydrocarbon gases which may be present in reservoir natural gas are carbon dioxide, helium, hydrogen sulfide, and nitrogen.

Natural Gas Liquids—Those hydrocarbons in natural gas which are separated from the gas through the processes of absorption, condensation, adsorption, or other methods in gas processing or cycling plants. Generally such liquids consist of propane and heavier hydrocarbons and are commonly referred to as condensate, natural gasoline, and liquefied petroleum gases. Where hydrocarbon components lighter than propane are recoverd as liquids, these components should also be included with natural gas liquids.

Natural Gas Processing Plant—A facility designed to recover natural gas liquids from a stream of natural gas which may or may not have passed through lease separators and/or field separation facilities. Another function of natural gas processing plants is to control the quality of the processed natural gas stream. Cycling plants are to be considered natural gas processing plants.

Operator—The peraon responsible for the management and day-to-day operation of one or more natural gas processing plants as of December 31 of the report year. The operator is generally a working interest owner of a company under contract to the working interest owner(s). Plants shut down during the report year are also considered "operated" as of December 31. (see "Person.")

Person—An individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or an unincorporated organization.

Economic Regulatory Administration

[ERA Docket No. 83-CERT-026]

Continental Grain Co.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Continental Grain Company (CONTINENTAL), 277 Park Avenue, New York, New York 10172, filed an application on April 18, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its soybean processing facility in Taylorville, Illinois, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, CONTINENTAL indicates that the volume of natural gas for which it requests certification is approximately 2,500 Mcf per day. This volume is estimated to displace the use of approximately 18,000 gallons of No. 2 fuel oil (0.29 percent sulfur) per day (5,150,000 gallons per year).

The eligible seller is Stauffer-Wyoming Pipeline Company, P.O. Box 513, Green River, Wyoming 82935. The gas will be transported by Colorado Interstate Gas Company, P.O. Box 1087, Colorado Springs, Colorado 80944; Panhandle Eastern Pipeline Company, P.O. Box 1348, Kansas City, Missouri 64141; and by Central Illinois Public Service Company, 607 E. Adams Street, Springfield, Illinois, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to CONTINENTAL and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on May 11, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

Crompton & Knowles Corp. et al.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

In the matter of Crompton & Knowles Corporation [ERA Docket No. 83-CERT-049;] The F & M Schaefer Brewing Company [ERA Docket No. 83-CERT-050;] Sure Fit Products Company [ERA Docket No. 83-CERT-051;] Harrisburg Hospital [ERA Docket No. 83-CERT-052;] General Electric Company [ERA Docket No. 83-CERT-053;] ITT Grinnell Corporation [ERA Docket No. 83-CERT-054;] North American Refractories Company [ERA Docket No. 83-CERT-055;] Interstate Intercorr Corporation [ERA Docket No. 83-CERT-056;] Talbott Knitting Mills [ERA Docket No. 83-CERT-057;] Easton Hospital [ERA Docket No. 83-CERT-058;] Franklin and Marshall College [ERA Docket No. 83-CERT-059;] Zausner Foods Corporation [ERA Docket No. 83-CERT-060;] Appleton Papers Inc. [ERA Docket No. 83-CERT-062.]

On May 2, 1983, Crompton & Knowles Corporation, Dyes and Chemicals Division (C&K), P.O. Box 341, Reading, Pennsylvania 19603; The F & M Schaefer Brewing Company, Lehigh Valley Brewery (SCHAEFER), P.O. Box 2568, Allentown, Pennsylvania 18001; Sure Fit Products Company (SFP), East Broad & Wood Streets, Bethlehem, Pennsylvania 18016; Harrisburg Hospital (H.HOSP), South Front Street, Harrisburg, Pennsylvania 17101; General Electric Company, Housewares and Audio Business Division (GE), P.O. Box 629, Allentown, Pennsylvania 18105; ITT Grinnell Corporation (ITT), 1411 Lancaster Avenue, Columbia, Pennsylvania 17512; North American Refractories Company (NARC), R. D., Womelsdorf, Pennsylvania 19567; Interstate Intercorr Corporation (INTERCORR), P.O. Box 317, Reading, Pennsylvania 19603; Talbott Knitting Mills (TALBOTT), North 6th Street and Hiesters Lane, Reading, Pennsylvania 19605; Easton Hospital (E. HOSP), 21st and Lehigh Streets, Easton, Pennsylvania 18042; Franklin and Marshall College (F & M COL.), P.O. Box 3003, Lancaster, Pennsylvania 17604; Zausner Foods Corporation (ZAUSNER), 150 West Jackson Street, New Holland, Pennsylvania 17557; and Appleton Papers Inc. (APPLETON), 2850 Appleton Street, Camp Hill, Pennsylvania 17011, filed with the Administrator of the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at one college, two hospitals and eleven manufacturing facilities in Pennsylvania, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the applications on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In their applications, the Applicants indicate the total volume of natural gas for the fourteen Pennsylvania facilities for which they request certification is approximately 1,849,210 Mcf per year. This volume is estimated to displace the use of approximately 2,704,120 gallons of No. 6 fuel oil (0.2–2.8 percent sulfur), approximately 7,963,150 gallons of No. 2 fuel oil (0.1–1.0 percent sulfur), approximately 2,000,000 gallons of No. 4 fuel oil (0.2 percent sulfur), and approximately 685,360 gallons of No. 5 fuel oil (0.5 percent sulfur) per year.

The quantities at each location are subject to variation with changes in demand, but estimated gas usage and resulting oil displacement volumes are listed below:

Estimated Oil Displacement (Gallon) Per Year

ERA docket No. 83-CERT-	Location	Estimated volume (Mcf) per year	No. 6	Percent sulfur content	No. 2	Percent sulfur content	No. 4	Percent sulfur content	No. 5	Percent sulfur content

Total		1,849,210	2,704,120		7,963,150		2,000,000		685,360	

For each application noted above, the eligible seller is Exxon-USA, P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

In order to provide the public with as much opportunity to participate in the proceeding as in particable under the circumstances, we are inviting any person wishing to comment concerning any of these applications to submit comments in writing to the Ecomomic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independance Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and argument either against or in support of any of these applications may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to the Applicant and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on May 11, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-024]

Union Camp Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Union Camp Corporation (UNION), P.O. Box 326, Montgomery, Alabama 36101, filed an application on April 13, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its pulp and paper mill near Montgomery, Alabama, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, UNION indicates that the volume of natural gas for which it requests certification is approximately 16,000 Mcf per day. This volume is estimated to displace the use of approximately 106,000 gallons of No. 6 fuel oil (3.0 percent sulfur) per day.

The eligible seller is Terra Resources, Inc., 5416 South Yale Avenue, Tulsa, Oklahoma 74135. The gas will be transported by Southern Natural Gas Company, 1900 Fifth Avenue North, Birmingham, Alabama 35203; and by Alabama Gas Corporation, 1918 First Avenue North, Birmingham, Alabama 35295, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest.

If ERA determines that an oral presentation is necessary, further notice will be given to UNION and any person filing comments and will be published in the **Federal Register**.

Issued in Washington, D.C., on May 11, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-006]

United States Steel Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On March 7, 1983, United States Steel Corporation (USS), 600 Grant Street, Pittsburgh, Pennsylvania 15230, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an

VOL
48
ISS
96
MY
17
1983
UMI

application for certification of an eligible use of approximately 6.807 billion cubic feet (Bcf) of natural gas at its steel manufacturing facility in Lorain, Ohio, and 3.478 Bcf at its chemical plant in Haverhill, Ohio. This volume of gas is expected to displace the use of approximately 16,979,000 gallons of No. 2 fuel oil (0.50 percent sulfur) and 716,000 barrels of No. 6 fuel oil (1.53 percent sulfur) per year at its facility in Lorain and the use of approximately 797,000 gallons of No. 2 fuel oil (0.5 percent sulfur) and 535,000 barrels of No. 6 fuel oil (0.3 percent sulfur) per year at its plant in Haverhill.

The application was amended on April 25, 1983, and again on May 10, 1983, to add four eligible sellers and two interstate pipelines; the volumes remain the same. The eligible sellers of the natural gas are Energy Buyers Service Corporation, P.O. Box 19832, Houston, Texas 77224; Cabot Corporation, P.O. Box 8807, South Charleston, West Virginia 25303; Exxon Company, U.S.A., P.O. Box 2180, Houston, Texas 77001; Texas Oil & Gas Corporation, 2700 Fidelity Union Tower, Dallas, Texas 75201; and Delhi Gas Pipeline Corporation, Fidelity Union Tower, Dallas, Texas 75201. The gas will be transported by Panhandle Eastern Pipe Line Company, P.O. Box 1642, Houston, Texas 77001; Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25325; Tennessee Gas Transmission, Inc., P.O. Box 254, Houston, Texas 77001; Ozark Gas Pipeline Corporation, P.O. Box 566, Route 5, Fort Smith, Arkansas 72901; and Natural Gas Pipeline Company of America, 122 South Michigan Avenue, Chicago, Illinois 60603. Local distributors will be Columbia Gas of Ohio, Inc., 99 North Front Street, Columbus, Ohio 43215, and East Ohio Gas Company, Cleveland, Ohio 44101.

Notice of that application was published in the **Federal Register** (48 FR 16101, April 14, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed USS's application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that USS's application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, two amendments, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 11, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6717–01–M

[Docket No. QF83–266–000]

City of Palm Springs; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

May 11, 1983.

On April 26, 1983, City of Palm Springs, (Applicant) of City of Palm Springs Wastewater Treatment Plant 4375 Mesquite Avenue, Palm Springs, California 92264, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The facility will be located at the Wastewater Treatment Plant in Palm Springs, California. The generating capacity of the facility will be 250 kilowatts. The primary energy source will be sludg digester gas. There are no other facilities owned by the Applicant located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. CP83–272–000]

Columbia Gas Transmission Corp.; Notice of Application

May 11, 1983.

Take notice that on April 13, 1983, Columbia Gas Transmission Corporation (Applicant), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No. CP83–272–000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the interruptible transportation of natural gas for Sohio Chemical Company (Sohio) and the transportation and exchange of natural gas with Michigan Wisconsin Pipe Line Company (Mich Wis), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The application indicates that pursuant to an agreement dated March 21, 1983, Michigan Consolidated Gas Company (Mich Con) has agreed to sell to Sohio an annual quantity of 25,000,000 dt equivalent of natural gas at a maximum daily delivery rate not to exceed 90,000 dt equivalent without the concurrence of Mich Con. The agreement states that this service is subject to interruption to the extent the gas supplies are required by Mich Con to provide adequate service to its own distribution customers. It is stated that the term of this agreement is for an initial period of two years commencing from the date of first deliveries and is automatically extendable for successive two year periods unless cancelled by either party by notification within 30 days of the end of the initial term or any two-year extension.

It is indicated that Sohio's Lima, Ohio, ammonia-products plant has lost its ability to compete with manufacturers of similar products due to the cost of natural gas from its present supplier. It is further stated that even small changes in the cost of natural gas have a direct impact on production costs and the economic well being of this plant since natural gas constitutes approximately 80 percent of the cost of ammonia production. It is indicated that production of ammonia, urea, and carbon dioxide at its Lima plant were shut down on July 21, 1982, and that subsequently 70 of its 271 employees have been laid off and additional layoffs are likely if the facility cannot be restored to full operations.

Applicant states that it has entered into an agreement with Sohio dated April 8, 1983, which provides for the transportation on a best-efforts basis of up to 90,000 dt equivalent of natural gas per day for Sohio. It is stated that Applicant's obligation to transport this gas is subject to the limits of available capacity in its existing facilities, its obligation to customers served pursuant to its FERC Gas Tariff, Original Volume No. 1, the transportation of its own gas production and purchases, and precedent transportation or exchange arrangements. Applicant states that it would receive the natural gas supplies from Panhandle Eastern Pipe Line Company (Panhandle) at an existing interconnection located in Emerald Township, Paulding County, Ohio. Such supplies would have previously been delivered from Mich Con to Mich Wis, by displacement, and from Mich Wis to Panhandle. It is stated that once a new interconnection between Mich Wis and Applicant, proposed in Docket No. CP83–253–000, is placed into service deliveries would be made directly from Mich Wis to Applicant. Redeliveries of such volumes, less company use and loss, would be made at an existing interconnection with Columbia Gas of Ohio, Inc. (Columbia of Ohio), located in Shawnee Township, Allen County, Ohio, for subsequent delivery by Columbia of Ohio to Sohio at an existing point of delivery near Lima, Ohio, it is asserted.

Applicant's proposed transportation rate consists of: (1) A charge of 40.11 cents per dt equivalent of gas received for transportation which Applicant states reflects its average systemwide unit storage and transmission costs, exclusive of company use and unaccounted-for gas, and subject to adjustment to reflect revised costs; (2) a 0.70 cent per dt equivalent surcharge associated with the General R&D Funding Unit of the Gas Research Institute; plus (3) a 2.85 percent retention of all volumes transported for company use and unaccounted-for gas.

It is stated that the new interconnection proposed in Docket No. CP83–253–000 would be utilized to effectuate direct deliveries to Applicant of the gas volumes transported for Sohio and to effectuate a proposed gas exchange service between Applicant and Mich Wis. According to the terms of an agreement dated March 23, 1983, Applicant and Mich Wis have agreed, upon request, and to meet an emergency, to deliver up to 100,000 Mcf of natural gas per day to the other if the deliveries of such can be made without impairment of the service obligations of the delivering party. Applicant states that this gas exchange arrangement will allow it to achieve additional operating flexibility and will assist in alleviating emergency situations for both companies. The agreement states that as soon as possible, but within a period of 60 days thereafter, the party which received the emergency gas supplies would be obligated to redeliver thermally equivalent quantities at the new interconnection.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Project No. 6127–001]

Energenics Systems, Inc.; Surrender of Preliminary Permit

May 11, 1983.

Take notice that Energenics Systems, Inc. (Energenics), Permittee for the proposed Union City Dam Project No. 6127, requested by petition dated April 12, 1983, that its preliminary permit be surrendered. The preliminary permit was issued on October 18, 1982, and would have expired on October 31, 1984. Energenics has determined that hydroelectric development is infeasible due to lack of adequate head and flow.

The surrender of the preliminary permit for Project No. 6127 is accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

17
1983
UMI

with the Commission and open to public inspection.

Applicant requests blanket authorization to transport gas for other interstate pipeline companies for periods of up to two years. It states it would comply with § 284.221 (d) of the Commission's Regulations.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Northwest Pipeline Corp; Notice of Application

May 11, 1982.

Take notice that on April 22, 1983, Northwest Pipeline Corporation (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP83-287-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon service at an exchange balancing point with El Paso Natural Gas Company (El Paso) located in La Plata County, Colorado, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is authorized to undertake certain activities pursuant to a San Juan gathering agreement dated January 31, 1974, as amended, between Applicant and El Paso. The gathering agreement, it is said, provides for the mutual gathering and exchange of natural gas in the San Juan Basin area of northwestern New Mexico and southwestern Colorado. Such authorization, it is stated, permitted Applicant and El Paso to utilize, among other things, a point of interconnection between their respective gathering systems in the San Juan Basin area referred to as the Point of Interconnection No. 2 in order to achieve the balancing of deliveries of exchange gas under the gathering agreement. Said Point of Interconnection No. 2 is located at the intersection of El Paso's Trunk 4A-39 pipeline and Applicant's Trunk K pipeline in La Plata County, Colorado, it is asserted.

Applicant states further that subsequent to the installation and initial operation of the Point of Interconnection No. 2, pressure differentials between gathering pipelines of Applicant and El Paso developed which made the exchange of balancing gas at that point impractical. Applicant asserts that as a direct consequence no balancing gas has been delivered by the parties at the Point on Interconnection No. 2 since December 1976. Moreover, it is stated, since the gathering agreement currently provides for four additional balancing points, Applicant and El Paso do not anticipate the need for the Point of Interconnection No. 2 in the future. Applicant and El Paso, it is said, have therefore entered into an amendatory agreement dated December 21, 1982, wherein the parties have mutually agreed to delete said balancing point from the gathering agreement. Accordingly, Applicant request permission and approval to abandon the use of Point of Interconnection No. 2 as an exchange balancing point under the gathering agreement.

Applicant states that no interruption, reduction or termination of natural gas service presently rendered by Applicant to any of its customers would result from the proposed abondonment.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214, or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP78-532-010]

Ozark Gas Transmission System; Notice of Amendment

May 11, 1983.

Take notice that on April 18, 1983, Ozark Gas Transmission System (Applicant), 2700 Fidelity Union Tower, Dallas, Texas 75201, filed in Docket No. CP78-532-010 an amendment to its pending application filed in Docket No. CP78-532-009 pursuant to Section 7(c) of the Natural Gas Act so as to reflect the inclusion of the Turkey Flat Compressor Station in Applicant's request for waiver of certain noise limitations, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Applicant asserts that the Turkey Flat and the ONG compressor stations are located on the same yard site. It is stated that the existing ambient noise level at the site exceeds the 55dB(a) limit ordered by the Commission and that without the requested waiver Applicant would be unable to operate either of the compressor stations at the location.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-295-000]

Seagull Pipeline Corp.; Notice of Application

May 11, 1983.

Take notice that on April 27, 1983, Seagull Pipeline Corporation (Applicant), 1100 Louisiana, Houston, Texas 77002, filed in Docket No. CP83-295-000 an application pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 and § 284.127 of the Commission's Regulations for authority to transport certain quantities of natural gas for El Paso Natural Gas Company (El Paso), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is currently engaged in the transportation of natural gas on behalf of El Paso pursuant to a transportation agreement dated June 8, 1979. It is stated that service under this agreement commenced July 27, 1979, for an initial term of two years under the self-implementing provisions of § 284.122(a) of the Commission's Regulations and was extended for a period of two years commencing July 27, 1981, pursuant to § 284.125 of the Commission's Regulations. In order that the transportation service might be continued on an uninterrupted basis, Applicant has requested the Commission issue an order authorizing a continuation of the transportation arrangement for a period of two years commencing July 28, 1983, and ending July 27, 1985.

Applicant proposes to transport up to 36,000 Mcf of natural gas per day. Applicant states that it would transport El Paso's volumes from points located on Applicant's pipeline facilities in Live Oak County, Texas, to a point near the East Chapa Plant also in Live Oak County, Texas, or other mutually agreeable points. It is stated that pursuant to the original transportation agreement dated June 8, 1979, Applicant proposes to charge 4.25 cents per Mcf for the service.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

[Docket Nos. RP81-86-009 and RP80-102]

Southern Natural Gas Co.; Filing of Pipeline Refund Plan

May 10, 1983.

Take notice that on March 24, 1983, Southern Natural Gas Company (Company) submitted for filing a proposed refund plan in the above-captioned dockets.

Any person desiring to be heard or to protest said complaint should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this complaint are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP80-440-002]

Transcontinental Gas Pipe Line Corp.; Petition To Amend

May 11, 1983.

Take notice that on April 6, 1983, Transcontinental Gas Pipe Line Corporation (Petitioner), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP 80-440-002 a petition to amend the order issued November 6, 1980, in Docket No. CP80-440 pursuant to Section 7(c) of the Natural Gas Act so as to authorize an increase in the amount of natural gas to be transported for the account of Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), individually and as agent for Tenneco Oil Company (TOC), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

By order issued November 6, 1980, Petitioner states that it was authorized to transport up to the dekatherm equivalent of 12,000 Mcf of natural gas per day on an interruptible basis for Tennessee individually and as an agent for TOC. It is further stated that the established point of delivery for gas received by Petitioner from Tennessee is Petitioner's metering station at East Lake DeCade in Terrebonne Parish, Louisiana.

Petitioner states that pursuant to a February 15, 1983, amended transportation agreement, Petitioner proposes to increase its transportation volume on behalf of Tennessee, individually and as agent for TOC, on an interruptible basis up to the dekatherm equivalent of 20,000 Mcf per day as a result of an anticipated increase in deliverability from wells. Secondly, it is asserted that a new point of receipt for gas tendered by Tennessee would be added to include the point of interconnection between TOC or TOC's agent, Tennessee, on Petitioner's Southeast Louisiana Gathering System in Terrebonne Parish, Louisiana. Thirdly, Petitioner states that a new point of measurement for gas received by Petitioner would be established at or near Petitioner's Southeast Louisiana Gathering System in Terrebonne Parish, Louisiana. It is stated that Petitioner would construct the above referenced facilities, subject to reimbursement by Tennessee, under its blanket certificate issued in Docket No. CP82-426-000.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a

BILLING CODE 6717-01-M

[Docket No. CP83-271-000]

United Gas Pipeline Co.; Request Under Blanket Authorization

May 11, 1983.

Take notice that on April 12, 1983, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP83-271-000 a request pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that United proposes to install a 1-inch sales tap for the delivery of gas to Entex, Inc. (Entex), for resale to the residence of Richard Wilkinson (Wilkinson) under the authorization issued in Docket No. CP82-430-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes the installation of a 1-inch sales tap on its 1-inch Longview-Palestine Line in the Francisco Cordova Survey A-7, Overton, Texas. This tap would be utilized to deliver an estimated 80 Mcf of gas annually, through the distributor, Entex, it is stated. It is further stated that Entex would resell such gas to Wilkinson, a residential customer.

United also asserts that there would be no increase in the customer's contractual maximum daily quantity nor its entitlement under its effective curtailment plan. Gas flowing through this tap would be sold under United's Rate Schedule DG-N, it is stated.

United estimates the cost of the tap to be $533.00 and states that Entex would reimburse United for the cost of construction.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL83-21-000]

Basin Electric Power Cooperative and Merrill Lynch Leasing, Inc.; Filing

May 12, 1983.

Take notice that on May 3, 1983, Basin Electric Power Cooperative ("Basin Electric") and Merrill Lynch Leasing Inc. ("Merrill Lynch") filed a request for a declaratory order that neither Merrill Lynch nor St. Paul Bank for Cooperatives ("Lender") would be considered to be a "public utility" under Section 201(e) of the Federal Power Act by reason of its participation in a leveraged lease transaction with Basin Electric. Basin Electric and Merrill Lynch state that Basin Electric is required to comply with a rate design covenant in its mortgage with the Rural Electrification Administration ("REA") and is subject to the direction of the REA in its administration of such covenant. According to Basin Electric and Merrill Lynch, as an "REA coop", Basin Electric is not subject to regulation as a "public utility" under Part II of the Federal Power Act.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before May 20, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF83-220-000]

Chevron U.S.A. Inc.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

May 12, 1983.

On March 14, 1983, Chevron U.S.A. Inc. (Applicant), Manufacturing Department, 575 Market Street, San Francisco, California 94105, Attention: Mr. C. S. Smith, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The bottoming cycle cogeneration facility will be located in Jackson County, Mississippi. Waste heat from refinery processes will be recovered in waste heat boilers and supplies to a condensing steam turbine generator. The primary energy sources to the thermal processes are natural gas and oil. No supplementary fuel will be used in the waste heat boilers. The electric power production capacity of the facility will be 6,000 kilowatts.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 20 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP82-485-000]

Columbia Gas Transmission Corp.; Withdrawal of Application and Termination of Proceedings

May 12, 1983

Take notice that on February 28, 1983, Columbia Gas Transmission Corporation (Columbia) filed in Docket No. CP82-485-000 a notice of withdrawal pursuant to Rule 216 of the Commission's Rules of Practice and Procedure (18 CFR 385.216) of its application for a certificate of public convenience and necessity pursuant to Section 7(c) of the Natural Gas Act, filed August 13, 1982, in the above mentioned docket.

In its application, Columbia proposed to provide its wholesale customers for a period of one year a special sales incentive service under the provsions of a new rate schedule (SSI) to be incorporated in Columbia's FERC Gas Tariff, Original Volume No. 1. Under its new rate schedule, Columbia proposed to make available to eligible customers certain quantities of natural gas at a rate designed to enable Columbia's customers to regain consumers lost to alternate fuels, as well as to prevent further market erosion and to reduce Columbia's exposure to take-or-pay obligations.

On December 22, 1982, the Commission issued an order in Docket No. CP82-485-000 (21 FERC § 61,326) which among other things set the matter of permanent certification for formal hearing. By order issued February 3, 1983 (22 FERC § 63,058), the presiding Administrative Law Judge denied a request to certify an offer of settlement to the Commission and scheduled a hearing at 10:00 a.m. on May 17, 1983, at the FERC, 825 North Capitol Street, Washington, D.C. On February 28, 1983, Columbia filed the instant notice of withdrawal of its application.

Take further notice that, within the time period specified in Rule 216, no participant, or other person filing a timely motion to intervene has filed a motion in opposition, nor has the Commission or the presiding Administrative Law Judge issued an order disallowing the withdrawal. Accordingly, Columbia's application in Docket No. CP82-485-000 is effectively withdrawn and related proceedings are terminated.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-482-000]

Connecticut Light and Power Co.; Filing

May 12, 1983.

The filing Company submits the following:

Take notice that on April 28, 1983, Connecticut Light and Power Company (CL&P) tendered for filing as an initial rate schedule an agreement (the Agreement) between CL&P, the Hartford Electric Light Company (HELCO), Western Massachusetts Electric Company (WMECO, and together with CL&P and HELCO, the NU Companies) and Green Mountain Power Corporation (GMP). The Agreement, dated as of May 4, 1982, provides for the NU Companies to sell to GMP excess power from the system of the NU Companies ("system power") that may be available on a daily or weekly basis ("a transaction"). CL&P states that the timing of transactions cannot be accurately estimated but that the NU Companies would offer to sell such system power to GMP only when it was economic for them to do so. GMP would accept such an offer only if it was economic for GMP to do so.

CL&P states that GMP will pay a capacity to the NU Companies for each transaction in an amount equal to the kilowatts of system capacity utilized by the NU Companies to supply system power to GMP during each hour of a transaction, times a rate negotiated between the parties prior to each transaction, not to exceed $0.0175 per kilowatt. GMP will also pay an energy charge to the NU Companies for each transaction in an amount equal to the kilowatt hours provided by the NU Companies during such transaction times an energy charge rate. The energy charge rate is based on the heat rate and the replacement fuel price of the generating unit(s) which the NU Companies determine to be available to provide power at the time a transaction is agreed to by the parties.

CL&P requests an effective date of June 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been served upon HELCO, WMECO and GMP.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-483-000]

Duke Power Co.; Filing

May 12, 1983.

The filing Company submits the following:

Take notice that on April 28, 1983, the Duke Power Company tendered for filing amendments dated November 12, 1982 to the Restated Interconnection Agreement date June 21, 1982, which Restated Interconnection Agreement superseded the Interconnection Agreement dated March 6, 1978 between the Company and North Carolina Municipal Power Agency Number 1 (Power Agency). Power Agency owns 75 percent of Unit No. 2 of the Company's Catawba Nuclear Station. Under the terms of the Agreement, Duke will interconnect its generation and transmission system with the Catawba Nuclear Station, presently being constructed, and wheel electric power and energy to the members of Power Agency. Duke states that service under the Restated Interconnection Agreement, as amended, is expected to being on July 1, 1983.

Duke further states that these amendments to the Restated Interconnection Agreement, which Agreement is on file with the Commission, do not substantively change the pricing provisions for Duke's services to Power Agency.

Duke indicates that the modifications to the Restated Interconnection Agreement were requested by Power Agency following the inclusion of similar provisions in the Interconnection Agreement dated August 1, 1980, as amended October 22, 1982, between the Company and Piedmont Municipal Power Agency, a joint agency proposing to purchase the remaining 25 percent of Unit No. 2 of the Company's Catawba Nuclear Station.

VOL 48 ISS 96 MY 17 1983 UMI

Duke requests an effective date of November 12, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were mailed to Power Agency, the North Carolina Utilities Commission, and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP83-276-000]

Gasdel Pipeline System Inc.; Application

May 12, 1983

Take notice that on April 14, 1983, Gasdel Pipeline System Incorporated (Applicant), P.O. Box 570, 80 Park Plaza, Newark, New Jersey 07101, filed in Docket No. CP83-276-000 an application pursuant to Section 7 of the Natural Gas Act and Subpart F of Part 157 of the Commission's Regulations for a blanket certificate of public convenience and necessity authorizing the construction, acquisition, and operation of certain facilities and the transportation and sale of natural gas and for permission and approval to abandon certain facilities and service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 2, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-278-000]

Montana-Dakota Utilities Co.; Application

May 12, 1983.

Take notice that on April 15, 1983, Montana-Dakota Utilities Co. (Applicant), 400 North Fourth Street, Bismarck, North Dakota 58501, filed in Docket No. CP83-278-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to continue to sell natural gas to Michael W. Scott, d/b/a Byron Gas Service (Byron), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that is has been serving Byron under its Rate Schedule G-1 since 1969 but upon investigation realizes that it does not possess certificate authorization from the Commission. Applicant requests here authorization to continue to sell approximately 60,000 Mcf of natural gas annually to Byron, an intrastate natural gas distribution company, for resale. Service to Bryon would be continued under Applicant's Rate Schedule G-1, it is asserted. No new facilities would be required to render this service, Applicant states.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 2, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be repesented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-485-000]

Montaup Electric Co.; Filing

May 12, 1983.

The filing Company submits the following:

Take notice that on April 29, 1983, Montaup Electric Company (Montaup) tendered for filing a revised contract demand agreement between Montaup and the Town of Middleborough, Massachusetts (Middleborough). The revised agreement supersedes an agreement for contract demand service between Montaup and Middleborough. Under the revised agreement Montaup will make specified amounts of capacity and associated energy available to Middleborough through October 31, 1988 and will provide service thereafter in accordance with the conditions of the agreement.

Montaup requests waiver of the Commission's notice requirements in order to allow an effective date of May 1, 1983.

Copies of this filing have been served on Middleborough and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-484-000]

Potomac Electric Power Co., Filing

May 12, 1983.

The filing Company submits the following:

Take notice that on April 28, 1983, Potomac Electric Power Company (Potomac) tendered for filing the following rate agreements:

(1) Power Supply Agreement, dated as of May 2, 1983 among Ohio Edison Company (Ohio Edison), Pennsylvania Power Company (Penn Power), Monongahela Power Company (Monogahela), West Penn Power Company (West Penn), and the Potomac Edison Company (Potomac Edison).

(2) Power Resale Agreement, dated as of May 2, 1983 among Monongahela, West Penn, Potomac Edison, and Potomac Electric Power Company (PEPCO).

The Agreements set forth terms pursuant to which Ohio Edison and Penn Power will deliver to Monongahela, West Penn and Potomac Edison 150 megawatts per hour of energy for resale to PEPCO for the period May 2, 1983 until amended or terminated.

Potomac requests an effective date of May 2, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-13216 Filed 5-16-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-487-000]

South Carolina Electric & Gas Co.; Filing

May 12, 1983.

The filing Company submits the following:

Take notice that on April 29, 1983, South Carolina Electric & Gas Company (SCE&G) tendered for filing Ninth Revised Sheet No. 5, Ninth Revised Sheet No. 6, Tenth Revised Sheet No. 5 and Tenth Revised Sheet No. 6 to its FERC Electric Tariff, Original Volume No. 1. These sheets contain proposed changes to SCE&G's rates and charges to its municipal, rural electric cooperative and public power body sales-for-resale customers.

SCE&G proposes to place the revised tariff sheets containing the first phase of the proposed rate increase into effect on June 28, 1983, sixty days after filing. SCE&G proposes that the second phase of the rate increase take effect on June 29, 1983, sixty-one days after filing.

SCE&G states that the proposed rates would increase revenues by approximately $16,200,000 for the 12 month period ending June 30, 1984. The first phase of the proposed rates would increase revenues by approximately $9,000,000 over the same period.

SCE&G states that the proposed increased rates are necessitated by the fact that it is realizing an unreasonably low rate of return on sales to its jurisdictional customers. This return will be even lower with the placing into service of the Company's V.C. Summer Nuclear Plant, in which the Company's investment is approximately $858,000,000.

Copies of the filing have been served upon SCE&G's jurisdictional customers and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will

VOL 48 ISS 96 MY 17 1983 UMI

not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EF83-4011-000]

Southwestern Power Administration; Filing

May 12, 1983.

The filing Company submits the following:

Take notice that the Assistant Secretary for Conservation and Renewable Energy of the Department of Energy on April 27, 1983, submitted to the Commission pursuant to Delegation Order No. 0204-33, the following proposed System rate schedules of the Southwestern Power Administration:

Rate Schedule P-4, Hydro Peaking and Seasonal Peaking Power
Rate Schedule F-4A, Firm Power from Integrated System
Rate Schedule F-4B, Firm Power through Oklahoma Utilities Companies
Rate Schedule EE-2 (Revised), Excess Energy
Rate Schedule IC-2 (Revised) Interruptible Capacity

The Assistant Secretary requests that these System rate schedules be confirmed and approved on a final basis by the Commission to be effective for the period October 1, 1983, through September 30, 1986. The Assistant Secretary also requests that Commission confirmation and approval of the existing rate to Tex-La Electric Cooperative, Inc., under Section 2 of Contract No. 14-02-001-864 be extended for the period October 1, 1983, through April 1, 1984. The Assistant Secretary indicates that 1982 Power Repayment Studies show the need for a 38.3 percent increase in annual revenues from the Integrated System to meet present cost recovery criteria. The Assistant Secretary states that the proposed rate schedules would produce ultimate average annual System gross revenues of approximately $90.2 million. This would be an increase of approximately $25 million above the revenues produced by the existing rate schedules which have been in effect since April 1, 1979, according to the Assistant Secretary.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-13218 Filed 5-16-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-260-000]

Tennessee Gas Pipeline Co., a Division of Tenneco Inc. and Columbia Gas Transmission Corp.; Application

May 12, 1983.

Take notice that on March 31, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001, and Columbia Gas Transmission Corporation (Columbia), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No. CP83-260-000 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas through the Ozark Gas Transmission System (Ozark) for Mississippi River Transmission Corporation (MRT), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that pursuant to an agreement between Applicants and MRT dated November 9, 1982, Applicants would receive a contract quantity of up to 25,000 Mcf of natural gas per day produced in the Arkoma Basin in Arkansas at various points along Ozark and delivery equivalent volumes to Natural Gas Pipeline Company of America for the account of MRT. It is asserted that each Applicant would utilize an equivalent portion of its respective capacity entitlement in Ozark.

Applicants states that in accordance with the agreement MRT has agreed to pay Applicants a monthly demand charge plus a commodity charge applicable to Ozark's FERC Tariff Rate Schedule T-1.

It is asserted that the proposed service would be beneficial to MRT in that it would provide MRT with a means of transporting an additional supply of natural gas without its having to construct additional duplicative facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 2, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-13219 Filed 5-16-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-489-000]

Union Electric Co.; Filing

May 12, 1983.

The filing Company submits the following:

Take notice that on May 2, 1983, Union Electric Company tendered for filing an Electric Service Agreement dated April 28, 1983 between Missouri Utilities Company and Union Electric Company. Said Electric Service Agreement provides for the continued delivery of electric service to Missouri Utilities Company at the present rate.

The parties propose that said Agreement and Service Schedule supersede FERC Electric Tariff W-3 for the reason that they have made application for approval of the merging of their facilities.

The proposed effective date of the new agreements and rate schedules is July 1, 1983.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 27, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-13220 Filed 5-16-83; 8:45 am]

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of April 4 Through April 8, 1983

During the week of April 4 through April 8, 1983, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

Fred C. Hart Associates, Inc., 4/4/83, HFA-0124

On April 1, 1983 the DOE issued a Decision and Order concerning an Appeal from a Freedom of Information Act (FOIA) request that was denied in part by the Assistant Manager for Administration of the Albuquerque Operations Office. The appellant sought the release of a successful proposal to operate a DOE nuclear facility, much of which had been withheld pursuant to the FOIA's Exemption 4. In considering the appeal, the Office of Hearings and Appeals determined that some of the previously withheld material was properly withheld, some should be released, and the remainder should be remanded to the Assistant Manager for a more complete determination. Accordingly, the Appeal was granted in part.

Systematic Management Services, Inc., 4/07/83, HFA-0113

Systematic Management Service, Inc. filed an Appeal from a partial denial by the Manager of the Chicago Operations Office of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that (1) numerical weights employed by a Source Evaluation Board in evaluating contract proposals became nondeliberative final determinations upon the receipt of contract proposals and could not be withheld under Exemption 5, (2) the total cost of a concurrent DOE contract should be released but component costs that revealed the contractor's allocation of costs and were exempt from disclosure under Exemption 4, (3) confidential commercial information obtained from a person and incorporated in agency documents may be withheld under Exemption 4, (4) DOE officials are not required to provide "yes" or "no" answers or similarly direct responses to questions contained in a Request for Information submitted under the FOIA, and (5) the search for responsive documents conducted by the Authorizing Official was adequate.

Request for Exception

Texas Armada Refining Co., 4/8/83; BEE-1696

Texas Armada Refining Co. filed an Application for Exception from the provisions of 10 CFR 211.67 in which the firm sought relief from entitlements obligations incurred due to errors made in the firm's purchase invoices. In considering the request, the DOE found that the firm's invoicing errors occurred during the period March through September 1980, and were not subject to the provisions of the clean-up rule. Furthermore, the impact of the errors was insignificant. Accordingly, exception relief was denied.

Interlocutory Order

Office of Special Counsel, 4/4/83; HRZ-0141

The Office of Special Counsel sought an order directing Texaco Inc. to file a Statement of Legal Objection to a Proposed Remedial Order which OSC issued to the firm on May 1, 1979. Finding that the filing of the Statement of Legal Objections was necessary to bring the case to an orderly resolution, OHA granted the request.

Supplemental Order

Huntway Refining Co., 4/5/83; HCX-0059

Huntway Refining Company filed, pursuant to a District Court's Remand Order, supplemental material to its earlier Application for Exception from the provisions of 10 CFR 211.67, in which the firm had sought exception relief from entitlements purchase obligations pertaining to crude oil purchased for starting inventory for a new refinery. In considering the supplemental material, DOE found that the firm was not entitled to any greater exception relief than was previously granted.

Accordingly, DOE found that no modification of the previous Decision and Order, which granted Huntway only part of the exception relief requested, was warranted. The important issues discussed in the Decision and Order were (i) the effect of improper grants by ERA of starting inventory exclusion adjustments to new refiners and (ii) the specific criteria used by OHA in evaluating exception relief to firms that purchased new or expanded inventories.

Refund Applications

Standard Oil Company (Indiana)/Akin Oil Company, Inc. et al., 4/4/83; *RF21-144 et al.*

The DOE issued a Decision and Order concerning 89 Applications for Refund filed by wholesalers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of thge injury and the formula outlined in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). In considering these applications, the DOE concluded that each of the 89 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding total $945,190.

Standard Oil Co. (Indiana)/Bentley's Amoco, 4/5/83; *RF21-3312*

On February 14, 1983, the Office of Hearings and Appeals of the Department of Energy issued a Decision and Order approving refunds from the Standard Oil Company (Indiana) consent order fund for 206 claimants. *Standard Oil Co. (Indiana)/Jim Gandy Service*, 10 DOE ¶—— (February 14, 1983) (Case No. RF21-780). One of those claimants, Bentley's Amoco (Bentley), was granted a refund on the basis of a total purchase volume of 2,451,429 gallons of motor gasoline. Subsequent to the issuance of the February 14 Decision, Bentley informed the DOE that incorrect volume figures had been submitted in its refund application, and that the correct volume of motor gasoline it purchased from Standard Oil which qualified for a refund was only 1,529,879 gallons. In considering the material submitted by Bentley, the DOE determined that Bentley should be granted a refund on the basis of its purchases of 1,529,879 gallons of motor gasoline. Accordingly, since Bentley elected to apply for a refund based on the presumption of injury methodology, *see Office of Special Counsel*, 10 DOE ¶ 85,048 (1982), the DOE approved a refund of $557 rather than $892 as set forth in the February 14 Decision. The $557 refund is equal to 40 percent of 1,529,879 gallons of motor gasoline purchased times the applicable *pro rata* share of the Standard Oil consent order fund as of February 14, 1983 ($.0009097 per gallon including interest).

Standard Oil Company (Indiana)/Carl J. Preisler, et al., 4/6/83; *RF21-1601 et al.*

The DOE issued a Decision and Order concerning 192 Applications for Refund from branded retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶ 85,048 (1982). Each retailer therefore submitted detailed information concerning its Amoco purchase volumes. After analyzing this information, the DOE

VOL 48 ISS 96 MY 17 1983 UMI

concluded that each of the 192 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases during the consent order period. Accordingly, these applications were granted in full.

Standard Oil Company (Indiana)/Jerry's Norwalk Standard, et al., 4/5/83; RF21–1921 et al.

On Decision 23, 1982 the Office of Hearings and Appeals issued a Decision and Order implementing special refund procedures for the distribution of a 72,000,408 fund obtained by the DOE through a consent order with the Standard Oil Company (Indiana) (Amoco). *Office of Special Counsel*, 10 DOE ¶ 85,048 (1982). On April 5, 1983 the DOE issued a Decision and Order concerning 24 Applications for Refund filed by retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in the December 23 Decision. In considering these applications, the DOE concluded that each of the 24 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding totaled $17,687.

Standard Oil Company (Indiana)/Russ' Super Standard, 4/4/83; RF21–1606

The DOE issued a Decision and Order concerning 176 Applications for Refund by retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶ 85,048 (1982). In considering these applications, the DOE concluded that each of the 176 applications should receive a refund based upon the total volume of their Amoco middle distillate purchases. The refunds granted in this proceeding totaled $162,846

Dismissals

George B. Breznay,

Director, Office of Hearings and Appeals.

[FR Doc. 83–13095 Filed 5–16–83; 8:45 am]

BILLING CODE 6450–01–M

Issuance of Decisions and Orders; Week of April 11, Through April 25, 1983

During the week of April 11 through April 15, 1983 the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Physical Sciences, Inc, 4/15/83; HFA–0122

Physical Sciences, Inc. filed an Appeal from a partial denial by the Morgantown Energy Technology Center of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the denying official properly withheld certain material pursuant to exemptions four and five of the FOLA. An important issue considered in the Decision and Order was whether release of portions of the withheld material would harm the competitive position of the firm that submitted the information.

Remedial Order

Timco Oil Co., 4/11/83; HRD–0061

Timco Oil Company (Timco) objected to a Proposed Remedial Order which the Los Angeles Office of the Economic Regulatory Administration (ERA) issued to the firm on April 30, 1982. In the Proposed Remedial Order, the ERA found that Timco improperly certified one of its leases as qualified for stripper status and sold crude oil produced from that lease at prices in excess of those calculated pursuant to the Mandatory Petroleum Price Regulations. The DOE therefore concluded that the Proposed Remedial Order should be issued as a final Order. The important issues discussed in the Decision and Order include (i) whether Timco properly aggregated the rights to produce crude oil from its three leases and (ii) whether Timco's alleged ignorance of DOE regulations excused its non-compliance with those regulations.

Request for Modification and/or Rescission

Economic Regulatory Administration, 4/11/83; HRR–0048

The DOE's Office of Special Counsel of the Economic Regulatory Administration (ERA) filed Motions for Reconsideration of an Evidentiary Hearing and Discovery which was granted to Exxon Company, U.S.A. in a Decision and Order issued to the firm on December 8, 1982. *Exxon Company, U.S.A.*, 10 DOE ¶ 84,022 (1982). In considering the request for reconsideration, the DOE found that the ERA had failed to show that any modifications in the December 8 determinations were necessary in order to ensure that the underlying proceeding was conducted in an appropriate manner. Accordingly, the Motions for Reconsideration were denied.

Motion for Discovery

Exxon Company, U.S.A., Gulf Oil Corporation, Cities Service Co., 4/13/83; HED–0119, HEH–0016

Exxon Company, U.S.A., Gulf Oil Corporation, and Cities Service Company filed a joint Motion for Discovery and Evidentiary Hearing in connection with a Proposed Decision and Order issued to Husky Oil Company on February 4, 1983, in Case No. BEX–0210. In their Motion, the intervenors asserted that a full understanding of Husky's financial position during the base period as well as during the period January 1978 through January 1981 is crucial for an evaluation of Husky's eligibility for exception relief. The intervenors therefore requested access to detailed data related to Husky's financial and operating results during the subject periods. The parties also requested an evidentiary hearing to resolve certain disputed factual issues. In this Decision and Order, the Office of Hearings and Appeals stated that it had requested from Husky certain information which was similar in scope and character with data requested by the intervenors. The OHA denied the discovery request because it would be redundant to the data that Husky had submitted or would submit pursuant to the OHA's requests. The OHA, however, determined that an evidentiary hearing would be useful in resolving certain factual issues. Accordingly, the request for Evidentiary hearing was granted.

Interlocutory Order

Texaco Inc., 4/12/83; HRZ–0142

Texaco Inc. sought an order relieving it from the obligation to comply with a discovery stipulation it had entered into with the Office of Special Counsel. The Office of Hearings and Appeals (OHA) found that the discovery sought by OSC was no longer relevant in view of Texaco's withdrawal of affirmative defenses to which the discovery related. Although it found that Texaco had failed to show that manifest injustice would result from requiring it to abide by the terms of the stipulation, OHA granted the motion, finding that the continuation of the discovery process would delay the resolution of the case on its merits.

Refund Application

Standard Oil Company (Indiana)/Ferncreek Amoco, et al., 4/15/83; RF21–4264 et al.

The DOE issued a Decision and Order concerning 180 Applications for Refund from retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶ 85,048 (1982). In considering these applications, the DOE concluded that each of the 180 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding total $174,254.

Standard Oil Company (Indiana)/Retzer Oil Company, et al., 4/15/83; RF21–1015 et al.

The DOE issued a Decision and Order concerning 8 Applications for Refund filed by applicants who operate as both wholesalers and retailers of Amoco motor gasoline. All of these firms elected to apply for a refund based upon the presumption of injury and the formulae outlined in *Office of Special Counsel*, 10 DOE ¶ 85,048 (1982). In considering these applications, the DOE concluded that each of the 8 applicants should receive a refund based upon the total volume of their Amoco motor gasoline purchases. The refunds granted in this proceeding total $300,605.

BILLING CODE 6450–01–M

Issuance of Proposed Decision and Order; Week of April 25 Through April 29, 1983

During the Week of April 25 through April 29, 1983 the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of full text of this proposed decision and order are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Office Building, 12th and Pennsylvania Ave., NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

Dated: May 10, 1983.

George B. Breznay,

Director, Office of Hearings and Appeals.

Transcontinental Oil Corp., Shreveport, Louisiana; HEE–0062 Petroleum

Transcontinental Oil Corporation (Transcontinental) filed an Application for Exception from the provisions of the EIA reporting requirements. The exception request, if granted, would permit Transcontinental to be relieved of the obligation to file Form EIA–23, "Annual Survey of Domestic Oil and Gas Reserves," for the report year 1982. On April 29, 1983, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied.

BILLING CODE 6450–01–M

Cases Filed; Week of April 22 Through April 29, 1983

During the week of April 22 through April 29, 1983, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of Apr. 22 through Apr. 29, 1983]

Date	Name and location of applicant	Case No.	Type of submission
Apr. 22, 1983	Otis Ainsworth, Washington, D.C.	HEE–0066	Price Exception. If Granted: Otis Ainsworth would receive retroactive exception relief from the provisions of 10 CFR Part 212, Subpart D, regarding the sales of crude oil produced from the Thompson Creek, Bentonia, and Sandersville fields during the period 1973 to 1981.

VOL 48 ISS 96 MY 17 1983 UMI

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of Apr. 22 through Apr. 29, 1983]

Date	Name and location of applicant	Case No.	Type of submission
Do	Plateau, Inc., Washington, D.C.	HED-0128	Motion for Discovery. If granted: Discovery would be granted to Plateau, Inc. in connection with the Application for Exception filed by the U.S. Department of Interior and the Minerals Management Service (Case No. HEE-0063).
Do	Texaco Inc., White Plains, N.Y.	HRZ-0147	Interlocutory Order. If granted: The Office of Special Counsel would be deemed to have admitted certain facts concerning Texaco Inc.'s West Cote Blanche Bay producing area.
Do	Charles Barnes, Lawrence, Kans	HFA-0141	Appeal of an Information Request Denial. If granted: Charles Barnes would not be required to pay fees incurred in his Freedom of Information Request for documents relating to Spencer Chemical Company.
Do	Corpening Enterprises, Inc., Washington, D.C.	HRH-0017	Request for Evidentiary Hearing. If Granted: An evidentiary hearing would be convened in connection with the Statement of Objections submitted by Corpening Enterprises to the Proposed Remedial Order issued to the firm (Case No. HRO-0136).
Do	Ergon, Inc., Washington, D.C.	HER-0056	Request of Modification/Rescission. If Granted: The February 24, 1981, Decision and Order issued to Ergon, Inc. would be modified to consolidate the Entitlements exception relief previously granted in Decision and Orders issued on March 19, 1981 (Case Nos. BEE-1611 and BEE-1620) and January 6, 1982 (Case No. BEX-0191).
Do	Resources Extraction & Processing, Inc., Washington, D.C.	HRD-0129, HRH-0129	Motion for Discovery and Request for Evidentiary Hearing. If granted: Discovery would be granted and an evidentiary hearing would be convened in connection with the Statement of Objections submitted by Resources Extraction & Processing, Inc. to a Proposed Remedial Order (Case No. HRO-0121) issued to the firm.

NOTICES OF OBJECTION RECEIVED

[Week of Apr. 22 to Apr. 25, 1983]

Date	Name and location of applicant	Case No.
4/25/82	Navajo Refining Company, Washington, D.C.	BYX-0204.
4/25/83	Thriftway Company, Washington, D.C.	HYX-0019.

REFUND APPLICATIONS RECEIVED

[Week of Apr. 22 to Apr. 29, 1983]

Date	Name of refund proceeding/ name of refund applicant	Case No.
4/25/83	Ozone Gas Processing (I)/International Drilling and Energy Corporation.	RF27-2.
4/25/83	Ozone Gas Processing (I)/ Nalley, Inc.	RF27-3.

BILLING CODE 6450-01-M

FEDERAL COMMUNICATIONS COMMISSION

[MM Docket No. 83-446, File No. BPH-810226AC, etc.]

Athens Broadcasting Corp. et al.; Hearing Designation Order

Adopted: April 29, 1983.
Released: May 9, 1983.

In re applications of Athens Broadcasting Corporation, Clarksville, Virginia, Req: 98.3 MHz, Channel 252, 3.0 kW (H&V), 220 feet, MM Docket No. 83-446, File No. BPH-810226AC; Clarksville Broadcasting Company Inc., Clarksville, Virginia, Req: 98.3 MHz, Channel 252, 3.0 kW (H&V), 213 feet, MM Docket No. 83-447, File No. BPH-810812AH; Mecklenburg Broadcasting Company, Inc., Clarksville, Virginia, Req: 98.3 MHz, Channel 252, 3.0 kW (H&V), 300 feet, MM Docket No. 83-448, File No. BPH-820212AL; for construction permit for a new FM station; designating applications for consolidated hearing on stated issues.

By the Chief, Mass Media Bureau.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications filed by Athens Broadcasting Corporation (Athens), Clarksville Broadcasting Company, Inc. (Clarksville) and Mecklenburg Broadcasting Company, Inc. (Mecklenburg).

2. *Athens.* Section 73.1125 of the Commission's Rules requires that the main studio of an FM station be located within the city of license, but that on a showing of good cause may be located outside that community. Athens proposes to locate its main studio at its transmitter site, which is outside the city limits of Clarksville. Because applicant has not submitted a request to locate its main studio outside the community of license, pursuant to § 73.1125(a)(3) of the Commission's Rules, an issue will be specified.

3. *Mecklenburg.* The information submitted by applicant concerning the overall height of its tower above ground does not agree with the data filed with the Federal Aviation Administration. Therefore, applicant must amend its application or amend the data filed with the FAA, whichever is appropriate. Because of this discrepency, no determination has been reached that the antenna proposed by Mecklenburg would not constitute a menace to air navigation. Therefore, an issue regarding this matter is required.

4. *Clarksville and Mecklenburg.* Applicants for new broadcast stations are required to give local notice of the filing of their applications in accordance with § 73.3580 of the Commission's Rules. They must then file proof of such notice or certify that they have or will comply with the public notice requirement. We have no evidence, however, that Clarksville or Mecklenburg have done-either. If they have not already done so, they will be required to file a statement that they have complied with the public notice requirement with the Administrative Law Judge within 30 days of the release of this Order.

5. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, the areas and populations which would receive FM service of 1 mV/m or greater intensity, together with the availability of other primary aural services in such areas, will be considered under the standard comparative issue for the purpose of determining whether a comparative preference should accrue to any of the applicants.

6. *Other matters.* Mecklenburg filed its application for construction permit on August 18, 1981. A preliminary engineering study revealed that the proposed antenna site was separated from WGOL-FM, Lynchburg, Virginia, by 64 miles instead of the required minimum of 65 miles as specified in § 73.207 of the Rules. Accompanying Mecklenburg's application was a request for waiver of § 73.207. The Mecklenburg application was returned as unacceptable for filing on January 26, 1982 because of short-spacing. Since this was not in accordance with established Commission procedure which, in a competitive proceeding, allows the applicant 30 days in which to cure the deficiency, *Trend Broadcasting, Inc.*, 18 F.C.C. 2d 749 (1963); *Nelson County Broadcasting Co., Inc.*, 64 F.C.C. 2d 1932 (1977), the Commission, on its own motion, reaccepted the Mecklenburg proposal *nunc pro tunc*, waived the minimum mileage rule for the purpose of acceptability only, and placed the application on the March 12, 1982 "B" cut-off list. On March 11, 1982, prior to the Commission issuing the 30 day letter requiring the applicant to amend, Mecklenburg amended it application on its own specifying an antenna site in compliance with § 73.207.

7. On March 8, 1982, Clarksville filed a motion to dismiss the Mecklenburg application, as reaccepted on February 10, 1982. The substance of Clarksville's motion to dismiss is that Mecklenburg had filed neither a petition for reconsideration nor an application for review of the Commission action returning its application. Additionally, a petition to deny, dated February 11, 1982, was filed by Jamparo Corporation (Jamparo), licensee of WGOL-FM, the station with which Mecklenburg was originally short-spaced. The gravamen of Jamparo's petition was that in view of the fact that the competing applicants had specified non-short-spaced sites, favorable action on Mecklenburg's waiver request was not warranted.

8. Because we reaccepted Mecklenburg's application *nunc pro tunc* on our own motion, it was not necessary, in this instance, that Mecklenburg file a petition for reconsideration or an application for review. In addition, Mecklenburg has cured its deficiency and has brought its application into compliance with the Rules, with an amendment it would have filed in any event in response to routine Commission procedure. Hence, based on the foregoing, we find no basis to support either the motion to dismiss or the petition to deny. Accordingly, the motion to dismiss filed by Clarksville is denied and petition to deny filed by Jamparo is dismissed as moot.

9. The applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive they must be designated for hearing in a consolidated proceeding.

10. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to Athens, whether pursuant to § 73.1125(a)(3) of the Commission's Rules, good cause exists to warrant the location of its main studio outside the community of license.

2. To determine with respect to Mecklenburg, whether there is a reasonable possibility that a hazard to air navigation would occur as a result of the tower height and location proposed by Mecklenburg.

3. To determine which of the proposals would, on a comparative basis, best serve the public interest.

4. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

11. It is further ordered, That the Federal Aviation Administration is made a party to the proceeding with respect to the air hazard issue only.

12. It is further ordered, That Clarksville and Mecklenburg shall, within 30 days of this Order, certify to the Administrative Law Judge that local notice of the filing of the application has been published.

13. It is further ordered, That the motion to dismiss filed by Clarksville is denied, and the petition to deny filed by Jamparo is dismissed.

14. It is further ordered, That to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

15. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Audio Services Division.

BILLING CODE 6712-01-M

[File No. 26054-CL-P-(3)-82, and CC Docket No.83-445, File No. 26110-CL-P-(6)-82 etc.]

GTE Mobilnet of Portland Inc. et al.; Memorandum Opinion and Order Granting Application; Dismissing Application; and Designating Applications for Hearing

Adopted April 28, 1983.
Released May 9, 1983.

In re applications of GTE Mobilnet of Portland Inc., File No. 26054-CL-P-(3)-82; and Advanced Mobile Phone Service, Inc., File No. 26017-CL-P-(10)-82; for a construction permit to establish a cellular system operating on frequency Block B in the Domestic Public Cellular Radio Telecommunications Service (DPCRTS) to serve the Portland, Oregon/ Washington, Standard Metropolitan Statistical Area (SMSA).

In re applications of American Mobile Communications of Washington and Oregon, CC Docket No. 83-445, File No. 26110-CL-P-(6)-82; Cellular Mobile Systems of Washington, Inc., File No. 26183-CL-P-(8)-82; Interstate Mobilephone Co., File No. 26150-CL-P-(6)-82; MCI Cellular Telephone Co., File No. 26104-CL-P-(5)-82; Parr Communications Co., File No. 26082-CL-P-(7)-82; for a construction permit to establish a cellular system operating on frequency block A in the DPCRTS to serve the Portland, Oregon/Washington, Standard Metropolitan Statistical Area; designating applications for consolidated hearing on stated issues.

By the Common Carrier Bureau.

1. Presently before the Chief, Common Carrier Bureau, under delegated authority, are the captioned applications of American Mobile Communications of Washington and Oregon (Amcam). Cellular Mobile Systems Of Washington, Inc. (CMS), Interstate Mobilephone Co. (Interstate), MCI Cellular Telephone Co. (MCI), and Parr Communicatons Co. (Parr), For Construction permits for systems to serve the Portland SMSA on frequency Block A. Also before the Commission are the applications of GTE Mobilnet of Portland, Incorporated (GTE) and Advanced Mobile Phone Service, Inc. (AMPS) to serve the same market on frequency Block B. GTE and AMPS have filed a Limited Partnership Agreement, together with a Joint Motion for Approval, which would result in the

VOL
48
ISS
96
MY
17
1983
UMI

grant of GTE's amended application and the dismissal of AMPS'. Petitions to Dismiss or Deny have been filed against each of the applicants; responsive pleadings have also been filed.

2. After careful review and consideration of the applications and the related pleadings, we find that the public interest will be served by our approving the AMPS/GTE settlement agreement and granting the GTE application. Due to numerous and very basic defects in qualifying factors, we are dismissing the Parr application. the remaining four nonwireline applications are electrically mutually exclusive, and we are designating all four applicants for a comparative hearing in accordance with the Commission's *Report and Order* in CC Docket No. 79–318, 86 FCC 2d 469 (1981), *modified*, 89 FCC 2d 58 (1982), *further modified*, 90 FCC 2d 571 (1982).

Amcom Application

3. *Financial Qualifications.* CMS has submitted a petition to deny Amcom's application on the grounds of lack of financial qualification. Amcom has projected capital costs of $8,359,000 and first–year operating costs of $1,846,000 for total construction and first-year expenses of $10,205,000. Amcom has shown availability of $14,641,000 to meet these costs and has provided a "cushion" of over $4 million. Amcom has supplied a letter of commitment from the District of Columbia National Bank for $1,830,163; a letter from Chase Manhattan Bank for $7,300,000; and a letter from Manufacturers Hanover Trust Company for $5,674,000. CMS does not object to this showing, but argues that Amcom has failed to consider, in its costs estimate, such pre-grant expenses as it may have incurred and still may incur. CMS reads the Commissions's rule on cost estimates, which refers to "proposed construction and other initial expenses," as including these pre-grant expenses. 47 CFR 22.917(a).

4. Amcom points out in its reply that pre-grant expenses are separated from construction and first-year costs, and that its parent, RAM,[1] has undertaken payment of the former. Therefore, Amcom contends, the Commission need not address the pre-grant expenses. We agree. When an applicant demonstrates reasonable assurance that adequate funding is available for the construction and first-year operation of a particular cellular system, we need not engage in a detailed analysis of that applicant's other expenditures. *See American Mobile Communications of Washington and Oregon (Seattle Order)*, CC Mimeo 1739, released January 12, 1983, at para. 4. Here, the availability of a $4 million cushion assures the applicant's financialy ability to carry through on its proposal even should RAM fail to meet its responsibilities for pre-grant expenses.

CMS Application

5. *Financial Qualifications.* Amcom and Interstate question CMS' financial qualification in the Portland Market. The Commission considered CMS' financial qualifications in the Chicago market, and the financial qualifications of its parent corporation, Graphic Scanning, and found the applicant qualified in all 30 top markets, *Advanced Mobile Phone Service, Inc. (Chicago Order)*, 91 FCC 2d 512 (1982), at para. 6. Since no new issues regarding CMS' financial qualifications have been raised here, those findings control dispostiton of the petitioners' arguments here.

6. *Cost Estimates.* Amcom objects to CMS' cost esitmates as not providing a cell-by-cell expense list. In *Advanced Mobile Phone Service, Inc. (Buffalo Order)*, CC Mimeo 1320, released December 14, 1982, at para. 9, we indicated that a cell-by-cell cost analysis is not required. Both Amcom and Interstate charge that CMS has understated costs and omitted various expenses, which result in unrealistically low proposed expenditures. In the *Chicago Order* at para. 13, the Commission held that differences in cost estimates among applicants do not raise an issue, so long as no estimate is unreasonable on its face. Because such is not the case here, no cost issue will be designated.

7. *Direct Affirmative Case.* In its petition to deny the CMS application, Interstate objects to the adequacy of CMS' direct case, noting, among other things, faults in attributions and missing page numbers. The direct case submission requirement of § 22.916(b)(1), as noted in *Cellcom, Inc. (Minneapolis Order)*, CC Mimeo 1573, released December 30, 1982, at para. 9, is met, because the direct case was submitted with the application on June 7, 1982. The questions raised by Interstate are evidentiary matters and questions of adequacy, which will be dealt with in the hearing.

8. *Frequency Plan.* Both Amcom and Interstate oject to CMS frequency plan, including the amendment submitted July 7, 1982, as inadequate.[2] At page 13 of Volume I, Exhibit IV, CMS specifies the number of channels per site for its proposed system, for years one through five. On page 15 of the same exhibit, CMS lists the channels available for assignment at each cell site. This information adequately describes the system proposed by CMS, and satisfies the requirements of § 22.913(a) (4) of the rules.

MCI Application

9. *Financial Qualifications.* MCI's financial qualifications to construct cellular systems in 12 of the top 30 markets, including Portland, were resolved in *Advanced Mobile Phone Service, Inc. (Pittsburgh Order)*, CC Mimeo 1169, released December 6, 1982, at para. 5, and no new issues on this point have been raised here. Hence, our prior findings control the disposition of these petitions.

10. *Congestion Determination.* CMS has objected to MCI's application as providing only a "generalized discussion" of congestion determination; CMS finds this inadequate in face of the § 22.913(a)(5) requirement of "an exhibit indicating the basis which the applicant will use to determine whether sufficient congestion exists to warrant cell-splitting." We have found, *Buffalo Order* at para. 20, and *Minneapolis Order* at para. 13, that the qualifying requirement is satisfied by the application's inclusion of its plan for determination of congestion. The adequacy and efficacy of the plan may then be fully considered in the comparative hearing, to the extent relevant to the issues designated in para. 39, *infra*.

Interstate Application

11. *Amendment Regarding Ownership.* Interstate submitted an amendment on November 29, 1982 to add The Washington Post Company (Post) to its application as a general partner.[3] Both CMS and Amcom opposed this amendment on numerous grounds, arguing that it constituted a major, not a minor, amendment, and must as such be rejected. Interstate said in submitting the amendment that it sought no comparative advantage from the change, but that the amendment should be allowed as an example of "changes in ownership of an applicant which do not result in transfers of control." 47 CFR 22.918(b)(1).

12. This question was also presented in the Seattle market,[4] and the decision there controls here. The amendment including the Post as a one-sixth general partner is accepted as minor, but we will not accord any comparative credit for the change in ownership. *See Seattle Order*, at paras. 12 and 13. thus, consideration of Interstate's financial qualifications is based on the information provided in its initial application.[5]

13. *Financial Qualifications.* As it did in the Seattle market, Amcom here challenges Interstate's financial qualifications. The costs and financing of the two systems were considered together in the Seattle application. Because no new issues regarding Interstate's financial qualification have been raised here, the *Seattle Order* finding that Interstate is financially qualified is dispositive here. *Id.* at paras. 5–10.

14. *Cost Estimates.* Amcom and CMS object to Interstate's cost projections as understated. The Commisison in the *Chicago Order*, at para. 13, found that discrepancies in cost will not support the designation of an issue for hearing unless the cost estimates are shown to be unreasonable on their face. The petitioners here have not met that burden, and the projected costs do not appear unreasonable. Accordingly, Interstate's cost estimates will not be placed in issue.

15. *Extension Beyond SMSA.* Interstate's proposed CGSA extends beyond the Portland SMSA at several points, and is the basis of an objection by Amcom. In its petition to deny, Amcom states that "a showing of 'strong public interest' is deemed necessary if such coverage extensions are to be permitted," and that Interstate has not made such a showing.[6] We find that the Interstate extension beyond the SMSA is *de minimis*. Cell #1 extends beyond the irregular boundary of the SMSA, over rugged terrain, into unpopulated surroundings. It is clear that the cell was not designed for the purpose of serving the area of the extension, but is an integral part of the entire market coverage plan. The area in question is not within any SMSA, and includes the towns of Scappoose (pop. under 5,000) and St. Helens (pop. under 10,000); the area is bounded by the Columbia River to the east and by forested mountains on the other sides. The extension covers an area which could not be expected to support a cellular system itself. We find that these factors taken together justify the extension of cell #1 beyond the Portland SMSA.

16. *Frequency Plan.* On September 13, 1982 Interstate filed, and the Commission accepted as minor, an amendment which corrected discrepancies between Interstate's frequency plan as explained in Exhibit One, pages 97–116, and supplemental information relating to specific frequency assignments for each cell site as shown in exhibit E–2. Amcom's petition to deny noted the discrepancies and stated that they made Interstate's application unacceptable. Interstate's actual frequency plan as originally filed (in Exhibit One) satisfied the requirements of § 22.913(a)(6) of the Rules, and the minor amendment resolves Amcom's objections and any inconsistencies in the frequency plan and frequency assignments for each cell.

Parr Application

17. Our review of Parr's application reveals that it is defective in several of the basic qualifying requirements. These deficiencies mandate that the Commission dismiss this application as not acceptable for filing.[7]

18. *Site Availability.* Amcom, CMS and Interstate argue that Parr's application must be denied for failure to assure availability of antenna sites. The Commission requires reasonable assurance that sites are available for a proposed cellular system; as stated in the *Pittsburgh Order*, at para. 8, a "mere possibility" of a site's availability will not suffice. The requirement of a showing of site availability is an important determinant of an application's acceptability for filing. Under § 22.20(b)(5) of the rules, the failure to meet this requirement can result in dismissal of the application. Parr's application proposes seven antenna sites. Of one site, the application states that it is owned by the applicant; this statement is undocumented.[8] Of five others,[9] Parr states: "All five sites will be leased or purchased by PCC." No documentation of any leases or options, or even of any initial negotiations, is included; nor does Parr offer to provide such documentation upon request. Of the final site[10] no mention of availability is made. Despite strong objections in the petitions of Amcom, Interstate and CMS, Parr did not correct these defects or otherwise offer any response. Although no petitioner has conclusively demonstrated that Parr's proposed sites are not available, Parr's failrue to give reasonable assurance of site availability is a patent defect according to § 22.20(b)(5), and mandates dismissal of this application.

19. *Profile Sketch of Antenna.* Interstate notes, in its petition to deny, that Parr has provided no antenna sketches. Section 22.15(c) states that "each application involving a new or modified antenna supporting structure or passive facility * * * must be accompanied by a vertical profile sketch of the total structure * * *." Parr fails to provide such sketches, noting only that the sketches will be available "upon final engineering of the system" (Exhibit 13). Since the rule requires that such sketches be included in the application, their omission is a patent defect.[11]

20. *Financial Qualification.* Interstate petitions to deny the Parr application on the basis of financial qualification. The Commission requires reasonable

---

[1] The Amcom Joint Venture Agreement in application Volume II, Section I, Exhibit 2, Attachment A establishes that RAM Cellular Communications of Washington and Oregon, Inc. a wholly-owned subsidiary of RAM Cellular Communications, Inc., which in turn is a wholly-owned subsidiary of RAM Broadcasting Corporation, will be responsible for all application and pre-grant expenses.

[2] CMS' July 7, 1982 amendment of Exhibit IV submitted information which was referenced within the application, and was obviously omitted from the original application inadvertently. This information was properly accepted as a minor amendment.

[3] Interstate had submitted amendments previous to this one. Both CMS and Amcom objected that Interstate was attempting through amendments to cure a patently defective application. Following return, correction, and resubmission of its first amendment, Interstate was allowed to correct clerical errors to bring the E–2 exhibits into harmony with Exhibit 1 of the application (*see* paragraph 16, *infra*), and to add supporting and clarifying letters to its financial showing; but Interstate was not allowed to expand or add to the financial showing as originally set forth.

[4] In Seattle as in Portland, both Amcom and SCS objected to Interstate's Amendment 5. The arguments raised by both petitions were considered in the Seattle Order, although specific reference to

[5] The Baltimore, Md./Washington, D.C. Order, Mimeo No. 812, released November 16, 1982, stated that no comparative credit would be granted for an ownership change similar to the one in question here. An Application for Review of that decision is presently pending, and our decision here is subject to whatever action the Commission may take on review.

[6] This is a misconstruction of *Cellular Application Filing Procedures*, FCC Mimeo 2973, March 24, 1982, which says only that an extension is "more likely" to be permitted if "a strong public interest consideration" is shown.

[7] Although the application was accepted for filing by Public Notice of July 2, 1982, Report No. CL–3, that acceptance was provisional. The notice expressly stated that the Commission reserved the right to return the application if it were found upon further inspection to be defective and not in conformance with Commission Rules and Regulations or policies. 47 CFR 21.26(b).

[8] Union site. All site availability references are to Exhibit 1, pages 2–4. The Union Avenue site is in an industrial/commercial section of Portland where present zoning permits such construction.

[9] Mount Vista, Chamberlain Hill, Redland, Rosemont, and Cooper Mountain sites. All five sites are mountainous wooded areas close to public power and telephone landline services. Proposed antennas are to extend no more than 20 feet above treetop level.

[10] North Plains site. This site is in flat, open farmland near State Highway 26. The construction of an antenna here would require a conditional use permit, for which Parr states it will apply upon grant of its application.

[11] Compare our treatment of an applicant in Philadelphia, Advanced Mobile Phone Service, Inc. (Philadelphia Order), CC Mimeo 1682, released January 21, 1983, at para. 11, where the applicant had submitted antenna sketches, thereby avoiding the patent defect.

VOL 48 ISS 96 MY 17 1983 UMI

assurance that a loan or similar financing will be available to the applicant who secures a construction permit. *Multi-State Communications, Inc. v. FCC*, 590 F.2d 1117 (D.C. Cir. 1978), cert. den. 440 U.S. 959 (1979); *Las Vegas Valley Broadcasting Co. v. FCC*, 82 FCC 2d 166 (1980). The Commission emphasized in its *Report and Order* that the basic criterion of financial qualification is especially essential in cellular applications "because of the large capital investment required to finance the highly sophisticated technology associated with cellular operations, and because cellular service is in an early stage of development and must be viewed as a relatively high-cost business venture. [Footnote omitted]" *Id.* at para. 72. The Commission also noted that the provision of only two systems per service area means that the inability of one system to finance its development would result in public inconvenience and wasted specturm. *Id.* Section 22.917 of the Commission's rules sets forth the required demonstration of financial qualification, including "estimated costs of proposed construction and other initial expenses," and submission of copies of any financial commitments in support of the proposed facilities. Parr's cost estimates total $2.7 million. Parr's financial showing consists of $65,000 in liquid assets and an available line of credit of $100,000. Also included is a "letter of reference" from a bank which establishes Parr's good name but makes no mention of a loan, or even of available funds. Reasonable assurance of a loan, according to the *Multi-State* test, requires specific information such as the amount and terms of the proposed loan, the interest rate or the mode of its calculation, and covenants and/or conditions required. Parr's letter from First Interstate Bank of Oregon fails in all these respects to give reasonable assurance of the availability of funds. Far from giving reasonable assurance of the availability of the needed $2.7 million, the Parr application makes no effort to show the availability of any funds whatsoever beyond the assets and the $100,000 line of credit mentioned above. Assets of $165,000 against projected construction and first-year operating costs of over $2,700,000 indicate that Parr is not financially qualified. According to §§ 22.917 and 22.20 of the Commission's rules, this defect mandates dismissal of the Parr application.[13]

[13] This situation is readily distinguishable from an application in which financial qualifications were designated as an issue for hearing. In the Philadelphia Order, at para. 8, for example, a bank letter extended $50 million credit, but without sufficient details of the terms of the loan to assure its availability. The bank there promised an adequate loan but failed to give details. Here, despite vigorous challenges, there is no statement whatsoever of the availability of funds beyond the $165,000 mentioned above.

21. *Technical Qualifications.* Interstate and CMS object strenuously to the Parr application for its failure to assert or demonstrate any technical qualification whatsoever. Section 22.901(a) requires that applicants for cellular construction permits demonstrate that they are technically qualified. The Parr application fails to establish Parr's technical qualification to construct and operate a cellular system. The engineering requirements of the application have been met haphazardly if at all, and the application itself states (Exhibit 4, p. 6) that its design engineer (who, in case of a grant of the application, would become its chief engineer) is not qualified in the field of radio telecommunications design and interference studies. The application states that it was impossible to secure engineering consultants or assistants for this preparation. Based on the foregoing, we find that Parr has failed to demonstrate its technical qualification, and its application is therefore defective in this respect.

22. *Environmental Impact.* Exhibit 1 at page 2 states that all seven of the antenna construction proposals are major actions as defined in Section 1.1305. This may or may not be the case; it is impossible to determine due to the absence of profile sketches and other detailed site information. But if the approval of these proposals, or any one of them, would be major actions by the terms of § 1.1305, then the environmental impact showing required under § 1.1311 is totally inadequate. Under § 22.20(a)(6), this defect would render the application unacceptable for filing.

23. *Signatures.* Section 22.6(d) requires that applications comply with § 1.743. The latter requires a personal signature on the application (on FCC Form 401, pages 3 and 6). The Parr application was submitted with a photocopied signature; it thus fails to comply with requirements of § 1.743.

24. *Direct Affirmative Case.* Interstate petitions to deny Parr's application on the basis that Parr has failed to submit a direct affirmative case. The relevant rule, § 22.916(b)(1), states only that the direct case must be submitted with the application. Although Interstate argues that the lack of a direct case is a ground for dismissal, the direct affirmative case is not a qualifying requirement of an application, so its omission cannot result in an application's dismissal, even though such omission may seriously prejudice the applicant's comparative posture.[12]

25. In view of the foregoing, we find that Parr is not financially or technically qualified, and therefore its application must be dismissed. The Commission established basic qualifying requirements for cellular applicants in its *Report and Order*, and in § 22.913 of its rules. Although we have stated, in the *Chicago Order* at para. 17, that an overly rigid application of these regulations would not serve the public interest, still an application which blatantly disregards the Commission's requirements and criteria, and which fails to make a good faith effort to meet the standards established for cellular service applications, must be returned as defective. The omissions of the Parr application are basic and numerous, and the applicant has made no effort to correct its shortcomings or to respond to the objections and criticisms of its opponents. Because the essential criteria for site availability, financial qualification, technical qualification, environmental impact analysis, and engineering exhibits not only have not been met, but also have been blatantly disregarded, the Parr application must be returned.

GTE Application

26. GTE is the remaining applicant for Block B (wireline) in the Portland market under the terms of a Limited Partnership Agreement submitted on June 8, 1982.[14] This Agreement is one of a series of similar agreements by which AMPS, which filed aplications on June 7, 1982 in 29 of the top 30 markets, and GTE, which filed in 15 of these markets, together with 18 other wireline companies proposed to settle their electrically mutually exclusive applications in 18 of the top 30 markets. Pursuant to the terms of the agreements, AMPS will operate cellular systems in fifteen markets and GTE will operate cellular systems in six markets, including Portland. Each partner will continue to prosecute its cellular applications in its specified markets, while the other partners to the

[12] Various additional shortcomings in the Parr application have been noted by the Commission staff and by other applicants in the Portland market. We do not discuss these issues because the issues already discussed so clearly mandate the dismissal of Parr's application.

[14] The participants in the agreement are: GTE Mobilnet of Portland, Inc., general and limited partner, 86.17%; Advance Mobile Phone Service, Inc., limited partner, 9.03%; Cascade Utilities, Inc., limited partner, 2.84%; Clear Creek Mutual Telephone Company, limited partner, 1.59%; and Lewis River Telephone Co., Inc., limited partner, 0.37%.

agreements will withdraw any applications in those markets. A Limited Partnership Agreement virtually identical to the Portland Agreement was approved by the Commission in *Advanced Mobile Phone Service, Inc. (Los Angeles Wireline Order)*, FCC 83-124, released April 26, 1983. We find the Commisson's decision to be dispositive of all objections to the Portland Agreement itself. Accordingly, we here address only those objections to GTE's application not previously considered and resolved.

27. In their petitions to deny, Amcom and MCI raise objections concerning the wireline set-aside and the issue of a head start. We find that it is premature to rule on these petitions at this time, for the reasons stated by the Commission in deferring action on similar petitions in the Chicago market. *See Chicago Order*, at para. 16. In addition, MCI alleges a history of anticompetitive behavior or wireline carriers generally. This argument has already been rejected as a basis for adverse action on a cellular application in the *Los Angeles Wireline Order, supra*, where MCI raised it against Pacific Telephone & Telegraph. MCI has raise no specific allegations against any of the wireline applicants here, and we find no reason to designate an issue regarding anticompetitive behavior.

28. *Engineering.* In its petition to deny, Amcom states that GTE has made no effort to show the kind of planning necessary to avoid adjacent-channel interference. We find this argument groundless, as GTE's application, specifically exhibits 19 and 21, fully complies with our requirements in this regard.

29. *Frequency Plan.* Amcom argues that GTE's frequency plan will result in intra-system interference because adjacent frequencies will be assigned in adjacent cells. While we agree that there is a potential for interference, we nevertheless find GTE's frequency plan adequate. GTE points out that it has adopted a standard frequency plan which employs a four-cell frequency re-use pattern. In a mature cellular system using directional antennas, adjacent channels would routinely be assigned in adjacent cells without interference. When omnidirectional antennas are used, as proposed by GTE for its initial phase of operation, adjacent channel interference can occur within the system. We cannot say with certainty that this would be the case in GTE's proposal; however, as GTE states, if interference did occur, GTE could easily remedy the situation by reconfiguring its intitial frequency assignment. The key point is that GTE's proposal will not prevent GTE from implementing its system, nor will it result in interference to any other system. Therefore, there is no basis for disqualifying GTE or designating the question for hearing.

30. *Resale.* Both MCI and Amcom object to the GTE application's lack of detailed information regarding resale policies and charges. GTE replies that the policy has been presented, if not detailed, and that no rules have been promulgated which require more. We agree. In its *Report and Order*, 86 FCC 2d 510-511, the Commission prohibited carriers from filing tariffs forbidding resale. While the Commission recited the potentially favorable impact on the market of widespread resale, it did not impose any basic or comparative qualification requirement related to resale. Accordingly, GTE is in compliance with all rules and policies regarding resale.

31. *Interconnection.* MCI's petition to deny cites § 22.913(a)(9) in arguing that GTE has failed to explain its interconnection policies clearly and in detail. GTE's application, Exhibit 23 provides a full discussion of its interconnection proposal; for technical details the exhibit references both AT&T and GTE publications. Further, the *Buffalo Order* states, at para. 5, that the interconnection question should be settled by intercarrier agreement subject to the wireline carrier's duty to provide reasonable and technically suitable interconnection. We note also that interconnection issues are a common concern to all prospective cellular applicants and licensees, and that these issues are currently under discussion in working groups which include FCC staff as well as wireline and nonwireline representatives.

32. We therefore conclude here, as in the *Buffalo Order*, that the wireline carrier has met our requirements regarding interconnection policy, and that the petition to deny on this basis is without merit. As an additional assurance, we have taken the position that "if reasonable interconnection agreements have not been formulated by the time [the wireline carrier] files an application for a license to operate its cellular system, any grant to [the WCC] will be conditioned upon its providing reasonable interconnection." *Pittsburgh Order*, at n. 8, citing 89 FCC 2d at 81-82.

Conclusions

33. Based on our analysis of the applications and of the contested issues, and upon our resolution of these issues within this order, we find that the application of Parr Communications Co. must be dismissed as failing in several respects to meet minimum standards regarding basic qualifying issues. We find the other applicants to be legally, technically, financially and otherwise qualified to construct and operate their proposed cellular systems. We further find that the grant of the GTE Mobilnet application, as conditioned below, will serve the public interest, convenience and necessity.[15]

34. Accordingly, it is ordered, pursuant to § 22.29 of the Commission's Rules, that the Joint Request for Approval of Limited Partnership filed by GTE Mobilnet of Portland, Incorporated, Advanced Mobile Phone Service, Inc., Cascade Utilities, Inc., Clear Creek Mutual Telephone Company, and Lewis River Telephone Company, Inc. is granted and the accompanying October 26, 1982 Limited Partnership Agreement is approved.

35. It is further ordered that the amendment to the GTE Mobilnet of Portland, Inc. application is accepted, that the amendment is exempted from the cut-off provisions under § 22.31(e) (3) and (4); and that the amended GTE application, File No. 26054-CL-P-(3)-82, is granted.

36. It is further ordered that the request for withdrawal of the application filed by Advanced Mobile Phone Service, Inc., File No. 26017-CL-P-(10)-82 is granted and the application and the petitions to deny filed against it are dismissed.

37. It is further ordered that the authorization is conditioned upon GTE's filing an amendment to the Limited Partnership agreement which eliminates the language contained in section 11.1 of the agreement, imposing restraints on the alienation of partnership interests.[16]

38. It is further ordered that the application of Parr Communications Company is dismissed.

39. It is further ordered, pursuant to Section 309 of the Communications Act of 1934, as amended, that the applications of American Mobile Communications of Washington and Oregon, Cellular Mobile Systems of Washington, Inc., Interstate Mobilephone Co., and MCI Cellular

[15] This authorization will be conditioned upon GTE Mobilnet's obtaining the appropriate antenna structure clearances and upon its deletion of one provision of the Limited Partnership Agreement which restricts alienation of partnership interests. *See* Los Angeles Wireline Order, at paras. 27-30.

[16] The Commission will withhold issuance of GTE's authorization until the amendment is received by the Mobile Services Division, Common Carrier Bureau. We also remind the partners that, pursuant to Section 212 of the Communications Act, officers or directors of more than one carrier are required to have authorizations to hold interlocking directorships.

VOL 48 ISS 96 MY 17 1983 UMI

Telephone Co., are designated for hearing in a consolidated proceeding upon the following issues: [17]

(a) To determine on a comparative basis the geographic area and population that each applicant proposes to serve; [18] to determine and compare the relative demand for the services proposed in said areas; and to determine and compare the ability of each applicant's cellular system to accommodate the anticipated demand for both local and roamer service; [19]

(b) to determine on a comparative basis each applicant's proposal for expanding its system capacity in a coordinated manner within its proposed CGSA in order to meet anticipated increasing demand for local and roamer service;

(c) to determine on a comparative basis the nature and extent of the service proposed by each applicant, including each applicant's proposed rates, charges, maintenance, personnel, practices, classifications, regulations and facilities (including switching capabilities); [20] and

(d) to determine, in light of the evidence adduced under the foregoing issues, what disposition of the referenced applications would best serve the public interest, convenience and necessity.

40. It is further ordered that the Separated Trial Staff (the Hearing Division and other individuals specifically designated) of the Common Carrier Bureau is made a party to the proceeding. [21]

41. It is further ordered that the applicants shall file written notices of appearances under § 22.916(b)(3) of the Commission's Rules within 10 days after publication of this order in the **Federal Register.**

42. It is further ordered that the hearing shall be held according to the procedures specified in § 22.916 of the Rules, except as otherwise noted here, at a time and place and before an Administrative Law Judge to be specified in a later order.

43. It is further ordered that exceptions to the initial decision of the Administrative Law Judge under § 1.276 of the Commission's Rules shall be taken directly to the Commission.

44. It is further ordered that, except to the extent granted here, the Petitions to Deny filed by the parties against the captioned applications, excluding those filed against Parr's application, are denied.

45. It is further ordered that any authorization granted to CMS as a result of the comparative hearing shall be conditioned on, and without prejudice to, reexamination and reconsideration of that company's qualifications to hold a cellular license following a decision in the hearing designated in *A.S.D. Answering Service, Inc., et al.*, FCC 82–391, released August 24, 1982, and shall be specifically conditioned upon the outcome of that proceeding.

46. It is further ordered that any authorization granted as a result of this proceeding shall be conditioned upon obtaining the appropriate antenna structure clearances.

47. This order is issued under § 0.291 of the Commission's Rules and *Order Delegating Authority* FCC 82–435, released October 6, 1982, and is effective on its release date. Petitions for reconsideration under § 1.106 or applications for review under § 1.115 of the Rules of this order, insofar as it grants the GTE application, may be filed within 30 days of the date of public notice of this order (see Rule 1.4(b)(2)).

48. The Secretary shall cause a copy of this order to be published in the **Federal Register.**

Federal Communications Commission.

Gary M. Epstein,

Chief, Common Carrier Bureau.

[FR Doc. 83-13128 Filed 5-16-83; 8:45 am]

BILLING CODE 6712-01-M

[17] There are two issues that are not to be considered in the comparative hearing. The first is the financial qualifications of the applicants. Financial ability is a basic rather than a comparative qualification for cellular licensing. Cellular Communications Systems, 86 FCC 2d 469, 501–02 (1981). We have found all four of the applicants included in the comparative hearing to be financially qualified. The second issue not to be considered is the qualifications of Cellular Mobile Systems of Washington, Inc. or its parent Graphic, to the extent that such qualifications may be affected by the issues included in the Commission's order designating certain 35 and 43 MHz paging applications for hearing, A.S.D. Answer Service, Inc., *et al.* (ASD), FCC 82–391, released August 24, 1982. Those issues will be thoroughly reviewed in that separate proceeding and should not be reargued in the context of a cellular hearing. As set forth in para. 38, *infra*, the Commission reserves the right to reexamine and reconsider the qualifications of Cellular Mobile Systems of Washington to hold a cellular license should *ASD* be resolved adversely to any of CMS' affiliate or parent companies or to any of their principals. *See Chicago Order*, at n. 19.

[18] For purposes of comparison, the geographic area that an applicant proposes to serve includes that area within the proposed 39 dBu contours which, in turn, falls within the proposed Cellular Geographic Service Area and the relevant Standard Metropolitan Statistical Area. Consideration should be given to the presence of densely populated regions, highways and areas likely to have high mobile usage characteristics as well as indications of a substantial public need for the services proposed. *See* 86 FCC 2d at 502.

[19] In making this comparison, preference should be given to designs entailing efficient frequency use, including not only the applicant's plans with regard to cell-splitting and additional channels, but also the degree of frequency reuse the system will be capable of, and the applicant's ability to coordinate the use of channels with adjacent or nearby cellular systems. *See* 86 FCC 2d at 502–3.

[20] *See* 86 FCC 2d at 503 for a discussion of the relative importance of the evidence submitted under this issue.

[21] Members of the Separated Trial Staff are non-decision making personnel and they will not participate in decision making or agency review on an *ex parte* basis in this case, either directly or through contact with other Common Carrier Bureau personnel. Any investigative or prosecuting functions will be performed by the Separated Trial Staff in connection with its role as a party to the adjudication of these cellular radio applications. All other personnel of the Common Carrier Bureau, unless identified in a subsequent order as required to be separated are designated as decision-making and they may advise the Commission as to the ultimate disposition of any appeal of an Initial Decision in this proceeding. See Communications Act of 1934, as amended section 409 (c) (47 U.S.C. 409 (c)); Administrative Procedure Act section 54 (d) (5 U.S.C. 54 (d)); § 1.1221 of the Commission's rules.

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-682-DR]

California; Amendment to Notice of Major Disaster Declaration

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the Notice of a major disaster for the State of California (FEMA–682–DR), dated May 5, 1983 and related determinations.

DATED: May 9, 1983.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287–0501.

SUPPLEMENTARY INFORMATION: The notice of a major disaster for the State of California dated May 5, 1983, is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of May 5, 1983.

Fresno County for Individual Assistance and Kings County as an adjacent county for Individual Assistance.

John Dickey,

Acting Deputy Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance)

[FR Doc. 83-13130 Filed 5-16-83; 8:45 am]

BILLING CODE 6718-01-M

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed De Novo Nonbank Activities; Louisiana Bancorp, Inc.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Louisiana Bancorp, Inc.*, Crowley, Louisiana (leasing activities; Louisiana): To engage, through its subsidiary, Louisiana Bancorp Leasing Company, in the leasing of real property in accordance with the Board's Regulation Y. This activity would be conducted from an office located in Lafayette, Louisiana, serving the Lafayette, Louisiana greater metropolitan area. Comments on this application must be received not later than June 3, 1983.

2. *Louisiana Bancorp, Inc.*, Crowley, Louisiana (lending and financing activities; Louisiana): To engage, through its subsidiary, Louisiana Bancorp Lending Company, in making or acquiring loans and other extensions of credit such as would be made by a mortgage, finance, credit card or factoring company and in servicing loans and other extensions of credit for any person. These activities will be conducted from an office in Lafayette, Louisiana, serving southwest Louisiana. Comments on this application must be received not later than June 3, 1983.

B. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *PNC Financial Corp*, Pittsburgh, Pennsylvania (finance activities; Alaska): To engage, through its wholly-owned subsidiary, The Kissell Company, in making or acquiring and servicing for its own account and/or the account of others, loans and other extensions of credit. These activities will be conducted at an office located in the metropolitan area of Anchorage, Alaska and will serve the metropolitan area of Anchorage. Comments on this application must be received not later than June 10, 1983.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Los Hacendados, Inc.*, Clayton, New Mexico (insurance activities; Union County, New Mexico); To engage through a proposed subsidiary, First Insurance Agency, Inc., in the sale of general insurance in a town with a population not exceeding 5,000. These activities would be performed in the Town of Clayton, serving all of Union County, New Mexico. Comments on this application must be received not later than June 10, 1983.

Board of Governors of the Federal Reserve System, May 11, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-13110 Filed 5-16-83; 8:45 am]

GENERAL SERVICES ADMINISTRATION

[G-83-3]

Revocation of Delegation of Authority; Secretary of Defense

1. *Purpose.* This document revokes a 1975 delegation of authority to the Secretary of Defense.

2. *Effective date.* This document is effective June 16, 1983.

3. *Revocation.* The following 1975 delegation which authorized the Secretary of Defense to audit and retain all freight and passenger transportation documents paid by Department of Defense overseas offices is hereby revoked:

FPMR temporary regulation	Date	Subject
G-25	Dec. 30, 1975	Delegation of authority to the Secretary of Defense.

Dated: May 9, 1983.

Ray Kline,

Acting Administrator of General Services.

[FR Doc. 83-13100 Filed 5-16-83; 8:45 am]

BILLING CODE 6820-34-M

[G-83-34]

Delegation of Authority to the Secretary of Defense

1. *Purpose.* This delegation authorizes the Secretary of Defense to audit and retain other than international freight and passenger transportation documents paid by Department of Defense overseas offices.

2. *Effective date.* This document is effective June 16, 1983.

3. *Expiration date.* This document expires on January 1, 1988.

4. *Delegation.*

a. Pursuant to the authority vested in me by Section 322 of the Transportation Act of 1940, as amended (31 U.S.C. 3726), authority is delegated to the Secretary of Defense to:

(1) Continue the use of currently approved freight and passenger warrants, transportation orders, credit notes, and related transportation forms in overseas areas for the procurement of freight and passenger transportation and related services;

(2) Continue the use of currently approved Military Airlift Command (MAC) forms for the procurement of MAC contract airlift services;

(3) Audit and retain at Scott Air Force Base, Illinois, all payment vouchers and related transportation documents covering MAC contract airlift services, subject to test verification and reviews by GSA; and

(4) Audit and retain in overseas offices those transportation vouchers and related documents paid at such offices for other than international services, and non-English language documents for international services, subject to test verifications and reviews by GSA.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 83C-0130]

Wilsa, Inc.; Filing of Color Additive Petition

AGENCY: Food and Drug Adminstration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Wilsa, Inc., has filed a petition proposing that the color additive regulations be amended to provide for the safe use of [phthalocyaninato(2-)] copper in coloring contact lenses.

FOR FURTHER INFORMATION CONTACT: Geraldine E. Harris, Bureau of Foods (HFF-334), Food and Drug Adminstration, 200 C St. SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 706(b)(1), 74 Stat. 399-402 as amended (21 U.S.C. 376(b)(1))), notice is given that a petition (CP 3C0166) has been filed by Optacryl Division, Wilsa, Inc., P.O. Box 36142, Denver, CO 80236, proposing that the color additive regulations be amended to provide for the safe use of [phthalocyaninato(2-)] copper in coloring contact lenses.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c) (proposed December 11, 1979; 44 FR 71742).

Dated: May 6, 1983.

Sanford A. Miller,

Director, Bureau of Foods.

BILLING CODE 4160-01-M

Advisory Committees; Notice of Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meetings are announced:

Vaccines and Related Biological Products Advisory Committee

Date, time, and place. June 7, 9 a.m., Rm. 121, Bldg. 29, 8800 Rockville Pike, Bethesda, MD.

Type of meeting and contact person. Open public hearing, 9 a.m. to 10 a.m., unless public participation does not last that long; closed committee deliberations, 10 a.m. to 4 p.m.; Jack Gertzog, National Center for Drugs and Biologics (HFN-6), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5455.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of vaccines and related biological products intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Closed committee deliberations. The committee will review trade secret or confidential commercial information relevant to two pending investigational new drugs (IND's). This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Anesthesiology Device Section of the Respiratory and Nervous System Devices Panel

Date, time, and place. June 13 and 14, 9 a.m. Conference Rm. E., Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open public hearing, June 13, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 12 m.; closed committee deliberations, 1 p.m. to 2 p.m.; open committee discussion, 2 p.m. to 5 p.m.; open committee discussion, June 14, 9 a.m. to 5 p.m.; David S. Shindell, National Center for Devices and Radiological Health (HFK-430), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7226.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the panel section leader before June 1, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of the proposed participants, and in indication of the approximate time required to make their comments. Presentations should be limited to 15 minutes. Persons or groups with similar views on the issues before the committee are requested, if possible, to consolidate their presentations and make a single presentation before the committee.

Open committee discussion. The committee will discuss premarket approval applications (PMA's) P830008 for a transcutaneous carbon dioxide monitor and P820043 for a high frequency jet ventilator.

Closed committee deliberations. The committee will review and discuss trade secret or confidential commercial information presented by the sponsor of PMA P820043 for a high frequency jet ventilator. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Circulatory System Devices Panel

Date, time, and place. June 24, 8:30 a.m., Rm. 703-727A, 200 Independence Ave. SW., Washington, D.C.

Type of meeting and contact person Open public hearing, 8:30 a.m. to 10:30 a.m.; closed presentation of data, 10:30 a.m. to 12:30 p.m.; open committee discussion, 1 p.m. to 4 p.m.; Glenn A. Rahmoeller, National Center for Devices and Radiological Health, Office of Medical Devices (HFK-450), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7559.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before June 10, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss recommendations from the North American Society of Pacing and Electrophysiology for the clinical evaluation of new pacemakers and will review a premarket approval application for the Cordis Gemini pacing system.

Closed presentation of data. Representatives from Kolff Medical will present trade secret or confidential commercial information regarding their clinical investigation of the artificial heart. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA), as amended by the Government in the Sunshine Act (Pub. L. 94-409), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

Dated: May 11, 1983.

Mark Novitch,

Acting Commissioner of Food and Drugs.

[FR Doc. 83-13112 Filed 5-16-83; 8:45 am]

BILLING CODE 4160-01-M

Pfizer Inc.; Tran-Q Plus Terramycin Premix; Withdrawal of Approval of NADA

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of a new animal drug application (NADA) held by Pfizer, Inc., providing for use of Tran-Q plus terramycin Premix (oxytetracycline hydrochloride plus hydroxyzine hydrochloride) in cattle feed for increased feed efficiency and growth stimulation. The sponsor requested the withdrawal of approval.

EFFECTIVE DATE: May 27, 1983.

FOR FURTHER INFORMATION CONTACT: David N. Scarr, Bureau of Veterinary Medicine (HFV-214), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1848.

SUPPLEMENTARY INFORMATION: Pfizer, Inc., 235 E. 42d St., New York, NY 10017, is the holder of NADA 11-661, which provides for use of Tran-Q plus Terramycin Premix (oxytetracycline hydrochloride plus hydroxyzine hydrochloride) in making beef cattle feed for increased feed efficiency and growth stimulation.

The application was approved on April 15, 1959. Approval of this

VOL 48 ISS 96 MY 17 1983 UMI

application has not been codified in the Code of Federal Regulations. By letter of August 12, 1982, the sponsor requested withdrawal of approval of the NADA because the product is no longer being manufactured or marketed and waived the opportunity for a hearing under the provisions of § 514.115 (21 CFR 514.115).

Section 514.115(d) normally does not apply if the holder of the application whose withdrawal has been requested already has been afforded an opportunity for hearing on a proposal to withdraw approval of the NADA (42 FR 56264, October 21, 1977; Docket No. 77N–0316). In this case, however, Pfizer's request is being granted because of the extended time interval which has elapsed since the notice of opportunity for hearing concerning NADA 11–661 was published. The Director of the Bureau of Veterinary Medicine has determined that the public interest will be served, and that the sponsor's interests will not be prejudiced by the withdrawal.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 350b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.84), and in accordance with § 514.115 *Withdrawal of approval of applications*, notice is given that approval of NADA 11–661 and all supplements for Pfizer's Tran-Q plus Terramycin Premix is hereby withdrawn, effective May 27, 1983.

Dated: May 10, 1983.

Gerald B. Guest,

Acting Director, Bureau of Veterinary Medicine.

BILLING CODE 4160–01–M

FEDERAL COMMUNICATIONS COMMISSION

Telecommunications Industry Advisory Group Auditing and Regulatory Subcommittee; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a two day meeting of the Telecommunications Industry Advisory Group's Auditing and Regulatory Subcmmittee. The meeting is scheduled for Monday, June 6, 1983, and Tuesday, June 7, 1983, at the offices of Arthur Andersen & Co., 1666 K Street, NW., Washington, D.C., Room 512, 5th Floor, beginning at 9:30 a.m. The meetings will be open to the public. The agenda is as follows:

I. General Administrative Matters
II. Continued Analysis of GAAP as it applies to USOA
III. Further Assignment of Tasks
IV. Other Business
V. Presentation of Oral Statements
VI. Adjournment

With prior approval of Subcommittee Chairman Hugh A. Gower, oral Statements, while not favored or encouraged, may be allowed if time permits and if the Chairmen determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contact Mr. Gower (404/658–1776) at least five days prior to the meeting date.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Helicopter Use In Wild Horse Gatherings; Meeting

Notice is hereby given in accordance with Pub. L. 92–195 that a meeting to discuss the use of helicopters in gathering wild horses will be held at 1 p.m. on June 6, 1983, in the Burns District Office, 74 S. Alvord Street, Burns, Oregon 97720. The use of helicopters to gather wild horses in the Burns and Lakeview BLM districts in fiscal year 1983, as well as other aspects of the gathering and adoption process will be discussed.

The Burns district plans to gather 88 horses in June from the East Kiger Wild Horse Herd and 76 horses in August from the Riddle Mountain Wild Horse Herd. The Lakeview district plans to gather 42 horses in July from the Browns Valley Wild Horse Herd. Additional public notice will be given prior to the gatherings.

Dated: May 4, 1983.

David Lodzinski,

Associate District Manager.

[FR Doc. 83–13151 Filed 5–16–83; 8:45 am]

BILLING CODE 4310–84–M

Montrose District Advisory Council; Meeting

Notice is hereby given in accordance with 43 CFR Part 1780 that a meeting of the Montrose District Advisory Council will be held June 14 and 15, 1983. The meeting will convene at 1:30 p.m. in the meeting room of the Hinsdale County Courthouse in Lake City, Colorado.

The agenda for this meeting will include election of officers, the merger of BLM and onshore offices of Mineral Management Services, and a working session to review the Preference Right Lease Application by Earth Science Corporation to lease and mine alunite in the Lake City area.

The meeting is open to the public. Interested persons may make oral statements to the Council between 10:00 a.m. and 12:00 p.m. June 15, 1983; or file written statements for the Council's consideration. Anyone wishing to make an oral statement should contact the District Manager, Bureau of Land Management, P.O. Box 1269, Montrose, Colorado 81402 or telephone (303) 249–7791 by June 10, 1983.

Summary minutes of the Council meeting will be maintained at the District Office at 2465 South Townsend, Montrose, Colorado and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

Marlyn V. Jones,

District Manager.

BILLING CODE 4310–84–M

San Juan River Basin Regional Coal Team; Resolution

AGENCY: Bureau of Land Management (BLM), Department of the Interior.

ACTION: On April 26, 1983, the San Juan River Basin (SJRB) Regional Coal Team (RCT) adopted the following resolution.

SUMMARY: *Fair Market Value (FMV) for Preference Right Lease Applications (PRLA's)*—The RCT will form a subgroup to prepare a report on increasing the revenue on PRLA's to recover FMV. The subgroup will be composed of BLM and State representatives from New Mexico and Colorado to be selected by the RCT members by May 2, 1983. The subgroup will be chaired by the State of New Mexico and will be present the report at the July 1983 RCT meeting.

The subgroup should recommend whether and to what degree the annual rental should be increased from the minimum to reflect FMV. The report should also discuss how the increased revenues can be used for impact assistance.

Although the meetings of the subgroup are not formal meetings of the RCT, the subgroup will follow procedures

applicable to the RCT to the extent practicable. The purpose of the Notice is to inform the public of the procedures that will be followed in carrying out the RCT's resolution.

1. The initial organizational meeting of the Fair Market Value Subgroup will be on May 26, 1983 at 1:30 p.m. in the Conference Room at the New Mexico Energy and Minerals Department, 525 Camino de los Marquez, Santa Fe, New Mexico.

2. The subgroup will hold a series of meetings at the above location on June 7, 14, 21 and 28. Each meeting will begin at 10:00 a.m. Persons planning to attend these meetings should verify the time and location by calling Mr. Charles Turpen's office, telephone number 505–827–5950 on the day preceding each meeting.

3. All meetings of the subgroup will be open to the public except that the subgroup may convene executive sessions to receive and consider proprietory or confidential information, and data received by the subgroup may be restricted to authorized personnel.

4. Members of the public may submit written material to the subgroup at any time and oral presentations by the public will be allowed at the discretion of the chairman.

5. The final subgroup report will be made available for public review as far in advance of its presentation to the RCT as possible. The public will have the usual opportunity to comment on the subgroup report at the RCT meeting.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Turpen, 525 Camino de los Marquez, Santa Fe, New Mexico 87501, telephone number 505–827–5950.

Charles W. Luscher,

State Director.

[W–83357]

Wyoming, Proposed Continuation of Withdrawals

May 9, 1983.

The Bureau of Land Management, U.S. Department of the Interior proposes to continue the existing withdrawals of the following public lands for a 20-year period pursuant to Section 204 of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2751; 43 U.S.C. 1714). The lands were withdrawn by the following orders: Secretarial Orders of October 20, 1917, April 24, 1918, May 6, 1918, March 18, 1920, June 30, 1927, October 26, 1929, February 20, 1931, May 28, 1932, February 9, 1933, May 29, 1934, April 25, 1938, December 12, 1938, September 24, 1940, April 9, 1941, June 24, 1942, November 17, 1942, February 19, 1943, May 5, 1943, May 4, 1944, August 1, 1944, and July 17, 1947, Government Land Order of April 20, 1945, Bureau of Land Management Orders of April 4, 1950, June 7, 1950, and Public Land Order 3269, November 20, 1963. The above orders will be continued insofar as they affect the following described lands:

The area described contains approximately 134,998.74 acres in Natrona, Converse, Campbell, Johnson, Sheridan, and Washakie Counties, Wyoming.

The purpose of these withdrawals are for stock driveways. The withdrawals closed the described lands to all forms of appropriation under the public land laws, but not to the mining laws or leasing under the mineral leasing laws. No change in the segregative effect or use of the land is proposed by the continuation.

Comments, suggestion, or objections to the proposed withdrawal continuation must be submitted in writing to the undersigned authorized officer of the Bureau of Land Management on or before August 15, 1983.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal continuation. All interested persons who desire to be heard on the proposal must submit a written request for a meeting to the undersigned before August 15, 1983. Upon determination by the State Director, Bureau of Land Management, that a public meeting will be held, a notice will be published in the **Federal Register** giving the time and place of such meeting. Public meetings are scheduled and conducted in accordance with BLM Manual Section 2351.16B.

The authorized officer of the Bureau of Land Management will make necessary investigations to determine the existing and potential demands for the land and its resources and review the withdrawal rejustification to insure that continuation would be consistent with the statutory objective of the programs for which the lands are dedicated. He will also prepare a report for consideration by the Secretary of the Interior, The President, and Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawals will continue until such final determination is made.

P. D. Leonard,
Associate State Director, Wyoming.

Arizona: Realty Action; Competitive Sale of Public Land in Yavapai County

The Bureau of Land Management will offer the following described lands for sale at a public auction on July 19, 1983, at 1:00 p.m. at the Wickenburg Community Center. There will be 8 tracts of land in the Yavapai Sale Area. It has been determined that the sale of these tracts is consistent with Section 203 of the Federal Land Policy and Management Act of October 21, 1976. The lands will be offered for sale at no less than the appraised fair market value indicated below.

Gila & Salt River Meridian, Arizona

Yavapai Sale Area

Tract No.	Legal description	Acres	Value
1	T. 8 N., R. 5 W., Sec. 15, NE¼NE¼NW¼;	10.0	20,000
2	T. 8 N., R. 5 W., Sec. 15, SE¼NE¼NW¼;	10.0	20,000
3	T. 8 N., R. 5 W., Sec. 15, W½NE¼NW¼;	20.0	40,000
4	T. 8 N., R. 5 W., Sec. 15, NW¼NW¼;	40.0	66,000
5	T. 8 N., R. 5 W., Sec. 15, N½SW¼NW¼;	20.0	40,000
6	T. 8 N., R. 5 W., Sec. 15, S½SW¼NW¼;	20.0	40,000
7	T. 8 N., R. 5 W., Sec. 15, W½SE¼NW¼;	20.0	40,000
8	T. 8 N., R. 5 W., Sec. 15, E½SE¼NW¼;	20.0	40,000

The above aggregates 160.0 acres of land in Yavapai County.

Upon publication of this notice in the **Federal Register**, the land described above will be segregated from all forms of nondiscretionary appropriation under the public land laws, including the mining laws, except the mineral leasing laws, for a period of 2 years or until the lands are sold. The segregative effect may otherwise be terminated by the authorized officer by publication of a termination notice in the **Federal Register** prior to the expiration of the 2-year period.

Lands not sold on July 19, 1983, will be reoffered for sale by competitive bid at the Phoenix District Office at 10:00 a.m. on October 5, 1983. Any remaining unsold lands will be available for over-the-counter purchases for the remainder of the 2 years.

All of the parcels listed will be subject to the following reservations when patented:

1. A right-of-way for ditches and canals constructed by the authority of the United States. (Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.)

2. A reservation of all oil and gas to the United States with the right to prospect for, mine, and remove such deposits.

3. A reservation of all minerals to the United States with the right to prospect for, mine, and remove such deposits.

Additionally, all parcels will be sold subject to the KMJ-72 grazing lease #AZ-020-2530. The purchaser of the land will honor the terms and conditions of this grazing lease until February 28, 1989. The purchaser will not charge more than the BLM grazing fee schedule for a given year. Modification of these terms and conditions will occur only through mutual agreement between the purchaser and the leesee.

There are no known mineral values in the land. If the successful bidder wishes, he/she may apply for the reserved mineral estate under the provision of Section 209 of the Federal Land Policy and Management Act of October 21, 1976.

Additional information concerning these lands, terms and conditions of the sale, and bidding instructions may be obtained from the Phoenix District Manager, 2929 West Clarendon Avenue, Phoenix, Arizona 85017 or by calling (602) 241-2511.

For a period of 45 days from the date of this notice, interested parties may submit comments regarding the Proposed Action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

Dated: May 11, 1983.
William K. Barker,
District Manager.

BILLING CODE 4310-84-M

Fish and Wildlife Service

Availability of a Draft Environmental Impact Statement on the Trinity River Basin Fish and Wildlife Management Program, Northwestern California

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice advises the public that the draft Environmental Impact Statement on the Trinity River Basin Fish and Wildlife Management Program, Northwestern California, is available for public review. Comments and suggestions are requested. Proposed is a management program to restore salmon, steelhead trout, deer and other fish and wildlife resources in the Trinity River Basin in northwestern California. Developed by a joint Federal-State-local task force under Bureau of Reclamation lead, the sixty million dollar proposal would span a ten-year period and consist of eleven actions such as watershed rehabilitation, spawning riffle construction, monitoring, and fish hatchery modernization. No significant adverse impacts are foreseen. Three alternative subjects of these same actions, and variants to five of the actions, were also evaluated in the DEIS.

DATES: Written comments are requested by July 20, 1983. Public meetings will be held on June 21, 23 and 28, 1983.

ADDRESSES AND TIMES: Written comments should be addressed to: James J. McKevitt, Field Supervisor, U.S. Fish and Wildlife Service, Division of Ecological Services, 2800 Cottage Way, Room E-2727, Sacramento, California 95825.

Oral Comments May Be Presented at Meetings

June 21, 1983. Tuesday, 7:30 p.m.–8:30 p.m. Supervisors Conference Room B, Humboldt County Courthouse. 825 Fifth Street, Eureka, California.
June 23, 1983. Thursday, 7:30 p.m.–8:30 p.m. Board Room, Trinity County Courthouse. 101 Court Street, Weaverville, California.
June 28, 1983. Tuesday, 1:00 p.m.–2:00 p.m. Room W-2140, Federal Building, 2800 Cottage Way, Sacramento, California.

FOR FURTHER INFORMATION CONTACT: Jody Hoffman, U.S. Fish and Wildlife Service, ES, 2800 Cottage Way, Room E-2727, Sacramento, California 95825, (916) 484-4731.

Copies of the DEIS have been distributed to all participants in the scoping process, those who have already requested copies, identified agencies and organizations representing interested user groups, and central libraries within the following counties: Humboldt, Shasta, Sacramento, and Trinity. Anyone requiring a copy of the DEIS for review should immediately contact the above individual.

SUPPLEMENTARY INFORMATION: A five person team from the FWS Division of Ecological Services authored this document. The Secretary of the Interior has designated FWS as the lead agency because the proposal directly addresses problems associated with declining populations of anadromous salmonid resources. Because the proposal would also impact operation of a Federal water resource project and Indian utilization of the fishery resource, both WPRS and BIA have been designated as cooperating agencies in the preparation of the EIS.

This draft environmental impact statement is intended as a broad scope programmatic or first-tier analysis of the proposed Trinity River Basin Fish and Wildlife Management Program (March, 1982) which was developed over the past 7 years by the Trinity River Basin Fish and Wildlife Task Force. The program would continue over ten years and would be administered by the Department of the Interior with the advisory assistance of a similar 14-agency task force. The estimated cost of the program is $60,000,000 including costs for construction of the presently authorized Grass Valley Creek Debris Dam. Detailed environmental documents will be prepared for site-specific actions and for any specific activity plans developed under the Management Program.

The proposed program consists of eleven actions to correct fish and wildlife problems in the Trinity River Basin caused by the Trinity River Division of the Central Valley Project and by adverse land use practices. These problems include the loss of 59 miles of chinook salmon habitat and 109 miles of steelhead trout habitat upstream from Lewiston Dam, degradation of salmonid habitat below Lewiston Dam caused by lowered river flows, distrubance of watershed lands by logging and road construction, and the inundation of prime habitat for an estimated 4,000 to 7,500 black-tailed deer.

The eleven actions are:

1. Continue or reestablish an advisory task force and establish field office staff to implement and oversee the management program.

2. Control sediment from Grass Valley Creek by building a debris dam on Grass Valley Creek and a dredging system in the Trinity River below the mouth of the creek.

3. Rehabilitate and maintain the main river below Lewiston.

4. Rehabilitate and maintain tributaries below Lewiston.

5. Rehabilitate and maintain watersheds below Lewiston.

6. Rehabilitate and maintain South Fork Trinity River and watershed.

7. Modify Trinity River Fish Hatchery to increase production.

8. Interim use of artificial propagation below Lewiston to accelerate restoration of natural anadromous salmonid production.

9. Formulate and conduct a wildlife management program.

10. Monitor anadromous fish and fisheries.

11. Evaluate stream and land use effects.

The program would improve fish and wildlife habitat, with secondary beneficial social effects. Based on a combined fishery harvest-to-escapement ratio of 3 to 1 for fall-run chinook and coho and a 1 to 1 ratio for spring-run chinook and steelhead, increased harvests resulting from fish populations restored by the management program would add over 174,000 fish to the current commercial, sport and Indian net catches and would result in direct yearly benefits totalling at least $8,200,000. Benefits would accrue to ocean commercial and sport fishermen, inland sport fishermen, and to the Indian net fishery.

The management program will improve wildlife habitat to increase the range carrying capacity to compensate for the 4,000 to 7,500 black-tailed deer lost when important range of the Weaverville herd was inundated by Clair Engle Lake. Restoration of these animals will add from $400,000 to $750,000 to the annual recreational value of the herd.

Negative impacts would be limited to localized short-term nuisances caused by debris dam construction and habitat inundation, habitat rehabilitation and maintenance along the Trinity River, and by vegetative control techniques used for wildlife habitat restoration.

The Proposed Management Program constitutes the optimum mix of actions selected by the Trinity River Fish and Wildlife Task Force to achieve the established fish and wildlife restoration objectives. No alternative groups of actions to achieve the program objectives were received during the scoping process. Three alternative groups of actions are evaluated in this EIS. They consist of subsets of actions contained in the proposed program and would be directed at accomplishing some portions of the established fish and wildlife restoration objectives.

Action 1, the establishment of an advisory group similar to the existing Task Force, with no regulatory authority, has a number of alternatives. These include the establishment of a management board more reflective of special private user interests within the basin, the establishment of a board with permit authority over resource uses affecting fish and wildlife, and the delegation of all management to a single agency, such as the Department of the Interior or the Department of Agriculture.

VOL
48
ISS
96
MY

1983
UMI

Alternatives to Action 2, which consists of constructing a debris dam on Grass Valley Creek and a sand dredging program in the Trinity River, were investigated in a California Department of Water Resources memo (1976). They include alternative dam sites, the use of settling ponds, reliance on suction dredging or dam construction alone, and large releases of water from Lewiston Dam to flush gravels from deposition areas below Grass Valley Creek. The proposed action was recommended in the DWR study, and adopted unanimously by the Task Force. It has since been authorized for Construction by Pub. L. 96–335. Preliminary evaluation of the impacts of this project has been completed by the California Department of Water Resources under provisions of the California Environmetnal Quality Act (CEQA).

Alternatives to Action 3, which proposes to rehabilitate habitat in the main stem of the river below Lewiston Dam, include large flushing flows to clean river gravel beds, and replacement of potential natural spawning in the rehabilitated river by increased hatchery production. Use of flushing flows, however, would be prohibited expensive and could endanger residents who have moved into the flood plain area after the construction of Trinity Dam. Increasing hatchery production to compensate for historical spawning below Lewiston would not be consistent with the Task Force emphasis on natural production where possible.

Other than no action, the alternative to Action 4, tributary rehabilitation would be hatchery expansion or relocation. Impacts expected with this alternative are discussed for Actions 3 and 7.

The major alternative to Action 7, the modification of the Trinity River Fish Hatchery, would be relocation of the hatchery downstream. This would be costly and an adequate water supply for hatchery production is not assured lower in the river. It would also require construction of a dam or weir across the river, and could negatively affect remaining natural spawning.

There are two alternatives to Action 8. As proposed, Action 8 consists of instituting various temporary artificial propogation techniques to help restore natural anadromous fish production in the main stem of the river. One alternative would be to abandon the attempt to restore natural production and rely permanently on artificial techniques. This would be inconsistent with the basic goals established by the Task Force. The second alternative would be no action which would prolong by several generations the time required for natural populations to grow enough to fill restored habitat.

Actions 5, 6, 9, 10, and 11 have no reasonable alternatives other than no action.

A notice of intent to conduct scoping meetings for this EIS was published in the September 8, 1981 **Federal Register** and was distributed to about 850 agencies, county organizations, libraries, media representatives and private interests. Comments were accepted from concerned Federal, State and local agencies, organizations, and other individuals at the Fish and Wildlife Service Area Office and at five public meetings held the week of October 5 through 9, 1981. A scoping summary was mailed to all participants on April 16, 1982. Preliminary working draft copies of the EIS were distributed to the members of the Trinity River Task Force in July 1982. Comments received in correspondence and at Task Force Action Group meetings in July and August, 1982, have been addressed in this EIS.

The major areas of controversy surrounding the proposed management program during its formulation and scoping of the EIS have either not been directly related to environmental impacts, or they have been resolved. Three controversial measures; the creation of a quasi-independent management board, the imposition of additional land-use regulations, and actions involving zoning and road ordinances affecting private lands, have been dropped from the original proposed program.

Other areas of controversy have involved such questions as what are the causes and who is to blame for the degradation of the river, who is to pay and how much for compensation, and who is to be included in management decisions. These questions are beyond the scope of an EIS.

Richard J. Myshak,

Regional Director.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Commission on Security and Economic Assistance

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the second meeting of the Commission on Security and Economic Assistance on May 26, 1983.

The purpose of the meeting is to continue the review of U.S. security and economic assistance in light of its goals and objectives, assess the modalities used and their effectiveness, and to advise the Secretary of State and the Congress of its findings and recommendations. The Commission will receive briefings on aspects of security and economic assistance and instruct the staff to prepare additional studies for its review.

The Commission will meet from 9:00 a.m. to 12:30 p.m. on May 26, 1983, at 1800 K Street, NW., Washington, D.C. 20006. The meeting is open to the public. Any interested person may attend. Written statements may be filed with the Commission in advance of the meeting.

Mr. John K. Wilhelm is the designated A.I.D. representative. Statements may be filed with him, or further information received by writing to him in care of the Agency for International Development, PPC/C, Room 1004 NS, Washington, D.C. 20523, or telephone him at 202/632–7800.

Dated: May 6, 1983.

John K. Wilhelm,

A.I.D. Representative, Commission on Security and Economic Assistance.

BILLING CODE 6116–01–M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Approved Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of approved exemptions.

SUMMARY: The motor carriers shown below have been granted exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub—No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Propery Under 49 U.S.C. 1343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: The exemptions will be effective on June 16, 1983. Petitions for reconsideration must be filed by June 6, 1983. Petitions for stay must be filed by May 27, 1983.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: For further information, see the decision(s) served in the proceeding(s) listed below. To purchase a copy of the full decision contact: TS Infosystems, Inc., Room 2227, 12th and Constitution Ave. NW., Washington, D.C. 20423; or call (202) 289–4357 in the D.C. metropolitan area; or (800) 424–5403, toll-free outside the D.C. area.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

[MC–F–15127]

Roadway Express, Ltd.—Purchase Exemption—Harkema Express Lines, Limited

Addresses: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423; (2) Petitioner's representative: William O. Turney, Suite 1010, 7101 Wisconsin Avenue, Washington, D.C. 20814. Pleadings should refer to No. MC–F–15127.

Decided: May 6, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior regulatory approval under 49 U.S.C. 11343(e), the purchase by Roadway Express, Ltd. of all of the operating rights of Harkema Express Lines, Limited, contained in Certificates No. MC–140611 (Sub-No. 2), and No. MC–96134 Sub-No. 1), acquired in MC–FC–77875.

[MC–F–15117]

Best-Way Transportation—Purchase Exemption—Spector Red Ball, Inc. (Debtor-in-Possession)

Addresses: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission Washington, D.C. 20423; and (2) Petitioner's representative Phil B. Hammond, Evans, Hammon, & Milliken 3003 N. Central, Suite 2201, Phoenix, AZ 85012. Pleadings should refer to No. MC–F–15117.

Decided: May 5, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(e), the purchase by Best Way Transportation of authorities issued to Spector Red Ball, Inc., in No. MC–2229 and various sub-numbers thereunder (28, 31, 33–46, 49, 57, 58, 62–64, 66, 67, 71, 73, 74, 76, 79, 80, 82, 85, 89, 93–95, 99, 191, 106, 111, 116, 122, 125, 131, 153, 155, 160, 163, 175, 182, 226F, 240, 245 and 271X, and portions of 102 and 169).

BILLING CODE 7035–01–M

[OP4F–289]

Motor Carriers; Decision-Notice

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquired control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2.(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this descision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board No. 3, Members Krock, Joyce and Dowell.

Agatha L. Mergenovich,

Secretary.

Please direct status inquires to Team Four at (202) 275–7669.

Volume No. OP1–173

Decided: April 28, 1983.

[MC–F–15214]

Phelco, Inc.—Purchase Exemption—Central Motor Express, Inc.

Phelco, Inc. (Phelco), seeks an exemption under section 11343 of prior regulatory approval for its purchase from Central Motor Express, Inc. (Central), of a portion of its No. MC–38320 Sub-No. 26X (formerly Sub-No. 13), as is described at paragraph 4, page 5 of said certificate authorizing the transportation of general commodities, with exceptions, over irregular routes, between points in Taylor County, KY, on the one hand, and, on the other, points in 15 States. [The parties intend to transfer not only the portion of Sub-No. 26X described above, but also the underlying certificate for that authority, MC–38320 (Sub-No. 13)]. In addition, Phelco proposes to acquire from Central all of the authority in No. MC–38320 Sub-No. 27F which authorizes the transportation of general commodities (except classes A and B explosives), over described regular routes, between (1) Campbellsville, KY, and Dayton, OH, (2) between junction Interstate Hwy 65 and Kentucky Hwy 245, at or near Bardstown Junction, KY, and Ft. Wayne, IN, and (3) between Campbellsville, KY, and Cincinnati, OH. Phelco also seeks to tack the described portion of (Sub-No. 26)X and all of (Sub-No. 27)F at Campbellsville (Taylor County), KY, and to tack the regular route authority to be acquired in (Sub-No. 27)F with the irregular route authority of Phelco in its No. MC–151504 (Sub-Nos. 2F, 7X, and 8) certificates authorizing the transportation of various specified commodities between points in various States. Finally, temporary authority is sought by Phelco to lease the operating rights to be acquired from Central pending disposition of the petition for exemption.

Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423; and (2) petitioner's representative Mr. Louis J. Amato, P.O. Box E, Bowling Green, KY 42101. Comments should refer to No. MC–F–15214.

Volume No. OP4F–282

Decided: May 9, 1983.

[MC–F–15262]

Trafco, Inc.—Purchase (Exemption)—North Manchester Trucking Company, Inc.

Trafco, Inc., seeks an exemption from the requirement under section 11343 of prior regulatory approval for its purchase of all of the operating rights of North Manchester Trucking Company Inc. (No. MC–10436 and Sub-Nos. 1, 2, 3, and 4). The rights authorize the transportation of general commodities over a network of regular and irregular routes generally involving counties in northern Indiana. Trafco intends to join its existing authority with North Manchester's to provide a through service between northern Indiana counties, on the one hand, and, on the other, points in the United States in and east of WI, IA, NE, MO, AR, and TX.

Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Michael D. McCormick SCOPELITIS & GARVIN, 1301 Merchants Plaza, Indianapolis, IN 46204. Comments should refer to No. MC–F–15262.

Volume No. OP5–F–228

Decided: May 10, 1983.

Motor Carriers; Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the **Federal Register**.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this **Federal Register** notice. Such pleading shall address specifically the issue(s) indicated as the purpose for republication. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 3 at (202) 275–5223.

Volume No. OP3–211

MC 162724 (Sub-3) (Republication) filed November 18, 1982, published in the **Federal Register** issue of December 8, 1982, and republished this issue. Applicant: MOUNTAIN OIL TRANSPORT, INC., P.O. Box 2216, Wala Wala, WA 99362. Representative: George R. LaBissoniere, 15 S. Grady Way, Suite 239, Renton, WA 98055. A decision of the Commission, Review Board Number 3, decided March 25, 1983, and served April 6, 1983 finds that the performance by the applicant of the service described herein to operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in Washington, Oregon, California, and Idaho, on the one hand, and, on the other, points in the United States (except Hawaii), and (2) *petroleum products* and *such commodities as are used in pipeline construction*, between points in the United States (except Hawaii); that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to reflect the broadening of the commodity description to the extent it authorizes bulk commodities.

Please direct status inquiries about the following to Team 4 at (202) 275–7669.

Volume No. OP4–281

MC 152566 (Sub-3) (republication), filed April 15, 1983; published in the **Federal Register** issue of April 30, 1983, and republished this issue. Applicant: ONEDIN LINES, INC., 6021 Bapst St., Toledo, OH 43615. Representative: Richard A. Eberlin, P.O. Box 39, Holland, OH 43528, (419) 474–6331. In a decision, by the Entire Commission, decided April 11, 1983, and finds that performance by applicant: To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting (1) *malt beverages*, between points in Lucas County, OH, on the one hand, and, on the other, points in Houston County, GA, Allegheny County, PA, and Milwaukee County, WI; (2) *lumber and wood products, and tar products* in containers, between points in Lucas County, OH, on the one hand, and, on the other, points in NY, PA, MI, NJ, MA, CT, IL, WI, MN, IN, WV, and VA; (3) *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI); and (4) *packaging materials and plastic products*, between points in U.S. (except AK and HI), will serve a useful public purpose responsive to public demand or need. Applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements.

Note.—The purpose of this republication is to give notice of the change in the territorial description of (3) and (4).

MC 158296 (Sub-2) (republication), filed August 23, 1982; published in the **Federal Register** issue of September 7, 1982; and republished this issue. Applicant: ROY NEAL WHEELER, SR, ROY NEAL WHEELER, JR., AND PHILIP VERNE WHEELER, d.b.a. WHEELER & SONS TRUCKING, 1607 Oro Dam Blvd. West, Oroville, CA 95965. Representative: Robert G. Harrison, 4299 James Dr., Carson City, NV 89701, (702) 882–5649. In a decision, by the Commission, Division 2, acting as an Appellate Division, decided March 28, 1983, and finds that the performance by the applicant: To operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting metal articles, building and construction materials and equipment, wood products, clay, concrete, glass and stone products, and ores and minerals, between points in Washington, Oregon, California, Nevada, Montana, Idaho, Utah, Arizona, New Mexico, Colorado, Texas, Wyoming, Louisiana, Florida, Illinois and Indiana, will serve a useful public purpose responsive to a public demand or need. Applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements.

Note.—The purpose of this republication is to include "equipment" in the commodity description.

[No. 39065[1]]

Motor Carriers; Seaboard Express, Inc., et al.—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Three motor contract carriers have each requested exemption from the requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted for future as well as existing contracts.

DATES: Comments are due June 1, 1983. The sought relief will become final June 16, 1983, unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: Interstate Commerce Commission, 12th and Constitution Ave., N.W., Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Paul Grossman, (202) 275–7976; or Howell I. Sporn, (202) 275–7691.

SUPPLEMENTAL INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2227, Washington, D.C. 20423, or call 289–4357 in the DC Metropolitan area or toll free (800) 424–5403.

Decided: May 6, 1983.

By the Commission, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L Mergenovich

Secretary.

BILLING CODE 7035–01–M

[1] This proceeding embraces three petitions for exemption: No. 39065, Seaboard Express, Inc.; No. 39068, Southwest Truck Service; and No. 39069, United Van Lines, Inc.

[Finance Docket No. 30159]

Rail Carriers; Southern Pacific Transportation Company—Abandonment Exemption—In Dallas County, TX

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts from the requirement of prior approval under 49 U.S.C. 10903 *et. seq.*, the abandonment by the Southern Pacific Transportation Company of 2.8 miles of track of its Athens Branch in Dallas County, TX, subject to standard employee protective conditions.

DATES: This exemption shall be effective on June 16, 1983. Petitions to stay the effectiveness of the decision must be filed by May 27, 1983. Petitions for reconsideration must be filed by June 6, 1983.

ADDRESSES: Send pleadings referring to Finance Docket No. 30159 to:

(1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's representative: Gary A. Laakso, Southern Pacific Building, One Market Plaza, San Francisco, CA 94105

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

BILLING CODE 7035–01–M

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petition seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Please direct status inquiries about the following to Team 1, (202) 275–7992.

Volume No. OP1–FC–174

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing. Member Ewing not participating.

MC–FC–81366. By decision of May 6, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 2 approved the transfer to DAVID W. KENNAN, d.b.a. ROGERS TRANSFER & STORAGE COMPANY, Rogers, AR, of Certificate No. 34810 issued June 9, 1959, to W. B. KENNAN, JR. AND W. R. KENNAN, d.b.a. ROGERS TRANSFER & STORAGE COMPANY, of Rogers, AR, authorizing the transportation of (1) vinegar, in containers, in truckloads, from Springdale, AR, to points in AR through OK and MO, and to points in OK, MO and KS, (2) empty glass bottles, from points in MO, KS and OK to Springdale, AR, (3) empty oil barrels and drums, from points in Benton and Washington Counties, AR, to Okmulgee, Ponca City and Tulsa, OK, (4) oil and grease, in containers, from Okmulgee, Ponca City and Tulsa, OK, to points in Benton and Washington Counties, AR (except Rogers, AR), (5) spray material and insecticides, from St. Louis and Springfield, MO, to Springdale and Rogers, AR, (6) fresh fruits, berries and vegetables, from points in Washington and Benton Counties, AR, to points in OK, KS and MO, (7) livestock and used agricultural machinery and implements, between points in Benton and Washington Counties, AR, on the one hand, and, on the other, points in OK and KS, and those in MO (except those south of U.S. Highway 66 and east of U.S. Highway 63), (8) household goods, between points in Washington and Benton Counties, AR, on the one hand, and, on the other, points in AR, MO, OK, and KS, and (9) oil, petroleum by-products, vinegar, barrels, drums, kegs, empty glass bottles, agricultural implements, charcoal, hay, straw, lime in packages, building materials, and livestock, between Rogers, AR, on the one hand, and, on the other, points in AR, OK, KS and MO. Representative: John M. Blair, 117 South Second St., Rogers, AR 72756.

MC–FC–81439. By decision of May 6, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 2 appoved the transfer to SMITH TRUCKING COMPANY, INC., Enid, OK, of Certificate No. MC–152061, issued August 26, 1981, to GENE SMITH AND ELMER ABNEY, d.b.a. SMITH TRUCKING CO., authorizing the transportation of (1) machinery, equipment, materials, and supplies used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, and (2) machinery, materials, equipment, and supplies, used in, or in connection with the construction, operation, repair, servicing, maintenance and dismantling of pipe lines, including the stringing and picking up thereof, between points in OK, KS, and TX. Representative: William P. Parker, 4400 N. Lincoln, Suite 10, Oklahoma City, OK 73105.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problem (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements wiich must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries about the following to Team 1, (202) 275-7992.

DEPARTMENT OF LABOR

Employment and Training Administration

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period May 2, 1983–May 6, 1983.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–13,895; Tuff Machine Co., Warren, MI

TA–W–13,595; Republic Steel Corp., Enduro Div., Canton, OH

In the following cases the investigation revealed that criterion (3) has not been met. Increased imports did not contribute importantly to workers separations at the firm.

TA–W–13,650; LCP Chemicals & Plastics, Inc., Syracuse, NY

TA–W–13,979; Pantasote, Inc., Point Pleasant, WV

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA–W–13,873; Great Lakes Carbon Corp., Casper, WY

Aggregate U.S. imports of calcined petroleum coke are negligible.

TA–W–13,877; Alpha Portland Cement Co., Cementon, NY

Aggregate U.S. imports of hydraulic cement did not increase as required for certification.

TA–W–13,487; Mason Bit & Tool Corp., Tuttle, OK

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

Affirmative Determinations

TA–W–13,882; Wheeling-Pittsburgh Steel Corp., Allenport Works, Allenport, PA

A certification was issued covering all workers of the firm separated on or after July 28, 1981.

TA–W–13,883; National Pipe & Tube Co., Liberty, TX

A certification was issued covering all workers of the firm separated on or after April 1, 1982.

TA–W–13,642; Armco, Inc., Ashland Works, Ashland, KY

A certification was issued covering all workers of the firm separated on or after January 1, 1982.

TA–W–13,642–A; National Supply Co., Div. of Armco, Inc., Ambridge, PA

A certification was issued covering all workers separated on or after January 1, 1982.

TA–W–13,880; Crouse-Hinds Co., Arrow Hart Div., Hartford, CT

A certification was issued in response to a petition received on October 18, 1982 covering all workers separated on or after October 13, 1981.

TA–W–13,712; Pennsylvania Optical Co., Reading, PA

A certification was issued covering all workers separated on or after August 5, 1981.

TA–W–13,615; Crucible, Inc., Specialty Metals Div., Syracuse, NY

A certification was issued covering all workers of the firm separated on or after June 28, 1981.

TA–W–13,875; Wheeling-Pittsburgh Steel Corp., Dayton District Sales Office, Dayton, OH

A certification was issued covering all workers separated on or after September 23, 1981.

TA–W–13,597; Republic Steel Corp., Enduro Div., Massilon, OH

A certification was issued covering all workers of the firm producing stainless steel strip sheet and plate separated on or after December 1, 1981.

TA–W–13,799; Olga Coal Co., Road Fork Mine #2, McDowell County, WV

A certification was issued covering all workers of the firm separated on or after October 6, 1981.

TA–W–13,852; Olga Coal Co., Olga Mine & Preparation Plant, McDowell County, WV

A certification was issued covering all workers of the firm separated on or after October 6, 1981.

TA–W–13,853; Olga Coal Co., Caretta Mine #4, McDowell County, WV

A certification was issued covering all workers of the firm separated on or after October 6, 1981.

I hereby certify that the aforementioned determinations were issued during the period May 2, 1983–May 6, 1983. Copies of these determinations are available for inspection in Room 9120, U.S. Department of Labor, 601 D Street, N.W., Washington, D.C. 20213 during normal business hours or will be mailed to persons who write to the above address.

Dated: May 10, 1983.

Glenn Zech,
Acting Director, Office of Trade Adjustment Assistance.

[TA–W–13,750]

Chicago Pneumatic Tool Co., Utica, New York; Revised Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, on March 30, 1983, the Department of Labor issued a certification of eligibility to apply for adjustment assistance to all workers of the Utica, New York plant of Chicago Pneumatic Tool Company.

Subsquent to the certification the Office of Trade Adjustment Assistance received a request to review and redetermine the impact date established in the certification. Based on the new information furnished to the Office, the certification is revised to include workers of the Utica, New York plant of Chicago Pneumatic Tool Company who were separated prior to the January 1, 1982 impact date.

The revised certification applicable to TA–W–13,750 is hereby issued as follows:

"All workers of Chicago Pneumatic Tool Company, Utica, New York who became totally or partially separated from employment on or after July 29, 1981 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974".

Signed at Washington, D.C., May 5, 1983.

Robert A. Schaerfl,
Director, Office of Program Management Unemployment Insurance Service.

[TA–W–14,502]

Merchant Metals, Columbiana, Alabama; Termination of Investigation

Pursuant to Section 221, of the Trade Act of 1974, an investigation was initiated on March 28, 1983 in response to a petition received on March 11, 1983 which was filed by United Steelworkers of America on behalf of workers at the Columbiana, Alabama plant of Merchant Metals. No public hearing was requested and none was held.

All workers were separated from the subject firm more than one year prior to the date of the petition. Section 223 of the Act specifies that no certification may apply to any worker whose last separation occurred more than one year before the date of the petition. Consequently further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed at Washington, D.C. this May 5, 1983.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

[TA–W–13,064 and 13,392]

Union Carbide Corp., Metals Division, Alamo, Nevada, Bishop, California; Revised Determination on Reconsideration

On January 20, 1983, the Department made an Affirmative Determination Regarding Application for Reconsideration for former workers at Union Carbide Corporation's Alamo, Nevada and Bishop, California facilities. This determination was published in the **Federal Register** on January 28, 1983 (48 FR 4060).

The company's application for reconsideration, supported by evidence presented at a meeting in Washington, D.C. on February 11, 1983 claimed that the Department's survey of Union Carbide's customers was inadequate in that it did not include toll converting or imports of tungsten oxide which is competitive with ammonium paratungstate, APT.

The Department's review showed that imports of APT did not meet the "contributed importantly" test as demonstrated by the Department's survey of Union Carbide's customers. All of the tungsten concentrates produced at Alamo, Nevada were used in making APT at Union Carbide's Bishop, California plant. Consequently, the proper focus of competitive impact was on the final product, APT.

On reconsideration, the Department found that U.S. imports of APT increased substantially in 1982 compared to 1981 and in 1981 compared to 1980. The ratio of imports to domestic production of APT increased from 5.4 percent in 1981 to 15.4 percent in 1982.

The Department's reconsideration survey showed another major customer of Union Carbide which had previously incorrectly indicated no import purchases had, in fact, been a major importer of APT. This customer shifted to a large degree its purchases of APT away from Union Carbide in 1982 and substantially increased its import purchases of APT. This customer's purchases of APT from Union Carbide accounted for over 20 percent of Bishop's production of APT in 1982.

Production and employment declines began in July 1981 for Union Carbide's mines and facilities at Alamo, Nevada and Bishop, California. Production of tungsten concentrates at the Alamo facility ceased in May 1982 while production of APT at Bishop ceased in April 1982.

Conclusion

After careful review of the facts obtained on reconsideration, it is concluded that increased imports of articles like or directly competitive with APT produced at Union Carbide Corporation's Metal Divison's facilities at Alamo, Nevado and Bishop, California contributed importantly to the decline in sales or production and to the total or partial separation of former workers at the above mentioned facilities. In accordance with the provisions of the Trade Act of 1974, I make the following revised determination:

"All workers of Union Carbide Corporation's Alamo, Nevada and Bishop, California facilities who became totally or partially separated from employment on or after July 1, 1981 and before July 1, 1982 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, D.C. this 6th day of May 1983.

Robert A. Schaerfl,
Director, Office of Program Management, Unemployment Insurance Service.

[TA–W–14, 525]

Bethlehem Steel Corp., Plant Patrol Department, Bethlehem, Pennsylvania; Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on March 31, 1983 which was filed on behalf of workers of the Plant Patrol Department of the Bethlehem Plant of the Bethlehem Steel Corporation, Bethlehem, Pennsylvania.

An active certification covering the petitioning group of workers remains in effect (TA–W–13,269). Consequently, further investigation in this case would serve no purpose; and the investigation has been terminated.

Signed At Washington, D.C. this May 5, 1983.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 27, 1983.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 27, 1983.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, N.W., Washington, D.C. 20213.

Signed at Washington, D.C. this 9th day of May 1983.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Office of the Secretary

The Steering Subcommittee of the Labor Advisory Committee for Trade Negotiations and Trade Policy; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463 as amended), notice is hereby given of a meeting of the Labor Advisory Committee for Trade Negotiations and Trade Policy.

Date, time and place: June 7, 1983, 9:30 p.m., Rm. N3437 A & B, Frances Perkins, Department of Labor Building, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Purpose: To discuss trade negotiations and trade policy of the United States.

This meeting will be closed under the authority of Section 10(d) of the Federal Advisory Committee Act. The Committee will hear and discuss sensitive and confidential matters concerning U.S. trade negotiations and trade policy.

For further information, contact: Joseph S. Papovich, Executive Secretary, Labor Advisory Committee, phone: (202) 523-6565.

Signed at Washington, D.C. this 12th day of May 1983.

May 12, 1983.

Robert W. Searby,

Deputy Under Secretary, International Affairs.

BILLING CODE 4510-28-M

NATIONAL COMMISSION FOR EMPLOYMENT POLICY

Meeting

AGENCY: National Commission for Employment Policy.

ACTION: Notice of meeting.

SUMMARY: Under the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given of the thirty-first meeting of the National Commission for Employment Policy in Washington, D.C. at the Capitol Hilton, 16th and K Streets, N.W.

Date: June 16, 9:00 a.m.-5:00 p.m. June 17, 9:00 a.m.-1:00 p.m.

Status: This meeting will be open to the public.

Matters to be discussed: The Commissioners will continue their discussion of the Commission work plan for fiscal year 1984. They will consider general areas of recommendation for national policy and older Americans and will discuss several other policy issues. For further information, contact: Ms. Patricia Hogue, Director, National Commission for Employment Policy, 1522 K Street, N.W., Suite 300, Washington, D.C. 20005 (202) 724-1545.

SUPPLEMENTARY INFORMATION: The National Commission for Employment Policy was established as title V of the Comprehensive Employment and Training Act Amendments of 1978 (Pub. L. 95-524). The Act gives the Commission the broad responsibility of advising the President and the Congress on national employment issues. Business meetings are open to the public. People wishing to submit written statements to the Commission that are germane to the agenda may do so, provided that such statements are in reproducible form and are submitted to the Director at least 5 days before the meeting and not more than 7 days after the meeting.

In addition, members of the general public may request to make oral presentations to the Commission, time permitting. Such statements must be applicable to the announced agenda and written application must be submitted to the director at least 5 days before the meeting. This application should include: name and address of applicant, subject of presentation, relation to agenda, amount of time needed, individual's qualifications to speak on the subject, and a statement justifying the need for an oral rather than written statement.

The Commission Chairman has the right to decide to what extent public oral presentations may be permitted at the meeting. Oral presentations will be limited to statements of fact and views and shall not include any questioning of the Commissioners or other participants unless these questions have been specifically approved by the Chairman.

Minutes of the meeting and materials prepared for it will be available for public inspection at the Commission's headquarters, 1522 K Street, N.W., Suite 300, Washington, D.C. 20005.

Signed in Washington, D.C., this 11th day of May, 1983.

Patricia W. Hogue,

Director.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Expansion Arts Advisory Panel; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Expansion Arts Advisory Panel (Services to the Field & City Arts Section) to the National Council on the Arts will be held on June 1-2, 1983, from 9:00 a.m.-5:30 p.m. at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, D.C.

A portion of this meeting will be open to the public on June 1, from 9:00 a.m.-10:30 a.m. to discuss overview of program.

The remaining sessions of this meeting on June 1, from 10:30 a.m.-5:30 p.m. and on June 2, from 9:00 a.m.-5:30 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 682-5433.

Dated: May 10, 1983.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Social and Economic Science; Subpanel for Geography and Regional Science; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meetings:

Name: Subpanel for Geography & Regional Science of the Advisory Panel for Social and Economic Science.

Date/time: June 2, 1983; 8:30 a.m. to 5:00 p.m.; June 3, 1983; 8:30 a.m. to 2:00 p.m.

Place: Rooms 338 and 421 National Science Foundation, 1800 G Street, NW., Washington, D.C.

Type of meeting: Closed.

Contact person: Dr. George J. Demko, Program Director, Geography & Regional Science, Room 312, National Science Foundation, Washington, D.C. 20550; telephone (202) 357-7326.

Purpose of subpanel: To provide advice and recommendations concerning support for research in Geography and Regional Science.

Agenda: Closed portion: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

May 12, 1983.

M. Rebecca Winkler,

Committee Management Coordinator.

VOL 48 ISS 96 MY 17 1983 UMI

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-317 and 50-318]

Baltimore Gas & Electric Co.; Issuance of Amendments to Facility Operating Licenses

The Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 83 and 66 to Facility Operating Licenses Nos. DPR-53 and DPR-69, issued to Baltimore Gas and Electric Company, which revised Technical Specifications for operation of the Calvert Cliffs Nuclear Power Plant, Units No. 1 and 2. The amendments are effective as of the date of issuance.

These amendments to the Technical Specifications (1) revise Surveillance Requirements for the equipment hatch; (2) revise Surveillance Requirements for safety-related air filter systems; (3) revise Surveillance Requirements and provide for a single period of inoperability for the hydrogen analyzers; and (4) delete the Limiting Safety System Settings and an administrative change associated with "Loss of Load" function of the Reactor Protection System.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) the application for amendment dated February 24, 1983 as supplemented by letter dated March 22, 1983, (2) Amendment Nos. 83 and 66 to License Nos. DPR-53 and DPR-69, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Calvert County Library, Prince Frederick Maryland. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 5th day of May 1983.

For the Nuclear Regulatory Commission.

Charles M. Trammell,

Acting Chief, Operating Reactors Branch #3, Division of Licensing.

[FR Doc. 83-13189 Filed 5-16-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-317 and 50-318]

Baltimore Gas & Electric Co.; Issuance of Amendments to Facility Operating Licenses

The Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 84 and 67 to Facility Operating Licenses Nos. DPR-53 and DPR-69, issued to Baltimore Gas and Electric Company, which revised Technical Specifications for operation of the Calvert Cliffs Nuclear Power Plant, Units No. 1 and 2. The amendments are effective as of the date of issuance.

These amendments revise the Technical Specifications to allow periodic testing of control element assemblies with an inoperable reed switch stack system.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respects to this action, see (1) the application for amendment dated March 15, 1983, (2) Amendment Nos. 84 and 67 to License Nos. DPR-53 and DPR-69, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Calvert County Library, Prince Frederick, Maryland, A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 5th day of May, 1983.

BILLING CODE 7590-01-M

[Docket No. 50-369]

Duke Power Co.; Issuance of Amendment Facility Operating License No. NPF-9

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 21 to Facility Operating License No. NPF-9, issued to Duke Power Company (licensee) for the McGuire Nuclear Station, Unit 1 (the facility) located in Mecklenburg County, North Carolina.

This amendment adds to the operating license a condition for verifying acceptability of Model D2 steam generator design modifications. The amendment is effective as of its date of issuance.

Issuance of this amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) Duke Power Company letter dated February 3, and April 28, 1983, (2) Amendment No. 21 to Facility Operating License No. NPF-9 and (3) the Commission's related Safety Evaluation.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and the Atkins Library, university of North Carolina, Charlotte (UNCC Station), North Carolina 28223. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 5th day of May 1983.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Chief, Licensing Branch No. 4, Division of Licensing.

BILLING CODE 7590-01-M

[Docket Nos. 50-369 and 50-370]

Duke Power Co.; Granting of Relief From Requirements of ASME Code Section XI Inservice (Testing) Requirements

The Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules and Inservice Inspection of Nuclear Power Plant Components" to the Duke Power Company (the licensee). The relief relates to the preservice hydrostatic tests for the McGuire Nuclear Station, Units 1 and 2 (the facilities) located in Mecklenburg County, North Carolina. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of its date of issuance.

The relief relates to certain preservice examination requirements, pursuant to the Commission's regulations in 10 CFR 50.55a(g)(6)(i). In lieu of hydrostatic tests, the licensee will perform nondestructive examinations consisting of radiography, ultrasonic testing, and surface examination of the welds.

The requests for relief comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the related Safety Evaluation Report.

The Commission has determined that the granting of relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration environmental impact appraisal need not be prepared in connection with issuance of this action.

For further details with respect to this action, see (1) the licensee's letter dated March 11, 1983, (2) the Commission's letter to the licensee dated May 9, 1983 and, (3) the Commission's related Safety Evaluation Report. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Atkins Library, University of North Carolina—Charlotte, UNCC Station, North Carolina 28223. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 10th day of May, 1983.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Chief Licensing Branch No. 4 Division of Licensing.

[FR Doc. 83-13192 Filed 5-16-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-315 and 50-316]

Indiana & Michigan Electric Co.; Issuance of amendments to Facility Operating Licenses

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 73 to Facility Operating License No. DPR-58, and Amendment No. 55 to facility Operating License No. DPR-74 issued to Indiana and Michigan Election Company (the licensee), which revised Technical Specifications for operation of Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2 (the facilities) located in Berrien County, Michigan. The amendments are effective as of the date of issuance.

The amendments revise the license conditions and Technical Specifications to permit the storage of Westinghouse 15 X 15 optimized fuel assemblies with a uranium enrichment of less than or equal to 4.00 weight percent of U-235. The portion of the licensee's request relating to authorization to operate with such new fuel is still under NRC staff review.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated February 28, 1983, (2) Amendment Nos. 73 and 55 to License Nos. DPR-58 and DPR-74, and (3) the Commission's related Safety evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington D.C. and at the Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of May, 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1. Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-322-OL-3; ASLBP No. 83-488-03 OL]

Long Island Lighting Co.; Establishment of Atomic Safety and Licensing Board To Preside In Proceeding

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972), and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, and pursuant to the Statement of Policy on Conduct of Licensing Proceedings, 13 N.R.C. 452 (1981), and the request of the Atomic Safety and Licensing Board already established to preside in this operating license proceeding, a separate Atomic Safety and Licensing Board is being established to preside over the proceeding on all emergency planning issues: Long Island Lighting Company, Shoreham Nuclear Power Station, Unit 1, Construction Permit No. CPPR-95.

This Board is being constituted pursuant to a notice published by the Commission on March 18, 1976 in the **Federal Register** entitled, "Receipt of Application for Facility Operating License, Availability of Applicant's

VOL
48
ISS
96
MY

BILLING CODE 7590-01-M

[Docket No. 50-298]

Nebraska Public Power District; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 83 to Facility Operating License No. DPR-46 issued to Nebraska Public Power District (the licensee) which revised the Technical Specifications for operation of the Cooper Nuclear Station located in Nemaha County, Nebraska. The amendment is effective as of the date of its issuance.

The amendment to the Technical Specifications revises the following: (1) Lowers the MSIV low reactor water level isolation setpoint from the current level 2 to level 1, (2) lowers the opening and closing setpoints of two preselected SRVs upon opening of any SRV, and (3) reorganizes the bases of Section 3.2, Protective Instrumentation to categorize the systems covered and incorporates the bases for the Technical Specification changes addressed by this amendment.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determine that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated December 17, 1982, as supplemented February 15, 1983, (2) Amendment No. 83 to License No. DPR-46 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W. Washington, D.C., and at the Auburn Public Library, 118-15th Street, Auburn, Nebraska 68304. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of May 1983.

Domenic B. Vassallo,

Chief, Operating Reactors Branch #2, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-336]

Northeast Nuclear Energy Co., et al.; Granting Relief From ASME Section XI Inservice Testing Requirements

The Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to the Northeast Nuclear Energy Company, et al. The relief relates to the inservice testing program at the Millstone Nuclear Power Station, Unit No. 2 (the facility) located in Waterford, Connecticut. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of the date of its issuance.

The relief permits the licensee to test certain designated pumps and valves in a manner or on a schedule different from that prescribed in Section XI of the ASME Boiler and Pressure Vessel Code and applicable Addenda, as required by 10 CFR Part 50, because of inaccessibility, configuration of components, radiation level, or other valid reasons.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief and in the accompanying Safety Evaluation.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the application for relief dated June 25, 1979, as revised May 1, 1981, (2) the Commission's letter dated May 4, 1983 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at Waterford Public Library, Rope Ferry Road, Waterford, Connecticut.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of May, 1983.

For the Nuclear Regulatory Commission.

Charles M. Trammell,

Acting Chief, Operating Reactors Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket Nos. 50-327 and 50-328]

Tennessee Valley Authority; Issuance of Amendments Facility Operating License Nos. DPR-77 and DPR-79

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 29 to Facility Operating License No. DPR-77 and Amendment No. 18 to Facility Operating License No. DPR-79, issued to Tennessee Valley Authority (licensee) for the Sequoyah Nuclear Plant, Units 1 and 2 (the facilities) located in Hamilton County, Tennessee. These amendments change the Technical Specifications to reflect installation of the second level of undervoltage protection for the Class 1E buses. The amendments are effective as of their dates of issuance.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) and environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) Tennessee Valley Authority letters dated September 17 and December 1, 1982, and April 7, 1983 (2) Amendment No. 29 to Facility Operating License No. DPR-77 with Appendix A Technical Specification page changes; (3) Amendment No. 18 to Facility Operating License No. DPR-79 with Appendix A Technical Specification page changes; and (4) the Commission's related Safety Evaluation.

All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and the Chattanooga Hamilton County Bicentennial Library, 1001 Broad Street, Chattanooga, Tennessee 37402. A copy of Amendment No. 29 and Amendment No. 18 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 5th day of May 1983.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket No. 50-128]

Texas A&M University; Renewal of Facility Operating License and Negative Declaration

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 9 to Facility Operating License No. R-83, which renews the license for the operation of the TRIGA-type reactor (the facility) located on the campus of the Texas A&M University (the licensee) in College Station, Texas. The facility is a research reactor that has been operating at steady-state power levels not in excess of one (1) megawatt thermal with periodic pulses of power at somewhat higher levels for extremely short periods.

The amendment extends the duration of Facility License No. R-83 for twenty years from the date of issuance of this amendment.

The application for the renewal complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I. Those findings are set forth in the license amendment. Notice of the proposed issuance of this action was published in the **Federal Register** on October 25, 1979 at 44 FR 61474. No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The Commission has prepared an Environmental Impact Appraisal for the renewal of the Facility Operating License, and has concluded that an Environmental Impact Statement for this particular action is not warranted because there will be no significant environmental impact attributable to the action.

For further details with respect to this action, see (1) the application for renewal dated July 2, 1979, as supplemented by filings dated July 10, 1979, October 20, 1980, January 15, 1980, April 16, 1982, May 27, 1982, October 28, 1982 and November 1, 1982; (2) Amendment No. 9 to License No. R-83; and (3) the Commission's related Safety Evaluation Report and Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C.

A copy of items (2) and (3) may be obtained upon request from the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 30th day of March 1983.

For the Nuclear Regulatory Commission.

[Docket No. 50-508-OL; ASLBP No. 83-486-01 OL]

Washington Public Power Supply System, et al. (Nuclear Project No. 3); Reconstitution of Board

Pursuant to the authority contained in 10 CFR 2.721 (1980), the Atomic Safety and Licensing Board for *Washington Public Power Supply System, et al.* (Nuclear Project No. 3), Docket No. 50-508-OL, is hereby reconstituted by appointing Administrative Judge Frederick J. Shon in place of Administrative Judge Glenn O. Bright who, because of a schedule conflict, is no longer able to serve.

As reconstituted, the Board is comprised of the following administrative Judges: Morton B. Margulies, Chairman, Frederick J. Shon, Dr. James H. Carpenter.

All correspondence, documents and other material shall be filed with the Board in accordance with 10 CFR 2.701 (1980). The address of the new Board member is: Administrative Judge Frederick J. Shon, U.S. Nuclear Regulatory Commission, Atomic Safety and Licensing Board Panel, Washington, D.C. 20555.

Dated at Bethesda, Maryland, this 11th day of May, 1983.

BILLING CODE 7590-01-M

[Docket No. 50-301]

Wisconsin Electric Power Co. (Point Beach Nuclear Plant Unit 2); Exemption

I

Wisconsin Electric Power Company (the licensee) is the holder of Facility Operating License No. DPR-27 (the license) which authorizes operation of

VOL 48 ISS 96 MY 17 1983 UMI

the Point Beach Nuclear Plant, Unit No. 2 (the facility) at a steady state reactor power level not in excess of 1518 megawatts thermal. The facility consists of a Westinghouse Electric Corporation designed pressurized water reactor (PWR) located at the licensee's site in Manitowoc County, Wisconsin.

The license is subject to all rules, regulations and Orders of the Commission.

II

10 CFR 50.44(c)(3)(iii) requires a licensee to provide each light-water nuclear power reactor with high point vents for the reactor coolant system, for the reactor vessel head, and for other systems required to maintain adequate core cooling if the accumulation of non-condensible gases would cause the loss of function of these systems. Required modifications are to be completed by the end of the first scheduled outage of sufficient duration beginning after July 1, 1982.

By letter dated April 5, 1983, the licensee requested an exemption to the schedular requirements of Paragraph (c)(3)(iii) of 10 CFR 50.44. The licensee requests that it be granted an exemption until no later than January 1, 1984 to complete installation of the reactor coolant system and reactor vessel head high point vents for the Point Beach Nuclear Plant, Unit No. 2.

The licensee has stated that the control panel necessary to permit complete remote operation of the reactor coolant gas vent system for Point Beach Unit No. 2 were not available for installation during the Spring 1983 annual refueling outage for this unit. The Spring 1983 refueling outage is the first scheduled outage of sufficient duration after July 1, 1982 to permit installation of the reactor coolant gas vent system at Point Beach Unit No. 2. The licensee has further stated that the Point Beach Unit No. 2 reactor coolant gas vent system valves and piping will be installed and hydrostatically tested during the spring 1983 outage. All manual isolation valves will be open and all remotely operated solenoid valves will be closed with power removed to preclude inadvertent operation of the system. This is identical to the system lineup previously approved for Unit 1.

The licensee has further stated that temporary power supplies could be utilized to operate the reactor vessel head vent in the event of an accident occurring before final installation is completed. The existing Power Operated Relief Valves form the pressurizer high point vent portion of the system. These are fully operable.

Delivery of the control panels necessary to permit remote operation of the reactor coolant vents system is expected in late 1983. These panels are also necessary to complete installation of the reactor coolant gas vent system for Unit 1. A similar schedular exemption for Unit 1 was granted on January 25, 1983.

The NRC staff has reviewed the basis for an exemption to the RCS vents scheduled for Point Beach Unit No. 2. The licensee's efforts to minimize inadvertent actuation by removing power from the power operated solenoid isolation valves until construction is completed are warranted. Since the likelihood that vents would be needed prior to the completion of the vent system is low, the NRC staff concludes that a schedular exemption to the hydrogen rule vents requirements (10 CFR 50.44(c)(3)(iii)) until the system controls are installed and fully tested, but no later than January 1, 1984, is reasonable and that the licensee's request for exemption should be granted.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, the exemption requested by the licensee's letter of April 5, 1983, as discussed above, is authorized by law and will not endanger life or property or the common defense and security, and is otherwise in the public interest. The requested exemption is hereby granted as follows:

The date specified in Paragraph (c)(3)(iii) of 10 CFR 50.44 to complete installation of reactor coolant system high point vents is extended to no later than January 1, 1984 for the Point Beach Nuclear Plant, Unit No. 2.

The Commission has concluded, based on the considerations discussed above, that (1) because the granting of this Exemption does not involve a significant increase in the probability or consequences of an accident previously evaluated, does not create the possibiltiy of an accident of a type different from any evaluated previously, and does not involve a significant reduction in a margin of safety, the Exemption does not involve a significant hazards consideration, (2) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (3) such activities will be conducted in compliance with the Commission's regulations and the granting of this Exemption will not be inimical to the common defense and security or to the health and safety of the public.

The Commission has determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

This Exemption is effective upon issuance.

Dated at Bethesda, Maryland this 9th day of May, 1983.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing.

[FR Doc. 83-12301 Filed 5-16-83; 8:45 am]

BILLING CODE 7590-01-M

Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The new guide is Regulatory Guide 8.31, "Information Relevant to Ensuring that Occupational Radiation Exposures at Uranium Mills Will Be As Low As Is Reasonably Achievable." This guide recommends design criteria and administrative practices acceptable to the NRC staff for maintaining occupational exposures as low as is reasonably achievable in uranium mills and certain other types of uranium recovery facilities.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Copies of active guides may be purchased at the current Government Printing Office price. A subscription service for future guides in specific divisions is available through the Government Printing Office.

Information on the subscription service and current prices may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Publications Sales Manager.

BILLING CODE 7590-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Section 201 Case]

Certain Stainless Steel and Alloy Tool Steel Products; Solicitation of Public Views

Pursuant to Section 201 of the Trade Act of 1974, the President received, on May 6, 1983, a report from the United States International Trade Commission (USITC) on the case of certain stainless steel and alloy tool steel products provided for under the following items of the Tariff Schedules of the United States (Annotated) or TSUS(A):

	609.45	606.94
606.90	606.93	607.28
606.95	607.26	607.46
607.34	607.43	607.76
607.54	607.72	608.26
607.88	607.90	608.43
608.29	608.34	608.64
608.49	608.57	

The USITC determined that such stainless steel and alloy tool steel products are being imported into the United States in such increased quantities as to be a substantial cause of serious unjury to the four domestic industries producing articles like or directly competitive with the imported articles.

The Commission found and recommended that, in order to remedy the serious injury found to exist:

(1) It would be necessary to impose restrictions for a three-year period beginning January 1, 1983, as follows:

(a) For stainless steel sheet and strip, 8 percent of forecasted U.S. consumption, but not less than 62,900 short tons;

(b) For stainless steel plate, 10 percent of forecasted apparent consumption, but not less than 10,700 short tons;

(c) For stainless steel bar, 17 percent of forecasted U.S. consumption, but not less than 27,000 short tons;

(d) For stainless steel wire rod, 42 percent of forecasted U.S. consumption, but not less than 19,100 short tons;

(e) For alloy tool steel, 20 percent of forecasted U.S. consumption, but not less than 22,400 short tons;

(2) The period 1972–1982, exclusive of 1975 and 1982, is the period most representative of imports of these articles;

(3) No more than 30 percent of the respective aggregate quantities specified in (1), above, for each class of articles may be entered during any calendar quarter; and

(4) In order to provide for a more equitable distribution of imports among supplying countries, the quantities specified in (1), above, for each class of articles should be allocated on a country-by-country basis.

(5) The following articles should be exempted from any relief:

(a) Razor blade steel provided for in TSUS item 608.26

(b) Chipper knife steel provided for in TSUSA items:

608.9300	607.5405	608.3405
608.9400	607.7205	608.4905
607.3405	607.8805	608.6405

(c) Band saw steel provided for in the following TSUSA items:

608.9520	607.5405	608.3405
608.9525	607.7205	608.4905
607.3405	607.8805	608.6405

(d) The first 6,000 short tons of the following stainless steel sheet, which is provided for in TSUSA item 607.9020:

Stainless steel sheet not under 0.055 inch and not over 0.065 inch in thickness, not under 25.5 inches and not over 26.25 inches in width, which contains in addition to iron, each of the following elements by weight in the amounts specified and which is certified at the time of entry to be imported for use in the manufacture of stainless-steel-clad aluminum automotive trim:

Carbon: not more than 0.12 percent;
Chromium: not less than 16 percent nor more than 18 percent;
Molybdenum: not less than 0.75 percent nor more than 1.25 percent;

The Commission also advised the President that the exemption of:

(1) Stainless flapper valve steel.
(2) Lummis strip steel.
(3) Rotor steel for hysteresis motors.
(4) Grade 253 MA stainless.
(5) Grade 254 SMO stainless steel.
(6) Stainless steel sheet 72 to 80 inches in width.

would not have an adverse impact on the industry seeking relief (See USITC report TA–201–48).

Within 60 days of receiving a report from the Commission containing an affirmative determination (by July 5, 1983 in this case), the President must determine what method and amount of import relief he will provide or determine that import relief is not in the national economic interest and whether he will direct expeditious consideration of adjustment assistance petitions.

In determining whether to provide import relief and what method and amount of import relief he will provide, the President must take into account, in addition to other considerations he may deem relevant, the following factors:

(1) The probable effectiveness of the import relief as a means to promote adjustment, the efforts being made or to be implemented by the industry concerned to adjust to import competition, and other considerations relevant to the position of the industry in the Nation's economy;

(2) The effect of import relief on consumers and on competition in the domestic markets for such articles;

(3) The effect of import relief on the international economic interests of the United States;

(4) The impact on United States industries and firms as a consequence of any possible modifications of duties or other import restrictions which may result from international obligations with respect to compensation;

(5) The geographical concentration of imported products marketed in the United States;

(6) The extent to which the United States' market is the focal point for exports of such articles by reason of restraints on exports of such articles to, or on imports of such articles into, third country markets; and

(7) The economic and social costs which would be incurred by taxpayers, communities, and workers if import relief were not provided.

The Office of the United States Trade Representative (USTR) chairs the interagency Trade Policy Committee structure that makes recommendations to the President as to what action, if any, he should take on reports submitted by the USITC under Section 201(d). In order to assist the development of recommendations to the President as to what action he should take under sections 202 and 203 of the Trade Act of 1974, the USTR welcomes written views or briefs from interested parties on the above listed subjects.

Briefs should be submitted in twenty (20) copies, in conformity with 15 CFR 2003, to the Secretary, Trade Policy Staff Committee, Room 500, Office of the United States Trade Representative, 600 17th Street NW., Washington, D.C. 20506.

For further informaton contact: Catherine Curtiss, telephone 202–395–4948. Legal questions should be directed to C. Michael Hathaway 202–395–3432.

(Additional information on this case is available in USITC report TA–201–48).

To be considered by the Office of the USTR, submissions should be received as soon as possible, but in no event later than the close of business, Tuesday, May 31, 1983.

Supplementary information: This investigation was initiated by the USITC on December 9 following the receipt of a letter on November 23, 1982, from the USTR requesting an expedited investigation under section 201 concerning imports of certain stainless steel and alloy tool steel products. The USTR's request was in accordance with a determination of the President on November 16, 1982 (47 FR 51717), under section 301(a)(2)(A) of the Trade Act of 1974 (19 U.S.C. 2411(a)(2)(A)).

The President's action followed the completion of investigations under section 301 of the Act initiated by USTR on February 26, 1982 (47 FR 10107) and on August 9, 1982 (47 FR 36387). These investigations were instituted (for all countries listed except Brazil) on the basis of petitions filed by the Tool and Stainless Steel Industry Committee and the United Steelworkers of America, alleging that the European Community, Belgium, France, Italy, the United Kingdom, Brazil, Austria, and Sweden had subsidized the production of stainless steel and alloy tool steel in a manner inconsistent with their obligations under Articles VI, XVI, XXIII of the Subsidies Code of the General Agreement on Tariffs and Trade.

Frederic L. Montgomery,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3190–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13223; (812–5512)]

The Tax Free Fund, Inc. (Formerly Criterion Tax Free Fund, Inc.); Filing of Application

May 6, 1983.

Notice is hereby given that The Tax Free Fund, Inc. ("Applicant"), 333 Clay Street, Suite 4300, Houston, Texas 77002, registered under the Investment Company Act of 1940 (the "Act") as an open-end, diversified management investment company, filed an application on April 4, 1983, and an amendment thereto on or about May 5, 1983, for an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant's Current Interest Tax Free Portfolio and any portfolios that invest primarily in tax free money market instruments that may subsequently be created by Applicant (the "Short-term Porfolios" or "Portfolios") from the provisions of Sections 2(a)(41) and 12(d)(3) of the Act and Rules 2a–4 and 22c–1 thereunder to the extent necessary: (1) To permit the Short-term Portfolios to calculate their net asset values per share and to value their assets pursuant to the amortized cost method of valuation pursuant to the conditions set forth below and (2) to permit the Short-term Portfolios to acquire stand-by commitments from brokers and dealers and to permit the rights belonging to the Short-term Portfolios to be valued in the manner set forth in the application. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below. Such persons are also referred to the Act and the Rules thereunder for the complete text of those provisions thereof from which an exemption is being sought.

Applicant states that it is incorporated under the laws of the State of Texas. It has filed a registration statement with the Commission under the Securities Act of 1933 pursuant to which it seeks to register shares of its first two portfolios for sale to the public. That registration statement has not yet become effective. Applicant further states that Funds, Inc., a wholly owned subsidiary of the Criterion Management Company, serves as investment adviser to Applicant.

Pursuant to Applicant's Articles of Incorporation, Applicant's Class A Common Stock may be divided into series. Shares of each series represent interests in separate portfolios of investments that Applicant will acquire. Applicant represents that the investment return and net asset value of shares of each series will be determined separately from other series and will be based upon the investment results of each series' separate portfolio. Applicant currently has one Short-term Portfolio: the Current Interest Tax Free Portfolio.

The Short-term Portfolios will seek as their investment objectives to obtain as high a level of current income exempt from Federal income taxation as is consistent with the preservation of capital and maintenance of liquidity. Applicant states that the Short-term Portfolios will pursue these objectives by investing primarily in high quality, short-term obligations, the income form which is exempt from Federal income taxation. Among the obligations in which the Short-term Portfolios may invest are variable rate and floating rate obligations. To the extent that any Short-term Portfolio, relying upon the order issued upon the application, purchases any such obligations, Applicant states that the procedures applicable to such purchases, as well as the manner by which the maturities of such obligations will be determined, will conform to the requirements set forth in proposed Rule 2a–7 or, if that Rule should ultimately be adopted, the procedures set forth in the Rule as adopted.

Applicant states that its Board of Directors has reviewed the various valuation and pricing procedures that might be utilized by the Short-term Portfolios and has concluded that it would be in the best interests of such Portfolios and their shareholders to utilize amortized cost valuation in valuing all securities held. Through such valuation method, it is asserted that the Short-term Portfolios would be able to offer two features which appear to be favored by investors: (1) Stability of principal (i.e., a stable net asset value per share) and (2) a steady flow of investment income. Applicant's Board of Directors believes that these features can best be obtained through use of amortized cost valuation subject to the conditions hereinafter set forth. It further believes that with respect to a portfolio of securities maturing in 120 days or less there is normally a negligible discrepancy between market value and amortized cost value. Accordingly, Applicant states that its Board of Directors has determined in good faith that, in view of the objectives of the Short-term Portfolios and the conditions pursuant to which amortized cost valuation would be used, such valuation method would be appropriate and would reflect the fair value securities absent unusual circumstances.

In order to improve the liquidity of their investments, the Short-term Portfolios also may purchase securities together with the right to resell such securities to the seller at an agreed upon price or yield within a specified period prior to the maturity date of such securities. This right to resell is, generally known as a "stand-by commitment" or "put". Applicant states that its Board believes that the acquisition of such stand-by commitments by the Short-term Portfolios would help to assure appropriate liquidity to facilitate the availability of funds to satisfy redemptions of their shares. In reaching that determination, the application states that Applicant's Board of Directors considered the fact that the available maturities of short-term municipal obligations are normally not as frequent and flexible as those of other money market instruments. Maturity dates of such obligations may be sufficiently infrequent that, at times, the Short-term Portfolios would be unable to rely upon scheduled maturities to meet net redemptions of their shares by shareholders. Applicant represents that, absent the use of stand-by commitments, a portion of each Short-term Portfolio's assets would have to be retained in cash or very short-term instruments, which would reduce investment return. In order to enhance the investment opportunities and flexibility of the Short-term Portfolios, Applicant's Directors believe that it would be appropriate and consistent with shareholders' best interests to acquire stand-by commitments from broker-dealers, as well as from banks.

Applicant represents that the investment policies of the Short-term Portfolios will permit the acquisition of stand-by commitments solely to facilitate liquidity, and the acquisition, exercisability and duration of the stand-by commitments will not be a factor in determining the dollar-weighted average maturities of the Short-term Portfolios, or the values and maturities of the securities they hold. Applicant states that the stand-by commitments will have the following features: (1) They will be in writing and will be physically held by Applicant's custodian; (2) they will be exercisable at any time prior to the underlying security's maturity; (3) the rights of the Short-term Portfolios to exercise the stand-by commitments will be unconditional and unqualified; (4) they will be entered into only with dealers, banks and brokers who, in Applicant's investment adviser's opinion, present a minimal risk of default; (5) although the commitments will not be transferable, the municipal obligations purchased subject to such commitments may be sold to a third party at any time, even though a commitment may be outstanding; and (6) their exercise price in each case will be (i) the relevant Short-term Portfolio's acquisition cost of the municipal obligation that is subject to the commitment (excluding any accrued interest that such Portfolio paid on acquisition of the security), less any amortized market premium or plus any amortized market or orginal issue discount during the period such Portfolio owned the municipal obligations, plus (ii) all interest accrued on the municipal obligation since the last interest payment date during the period such obligation was owned by the Portfolio.

Because the Short-term Portfolios will value municipal obligations on an amortized cost basis, assuming an order permitting such valuation method is granted, the amount payable under a stand-by commitment will be substantially the same as the value assigned to the underlying securities. In addition, due to the high quality of the securities in which the Short-term Porfolios will invest, there is little risk of an event occurring that would make amortized cost valuation of portfolios securities inappropriate. However, in the unlikely event that the market or fair value of the Short-term Portfolios' securities were not substantially equivalent to their amortized cost value, Applicant's Directors may determine that the securities should be valued on the basis of available market information. Applicant represents that the Short-term Portfolios will refrain from exercising the stand-by commitments in such situations to avoid imposing a loss on dealers and banks and jeopardizing applicant's business relationships with such dealers and banks. Stand-by commitments generally will be available without the payment of any direct or indirect consideration. If Applicant's Directors believe it to be necessary or advisable, the Short-term Portfolios may pay for stand-by commitments, either separately in cash or by paying a higher price for the securities that are acquired subject to the commitment. However, as a matter of policy, the total amount "paid" in either manner for outstanding stand-by commitments held by each Short-term Portfolio will not exceed 1/2 of 1% of the value of its total assets calculated immediately after any stand-by commitment is acquired.

Because it is difficult to evaluate the likehood of use or the potential benefit of a stand-by commitment, the Directors believe that such commitments should be given no value in determining the net asset value of a Short-term Portfolio, regardless of whether any direct or indirect consideration is paid. When the Short-term Portfolios pay for a stand-by commitment, its cost will be reflected as unrealized depreciation for the period during which the commitment is held. In addition, for purposes of complying with the conditions that: (i) The dollar-weighted average maturity on the Short-term Portfolios securities shall not exceed 120 days and (ii) the maturity of a portfolio security shall not exceed one year, the existence of stand-by commitments will not be viewed as shortening the maturities of the underlying municipal obligations subject to such commitments.

Applicant notes that the Internal Revenue Service ("IRS") has issued favorable private letter rulings to the effect that a registered investment company will be the owner of municipal obligations acquired subject to a stand-by commitment and that interest on the securities will be tax-exempt to the company. However, Applicant does not intend to seek a ruling from the IRS with respect to this matter. There is no assurance that stand-by commitments will be available to the Short-term Portfolios nor can it be assumed that such commitments will continue to be available under all market conditions.

Prior to the filing of the application, the Commission expressed its view that, among other things: (1) Rule 2a-4 under the Act requires that portfolio instruments of money market funds be valued with reference to market factors, and (2) it would be inconsistent, generally, with the provisions of Rule 2a-4 for a money market fund to value its portfolio instruments on an amortized cost basis (Investment Company Act Release No. 9786, May 31, 1977. Section 6(c) of the Act provides, in pertinent part, that the Commission by order upon application may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant (the "Fund") agrees that the following conditions may be imposed by the Commission upon each of the Short-term Portfolios relying upon any exemptive order granting the relief requested herein:

1. In supervising the Portfolio's operations and delegating special responsibilities involving portfolios management to the Fund's investment adviser, the Fund's Board of Directors undertakes—as a particular responsibility within the overall duty of care owed to shareholders—to establish procedures reasonably designed, taking into account current market conditions and the Portfolio's investment objectives, to stabilize the Portfolio's net asset value per share, as computed for the purposes of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by the Board of Directors shall be the following:

(a) Review by the Board of Directors, as it deems appropriate and at such intervals as are reasonable in light of

VOL
48
ISS
96
MY
17
1983
UMI

current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from the Portfolio's $1.00 amortized cost price per share and the maintenace of records of such review.[1]

(b) In the event such deviation from the Portfolio's $1.00 amortized cost priced per share exceeds ½ of 1%, a requirement that the Board of Directors will promptly consider what action, if any, should be initiated.

(c) Where the Board of Directors believes that the extent of any deviation from the Portfolio's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which may include: redemption of shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten the average maturity of portfolio instruments of the Portfolio; withholding dividends; or utilizing a net asset value per share as determined by using market quotations.

3. The Portfolio will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining as table net asset value per share; provided, however, that it will not (a) purchase any instrumnent with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity in excess of 120 days.[2]

4. The Fund will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in paragraph 1 above, and will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the Board of Directors' considerations and actions taken in connection with discharge of its responsibilities, as set forth above, to be included in the minutes of the Board of Directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. The Portfolio will limit its portfolio investments, including repurchase agreements, to those United States dollar denominated instruments which the Board of Directors determines present minimal credit risks and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by the Board of Directors.

6. The Fund will include in each quarterly report, as an attachment to Form N–1Q, a statement as to whether any action pursuant to paragraph 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

In connection with the acquisition of stand-by commitments by the Short-term Portfolios, Applicant states that it is significant that the commitments will be valued in a way that will not result in the insulation of net asset value per share against decline due to unrealized depreciation in the values of portfolio securities. The commitments will not pose new investment risks because of the manner in which they will be used, and instead will simply improve the liquidity of the Short-term Portfolios and their ability to satisfy redemptions of their shares. In addition, to the extent the commitments may represent an obligation of a broker or dealer, Applicant represents that such Portfolios' reliance upon the obligations of dealers and brokers from whom stand-by commitments are acquired will be secured to the extent of the value of underlying municipal obligations that are subject to the commitments. Applicant states that, under the foregoing circumstances, the acquisition of stand-by commitments will not expose the Short-term Portfolios to a significant extent to the credit risks of brokers or dealers.

Nevertheless, Applicant states that the Fund's investment adviser intends to evaluate periodically the credit of institutions issuing stand-by commitments to the Short-term Portfolios. Finally, according to Applicant, the Short-term Portfolios will not acquire stand-by commitments to promote reciprocal practices, to encourage distribution efforts or to obtain research sevices. Accordingly, Applicant asserts that the acquisition of stand-by commitments will not meaningfully expose assets of the Short-term Portfolio to the entrepreneurial risks of the ivestment banking business, nor require them to evaluate the credit of dealers in determining their net asset values per share. Under the circumstances, and in view of the conditions and representations set forth in the application, Applicant submits that the granting of the requested exemptive orders would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 31, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83–13139 Filed 5–16–83; 8:45 am]

BILLING CODE 8010–01–M

[1] To fulfill this condition, the Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the Board of Directors in the exercise of its discretion to the appropriate indicators of value which may include, inter alia: (1) quotations or estimates of market value for individual portfolio securities, or (2) values obtained from yield data relating to classes of securities published by reputable sources.

[2] In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, the Portfolio will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

[Release No. 13232 (812–5426)]

The Benchmark Fund Money Market and Government Portfolios and the Benchmark Tax-Exempt Fund; Filing of Application for an Order Pursuant to Section 6(c) of the Act for Exemption From the Provisions of Sections 2(a)(41) and 12(d)(3) of the Act and Rules 2a–4 and 22c–1 Thereunder

In the matter of The Benchmark Fund Money Market and Government Portfolios (formerly known as Compass Fund Money Market and Government Portfolios) and The Benchmark Tax-Exempt Fund (formerly known as Compass Tax-Exempt Fund), 111 West Jackson Boulevard, Chicago, Illinois 60604.

Notice is hereby given that The Benchmark Fund Money Market and Government Portfolio ("BF") and the Benchmark Tax-Exempt Fund ("BTF," and jointly with BF, the "Applicants"), open-end, diversified management investment companies registered under the Investment Company Act of 1940 (the "Act"), filed an application on January 11, 1983, and an amendment thereto on April 22, 1983, for an order of the Commission, pursuant to Section 6(c) of the Act, exempting BTF from the provisions of Sections 12(d)(3) and 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder to the extent necessary to permit BTF to acquire certain "puts" solely to facilitate portfolio liquidity and to value puts as described in the application and exempting both Applicants from the provisions of Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder to the extent necessary to permit them to compute their respective net asset values per unit using the amortized cost method of valuation. All interested persons are referred to the application on file with the Commission for a statement of the representatives therein, which are summarized below. Such persons are also referred to the Act and the rules thereunder for the complete text of the provisions thereof from which an exemption is being sought.

Applicants state that they are newly formed "money market funds." The application states that BF's investment objective is to maximize current income to the extent consistent with the preservation of capital and the maintenance of liquidity through investment in high quality money market instruments. BF states that it will initially offer two separate portfolios of money market instruments, a Money Market Portfolio and a Government Portfolio, each of which is represented by a separate series of units of beneficial interest. In the case of BF, the order sought would relate separately to the Money Market Portfolio and the Government Portfolio as well as to each additional money market fund portfolio.

The application further states that BFT's investment objective is to provide its unitholders, to the extent consistent with the preservation of capital and prescribed portfolio standards, with a high level of income exempt from Federal income taxes by investing primarily in municipal instruments. BTF states that it will initially offer a Short-Term Diversified Portfolio (the "Tax-Exempt Portfolio") and may create additional portfolios. In the case of BTF, the order sought would relate to the Tax-Exempt Portfolio as well as separately to each additional money market fund portfolio.

The application states that BF's Money Market Portfolio will pursue its investment objective by investing exclusively in United States dollar denominated obligations of United States banks with total assets in excess of $1 billion (including obligations of foreign branches of such banks); United States dollar denominated obligations of Canadian banks or of U.S. branches of foreign commercial banks where such banks have total assets in excess of $5 billion; high-quality commercial paper and other short-term corporate obligations, including variable rate demand notes; securities issued or guaranteed as to principal and interest by the United States Government or by agencies or instrumentalities thereof (including the International Bank for Reconstruction and Development); and repurchase agreements pertaining to the instruments referred to above. It is represented that BF will not purchase certificates of deposit of BF's proposed investment adviser, transfer agent and custodian, The Northern Trust Company ("Northern"), or Northern's affiliate banks, commercial paper issued by Northern's parent holding company, or other securities issued or guaranteed by Northern, its parent holding company, or their subsidiaries or affiliates. The application further states that BF's Government Portfolio will pursue its investment objective by investing exclusively in securities issued or guaranteed as to principal and interest by the United States Government or by agencies or instrumentalities thereof (including the International Bank for Reconstruction and Development) and repurchase agreements pertaining thereto.

BTF states that its Tax-Exempt Portfolio will pursue its investment objective by investing primarily in high-quality, short-term instruments, the interest on which is, in the opinion of Bond Counsel for the issuers, exempt from Federal income tax ("Municipal Instruments"). BTF further states that Municipal Instruments purchased by the Tax-Exempt Portfolio will consist of municipal notes (including variable rate demand obligations) with remaining maturities of one year or less, municipal bonds or notes with remaining maturities of one year or less which are guaranteed as to principal and interest by the United States Government or an agency or instrumentality thereof or which otherwise depend directly or indirectly on the credit of the United States, municipal bonds with remaining maturities of one year or less, or securities issued by other investment companies investing primarily in high-quality, short-term municipal instruments and which determine their net asset value per unit based on the amortized cost or penny rounding method ("Tax-Exempt Money Fund Units"). Tax-Exempt Money Fund Units will be acquired by the Tax-Exempt Portfolio within the limitations described by the Act.

BTF represents that the intended purpose of utilizing puts is solely to facilitate portfolio liquidity. In this regard, the application states that BTF expects to make same day payment for redeemed units in immediately available funds. It represents that, although it intends generally to hold its portfolio securities to maturity, the maturity dates of available tax-exempt obligations are sufficiently infrequent that BTF does not wish to rely merely on scheduled maturities to meet net redemptions. BTF states that an additional source of funds to meet net redemptions on a given day consists of settlements arranged that same say on sales of portfolio securities However, BTF states that Northern, BTF's investment adviser, has only a few hours to make these arrangements in order to permit timely receipt by BTF of immediately available funds. Regular settlement of sales of Municipal Instruments is effected on the fifth business day after the commitment to sell is entered into. BTF further represents that, unless prior arrangements assuring immediate liquidity have been made, the negotiation of same-day settlements on sales of portfolio securities within the brief time referred to above may be impossible or may require BTF to receive a less favorable execution price on the sale even though the securities sold have a short remaining maturity (e.g., less than 30 days). BTF states that other investment techniques used by taxable money-market funds to obtain liquidity are not normally available to BTF because they are prohibitively expensive or would produce taxable income. BTF states that the ability to assure same-day settlement on portfolio sales, at prices which will avoid losses caused by negotiations under time pressure, is therefore important to achieving BTF's objectives. It further states that the exemption requested will enable it to adopt policies that would assure same-day settlements on portfolio sales and would thereby facilitate the same-day payment of redemption proceeds in immediately available funds. Accordingly, to improve portfolio liquidity, BTF proposes to adopt policies permitting the acquisition

VOL
48
ISS

1983
UMI

of puts from banks and other financial institutions, including brokers and dealers.

BTF states that when it purchases a Municipal Instrument from a bank, broker, dealer, or other person it proposes to have the flexibility from time to time to acquire, in addition, the option to sell the same principal amount of such securities back to the institution at a specified price. Such a right is sometimes referred to in the industry as an "optional delivery, standby commitment" and is referred to in the application as a "put."

The application states that the exercise price of puts will be: (i) BTF's acquisition cost of the Municipal Instruments which are subject to the put (excluding any accrued interest which BTF paid on their acquisition), less any amortized market premium or plus any amortized market or original issue discount during the period BTF owned the securities, plus (ii) all interest accrued on the securities since the last interest payment date during the period the securities were owned by BTF. Absent unusual circumstances, BTF will value Municipal Instruments on an amortized cost basis pursuant to the requested exemption. Accordingly, the amount payable by the issuer of a put during the time the put is exercisable would be substantially the same as the value of the underlying securities.

According to the application, although puts will not be transferable, Municipal Instruments purchased subject to puts could be sold at any time even though the put was outstanding. The put would not obligate BTF to sell the underlying securities to the issuer of the put, nor entitle the issuer to demand the return of the securities at its option. BTF expects that a sale of the underlying securities to a third party would terminate BTF's rights under the related put to sell the securities back to the issuer of the put. It is represented that puts may (but not necessarily will) be exercisable by BTF at any time prior to the maturity of the underlying security and BTF's right to exercise will be unconditional and unqualified.

If necessary and advisable, BTF proposes to pay for puts either separately in cash or by paying a higher price for the portfolio securities which are acquired subject to the put (thus reducing the yield to maturity otherwise available for the same securities). As a matter of policy, the total amount "paid" in either manner by BTF for outstanding puts held in its portfolios would not exceed ½ of 1% of the value of its total assets calculated immediately after any put is acquired. It is represented that puts acquired by BTF would be in writing and would be physically held by Northern as BTF's custodian.

The application states that, during the term of a put, it would be very difficult if not impossible to evaluate the likelihood of eventual exercise of the put or to quantify the potential benefit to BTF if that put were exercised. In light of such uncertainties, the application states that the Board of Trustees of BTF will deem the put to have a "fair value" of zero, regardless of whether BTF paid any direct or indirect consideration for the put. When BTF pays for a put, its cost will be reflected as unrealized depreciation for the period during which the commitment is held by BTF.

Notwithstanding the foregoing, in calculating the dollar-weighted average maturity of BTF's portfolios, it is represented that puts would always be valued zero and the dollar-weighted average maturity will not be affected by the acquisition of the puts. The application represents that the acquisition or exercisability of a put will not affect the valuation or assumed maturity of the underlying Municipal Instruments, which would continue to be valued on the basis of amortized cost. It is further represented that BTF believes there to be little risk of an event occurring which would make amortized cost valuation of its portfolio instruments inappropriate. However, in the unlikely event that the market or fair value of BTF's portfolio instruments was not substantially equivalent to their amortized cost value, the application states that BTF's Trustees may determine that the Municipal Instruments should be valued on the basis of available market quotations. It is further stated that BTF expects that any puts covering such Municipal Instruments would continue to be valued as described above because FTF expects that it would refrain from exercising the puts to avoid imposing a loss on the bank, broker, or dealer and jepardizing its business relationship with that entity.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

BTF submits that the requested exemption from Section 12(d)(3) of the Act is appropriate and in the public interest. BTF states that it does not believe that Section 12(d)(3) was intended to prohibit an investment company's acquisition of a put "issued" by a broker or dealer. While the puts proposed to be acquired by BTF will be exercisable at BTF's option, BTF represents that this element of discretion does not alter the nature of the broker's or dealer's commitment which is comparable to the commitment of any investment firm to make payment at settlement for the sale of a fund's porfolio securities.

BTF states that it will enter into puts only with banks, brokers, dealers, and other persons which, in the investment adviser's opinion, present a minimal risk to default. In addition to the credit of these institutions, BTF states that its rights under a put will be secured to the extent of the value of the underlying Municipal Instruments which are subject to the put and, therefore, the risk of loss is not qualitatively different from the risk of loss faced by any investment company which is holding securities pending settlement after having agreed to sell the securities in the ordinary course of business. BTF states that its investment adviser has informed BTF that it intends to periodically evaluate the credit of institutions issuing puts to BTF in accordance with current procedures used in evaluating the creditworthiness of issuers of shortterm debt securities. In the event of a default under a put, BTF states that it expects that it will be an unsecured creditor but only to the extent, if any, that the amount due under the put exceeds the current value of the underlying Municipal Instruments owned by BTF. In addition, BTF contends that, because it will value puts at zero, the acquisition of such puts will not meaningfully expose BTF's assets "to the entrepreneurial risks of the investment banking business" (Investment Company Act Release No. IC–10666, April 18, 1979), nor require BTF to evaluate the credit of dealers in determining its net asset value. BTF further states that it will not acquire puts to promote reciprocal practices, to encourage unit distribution efforts, or to obtain research services.

Applicants request an order of the Commission to permit them to value their assets (other than the Tax-Exempt Money Fund Units) according to the amortized cost method of valuation. According to the application, BTF intends to value Tax-Exempt Money Fund Units based on the amortized cost method in reliance upon Investment Company Act Release No. 9786. It is asserted that BTF believes that such reliance is appropriate since Tax-Exempt Money Fund Units are, for this purpose and in its opinion, the functional equivalent of debt instruments with a maturity generlly no greater than 7 days.

In support of the relief requested, the application states that the Applicants believe that potential investors in the Fund's units are concerned that (1) the net asset value of their units remain stable; (2) that the daily net income declared on their investment be steady and not exhibit the volatility which can occur when changes in market prices caused changes in yield on a daily or weekly basis. By maintaining portfolios of high quality money market instruments of short maturities, Applicants believe that it will be possible to provide the required stability to their investors.

The Applicants have each agreed that the following conditions may be imposed in any order of the Commission granting the relief requested:

(1) In supervising each Applicant's operations and delegating special responsibilities involving porfolio management to the Applicants' investment adviser, each Applicant's Trustees undertake—as a particular responsibility within their overall duty of care owned to such Applicant's unitholders—to establish procedures reasonably designed, taking into account current market conditions and such Applicant's investment objective, to stabilize such Applicant's net asset value per unit, as computed for the propose of distribution, redemption and repurchase, at $1.00 per unit.

(2) Included within the procedures to be adopted by each Applicant's Trustees shall be the following:

(a) Review by the Trustees, as they deem appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per unit as determined by using available market quotations from such Applicant's $1.00 amortized cost price per unit, and the maintenance of records of such review.[1]

(b) In the event that such deviation from such Applicant's $1.00 amortized cost price per unit exceeds ½ of 1%, a requirement that the Trustees will promptly consider what action, if any, should be initiated.

(c) If the Trustees believe that the extent of any deviation from such Applicant's $1.00 amortized cost price per unit may result in material dilution or other unfair results to investors or existing unitholders, they shall take such action as they deem appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redemption of units in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten the average portfolio maturity of such Applicant; reducing or withholding dividends or utilizing a net asset value per unit as determined by using available market quotations.

(3) Each Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable price per unit; *provided*, however, that such Applicant will neither (a) purchase any instrument with a remaining maturity of greater than one year, except for instruments subject to repurchase agreements providing for settlement for the repurchase within one year after the Applicant's purchase of the instrument, nor (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days.[2]

(4) Each applicant will record, maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition (1) above, and such Applicant will include in the minutes of the Trustees' meetings and will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the Trustees' considerations and actions taken in connection with the discharge of their responsibilities, as set forth above. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as though such documents were records required to be maintained pursuant to the rules adopted under Section 31(a) of the Act.

(5) Each Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which the Trustees determine present minimal credit risks, and which are of high quality as determined by any major rating service or, in the case of any instrument that is not rated, are of comparable quality as determined by the Trustees.

(6) Each Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement as to whether any action pursuant to condition 2(c) above was taken during the preceding fiscal quarter, and, if any such action was taken, such Applicant will describe the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 6, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[1] To fulfill this obligation, each Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by its Trustees in the exercise of their discretion to be appropriate indicators of value, which may include among others (i) quotations or estimates of market value for individual portfolio instruments, or (ii) values obtained from yield data relating to classes of money market instruments published by reputable sources.

[2] In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average portfolio maturity in excess of 120 days, such Applicant represents that it will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable. In addition, in fulfilling this condition, the maturity of a portfolio security held by BTF shall not be considered shortened or otherwise affected by any put of the type described above to which such security is subject, and all such puts held by BTF shall be valued at zero.

[Release No. 13233; (812–5461)]

Credit National; Filing of Application for an Order Pursuant to Section 6(c) of the Act Exempting Applicant From All Provisions of the Act

May 11, 1983.

Notice is hereby given that Credit National (45, rue Saint-Dominique, 75007 Paris, France) ("Applicant") filed an application on February 28, 1983, for an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting applicant from all provisions of the Act. All

interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is a *societe anonyme*, formed in 1919 for the principal purpose of providing the French State with a means of financing indemnities for war-related losses and damages and to contribute to the development of industrial and commercial companies through long-term loans. Applicant states that long-term development lending has been its chief activity for many years.

Applicant states that as a *societe anonyme*, it is subject to the French Companies Law of July 24, 1966 (and the related decree of March 23, 1967) and other legislation applicable to French corporations. In addition, Applicant states that it is subject to the *Convention* of July 7, 1919, entered with the French State (approved by the law of October 10, 1919) and to the provisions of its *Statuts* (the "Charter"), first decreed in 1919 on the recommendation of the *Conseil d'Etat*. Applicant states that modifications of its Charter and by-laws, after appropriate shareholder approval, must be confirmed by order of the *Conseil d'Etat* (in the case of its Charter) or the Minister of Economy and Finance (in the case of its by-laws).

Applicant states that like other specialized institutions in France that provide development financing in the public interest, the Applicant is subject to regulation by the French State; any public bond issue of the Applicant, whether guaranteed by the French State or not, must be authorized by ministerial order of the Minister of Economy and Finance.

Applicant states that it is governed by a Board of Directors ("Board"). Applicant further states that, pursuant to the Charter, the Board is composed of 14 members, including 11 members elected by the shareholders for terms of six years, and a General Manager (the Chairman of the Board) and two Managers appointed, upon the proposal of the Board, by the President of the French State, countersigned by the Minister of Economy and Finance. The General Manager is generally empowered to conduct the business of the Applicant. The Managers and executive officers in each of the Applicant's divisions conduct the day-to-day business of the Applicant under authority delegated by the General Manager.

The application states that, under French corporation law, auditors, *Commissaires aux Comptes*, elected by the shareholders for six year terms are responsible for accounting examinations and control. Applicant represents that the auditors examine and certify annually the accuracy of Applicant's financial statements and render an opinion to the shareholders as to whether such statements are true and fair. In addition, Applicant represents that unaudited financial statements of the Applicant are published quarterly in France in the *Journal Officiel*. Applicant states that, pursuant to the Charter, four special *Censeurs*, two of whom are elected by the shareholders for terms of three years and two of whom are designated by order of the Minister of Economy and Finance, sit in an advisory capacity on the Board and exercise a general supervisory function. Applicant states that the *Inspection Generale des Finances*, the organization of the Ministry of Economy and Finance that is responsible for the control of all moneys managed by the administration of the French State, periodically reviews the administration of the various categories of applicant's special loans which involve the expenditure of public funds. Applicant represents that it reports regularly to the Minister of Economy and Finance about its operations.

Applicant states that while it performs many of the functions of an industrial bank or a development bank, it is prohibited in its Charter from (1) receiving deposits in the form of cash or securities, (2) granting loans other than long-term development loans and medium-term credits or (3) performing any trading in securities or banking operations other than those required to satisfy its stated objectives. Applicant represents that it does not underwrite or deal in investment securities. Applicant explains that, in light of the foregoing and the special regulatory procedures to which it is subject, it is not under the supervision of the *Conseil National du Credit* or the *Commission de Controle des Banques* which regulate commercial banks in France.

Applicant represents that at December 31, 1981, the latest date for which audited figures are available, it had total assets of approximately French francs ("FF") 55.8 billion.[1] Applicant represents that aggregate loans then outstanding were approximately FF 46.5 billion, of which the portion due within one year was approximatelyt FF 3.6 billion. At that date aggregate debt was FF 49.8 billion, of which the current portion was FF 4.5 billion; Applicant's shareholders' equity (after reevaluation of fixed assets and participation) was approximately FF 2.5 billion.

Applicant states that on December 31, 1982, its share capital was FF 106,493,200 consisting of 1,064,932 shares with FF 100 par value each, all fully paid and non-assessable and that the share capital is presently being increased to FF 351,427,400 through a rights issue, to be followed by a capitalization of reserves through a distribution of free shares and an increase of the par value of each share to FF 200. Applicant presently anticipates that the share capital increase will be completed by the end of 1983. According to the application, the main shareholders of Applicant are banks, insurance and investment companies and private individuals (the shares are listed on the Paris Stock Exchange). Applicant states that nationalizations in 1982 by the French State of the major part of the French banking system has led to a slight increase in the percentage of share capital owned directly by state companies or by the various pension and investment funds they manage, now approximately 55 percent.

Applicant states that pursuant to its Charter the interest rates charged by Applicant in its lending activities may not exceed by more than 1%the cost of Applicant's most recently issued bonds and that all loans must be secured by a mortgage, pledge of shares, a third party guarantee or other form of acceptable security. According to the application, the applicant's long-term lending activities consist of ordinary loans and loans for industrial development abroad which are generally fixed rate and are financed by Applicant's own general resources, i.e., bond issues on the domestic market and other funds, and of special purpose loans which are generally financed from specific resources, i.e., specific loans or bond issues in the French market and, particularly in recent years, borrowings in foreign markets. Applicant states that the program of special purpose loans was created to influence the economic activity of, and to facilitate structural changes in, French industry. Such loans bear below market interest rates and are designed to encourage or sustain, for example, exports, employment, energy and raw material conservation, automation and industrialization of new products. Applicant represents that the aggregate of special purpose loans in each category may not exceed amounts previously designated by the Ministry of Economy and Finance.

According to the application, in addition to its own lending operations the Applicant undertakes special operations on behalf of the French State and foreign public entities. These include loans on behalf and for the account of the French State and certain financial advisory and management functions for projects designated by the French State and its agencies or authorities.

[1] The exchange rate for one French franc was United States $0.174 at December 31, 1981 and United States $0.147 at February 22, 1983.

According to the application, Applicant proposes to issue and sell in the United States, prime quality commercial paper notes ("Notes") in minimum denominations of $100,000 through major United States commercial paper dealers. Applicant represents that it will secure an undertaking from each such dealer that the Notes will be sold to institutional investors and other entities and individuals that ordinarily purchase commercial paper notes and will not be offered for sale to the general public. Applicant states that it proposes to issue and sell the Notes initially in amounts up to United States $250,000,000–$300,000,000 outstanding at any one time, and that the Notes will not have maturities exceeding 270 days nor will they include any provisions for extension, renewal or automatic rollover at the option of either the holders or applicant. Applicant represents that the Notes will be direct liabilities of Applicant, and will rank *pari passu* among themselves and equally with all other unsecured, unsubordinated indebtedness of Applicant. Applicant represents that the Notes will be guaranteed by the French State by decree of the Minister of Economy and Finance.

Applicant states that it plans to sell the Notes without registration under the Securities Act of 1933 ("1933 Act"), in reliance upon an opinion of its special counsel in the United States that the offering will qualify for an exemption from the registration requirements of the 1933 Act provided for short-term commercial paper by Section 3(a)(3) thereof. Accordingly, Applicant states that the Notes will have the characteristics, including their negotiability, maturity and minimum denomination, such as to qualify them for exemption under Section 3(a)(3) and that the proceeds of the sale of the Notes (to the extent not applied to the repayment of maturing Notes or to the payment of current expenses) will be used by Applicant for current transactions. Applicant represents that it will not proceed with its proposed offering until it has received such an opinion letter. Applicant does not request Commission review or approval of such opinion letter and the Commission expresses no opinion as to the avilability of any such exemption. Applicant further represents that the presently proposed issue of debt securities and any future issue of its debt securities in the United States shall have received, prior to issuance, one of the three highest investment grade ratings from at least one of the nationally recognized investment rating organizations, and that its special United States counsel shall have certified that such rating has been received: provided, however, that no such rating shall be required to be obtained, if in the opinion of its special United States counsel, such counsel having taken into account for the purposes thereof the doctrine of "integration" referred to in various releases and no-action letters made public by the Commission, an exemption from registration is available with respect to such issue under Section 4(2) of the 1933 Act.

Applicant undertakes to ensure that the dealer will provide each offeree of the Notes, prior to any sale of Notes to such offeree, with a memorandum describing the business of Applicant and containing the most recent publicly available audited financial statements of Applicant, audited in accordance with French auditing practices. Applicant states that the offering memorandum will include a paragraph highlighting the material differences between French accounting standards applicable to Applicant and generally accepted accounting principles employed by similar United States institutions. Applicant represents that such memorandum will be at least as comprehensive as those customarily used in offering commercial paper in the United States and will be updated periodically to reflect material changes in the business or financial status of Applicant. Applicant further represents that in the future it may issue other debt securities, but that such securities will be offered of sold only pursuant to a registration statement under the 1933 Act, or an opinion of its special United States counsel that an exemption from registration under the 1933 Act is available, or pursuant to a staff position that no action would be taken if such securities are not registered.

Applicant further undertakes to provide to any person to which it offers such debt securities in the Untied States (and undertakes to ensure that any underwriter or dealer through whom it makes such offers will so provide) disclosure documents which are at least as comprehensive in their description of Applicant and the businesses of Applicant (1) in the case of securities registered under the 1933 Act, as are required by such Act and the applicable forms and regulations promulgated by the Commission thereunder and (2) in the case of securities exempt from registration under the 1933 Act, as are required by Regulation D of the Commission (and any successor regulation thereto) and containing such additional information as is, in the opinion of special United States counsel to the Applicant, required or appropriate. Applicant consents to having any order granting the relief requested under Section 6(c) of the Act expressly conditioned upon its compliance with the foregoing undertakings concerning disclosure documents.

Applicant represents that it will appoint a bank or trust company having an office in New York City, the Commission or a New York City corporation providing corporate services as agent to accept service of process in any suit, action, or proceeding, based on the Notes or with respect to the offer and sale of the Notes and instituted in any state or federal court by the holder of any Note. The application states that Applicant will expressly submit to the jurisdiction of state or federal courts in the City and State of New York in respect to any such suit, action or proceeding. Applicant will also be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering of the Notes or otherwise. The application further states that such appointment of an agent to accept service of process and such consent to jurisdiction shall be irrevocable until all amounts due and to become due with respect to the Notes have been paid. The application also states that Applicant will similarly consent to jurisdiction and appoint an agent for service of process in any such suit, action, or proceeding arising from any future offerings of debt securities that it may make in the United States or with respect to the disclosure documents prepared in connection therewith.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public

VOL 48 ISS 96 MY 17 1983 UMI

interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the exemptive relief requested, Applicant asserts that it is different from the type of institution Congress intended the Act to regulate. In addition, Applicant submits that an exemption pursuant to Section 6(c) of the Act would benefit institutional and other sophisticated investors in the United States by making Applicant's debt securities more readily available to such investors. Without such an exemption Applicant states that it would be precluded from publicly offering its securities in the United States. Applicant argues that its operations are extensively supervised and regulated by French public officials and that this control and regulation together with the requirements of Section 3(a)(3) of the 1933 Act and the anti-fraud provisions of the Securities Exchange Act of 1934 will afford substantial protection to investors in its debt securities.

Applicant concludes that granting the requested exemptive relief pursuant to Section 6(c) of the Act would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 6, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 22933; (70-6868)]

Indiana & Michigan Electric Co.; Proposed Issuance and Sale of First Mortgage Bonds and Preferred Stock

May 10, 1983.

Indiana & Michigan Electric Co. ("I&M") (One Summit Square, Fort Wayne, Indiana 46801), an electric utility subsidiary of American Electric Power Company, Inc. ("AEP"), a registered holding company, has filed an application-declaration with this Commission pursuant to Sections 6(b) and 12(c) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42 and 50 promulgated thereunder.

I&M proposes to issue and sell, in one or more transactions from time to time through December 31, 1983, up to $70,000,000 aggregate principal amount of its first mortgage bonds, in one or more new series, each with a maturity of not less than 5 years and not more than 30 years. The terms will be determined by competitive bidding pursuant to Rule 50. I&M may employ alternative competitive bidding procedures in accordance with the Commission's statement of policy set forth in HCAR No. 22623 (September 2, 1982). If market conditions should not be propitious for the sale of the bonds on a competitive bidding basis, I&M intends, subject to authorization by the Commission, either to place the bonds privately with institutional investors or to negotiate with underwriters for the sale of the bonds.

I&M also proposes to issue and sell up to 1,000,000 shares of its cumulative preferred stock, par value $25 per share, in one or more new series. The price to be paid to the company will be $25 per share. Such shares will be sold under competitive bidding pursuant to Rule 50. I&M may employ alternative competitive bidding procedures in accordance with the Commission's statement of policy set forth in HCAR No: 22623 (September 2, 1982). If market conditions should not be propitious for the sale of the cumulative preferred stock on a competitive bidding basis, I&M intends, subject to authorization by the Commission, either to place the cumulative preferred stock privately with institutional investors or to negotiate with underwriters for the sale. The terms of the cumulative preferred stock may also include a sinking fund provision with respect to one or more series.

The proceeds realized from the sale of the bonds and the cumulative preferred stock will be used to repay unsecured short-term indebtedness of I&M consisting of short-term notes and commercial paper, to repay maturing long-term debt, to reimburse the company's treasury for expenditures incurred in connection with the company's construction program, and for other corporate purposes. At December 31, 1982, I&M had approximately $92,150,000 aggregate principal amount of such unsecured short-term debt outstanding, and it is anticipated that, at the time of the initial sale of the bonds and/or cumulative preferred stock, not less than $100,000,000 of such unsecured short-term debt will be outstanding, portions of which will have been incurred in connection with the company's construction program. I&M estimates that its consolidated construction costs during 1983 will be approximately $127,000,000.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 6, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 1-7941]

Perry Drug Stores, Inc., Application To Withdraw From Listing and Registration

May 10, 1983.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

1. The common stock ($.05 Par Value) of Perry Drug Stores, Inc. ("Company") is listed and registered on the Amex. Pursuant to a Registration Statement on Form 8-A which became effective on March 18, 1983, the Company is also listed and registered on the New York Stock Exchange ("NYSE"). The Company has determined that the direct and indirect costs and expenses do not justify maintaining the dual listing of the common stock on the Amex and the NYSE.

2. This application relates solely to withdrawal of the common stock from listing and registration on the Amex and shall have no effect upon the continued listing of the common stock on the NYSE, or the Company's 12.85% convertible subordinated debentures (due October 15, 1997) which will continue to be listed on the Amex. The Amex has posed no objection to this matter.

Any interested person may, on or before June 1, 1983 submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13226; (812-5448)]

Westpac Banking Corp. and Westpac Capital Corp.; Application for Order Pursuant to Section 6(c) of the Act Exempting Applicants From all Provisions of the Act

May 10, 1983

Notice is hereby given that Westpac Banking Corporation ("WBC") (c/o Charles E. Hord, III, Esq., Barrett Smith Schapiro Simon & Armstrong, 26 Broadway, New York, New York 10004), an Australian bank, and its wholly-owned subsidiary Westpac Capital Corporation ("WCC", and jointly with WBC, the "Applicants"), a Delaware corporation, filed an application on January 28, 1983, and an amendment thereto on April 27, 1983, for an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act") exempting Applicants from all provisions of the Act in connection with their proposed issuance of dollar-denominated commercial paper in the United States. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that WBC, which conducted business under the name "Bank of New South Wales" until October 1, 1982, is the largest trading (*i.e.*, commercial) bank in Australia in terms of assets, deposits, and profits, and one of the largest banks in the world. Applicants further state that WBC recently acquired The Commercial Bank of Australia Limited and changed the name of the combined organization to Westpac Banking Corporation. According to the application, WBC currently has branches in Australia and New Zealand and branches, agencies, or representative offices overseas. In the United States, WBC has a branch in New York City, licensed by the Comptroller of the Currency; a state-licensed agency in San Francisco, California; a representative office in Houston, Texas; and a limited branch in Chicago, Illinois, licensed by the Comptroller of the Currency.

Applicants maintain that, as of September 30, 1982, WBC had, on an unconsolidated basis, assets of over $15.4 billion (expressed in Australian dollars at the rate of one Australian dollar for U.S. $0.9493, the exchange rate on September 30, 1982) and had a net profit of over $131.1 million for the twelve-month period ended September 30, 1982. They also maintain that on a consolidated basis, WBC and its affiliated companies had, as of September 30, 1982, assets and deposits of approximately $31.3 billion and $20.6 billion, respectively, and for the twelve-month period then ended, had a net profit of $215.5 million.

Applicants represent that WBC is engaged primarily in the business of receiving deposits (time and demand) and making loans. According to the application, on an unconsolidated basis, more than 62% of WBC's assets are represented by loans, and approximately 75% of its liabilities are deposits. Further, Applicants represent that during WBC's last fiscal year, income from loans accounted for approximately 74% of WBC's total revenue, and interest paid on deposits represented approximately 57% of WBC's total expenses. The application indicates that, in addition to accepting deposits and making loans, WBC and affiliated companies offer an extensive range of corporate, personal, and international banking services, as well as travel, investment management, insurance, custodian, and other fiduciary services. Applicants state that WCC was incorporated in Delaware on December 14, 1982, and was organized solely to obtain funds to be used by WBC, through the issuance of commercial paper guaranteed by WBC.

Applicants states that WBC is authorized to carry on a banking business by the Australian Banking Act of 1959 (as amended), which provides for the protection of depositors and the regulation of, among other things, statutory reserves, foreign currency, loan policies, foreign exchange, and interest rates. It is represented that the Banking Act is administered by the Reserve Bank of Australia, which supervises all banks in Australia, acting under the authority of both the Banking Act and the Reserve Bank Act of 1959 (as amended). Applicants further state that, as a foreign bank having Federal branches in the United States, WBC is also subject to regulation in this country pursuant to the International Banking Act of 1978 (the "IBA"). According to the application, Section 8 of the IBA subjects WBC to most of the provisions of the Bank Holding Company Act and thus to the regulation of the Federal Reserve Board. Applicants also state that regulations promulgated pursuant to the IBA require WBC to file an annual report with the Federal reserve Board, and that the Comptroller of the Currency maintains supervisory powers over Federal branches and agencies after it grants approval to an application. Applicants represent that, under the Comptroller's regulations, a Federal branch or agency must be examined at least once each calendar year, and that they are subject to reserve requirements set by the Federal Reserve Board.

Applicants propose to issue and sell in the United States, through United States investment banking firms, short-term, dollar-denominated promissory notes of the type generally referred to as commercial paper (the "Notes"). The Notes, which will be issued and sold in minimum denominations of $100,000, will be (i) obligations of WCC unconditionally guaranteed by WBC or (ii) direct obligations of WBC or (iii) some combination of (i) and (ii).

VOL 48 ISS 96 MY 17 1983 UMI

According to the application, the Notes will have a maturity of nine months or less, exclusive of days of grace, and will neither be payable on demand nor provide for any extension, renewal, or automatic "roll-over" at the option of either the holder or the issuer. Applicants represent that the Notes will arise out of, or the proceeds from the sale of the Notes will be used for, current transactions as contemplated by Securities Act Release No. 4412.

The application states that the Notes will be prime quality, negotiable commercial paper of a type eligible for discount by Federal Reserve Banks. Applicants represent that the Notes will have received, prior to issuance, one of the three highest investment grade ratings from at least one of the nationally recognized investment rating organizations and that United States counsel for the Applicants shall have certified that such rating has been received. However, no such rating shall be required if in the opinion of United States counsel for the applicants, such counsel having taken into account the doctrine of integration for the purpose thereof, an exemption from registration is available with respect to such issue under Section 4(2) of the Securities Act of 1933 ("1933 Act").

The application states that, if the Notes are issued by WCC and guaranteed by WBC, the Notes will rank *pari passu* among themselves, equally with all other unsecured, unsubordinated indebtedness of WCC and superior to the rights of WCC shareholders, and the WBC guarantee of the Notes will rank equally with all other unsecured unsubordinated indebtedness of WBC and superior to the rights of WBC shareholders, except insofar as the Australian Banking Act provides that, in the event of a bank becoming unable to meet its obligations or suspending payment, the assets of the bank in Australia will be available to meet the bank's deposit liabilities in Australia in priority to all other liabilities of the bank. The application also states that, if the Notes are issued by WBC, they will be direct liabilities of WBC, will rank *pari passu* among themselves, equally with all other unsecured, unsubordinated indebtedness of WBC and superior to the rights of WBC shareholders, except insofar as WBC's deposit liabilities in Australia have priority in right of payment over its other liabilities in the situation described in the preceding sentence.

Applicants state that the Notes will be sold through one or more United States commercial dealers. Applicants represent that they will secure an undertaking from each such dealer that the Notes will be sold to institutional investors and other entities and individuals who normally purchase commercial paper and will not be advertised or otherwise offered for sale to the general public. Applicants further state that they will provide each such dealer with sufficient information to prepare, and undertake to ensure that each dealer will furnish to each offeree of the Notes, prior to any sale of Notes to such offeree, a memorandum (the "offering memorandum") which describes the businesses of Applicants and contains the most recent publicly available financial statements of Applicants, audited in accordance with Australian auditing practices. Applicants represent that the offering memorandum will be at least as comprehensive as those customarily used by United States issuers in offering commercial paper in the United States and will be updated periodically to reflect material changes in Applicant's business or financial status. It is further represented that the offering memorandum will include a brief paragraph highlighting the material differences between Australian accounting principles applicable to Australian commercial banks and used by the Applicants and generally accepted accounting principles employed by United States commercial banks.

According to the application, it is intended that the Notes will be sold without registration under Section 5 of the 1933 Act, in reliance upon an opinion of United States counsel for the Applicants to the effect that, under the circumstances, the proposed offering will qualify for the exemption from registration provided by Section 3(a)(3) of the 1933 Act. Applicants represent that they will not proceed with their proposed offering until they have received such an opinion. The Applicants do not request Commission review or approval of such opinion.

Applicants state that they will appoint a bank or trust company having an office in New York City as issuing agent to issue the Notes on behalf of Applicants. Further, Applicants state they will expressly submit to the jurisdiction of New York State and United States Federal courts sitting in the City of New York for the purpose of any suit, action, or proceeding brought on the Notes or with respect to the offer and sale of the Notes by means of the offering memorandum and, in that connection, appoint the issuing agent or a corporation with an office in New York City engaged in providing corporate services for lawyers as agent to accept service of process in any action based on the Notes or with respect to the offer and sale of the Notes by means of the offering memorandum and instituted in any State or Federal court in New York City by the holder of any Note. Such appointment of an agent to accept service of process and such consent to jurisdiction shall be irrevocable until all amounts due, and to become due, in respect of the Notes have been paid.

Applicants state that either of them may, from time to time, in the future, offer and sell other debt securities of WBC or WCC in the United States. Applicants represent that no such securities shall be offered or sold in the United States unless (a) such securities are registered under the 1933 Act, (b) in the opinion of United States counsel for the Applicants an exemption from registration under the 1933 Act is available with respect to such offer and sale, or (c) the staff of the Commission states that it would not recommend that the Commission take action under the 1933 Act if such securities are not registered.

Applicants maintain that any future offering of securities of WBC or WCC in the United States will be made on the basis of disclosure documents which are appropriate and customary for such offering, whether made pursuant to a registration statement under the 1933 Act or an exemption therefrom (and in any event as comprehensive as those used in offerings of similar securities by issuers in the United States), and will be updated periodically to reflect material changes in the business or financial status of WBC or WCC. Applicants also maintain that, in any future offering of securities of WBC or WCC in the United States made through dealers or underwriters, the Applicant issuing such securities will secure an undertaking from each such dealer or underwriter to furnish such disclosure documents to each offeree of such securities, prior to any sale of such securities to such offeree. Applicants state that, in connection with any future offering by either Applicant of its securities in the United States, the Applicant issuing or guaranteeing such securities will appoint an agent to accept service of process in any suit, action, or proceeding brought on the securities by the holder of any such securities and will expressly submit to the jurisdiction of the New York State and United States Federal courts sitting in the City of New York with respect to any such suit, action or proceeding. Such appointment of an agent to accept service of process and such consent to jurisdiction shall be irrevocable until all amounts due and to become due in respect thereof have been paid. Applicants assert that they consent to having any order of the Commission granting the relief requested under Section 6(c) of the Act expressly conditioned on their compliance with the undertakings contained in the application.

Applicants contend that, as a commercial bank, WBC is not an investment company within the meaning of the Act and that WCC is excluded from the definition of investment company under Section 3(b)(3) of the Act. Applicants state, however, that they are applying to the Commission because of the uncertainty as to whether at least some foreign commercial banks and their domestic finance subsidiaries are "investment companies" under the Act. Section 6(c) provides that the Commission, by order upon application, may exempt any person from the provisions of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants submit that approval of the application is necessary or appropriate in the public interest for several reasons. Among other things, they state that approval would advance the policies underlying the International Banking Act of 1978, which seeks to place United States banks and foreign banks on a basis of competitive equality in their United States transactions. According to the application, if WBC or WCC were deemed to be an "investment company" and were denied the exemption requested, WBC would as a practical matter be precluded from publicly offering securities in the United States. Applicants state that WBC's access to the United States investment market would be thus diminished, putting it at a competitive disadvantage in this respect to United States banks, which generally are not subject to the Act, and to other foreign banks (including other Australian banks), which have received exemptions from the Act that enable them to sell their securities in the United States, either directly or through subsidiaries like WCC. The application also states that approval of the exemption would benefit institutional and other sophisticated investors in the United States by making securities of foreign banks more readily available to such investors.

Applicants contend that the exemption would be consistent with the protection of investors because, among othe reasons, (1) WBC is extensively regulated by the Australian banking authorities, as well as by U.S. banking authorities in connection with its U.S. operations, (2) any offering of securities by Applicants in the United States must in any event comply with the requirements of the 1933 Act, and (3) the abuses against which the Act was directed are not present in this case. Applicants further state that an exemption would be consistent with the purposes of the Act since the Act was not drafted to regulate entities such as Applicants, and the Act clearly contemplates the exercise by the Commission of its exemptive powers in cases such as that of Applicants which were not within the contemplation of the drafters of the Act and which do not present the abuses which the Act was designed to curb.

Notice is further given that any interested person wishing to request a hearing on the application may, not later then June 3, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

DEPARTMENT OF STATE

[Public Notice CM-8/633]

Advisory Committee on Oceans and International Environmental and Scientific Affairs; Open Meeting

The Department of State's Advisory Committee on Ocean and International Environmental and Scientific Affairs will meet at 9:00 AM on Wednesday, June 1, 1983, in Room 150 of the National Academy of Sciences, 2101 Constitution Avenue, NW., Washington, D.C. This meeting, with a break for lunch, is expected to end at approximately 3:00 PM.

At the meeting, responsible officials of the Department of State, and members of the Advisory Committee, will review the evolution of two matters they discussed at the Committee's last meeting on November 8, 1982: the work of the Global Issues Working group (on international environmental matters), and the science attache system. They will also discuss the following new subjects:

—Recent events in the population field including discussions at the Vatican;
—The proposed commercialization of the weather and Landsat systems;
—This fall's OECD science meeting in Japan; and
—The establishment of a U.S. exclusive economic zone, fisheries policy and other oceans matters.

This meeting is to be open to the public. Members of the public will be admitted to the limits of the meeting room's seating capacity and will be given the opportunity to participate in the discussions according to the instructions of the chairman.

People wishing further information on this meeting should direct their inquiries to Felix Dorough or Stephen Johnson of the Office of Science and Technology Support of the Department of State's Bureau of Oceans and International Environmental and Scientific Affairs. They may be reached by telephone on (202) 632-4066.

Dated: May 6, 1983.

James L. Malone,

Chairman.

Integrated Services Digital Network (ISDN) Working Party of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that the ISDN Working Party of the U.S. Organization for the International Telegraph and Telephone Consultative Committee will meet on June 2, 1983, at 9:30 a.m. in Room 1105 of the Department of State, 2201 C Street NW., Washington, D.C. This Working Party deals with the evolution of ISDN as it is being considered by CCITT Study Group XVIII.

The agenda for the meeting is as follows:

1. Report of the ISDN Technical Working Party Meeting;
2. Consideratioin of delayed contributions for Study Group XVIII;
3. Any other business.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. It is suggested that prior to June 2, all persons planning to attend the meeting should contact Mr. Dexter Anderson, Office of International Communications Policy, Department of State, Washington, D.C. 20520, telephone (202) 632–6583. All attendees must use the C Street entrance to the building. Entrance will be facilitated 15 minutes before and after the meeting begins.

James L. Gorman,

Acting Director, Office of International Communications Policy.

Study Group C of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that Study Group C of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on June 9, 1983, at 9:30 a.m. in Room 1205 of the Department of State, 2201 C Street, NW., Washington, D.C.

The meeting of Study Group C will concentrate entirely on the Study Group XVIII Expert Group which was chartered to recommend a single method of PCM coding at 32 kilobits/second. The U.S. participants will discuss the status of the work program of the Expert Group. Reports of recent Expert Group meetings in Tokyo (February, 1983) and London (May, 1983) will be presented. A preliminary Draft Recommendation and the Expert Group's report to the full Study Group will be prepared at the London meeting. These two documents will be reviewed on June 9, 1983.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. It is suggested that prior to June 9, all persons planning to attend the meeting should contact Mr. Dexter Anderson, Office of International Communications Policy, Department of State, Washington, D.C. 20520, telephone (202)632–6583. All attendees must use the C Street entrance to the building. Entrance will be facilitated 15 minutes before and after the meeting begins.

Dated: April 29, 1983.

POSTAL SERVICE

Notice of a Meeting

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR 7.5) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice that it intends to hold a meeting at 8:00 a.m. on Thursday, June 2, in Room C-121-122 of the Federal Building, 701 C Street, Anchorage, Alaska. The meeting is open to the public. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 245-3734.

On the previous afternoon, Wednesday, June 1, the management of the Postal Service will present a briefing session for the Board, which will be closed to the public. Although notice of briefing sessions is not required by the Act or the Bylaws of the Board, an agenda of the matters upon which the Board expects to be briefed is also set forth below.

Agenda

Wednesday Afternoon Briefing Session (Closed)

1. Briefing on Legislative Programs. (Mr. Hogan, Assistant Postmaster General, Government relations, will report on recent and anticipated Congressional developments affecting the Postal Service.)
2. Briefing on Technology Planning Process. (Mr. Cavallo, Senior Assistant Postmaster General, Research and Management Systems, will brief the Board on the status of technology planning and development.)
3. Briefing on *Ex Parte* Communications. (Mr. Califano, Dewey, Ballantine, Busby, Palmer & Wood, will brief the Board on proposed guidelines on *ex parte* communications to the Governors on issues in rate and classifications proceedings that are subject to Chapter 36 of Title 39, U.S. Code.)

Thursday Morning Meeting (Open)

1. Minutes of the Previous Meetings (May 2-3).
2. Remarks of the Postmaster General. (In keeping with its consistent practice, the Board's agenda provides this opportunity for the Postmaster General to inform the members of miscellaneous current developments concerning the Postal Service. Nothing requiring a decision by the Board is brought up under this item.)
3. Briefing on Update of 5-Year Plan. (Mr. Cummings, Assistant Postmaster General, Planning, will brief the Board on the 5-Year Plan.)
4. Briefing on Mailhandling in Alaska. (Mr. Opinsky, Management Sectional Center Manager/Postmaster of Anchorage, Alaska, will brief the Board on the unique mailhandling programs required for Alaska.)
5. Proposed Capital Investment Projects. (Mr. Biglin, Senior Assistant Postmaster General, Administration Group, will present proposals for 1) a new General Mail Facility and Vehicle Maintenance Facility for Reading, Pennsylvania, and 2) a new facility to house the Postal Data Center now located in San Bruno, California.)
6. Consideration of Tentative Agenda for July 7-8.

David F. Harris,

Secretary.

Part II

Department of Energy

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

VOL 48 ISS 96 MY 17 1983 UMI

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 891]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
- 102-2: New well (2.5 Mile rule)
- 102-3: New well (1000 Ft rule)
- 102-4: New onshore reservoir
- 102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
- 107-GB: Geopressured brine
- 107-CS: Coal Seams
- 107-DV: Devonian Shale
- 107-PE: Production enhancement
- 107-TF: New tight formation
- 107-RT: Recompletion tight formation

Section 108: Stripper well
- 108-SA: Seasonally affected
- 108-ER: Enhanced recovery
- 108-PB: Pressure buildup

Kenneth F. Plumb,

VOL 48 ISS 96 MAY 17 1983 UMI

[Volume 892]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 12, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd, Springfield, VA 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
- 102–2: New well (2.5 Mile rule)
- 102–3: New well (1000 Ft rule)
- 102–4: New onshore reservoir
- 102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
- 107–GB: Geopressured brine
- 107–CS: Coal Seams
- 107–DV: Devonian Shale
- 107–PE: Production enhancement
- 107–TF: New tight formation
- 107–RT: Recompletion tight formation

Section 108: Stripper well
- 108–SA: Seasonally affected
- 108–ER: Enhanced recovery
- 108–PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-C

VOL 48 ISS 96 MY 17 1983 UMI

[Volume 983]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 12, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes.

Section 102–1: New OCS lease
- 102–2: New well (2.5 Mile rule)
- 102–3 New well (1000 Ft rule)
- 102–4: New onshore reservior
- 102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
- 107–GB Geopressured brine
- 107–CS: Coal Seams
- 107–DV: Denvolan Shale
- 107–PE: Production enhancement
- 107–TF: New tight formation
- 107–RT: Recompletion tight formation

Section 108: Stripper well
- 108–SA: Seasonally affected
- 108–ER: Enhanced recovery
- 108–PB Pressure buildup

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-C

[Volume 894]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 12, 1983.

The following notices of determinations were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
102-2: New well (2.5 Mile rule)
102-3: New well (1000 Ft rule)
102-4: New onshore reservoir
102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
107-GB: Geopressured brine
107-CS: Coal seams
107-DV: Devonian Shale
107-PE: Production enhancement
107-TF: New tight formation
107-RT: Recompletion tight formation

Section 108: Stripper well
108-SA: Seasonally affected
108-ER: Enhanced recovery
108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

National Board's Selection of Localities for Emergency Food and Shelter Program Funding

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice sets forth the criteria for selection used by the National Board for the Emergency Food and Shelter Program, which was created by Pub. L. 98–8. A listing of localities selected and the amount of award monies each will receive is also included in the notice. The local board, created in each selected locality, will identify and certify as eligible those private voluntary organizations to receive the funds.

DATED: May 9, 1983.

FOR FURTHER INFORMATION CONTACT: Karen Keefer, Individual Assistance Division, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0567.

Dennis H. Kwiatkowski,

Chairman, National Board.

Pub. L. 98–8 created a National Board composed of six voluntary organizations and the Federal Emergency Management Agency. This Board was charged with quick distribution of $50,000,000 to supplement and extend emergency food and shelter services nationwide. Recognizing limited funding and the extent of the problem, the following operating principles were used:

—Fast response
—Public/private sector cooperation
—Allocations to neediest areas
—Minimum, but accountable reporting
—Local decision-making

The criteria for selection considered three factors: (1) Most current *annual* unemployment rates (2) total number of unemployed with a civil jurisdiction; and (3) needs data and other available factors. These included homelessness, Poverty Index, Travelers' Aid statistics, HHS lists of certified food banks, survey "at risk" groups within middle range unemployment rate communities, HHS breakdown of urban-rural poverty, benefit exhaustion rates, unemployment change rates, State Grant Awards, and review of all supplemental correspondence and data submitted. Not all these factors were available or usable.

Unemployment rates and numbers are not a totally valid surrogate for need or poverty. Yet, no other data were available divisible by State, SMSA, county, or municipality which were also current, uniform and available within the timeframe.

In communities surveyed, unemployment was classified most frequently as a "local emergency". Unemployment was mentioned three times more than any other factor. In fact, many of the others (e.g., "family victims of violence" and "shelter/food bank turnaways") were directly attributed to unemployment.

After thorough review, the following jurisdictions were selected:

- Jurisdictions, including balance of counties, with 18,000 + unemployed *and* 7.8%+ unemployment rate.
- Jurisdictions, including balance of counties, with 100 to 17,999 unemployed *and* 13%+ unemployment rate. (Includes U.S. territories.)
- Selected additional jurisdictions with supplemental data provided on migrant needs, number de-institutionalized, recent plant closings, displaced households, etc.

For brevity, this notice of awards is published on a county basis. Cities which meet the criteria will be handled as separate jurisdictions.

The National Board recognizes that hunger and homelessness know no bounds—occurring in urban as well as rural areas. Varying rates were selected to recognize such dynamics as urban area attraction of the homeless and hungry, for urban areas tend to have facilities and services.

Given the emergency nature of the program, the considerations above, and the limited funding available, NOT ALL STATES OR COMMUNITIES RECEIVED FUNDING from the National Board. The Board anticipates that other communities not eligible under these criteria could be identified for funding under a similar $50,000,000 program administered by the States.

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 50

National Capital Parks Regulations; Demonstrations in the White House Area

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend § 50.19 of Title 36 of the Code of Federal Regulations concerning demonstrations and special events in the National Capital Parks to prohibit signs or placards on the White House sidewalk except those that are carried by an individual. The proposed rule would also amend §50.19 of Title 36 of the Code of Federal Regulations and § 50.7(h) of the same title concerning storage of materials in park areas to prohibit the placement or storage of parcels, containers, packages, bundles or other property on the sidewalks surrounding the White House. Those changes are necessary in order to minimize potential threats to the structure and its occupants and visitors.

DATES: Written comments, suggestions, or objections regarding this proposed rule will be accepted until May 31, 1983.

ADDRESSES: Written comments regarding this proposed rule should be sent to Manus J. Fish, Jr., Regional Director, National Capital Region, National Park Service, 1100 Ohio Drive, S.W., Washington, D.C. 20242.

FOR FURTHER INFORMATION CONTACT: Sandra Alley, Associate Regional Director, Public Affairs, National Capital Region, National Park Service, 1100 Ohio Drive, S.W., Washington, D.C. 20242, telephone (202)426–6700; Richard G. Robbins, Assistant Solicitor, National Capital Parks, Office of the Solicitor, Department of the Interior, Washington, D.C. 20240, telephone (202)343–4338.

SUPPLEMENTARY INFORMATION: The following persons participated in the writing of this rule: Richard G. Robbins and Patricia S. Bangert, Office of the Solicitor, Department of the Interior.

Background

Recent events in the Memorial Core parks have increased security concerns for the White House and the President. On December 8, 1982, an individual backed a truck up to the Washington Monument and threatened to blow up the structure with 1,000 pounds of dynamite that he allegedly had stored in the truck. The incident, occurring a mere three blocks from the White House, highlighted the threat that could be potentially caused to the White House and the President by one determined individual.

Since the incident, the National Park Service, along with other law enforcement agencies, have reviewed present regulations applicable to the White House area to determine if regulatory changes could aid in minimizing potential threats to the structure and its occupants and visitors. Two areas of concern became evident in that review—signs or placards stationed on the White House sidewalk and parcels, containers, packages, bundles and other property placed or stored on the White House sidewalk and other sidewalks surrounding the structure. (The term White House sidewalk is defined in 36 CFR 50.19(a)(5) as "the south sidewalk of Pennsylvania Avenue, N.W., between East and West Executive Avenues, N.W.")

Signs or placards leaning against the White House fence, and parcels and other property placed or stored on the sidewalks, especially those left unattended, represent potential threats to the security of the area. For example, both can potentially conceal explosives or other contraband and both can potentially be used to scale the White House fence. In fact, the Secret Service reports a recent incident in which a large sign was used to facilitate the scaling of the fence.

In addition to the security concerns, experience with the recent proliferation of signs or placards and parcels and other property stationed and stored on the White House sidewalk has demonstrated that the policy of allowing such activity impedes the free flow of pedestrian and emergency traffic by and through the White House and significantly diminishes the White House experience for park visitors. For example, two individuals who have in the past and are presently maintaining a daily demonstration in front of the White House have had as many as twenty-five signs or placards leaning against the White House fence. In addition to the signs, paper bags, suitcases and other parcels containing personal belongings obsruct the view of the White House and impede the flow of pedestrian traffic.

It is the judgment of the National Park Service that certain restrictions can be placed upon the stationing of signs or placards and placement or storage of parcels and other property on the White House sidewalk which would enhance the park visitor's experience in viewing the White House and respond to security concerns without impairing the demonstrator's ability to convey a message.

This regulation was published as an interim rulemaking on April 22, 1983 (48 FR 17352). The interim rule was challenged in *White House Committee for the ERA Vigil v. Watt,* Civil Action No. 83–1243 (D.D.C. filed 4/29/83). Plaintiffs alleged constitutional and Administrative Procedure Act (APA) defects. The District Court found that good cause had not been shown for giving immediate effect to the regulation. On this basis, the court enjoined enforcement of the regulation as an interim rule until the publication of a final rule.

In response to the District Court's order, the National Park Service is republishing the regulation as a proposed rulemaking.

The National Park Service and the United States Secret Service maintain their position that good cause does exist to make this regulation effective immediately in order to protect the White House, the President and the public. However, the District Court differed with this view and held that good cause had not been shown to make the regulation effective immediately. Accordingly, the proposed rulemaking gives the public another comment period, in addition to the period already provided in the interim rulemaking.

Regulatory Changes

To accomplish the purpose of minimizing potential threats to the White House and the President, and for other purposes outlined above, the National Park Service is proposing to amend present regulations to prohibit signs or placards on the White House sidewalk, except those that are being hand-carried by an individual. The regulation, then, would not be applicable to other parks where demonstrations are permitted. (Demonstrations are not permitted on other sidewalks contiguous to the White House. 36 CFR 50.19(c)(1).)

The proposed rule would not prohibit the carrying of a sign or placard during demonstrations on the White House sidewalk. Further, it would not place any restriction on the size of the sign or placard, as long as it is in fact being held or carried by an individual. The proposed rule would prohibit signs or placards that are not held or carried by individuals, for example, signs that are leaned against the White House fence, signs that are left unattended on the White House sidewalk and signs that are supported by other structures. In fact, the proposed rule would not dramatically change the present regulatory scheme—temporary structures are presently prohibited on the White House sidewalk under 36 CFR 50.19(e)(8).

The National Park Service believes that there is a substantial government interest in regulating the use of signs or placards on the White House sidewalk. Signs or placards not hand-carried and those left unattended cannot be easily moved in emergency situations. Signs or placards leaning against the White House fence may conceal dangerous materials, obscure the view of law enforcement personnel and create other security problems. For example, a sign affixed to a large structure caught fire several weeks ago, seriously damaging the fence and granite post in front of the Old Executive Office Building, a few feet from the White House sidewalk and fence.

In addition, signs or placards leaning against the White House fence can obscure the view of the White House for the thousands of park visitors. Signs or placards stationed on the sidewalk also incommode the passageway and sometimes cause difficulty in maintaining smooth pedestrian flow, which may include park visitors and persons having business in the area.

The proposed rule would also prohibit the placement or strorage of parcels, containers, packages, bundles or other property on the White House sidewalk, the west sidewalk of East Executive Avenue, N.W. between Pennsylvania Avenue, N.W. and E Street, N.W., and the north sidewalk of E Street, N.W. between East and West Executive Avenues, N.W. The rule would not interfere with an individual who is carrying a parcel or other property along the sidewalk. In fact, it would not even subject an individual setting a parcel or other property down on the sidewalk or attending structures for up to one hour to law enforcement action unless that individual either refuses law enforcement personnel requests to search the property, or leaves the property unattended.

The National Park Service concludes, however, that when a parcel, container, package, bundle or other property is placed or stored on the sidewalks contiguous to the White House, potential security problems are created. In addition, the National Park Service concludes that parcels and other property, like signs or placards, may obscure the view of the White House by park visitors and law enforcement personnel, may be difficult to move when the sidewalk must be cleared in an emergency and may incommode the sidewalk and interfere with visitor and business pedestrian traffic.

The National Park Service believes that these minor restrictions on the stationing of signs or placards and the placement or storage of parcels, containers, packages, bundles or other property serve substantial government interests in maintenance of the security of the White House, preservation of the park experience for park visitors, and free passage of pedestrian traffic by and through the White House. The regulation is written in a neutral manner such that all persons are prohibited from stationing signs or placards or storing parcels or other property on the sidewalks surrounding the White House. In addition, it is unrelated to the suppression of free expression and the incidental impact on First Amendment freedoms is only as great as is essential to serve the substantial government interests in security, aesthetics and free passage of pedestrian traffic. Further, the proposed rule would apply only to sidewalks contiguous to the White House. A substantial number of alternative forums exist close to the White House sidewalks where these restrictions do not apply.

Public Participation and Statement of Good Cause

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, the National Park Service encourages interested persons to submit written comments, suggestions, or objections regarding the proposed rule to the address noted at the beginning of this rulemaking within the time period specified.

The National Park Service has determined that good cause exists to waive a further thirty-day comment period. Because the proposed rule relates to public property, the APA does not require that it be subject to public notice and comment. However, it is the policy of the Department of the Interior to utilize the public participation procedures of the APA to the fullest extent possible and public comments are invited until May 31, 1983. Because of the urgent need to eliminate security concerns for the White House, the President and the public, as described above, because the proposed rule is identical to that published as an interim rule, and because the public has had notice of the rule since April 22, 1983, and some members of the public have already submitted comments on the rule, good cause exists to waive the normal thirty-day comment period and, instead, invite comments for an additional approximately two-week period only. All comments received in response to the publication of the interim rule will be considered in addition to the comments received in response to this identical proposed rule.

Impact Analysis

The National Park Service has determined that this document is not a major rule requiring preparation of a Regulatory Impact Analysis under Executive Order 12291. The National Park Service has also determined that the proposed rule would not have a significant economic impact on a substantial amount of small entities and, therefore, does not require a small entity flexibility analysis under Pub. L. 96–354. The proposed rule would merely place restrictions on the stationing of signs or placards and parcels and other property on sidewalks contiguous to the White House. It would have no substantial impact on any aspect of the economy.

The National Park Service has further determined that this proposed rule is not a major Federal action significantly affecting the quality of the human environment.

List of Subjects in 36 CFR Part 50

District of Columbia, National parks, National Capital parks.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

Date approved: May 13, 1983.

PART 50—NATIONAL CAPITAL PARKS REGULATIONS

In consideration of the foregoing, it is proposed that §§ 50.19 and 50.7 of Title 36 of the Code of Federal Regulations be accordingly amended.

1. The authority citation for Part 50 reads as follows:

Authority: Section 6 of the Act of July 1, 1898 (30 Stat. 571); Sections 1–9 of the Act of August 25, 1916 (39 Stat. 535, as amended); Section 10 of the Act of March 3, 1925 (43 Stat. 1120, as amended); Act of March 17, 1948 (62 Stat. 81); Act of August 8, 1953 (67 Stat. 495); Act of July 1, 1980 (94 Stat. 672); 16 U.S.C. 1–3; D.C. Code 8–137 (1981); D.C. Code 40–721 (1981).

2. Section 50.19 is amended by redesignating paragraphs (e) (9) through (11) as (e) (11) through (13) and adding new paragraphs (e)(9) and (e)(10) to read as follows:

§ 50.19 Demonstrations and special events.

* * * * *

(e) * * *

(9) No signs or placards shall be permitted on the White House sidewalks except those signs or placards that are held or carried by an individual.

VOL 48 ISS 96 MY 17 1983 UMI

(10) No parcel, container, package, bundle or other property shall be placed or stored on the White House sidewalk or on the west sidewalk of East Executive Avenue, NW., between Pennsylvania Avenue, NW. and E Street, NW. or on the north sidewalk of E Street, NW. between East and West Executive Avenues, NW.; Provided, however, that a parcel, container package, bundle or other property, except structures, may be set down on these sidewalks for a maximum of one hour if it is attended at all times within that time period, and law enforcement personnel are permitted to search the property.

* * * * *

3. Section 50.7(h) is amended by redesignating the existing paragraph as paragraph "(1)" and by adding a paragraph "(2)", as follows:

§ 50.7 Federal property; miscellaneous provisions

* * * * *

(h) Storage. * * *

(2) No parcel, container, package, bundle or other property shall be placed or stored on the White House sidewalk, as that term is defined in § 50.19(a)(5) of this Part, or on the west sidewalk of East Executive Avenue, NW. between Pennsylvania Avenue, NW. and E Street, NW. or on the north sidewalk of E Street, NW. between East and West Executive Avenues, NW.; Provided, however, that a parcel, container package, bundle or other property, except structures, may be set down on any of these sidewalks for a maximum of one hour if it is attended at all times within that time period, and law enforcement personnel are permitted to search the property.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Now Available 1980-1981 Microfilm Editions of the Federal Register

The microfilm editions of the **Federal Register** for 1980 and 1981 (volumes 45 and 46) are now available at a cost of $735. These volumes cover 150,566 pages, the annual indexes, and the quarterly indexes of the List of CFR Sections Affected. Volume 45, the 1980 edition, is available on 26 rolls of microfilm at a cost of $390. Volume 46, the 1981 edition, is on 23 rolls and costs $345. The entire microfilm publication (M190), now comprising 410 rolls and spanning the years 1936–1981, is for sale at $6,150. Further information concerning the 1980–81 volumes or any other volumes may be obtained from the Publications Sales Branch (NEPS), National Archives and Records Service. Washington, D.C. 20408.

Institutions or business may place their orders directly with NEPS. The **Federal Register** is filmed on 35 mm. roll film only.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 97
Wednesday, May 18, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 929

Cranberries Grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York; Order Directing That a Referendum Be Conducted; Determination of Representative Period for Voter Eligibility; and Designation of Referendum Agents to Conduct the Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Referendum order.

SUMMARY: This document directs that a referendum be conducted among growers of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York, do determine whether they favor continuance of the marketing agreement and order program.

DATE: Referendum period May 18 throught 28, 1983.

ADDRESSES: See information contained in supplementary information.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, Fruit and Vegetable Division, AMS, USDA, telephone (202) 447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is required to determine whether growers favor continuance of the marketing order for cranberries grown in the production area as specified in the order and will not substantially affect costs for the directly regulated handlers.

Pursuant to § 929.68(d) of the marketing agreement, as amended, and Order No. 929, as amended (7 CFR Part 929), and the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amend (7 U.S.C. 601–674), it is hereby directed that a referendum be conducted within the period May 18 through May 28, 1983, among the growers who, during the period September 1, 1982 through March 31, 1983 (which period is hereby determined to be a representative period for the purposes of such referendum), were engaged in the production area in the production of cranberries covered by the said amended marketing agreement and order to ascertain whether continuance of the said amended marketing order is favored by the growers. Section 928.68(d) specifies that such a referendum shall be held during the month of May 1975, and during the month of may every fourth year thereafter, to ascertain whether growers favor such continuance.

Ronald L. Cioffi and Jay N. Guerber, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, are hereby designated as referendum agents of the Secretary of Agriculture to conduct said referendum. The procedure applicable to the referendum shall be the "Procedure for the Conduct of Referenda in Connection With Marketing Orders for Fruits, Vegetables, and Nuts Pursuant to the Agricultural Marketing Agreement Act of 1937, as Amended" (7 CFR 900.400 *et seq.*).

Copies of the texts of the aforesaid amended marketing order may be examined in the office of the referendum agents or of the Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250.

Ballots to be cast in the referendum may be obtained from the referendum agents and from their appointees.

[Docket No. AO–225–A35]

Milk in the Southern Michigan Marketing Area; Order Amending Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action provides handlers regulated by the Southern Michigan Federal milk order with limited transportation credits from the marketwide pool for certain Class III milk transferred to unusually distant outlets for surplus disposal. The change, which would apply only through August 31, 1983, is based on industry proposals considered at a public hearing on April 7, 1983. The amendment is needed to reflect current marketing conditions and to insure that all producers in the market share more equitably the costs of disposing of unusually large supplies of surplus milk that are expected during the months of May through August 1983. Cooperative associations representing more than two-thirds of the producers who supply the market have approved of the amended order.

EFFECTIVE DATE: May 18, 1983.

Emergency Final Decision: Issued April 29, 1983, published May 6, 1983 (48 FR 20418).

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when the order was first issued and when it was amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

(a) *Findings.* A public hearing was held upon a proposed amendment to the tentative marketing agreement and to the order regulating the handling of milk in the Southern Michigan marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order effective upon publication in the **Federal Register.** Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

The provisions of this order are known to handlers. The decision of the Assistant Secretary containing the amendment provision of this order was issued April 29, 1983. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective upon publication in the **Federal Register,** and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the **Federal Register.**

(Sec. 553(d), Administrative Procedure Act, 5 U.S.C. 551–559)

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in Sec. 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Southern Michigan marketing area shall be in conformity to and in compliance with the following terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

PART 1040—MILK IN THE SOUTHERN MICHIGAN MARKETING AREA

1. In § 1040.60, add paragraph (h) to read as follows:

§ 1040.60 Handler's value of milk for computing uniform price.

* * * * *

(h) With respect to milk marketed on or after the effective date hereof through August 1983, deduct the amount obtained by multiplying the pounds of bulk fluid milk and the pounds of condensed milk (whole or skim) which were classified as Class III and were transferred to another order plant pursuant to § 1040.42(b)(3) or to a nonpool plant pursuant to § 1040.42(d)(2), both of which are located outside the State of Michigan, by a per hundredweight rate equal to 3.6 cents for each 10 miles or fraction thereof that such other order plant or nonpool plant is located more than 150 miles, as determined by the market administrator, from the pool plant from which the milk was transferred. No credit should apply to the total quantity of milk so transferred by a handler if any portion of the milk is assigned to Class I.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 166

[Docket No. 83-024]

Swine Health Protection

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document exempts rendering facilities from the provisions of the Swine Health Protection Regulations. This action is necessary because the Deputy Administrator of Veterinary Services, APHIS, has determined that rendered products pose no disease threat to the swine industry. The effect of this action is to relieve the unnecessary burden on renderers of obtaining licenses to treat garbage which is to be fed to swine.

EFFECTIVE DATE: May 18, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. L. W. Schnurrenberger, Chief Staff Veterinarian, Swine Diseases, Special Diseases Staff, Veterinary Services, APHIS, USDA, Room 841, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8438.

Background

On November 3, 1982, there was published in the **Federal Register** a new 9 CFR Part 166 (47 FR 49940–49948) which, among other things, requires the licensing of garbage treatment facilities producing edible waste of animal origin for swine consumption. Rendering facilities were included in this category since they produce animal protein supplements for animal feeds from raw animal products and by-products.

Rendering is the process of treating any fat, bone, offal, viscera or related material derived from the carcasses of livestock, poultry, fish, or parts thereof, and used cooking greases and oils into products that include animal, poultry, or fish protein meal, grease or tallow. The material treated by rendering falls under the definition of garbage in the Swine Health Protection Act (7 U.S.C. 3801 *et seq.*) and 9 CFR Part 166. As the final rendered products are used in animal feeds, some of which are consumed by swine, renderers have been subject to regulation under the Swine Health Protection Act and the regulations in 9 CFR Part 166.

There are two main rendering processes: dry batch rendering and wet rendering. Dry rendering occurs where the material is agitated and cooked at 240°–250° F. for 1½ to 4 hours, driving off all moisture. Wet rendering occurs by injecting the container of material with live steam and cooking at 240°–310° F. for 1½ to 4 hours. The minimum final temperature of the rendered product with all rendering methods is not less than 230° F. Both of these processes meet or exceed the requirements of the regulations in Part 166. Those regulations are designed to ensure that all possible disease organisms in garbage which is to be fed to swine are killed by boiling at 212° F. for ½ hour or equivalent temperature. Rendered products reach at least 230° F., and it is not necessary to require that this temperature be maintained for any minimum time period, as merely reaching this temperature has the same effect as boiling for ½ hour; that is, all possible disease organisms are killed. In addition, rendered products used in animal feeds are under the jurisdiction of the Food and Drug Administration. Therefore, in view of these facts the Deputy Administrator, Veterinary Services, has determined that rendering facilities as defined in these regulations do not pose a risk to the swine industry in the United States.

In accordance with this determination, a document was published in the **Federal Register** on December 23, 1982 (47 FR 57292–57293), which proposed exempting rendering facilities from the provisions of the Swine Health Protection Regulations. Comments regarding the proposal were solicited for 20 days after publication of the proposed regulations, and copies of the proposal were distributed to industry organizations, animal health officials, and veterinary medical societies known to be interested in the subject matter.

Comments Received

The only comment received was from a national association representing the rendering industry. It was requested that the proposed definitions of "render" and "rendered product" be amended. These terms were defined in the proposal as follows:

Render. To process garbage derived from slaughter, food service, and other sources through grinding and heating to a minimum temperature of not less than 230° F.

Rendered product. Garbage that has been rendered to make products such as, but not limited to, animal, poultry, or fish protein meal, grease or tallow.

It was requested that the term "garbage," not be used in the definitions of "render" and "rendered product." In support of this request it was asserted that the use of the term "garbage," though technically correct, mistakenly implies that the material processed by renderers is "spoiled or waste food * * * that is thrown away (as worthless)." It was further pointed out that the materials that are processed come from the fresh meat industry and are neither spoiled nor thrown away, but in fact are highly desirable for use in animal feeds and fertilizers. In order to resolve what was perceived as being misleading, the association suggested substituting a portion of the definition of "garbage" for the term "garbage" itself.

The term "garbage" is defined in both the Act and the regulations to mean, in relevant part, "waste material derived in whole or in part from the meat of any animal (including fish and poultry) or other animal material, and other refuse of any character whatsoever that has been associated with any such material, resulting from the handling, preparation, cooking, or consumption of food * * *" The Department has carefully reviewed the proposed regulations in view of the comment received. As a result of this review, the Department has amended the proposal in the following nonsubstantive ways. In the definition of the term "rendered product" the word "garbage" has been deleted and the relevant portion of the definition of the word "garbage" has been substituted therefor. This change in the definition of the term "redered product" has resulted in the word "rendered" being deleted. Since the word "render" was defined in proposed § 166.1 only because the word "rendered " was used in the definition of the term "rendered product," the definition of the word "render" is deleted as unnecessary.

Otherwise, based on the reasons set forth in the proposal, the provisions in the proposal have been adopted in the final rule as proposed.

Executive Order 12291

In accordance with Executive Order 12291 and based on information compiled by the Department of Agriculture, this rule is determined to be nonmajor. This final rule will not have a significant effect on the economy and will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived their review process required by Exective Order 12291.

Certification Under the Regulatory Flexibility Act

James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on any entity. This action will impact on rendering facilities only. The renderers would merely not be required to obtain licenses under 9 CFR Part 166, because their activities do not pose a risk to the swine industry in the United States.

Alternatives

There were two alternatives considered:

1. Provide no exemption for rendering facilities.

2. Exempt rendering facilities.

Alternative 1 was rejected because it would have required the inspection and licensing of all rendering facilities, regardless of the fact that their activities pose no disease threat to the swine industry in the United States

Alternative 2 was selected because it was determined that rendering facilities already exceed the requirements in Part 166, and do not produce products that would transmit diseases of swine.

Therefore, the Department is amending 9 CFR 166.1, 166.2(a), and 166.10 to exempt renderers from the licensing requirements of Part 166, to allow the feeding to swine of rendered products from rendering facilities not licensed under the Swine Health Protection Act and the regulation in Part 166, and to add a definition of "rendered product."

Effective Date

The final rule relieves restrictions which have been found to be unnecessary. Accordingly, prompt action should be taken to delete the restrictions. Therefore, in accordance with the administrative procedure

VOL
48
ISS
97
MY
18
1983
UMI

provisions of 5 U.S.C. 553, good cause is found for making this final rule effective less than 30 days after publication of this document in the Federal Register.

List of Subject in 9 CFR Part 166

African swine fever, Animal diseases, Foot-and-mouth disease, Garbage, Hogs, Hog cholera, Swine vesicular disease, Vesicular exanthema of swine.

PART 166—SWINE HEALTH PROTECTION

Accordingly, 9 CFR Part 166, is amended as follows:

1. In § 166.1, the following definition is added in alphabetical order:

§ 166.1 Definitions in alphabetical order.

* * * * *

Rendered product. Waste material derived in whole or in part from the meat of any animal (including fish and poultry) or other animal material, and other refuse of any character whatsoever that has been associated with any such material, resulting from the handling, preparation, cooking or consumption of food that has been ground and heated to a minimum temperature of 230° F. to make products such as, but not limited to, animal, poultry, or fish protein meal, grease or tallow.

* * * * *

2. In § 166.2, paragraph (a) is revised to read:

§ 166.2 General restrictions.

(a) No person shall feed or permit the feeding of garbage to swine, except for rendered products, unless it is treated to kill disease organisms, pursuant to the regulations, at a facility operated by a person holding a valid license for the treatment of garbage.

* * * * *

3. In § 166.10, a new sentence is added at the end of paragraph (a) to read:

§ 166.10 Licensing.

(a) * * * Producers of only rendered products are so exempted from the requirements of this paragraph in States which do not have primary enforcement responsibility.

* * * * *

List of Subjects in 28 CFR Part 0

Clemency.

By virtue of the authority vested in me by 28 U.S.C. 509, 510 and 5 U.S.C. 301, Subpart G of Part 0 of Chapter I of Title 28, Code of Federal Regulations, is amended by revising §§ 0.35 and 0.36 as follows:

§ 0.35 General functions; delegation of authority.

Under the general supervision of the Attorney General and the direction of the Associate Attorney General, the following-described matters are assigned to, and shall be conducted, handled or supervised by, the Pardon Attorney but subject to the limitation contained in section 0.36 of this Chapter.

(a) Exercise of the powers and performance of the functions vested in the Attorney General by § 1.1 through 1.8 inclusive of this Chapter.

(b) Performance of such other duties as may be assigned by the Attorney General or the Associate Attorney General.

§ 0.36 Recommendations.

The Pardon Attorney shall submit all recommendations in clemency cases through the Associate Attorney General and the Associate Attorney General shall exercise such discretion and authority as is appropriate and necessary for the handling and transmittal of such recommendations to the President.

Dated: May 6, 1983.

William French Smith,

Attorney General.

BILLING CODE 4410-01-M

28 CFR Part 1

[Order No. 1011-83]

Rules Governing Petitions for Executive Clemency

AGENCY: Office of the Attorney General, Justice

ACTION: Final rule.

SUMMARY: The regulations governing petitions for Executive clemency describe the procedures involved in petitioning the President for Executive clemency and the responsibility of the Attorney General in investigating each applicant for clemency and advising the President as to the proper disposition of each application. This order simplifies and updates the present regulations, authorizes the Attorney General to delegate his responsibility in clemency matters, lengthens the eligibility waiting period for pardon applicants to a minimum of five years, with a minimum of seven required for more serious crimes, increases the categories of crimes requiring the longer eligibility waiting period, and broadens the discretionary authority to release clemency records in the public interest. Finally, the order adds a new section which describes the nature and effect of the regulations.

EFFECTIVE DATE: May 5, 1983.

FOR FURTHER INFORMATION CONTACT: David C. Stephenson, Acting Pardon Attorney, Office of the Pardon Attorney, Department of Justice, Washington, D.C. 20530 (301–492–5910).

List of Subjects in 28 CFR Part 1

Clemency.

With the approval of the President, acting in conformity with his authority as Chief Executive and Article II, Section 2, United States Constitution, and by virtue of the authority vested in me by 28 U.S.C. 509, 510 and 5 U.S.C. 301, Part 1 of Chapter I of Title 28 of the Code of Federal Regulations is revised to read as follows:

PART 1—EXECUTIVE CLEMENCY

Sec.

1.1 Submission of petition: form to be used: contents of petition.
1.2 Eligibility for filing petition for pardon.
1.3 Eligibility for filing petition for commutation of sentence.

Sec.

1.4 Offenses against the laws of possessions or territories of the United States.
1.5 Disclosure of files.
1.6 Consideration of petitions; recommendations to the President.
1.7 Notification of grant of clemency.
1.8 Notification of denial of clemency.
1.9 Delegation of authority.
1.10 Advisory nature of regulations.

Authority: U.S. Const., Art II, sec. 2, and authority of the President as Chief Executive.

§ 1.1 Submission of petition; form to be used; contents of petition.

Persons seeking Executive clemency by pardon, reprieve, commutation of sentence or remission of fine shall execute formal petitions therefor. The petitions shall be addressed to the President of the United States and shall be submitted to the Pardon Attorney, Department of Justice, Washington, D.C. 20530, except for petitions relating to military offenses. Petitions and other required forms may be obtained from the Pardon Attorney. Petition forms for commutation of sentence also may be obtained from the wardens of Federal penal institutions. A petitioner applying for Executive clemency with respect to military offenses should submit his petition directly to the Secretary of the military department which had original jurisdiction over the courtmartial trial and conviction of the petitioner. In such instance, a form furnished by the Pardon Attorney may be used but should be modified to meet the needs of the particular case. Each petition for Executive clemency should include the information required in the form prescribed by the Attorney General.

§ 1.2 Eligibility for filing petition for pardon.

No petition for pardon should be filed until the expiration of a waiting period of at least five years subsequent to the date of the release of the petitioner from confinement or, in case no prison sentence was imposed, until the expiration of a period of at least five years subsequent to the date of the conviction of the petitioner. In some cases, such as those involving violent crimes, violation of narcotics laws, gun control laws, income tax laws, perjury, violation of public trust involving personal dishonesty, fraud involving substantial sums of money, violations involving organized crime, or other crimes of a serious nature, no petition should be filed until the expiration of a waiting period of seven years. The waiting period may be waived in cases of aliens seeking a pardon to avert deportation. Generally, no petition should be submitted by a person who is on probation or parole.

§ 1.3 Eligibility for filing petition for commutation of sentence.

A petition for commutation of sentence, including remission of fine, should be filed only if no other form of relief is available, such as from a court of the United States Parole Commission, or if unusual circumstances exist, such as critical illness, severity of sentence, ineligibility for parole, or meritorious service rendered by the petitioner.

§ 1.4 Offenses against the laws of possessions or territories of the United States.

Petitions for Executive clemency shall relate only to violations of laws of the United States. Petitions relating to violations of laws of the possessions of the United States or territories subject to the jurisdiction thereof should be submitted to the appropriate official or agency of the possession or territory concerned.

§ 1.5 Disclosure of files.

Petitions, reports, memoranda and communications submitted or furnished in connection with the consideration of a petition for Executive clemency generally shall be available only to the officials concerned with the consideration of the petition. However, they may be made available for inspection, in whole or in part, when in the judgment of the Attorney General their disclosure is required by law or the ends of justice.

§ 1.6 Consideration of petitions; recommendations to the President.

(a) Upon receipt of a petition for Executive clemency the Attorney General shall cause such investigation to be made of the matter as he may deem necessary and appropriate, using the services of, or obtaining reports, from, appropriate officials and agencies of the Government, including the Federal Bureau of Investigation.

(b) The Attorney General shall review each petition and all pertinent information developed by the investigation and shall determine whether the request for clemency is of sufficient merit to warrant favorable action by the President. He shall report in writing his recommendation to the President, stating whether in his judgment the President should grant or deny the petition.

§ 1.7 Notification of grant of clemency.

When a petition for pardon is granted, the petitioner or his attorney shall be notified of such action and the warrant of pardon shall be mailed to the petitioner. When commutation of sentence is granted, the petitioner shall be notified of such action and the warrant of commutation shall be sent to the petitioner through the officer in charge of his place of confinement, or directly to the petitioner if he is on parole.

§ 1.8 Notification of denial of clemency.

(a) Whenever the President notifies the Attorney General that he is denying a request for clemency, the Attorney General shall so advise the petitioner and close the case.

(b) Whenever the Attorney General recommends that the President deny a request for clemency and the President does not disapprove or take other action with respect to that adverse recommendation within 30 days after the date of its submission to him, it shall be presumed that the President concurs in that adverse recommendation of the Attorney General, and the Attorney General shall so advise the petitioner and close the case.

§ 1.9 Delegation of authority.

The Attorney General may delegate to any officer of the Department of Justice any of his duties or responsibilities under §§ 1.1 through 1.8.

§ 1.10 Advisory nature of regulations.

The regulations contained in this part are advisory only and for the internal guidance of Department of Justice personnel. They create no enforceable rights in persons applying for Executive clemency, nor do they restrict the authority granted to the President under Article II, Section 2 of the Constitution.

Dated: April 27, 1983.

Approved:

Ronald Reagan

President.

Dated: May 5, 1983.

BILLING CODE 4410-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 947

Surface Mining and Reclamation Operations Under a Federal Program for Washington

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Corrections and Modifications to the Washington Federal Program and postponement of effective date.

VOL
48
ISS
97
MY
18
1983
UMI

SUMMARY: The Office of Surface Mining (OSM) is making minor corrections and modifications to the applicability and procedural requirements of the Federal program to regulate surface coal mining and reclamation operations in Washington in response to public comments. In order to give the public the maximum time permissible for required permit applications, the effective date for the program has been postponed from May 13, 1983 to May 16, 1983.

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: James M. Kress, Branch of Regulatory Programs, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue NW., Room 204, Washington, D.C. 20240, Telephone: (202) 343–5866.

SUPPLEMENTARY INFORMATION: On February 24, 1983, the Office of Surface Mining published an interim final Federal program for Washington in the **Federal Register** to regulate coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands in that State. 48 FR 7870. At that time, OSM announced that the effective date of the program would be April 25, 1983, and that comments would be accepted until April 14, 1983, on whether the pending revisions to OSM's permanent program rules made it necessary or desirable for OSM to modify the Washington Federal program, since the Washington Federal program cross-references those rules.

In response to public comment, OSM postponed the effective date of the Washington Federal program until May 13, 1983, and extended the comment period until April 28, 1983. 48 FR 16058; April 14, 1983.

After considering all comments received during the comment period, OSM is today making minor corrections and modifications to the Washington Federal program published February 24, 1983. In order to give the public the maximum time permissible for required permit applications, all aspects of the corrected and modified Washington Federal program take effect May 16, 1983. OSM will acknowledge and respond to coments received during the comment period in the **Federal Register** in the near future.

1. Section 947.700 is amended by revising paragraph (g) to read as follows:

§ 947.700 Washington Federal Program

* * * * *

(g) The Secretary may grant a limited variance from the performance standards of Section 947.815 through 947.828 of this Part if the applicant for a coal exploration approval or surface coal mining reclamation permit submitted pursuant to Sections 947.770 through 947.788 of this Part can demonstrate in the application (1) that such a variance is necessary because of the nature of the terrain, climate, biological, chemical, or other relevant physical conditions in the area of the mine; and (2) if applicable, that the proposed variance is no less effective than the environmental protection requirements of the regulations in this program and is consistent with the Act.

2. Section 947.701 is amended by revising paragraph (a) and by designating the definition of Forestry (Forest land) in paragraph (b) as paragraph (b)(2) and adding a new paragraph (b)(1), to read as follows:

§ 947.701 General.

(a) Sections 700.5, 700.11, 700.12, 700.13, 700.14, 700.15, and Part 701 of this chapter shall apply to surface coal mining operations in Washington.

(b) The following modified definitions shall be applicable under § 701.5 of this chapter:

(1) *Arid and semiarid area* means, in the context of alluvial valley floors, an area of the interior western United States, west of the 100th meridian west longitude, experiencing water deficits, where water use by native vegetation equals or exceeds that supplied by precipitation. All coalfields located in North Dakota west of the 100th meridian west longitude, all coalfields in Montana, Wyoming, Utah, Colorado, New Mexico, Idaho, Nevada, and Arizona, the Eagle Pass field in Texas, and the Stone Canyon and the Ione fields in California are in arid and semiarid areas, except that all coalfields located in the State of Washington west of the crest of the Cascade Mountain Range are not in arid or semiarid areas.

(2) *Forestry (Forest Land).* Includes

* * *

* * * * *

3. Section 947.780 is amended by revising paragraph (a) to read as follows:

§ 947.780 Surface mining permit application—minimum requirements for reclamation and operation plan.

(a) Part 780 of this chapter, *Surface Mining Permit Application—Minimum Requirements for Reclamation and Operation Plan*, shall apply to any person who makes application to conduct surface coal mining and reclamation operations, except for § 780.15(a) of that Part.

* * * * *

4. Section 947.822 is revised to read as follows:

§ 947.822 Special performance standards—operations on alluvial valley floors.

Part 822 of this chapter, *Special Performance Standards—Operations on Alluvial Valley Floors*, shall apply to any person who conducts surface coal mining and reclamation operations on alluvial valley floors, except in those coalfields in Washington west of the crest of the Cascade Mountain Range.

(Pub. L. 95–87, the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.*)

BILLING CODE 4310–05–M

VETERANS ADMINISTRATION

38 CFR Part 36

Decrease in Maximum Permissible Interest Rates on Guaranteed Manufactured Home Loans, and Home and Condominium Loans

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The VA (Veterans Administration) is decreasing the maximum interest rates on guaranteed manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans. In addition, the maximum interest rate applicable to home and condominium loans is also decreased, and a different maximum interest rate for graduated payment mortgages is established for those purposes. These decreases in interest rates are possible because of recent improvements in the availability of funds in various credit markets. The decrease in the interest rates will allow eligible veterans to obtain loans at a lower monthly cost.

EFFECTIVE DATE: May 9, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. George D. Moerman, Loan Guaranty Service (284), Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420 (202–389–3042).

SUPPLEMENTARY INFORMATION: The Administrator is required by section 1819(f), title 38, United States Code, to establish maximum interest rates for manufactured home loans guaranteed by the VA as he finds the manufactured home loan capital markets demand. Recent market indicators—including the prime rate, the general decrease in interest rates charged on conventional manufactured home loans, and the decrease of other short-term and long-term interest rates—have shown that the manufactured home capital markets have improved. It is now possible to decrease the interest rates on manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans while still assuring an adequate supply of funds from lenders and investors to make these types of VA loans.

After consultation with the Secretary of Housing and Urban Development as required by law, it has been determined that a decrease in the VA home and condominium interest rate is warranted at this time. It has also been determined that the capital markets require a higher yield on graduated payment mortgages compared to fixed-payment mortgages. To assure an adequate supply of funds for this type of mortgage at reasonable discount levels, a maximum rate ¼ percent higher than the rate for fixed payment mortgages is being established.

The decrease in the VA maximum home and condominium interest rate should not have an adverse impact on the availability of funds necessary to make VA loans. The decrease in the VA interest rate, however, should allow more veterans to purchase a home because of the lower monthly payment for principal and interest required at the lower interest rate.

Paragraphs (b), (c), and (d) of § 36.4311 have been redesignated paragraphs (c), (d), and (e). This allows the addition of a new paragraph (b) to § 36.4311 establishing a different maximum interest rate for graduated payment mortgages.

The Administrator's statutory authority to establish interest rates has been delegated by 38 CFR 2.6(b)(3) to the Chief Benefits Director, Deputy Chief Benefits Director, or person authorized to act for them.

Regulatory Flexibility Act/Executive Order 12291

For the reasons discussed in the May 7, 1981 **Federal Register** (46 FR 25443), it has previously been determined that final regulations of this type which change the maximum interest rates for loans guaranteed, insured, or made pursuant to Chapter 37 of title 38, United States Code, are not subject to the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601–612.

The amendment to allow a different interest rate for GPM (graduated payment mortage) loans is in effect only a decrease in the VA maximum interest rate for home and condominium loans amortized with graduated payment in lieu of fixed payment features. The interest differential for GPM loans is necessary because of mortgage money market pricing differences on pools of graduated payment mortgages as compared to fixed-payment mortgages.

Publication for notice and public comment is not necessary for the same reasons as discussed in the May 7, 1981, **Federal Register** (46 FR 25443). The delay necessary to publish a proposed regulation would require a minimum of 45 days which would be harmful to home buyers wishing to purchase housing with VA graduated payment mortgage loans. A delay would likely halt the closing of VA GPM mortgages pending the needed rate differential. This delay would prove costly to lenders who would be unwilling to process this type of loan pending resolution of the rate issue; to builders and developers who would be unable to sell some of their homes timely and thus incur increased construction costs; and to veterans who would be unable to obtain the homes of their choice, delaying home ownership and extending their current shelter costs. It is appropriate, therefore, to avoid these added costs to all three categories of program participants and provide a different maximum interest rate for graduated payment mortgages. This interest rate differential will be maintained as long as market conditions required the increased yield for graduated payment mortgage loans.

These regulatory amendments have also been reviewed under the provisions of Executive Order 12291. The VA finds that they are not "major rules" as defined in that Order. The existing process of informal consultation among representatives within the Executive Office of the President, OMB, the VA and the Department of Housing and Urban Development has been determined to be adequate to satisfy the intent of this Executive Order for this category of regulations. This alternative consultation process permits timely rate adjustments with minimal risk of premature disclosure. In summary, this consultation process will fulfill the intent of the Executive Order while still permitting compliance with statutory responsibilities for timely rate adjustments and a stable flow of mortgage credit at rates consistent with the market.

This final regulations come within exceptions to the general VA policy of prior publication of proposed rules as contained in 38 CFR 1.12. The publication of notice of a regulatory change in the VA maximum interest rates for VA guaranteed, insured or direct loans would deny veterans the benefit of lower interest rates pending the final rule publication date which would necessarily be more than 30 days after publication in proposed form. Accordingly, it has been determined that publication of proposed regulations prior to publication of final regulations is impracticable, unnecessary, and contrary to the public interest.

(Catalog of Federal Domestic Assistance Program numbers, 64.113, 64.114, and 64.119)

These regulations are adopted under authority granted to the Administrator by sections 210(c), 1803(c)(1), 1811(d)(1) and 1819 (f) and (g) of title 38, United States Code and delegated to the undersigned by 38 CFR 2.6(b)(3). The regulations are clearly within that statutory authority and are consistent with Congressional intent.

These decreases are accomplished by amending §§ 36.4212(a) (1), (2), and (3), 36.4311, and 36.4503(a), title 38, Code of Federal Regulations.

List of Subjects in 38 CFR Part 36

Condominiums, Handicapped, Housing, Loan programs—housing and community development, Manufactured Homes, Veterans.

Approved: May 6, 1983.

By direction of the Administrator.

Dorothy L. Starbuck,

Chief Benefits Director.

PART 36—LOAN GUARANTY

The Veterans Administration is amending 38 CFR Part 36 as follows:

1. In § 36.4212, paragraph (a) is revised to read as follows:

§ 36.4212 Interest rates and late charges.

(a) The interest rate charged the borrower on a loan guaranteed or insured pursuant to 38 U.S.C. 1819 may not exceed the following maxima except on loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the Veterans Administration prior to the respective effective date: (38 U.S.C. 1819(f))

(1) Effective May 9, 1983, 13½ percent simple interest per annum for a loan which finances the purchase of a manufactured home unit only.

VOL
48
ISS
97
MAY
18
1983
UMI

(2) Effective May 9, 1983, 13 percent simple interest per annum for a loan which finances the purchase of a lot only and the cost of necessary site preparation, if any.

(3) Effective May 9, 1983, 13 percent simple interest per annum for a loan which will finance the simultaneous acquisition of a manufactured home and a lot and/or the site preparation necessary to make a lot acceptable as the site for the manufactured home.

* * * * *

2. Section 36.4311 is revised as follows:

§ 36.4311 Interest rates.

(a) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the Veterans Administration which specify an interest rate in excess of 11½ per centum per annum, effective May 9, 1983, the interest rate on any home or condominium loan, other than a graduated payment mortgage loan, guaranteed or insured wholly or in part on or after such date may not exceed 11½ per centum per annum on the unpaid principal balance. (38 U.S.C. 1803(c)(1))

(b) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the Veterans Administration which specify an interest rate in excess of 11¾ per centum per annum, effective May 9, 1983, the interest rate of any graduated payment mortgage loan guaranteed or insured wholly or in part on or after such date may not exceed 11¾ per centum per annum. (38 U.S.C. 1803(c)(1)).

(c) Effective October 13, 1982, the interest rate on any loan solely for energy conservation improvements or other alterations, improvements or repairs which is guaranteed or insured wholly or in part on or after such date may not exceed 13 per centum per annum on the unpaid principal balance. (38 U.S.C. 1803(c)(1))

(d) Interest in excess of the rate reported by the lender when requesting evidence of guaranty or insurance shall not be payable on any advance, or in the event of any delinquency or default: *Provided*, That a late charge not in excess of an amount equal to 4 percent on any installment paid more than 15 days after due date shall not be considered a violation of this limitation.

(e) Refinancing loans for the purpose of an interest rate reduction (38 U.S.C. 1810(a)(8)) may specify an interest rate in excess of the rate specified in paragraphs (a), (b) and (c) of this section provided the interest rate of the refinancing loan is less than the interest rate of the current Veterans Administration loan being refinanced. (38 U.S.C. 1803(c)(1) and 1810(c))

3. In § 36.4503, paragraph (a) is revised to read as follows:

§ 36.4503 Amount and amortization.

(a) The original principal amount of any loan made on or after October 1, 1980, shall not exceed an amount which bears the same ratio to $33,000 as the amount of the guaranty to which the veteran is enrolled under 38 U.S.C. 1810 at the time the loan is made bears to $27,500. This limitation shall not preclude the making of advances, otherwise proper, subsequent to the making of the loan pursuant to the provisions of § 36.4511. Except as to home improvement loans, loans made by the Veterans Administration shall bear interest at the rate of 11½ percent per annum. Loans solely for the purpose of energy conservation improvements or other alterations, improvements, or repairs shall bear interest at the rate of 13 percent per annum. (38 U.S.C. 1811(d)(1) and (2)(A))

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL 2339-8]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: The EPA is approving a Marion County, Indiana, open burning regulation as a revision to the Indiana State Implementation Plan (SIP) for total suspended particulates (TSP). This regulation will decrease TSP levels in Marion County and will assist in attaining the TSP National Ambient Air Quality Standards (NAAQS) there.

EFFECTIVE DATE: This final rulemaking becomes effective on June 17, 1983.

ADDRESSES: Copies of this revision to the Indiana SIP are available for inspection at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408.

Copies of the SIP revision, the public comment on the notice of proposed rulemaking and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Robert B. Miller at (312) 886-6031 before visiting the Region V Office).

Environmental Protection Agency, Region V, Air Programs Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

Indiana Air Pollution Control Division, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana 46206

FOR FURTHER INFORMATION CONTACT: Robert B. Miller (312) 886-6031.

SUPPLEMENTARY INFORMATION: Under Section 107 of the Clean Air Act (Act), EPA has designated certain areas in each State, including portions of Marion County, Indiana, as not attaining the NAAQS for TSP.[1] See 43 FR 8962 (March 3, 1978) and 43 FR 45993 (October 5, 1978). For these areas, Part D of the Act requires that the State revise its SIP to provide for attaining the primary NAAQS by December 31, 1982. These SIP revisions must also provide for attaining the secondary NAAQS as soon as practicable. The requirements for an approvable SIP are described in a "General Preamble" for Part D rulemakings published at 44 FR 20372 (April 4, 1979), 44 FR 36583 (July 2, 1979), 44 FR 50371 (August 28, 1979), 44 FR 53761 (September 17, 1979), and 44 FR 67182 (November 23, 1979).

In response to Part D of the Act, on February 11, 1980, Indiana submitted its Marion County TSP SIP strategy to EPA. A supplement was submitted on October 28, 1981. The Marion County plan was based on requiring reasonably available control technology (RACT) to be placed on all existing industrial sources and studying various nontraditional fugitive dust control methods to bring Marion County into attainment. EPA conditionally approved the plan on July 16, 1982 (47 FR 30972), except for the coke battery regulation.

In its final rulemaking, EPA noted that Indiana had submitted a Marion County open burning regulation on April 16, 1982, and that EPA would rulemake on it and the coke battery regulation in subsequent **Federal Register** notices. An amended version of the Marion County open burning regulation was submitted on August 25, 1982. EPA proposed the August 25, 1982, regulation for public comment on September 9, 1982 (47 FR 39696). One comment was received in response to this proposal. After reviewing the regulation and the comment received, EPA today is approving the August 25, 1982 Marion County open burning regulation.

EPA is approving the Marion County open burning regulation as a revision to the SIP because this regulation should lead to a reduction in particulate levels in Marion County over those levels predicted to be emitted under the present SIP. It should also lead to reductions in the hydrocarbon levels (precursors to ozone) and the carbon monoxide levels. While EPA conditionally approved the Marion County TSP plan without an open burning regulation as meeting the requirements of Part D of the Act, inclusion of an open burning regulation will assist Indiana in its goal of attaining the NAAQS in Marion County. EPA's approval today of the Marion County regulation supplements but does not replace the currently approved State regulation (325 IAC Article 4-1, which was formerly APC 2). The general State regulation will remain a part of the Marion County SIP. EPA will recognize variances to these regulations given by the State or the County only if they are submitted and approved as revisions to the SIP.

In response to the September 9, 1982, notice of proposed rulemaking (NPR), EPA received one comment from the State of Connecticut. The comment noted that, in Connecticut, no trash burning is allowed for homeowners and brush burning is severely restricted. The commenter believed that the Marion County open burning regulation is a relaxation from the existing SIP and wished to know what additional restrictions are being placed on Marion County sources in order to compensate for this relaxation.

Contrary to the commenter's contention, the Marion County open burning regulation is more stringent than the statewide regulation, 325 IAC Article 4-1, which was the only approved SIP regulation in Marion County. (As stated earlier, 325 IAC Article 4-1 remains applicable in Marion County.) Therefore, the SIP is not being relaxed.

EPA has previously reviewed Indiana's total TSP package of regulations for Marion County in relation to the Part D TSP SIP. Indiana's strategy is based on RACT plus further studies of nontraditional sources. EPA approved this package as sufficient on July 16, 1982. Because the new Marion County regulation is more stringent, today's action on this regulation should lead to more expeditious attainment of the NAAQS in Marion County.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by 60 days from today. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

Note.—Incorporation by reference of the State Implementation Plan for the State of Indiana was approval by the Director of the Federal Register on July 1, 1982.

This notice is issued under authority of Sections 110 and 172 of the Clean air Act, as amended (42 U.S.C. 7410 and 7502.

Dated: May 11, 1983.

Lee L. Verstandig,

Acting Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Title 40 of the Code of Federal Regulations, Chapter I, Part 52 is amended as follows:

BILLING CODE 6560-50-M

---

40 CFR Part 52

[A-5-FRL 2323-4]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: The EPA announces final rulemaking action on revisions to the Indiana State Implementation Plan (SIP) for ozone and total suspended particulate (TSP). The revision pertains to source specific emission limitations contained in operating permits which have been issued by the State to Jeffboat, Incorporated, located in Jeffersonville, Indiana. The operating permits set forth specific limitations on the total amount of hydrocarbon [also known as volatile organic compound (VOC)] and particulate emissions from certain paint spraying and metal cleaning operations at Jeffboat, Incorporated. The intent of today's rulemaking is to incorporate these emission limitations into the State's SIP.

EFFECTIVE DATE: This final rulemaking becomes effective on June 17, 1983.

ADDRESSES: Copies of this revision to the Indiana SIP are available for inspection at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408.

Copies of the SIP revision, public comments on the notice of proposed rulemaking and other materials relating to this rulemaking are available for inspection at the following addresses:

Environmental Protection Agency, Region V, Air Programs Branch 230 South Dearborn Street, Chicago, Illinois 60604

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

Indiana Air Pollution Control Division, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana 46206

FOR FURTHER INFORMATION CONTACT: Sharon Reinders (312) 886-6034.

SUPPLEMENTARY INFORMATION:

Background

On November 24, 1981, the Indiana Air Pollution Control Board, submitted a revision to the Indiana SIP. The revision is in the form of two operating permits for Jeffboat, Incorporated, located in Jeffersonville, Indiana, a designated nonattainment area for the pollutants ozone and TSP. The permits set forth the following emission limitations.

Source	Operation	Pollutant	Emission limit
Plate shop	Paint spraying	Ozone [1]	110 lbs/hr, 2600 lbs/day, 340 t/yr.
	Metal Cleaning	TSP	5 lbs/hr, 15 t/yr.
Structural shop	Paint spraying	Ozone	86 lbs/hr, 2100 lbs/day, 274 t/yr.
	Metal Cleaning	TSP	14 lbs/hr, 43 t/yr.

[1] Permit limits pertain to volatile organic compounds

As shown above, VOC emissions from paint spraying are limited to 198 pounds per hour, 4700 pounds per day, and 614 tons per year. TSP emissions from metal cleaning and spraying are limited to 19 pounds per hour and 58 tons per year. The technical support developed by the

[1] The primary TSP NAAQS is violated when, in a year, either: (1) The geometric mean value of a site's TSP concentrations exceeds 75 micrograms per cubic meter of air (75 μg/m³) (the annual standard), or (2) the maximum 24-hour concentration of TSP exceeds 260 μg/m³ more than once (the 24-hour primary standard). The secondary TSP standard is violated when, in a year, the maximum 24-hour concentration exceeds 150 μg/m³ more than once

VOL 48 ISS 97 MAY 18 1983 UMI

State for the permits shows that these limitations represent status quo emissions.

On June 22, 1982, EPA announced direct final rulemaking action to incorporate the emission limitations contained in the permits into Indiana's SIP. EPA was subsequently advised that the Air Pollution Control District of Jefferson County, Louisville, Kentucky, wished to comment on the SIP revision. Therefore, on November 10, 1982, EPA withdrew its direct approval and began a new rulemaking action. (47 FR 50862 and 47 FR 50928). This new rulemaking action proposed to approve the revision and established a 30-day public comment period to December 10, 1982.

EPA's rationale for approving the limitations is that, under the present SIP, VOC emissions from marine vessel operations at facilities such as Jeffboat, Inc. are exempt from the control requirements of 325 Indiana Administrative Code (IAC) Article 8–2 and the federally approved Indiana SIP. Thus, "capping" the hourly, daily, and annual emissions is acceptable. With respect to TSP, EPA agrees with the State's technical analysis that the current SIP allows higher TSP emissions than the permit limitations. Thus, "capping" hourly and annual TSP emissions is also acceptable.

Public Comments

During the 30-day public comment period, EPA received one comment.

The commentor asked the following questions regarding EPA's proposed approval of the operating permits for Jeffboat, Inc. and requested that EPA include the information in response to the questions in the final approval action. Each question raised by the commentor and EPA's response are presented below.

Comment

The commentor requested that EPA identify which Reasonably Available Control Technology (RACT) Control Technique Guideline (CTG) has been applied in the determination of approval.

Response

EPA has not issued a CTG for the control of VOC emissions from the exterior surface coating of marine vessels.

Comment

The commentor requested that EPA identify what exemptions, if any, that were granted in the approval process and why.

Response

No exemptions from the SIP are being granted. Rule 325 IAC Article 8–2, which is included in Indiana's SIP strategy to control VOC emissions from surface coating operations, contains an exemption for surface coating the exterior of marine vessels. The State included this exemption in its SIP in accordance with EPA guidance. (See Guidance to State and Local Agencies in Preparing Regulations to Control VOC From 10 Stationary Source Categories, EPA–450/2–79–004). The guidance document concludes that surface coating the exterior of marine vessels may be exempted from control requirements because, "Exterior coatings on . . . marine vessels are high performance coatings which are applied under conditions that are not easily controlled". Thus, by issuing these operating permits, the State is limiting the hourly, daily, and annual VOC emissions from a source which was previously exempt from control requirements in the existing SIP.

Comment

The commentor requested that EPA identify the current emission rates, in RACT Control Technique Guideline (CTG) equivalent units, prior to the issuance of permits and the new emission rate, in RACT CTG equivalent units, being approved.

Response

This comment is not relevant because it refers to a RACT CTG which does not exist. However, as stated earlier, the limitations contained in the permits reflect status quo emissions. By issuing these permits, the State is setting enforceable VOC emissions limitation for a source which previously had no enforceable limit.

Comment

The commentor requested that EPA identify the compliance schedule to be implemented in achieving RACT control.

Response

The operating permits were issued by Indiana on April 21, 1981, and were effective on that date. With respect to VOC, EPA makes no judgment on whether the emission limitations contained in these permits represents RACT-level of control. The State of Indiana is required to include a schedule in its 1982 Ozone SIP revision for the application of RACT control to major non-CTG sources. EPA is reviewing the schedule as a part of its review of Indiana's 1982 Ozone SIP revision. EPA recently proposed a determination on February 3, 1983 (48 FR 5106).

Comment

The commenter requested that EPA identify the specific EPA approved Indiana SIP regulation being used to enforce the permit(s).

Response

Regulation 325 IAC Article 2 requires the State to submit all discretionary actions, such as operating permits, to EPA as revisions to the SIP. EPA reviews each submittal from the State and, if items vary from the SIP, publishes notices of rulemaking actions in the **Federal Register** disapproving or approving the State's action as a SIP revision.

As noted in the Background section of this notice, the emission limitations contained in the operating permits for Jeffboat, Inc. vary from the SIP. The operating permits were issued on April 21, 1981 and, thus, are enforceable by the State. By incorporating the emission limitations into the SIP, the limitations also become enforceable at the Federal level.

In conclusion, having reviewed both the information submitted by the State and the public comment received, EPA today is approving the VOC and TSP emission limits for Jeffboat, Inc. as submitted by the State on November 24, 1981.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See Sec. 307(b)(2).)

40 CFR Part 52

[A–6–FRL 2336–4]

Approval and Promulgation of Implementation Plans; Oklahoma Regulation 1.4 Air Resources Management-Permits Required and Major Sources-Nonattainment Areas

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: This notice approves two parts of Regulation 1.4's revision to the Oklahoma State Implementation Plan. The revision to Air Resources Management-Permits Required (1.4.1–1.4.3) and Major Sources-Nonattainment Areas (1.4.5) was submitted by the Governor on April 12, 1982. The notice proposing approval was published in the **Federal Register** on November 3, 1982, at 47 FR 49872, and no comments were received. The section on Prevention of Significant Deterioration (PSD) Requirements (1.4.4) is being addressed in a separate **Federal Register** package.

The revision fulfills the provisions of Section 173 of the Act by incorporating the Permit requirements into the regulation. It also sets forth legally enforceable procedures for the review of new sources and modifications which would locate in a nonattainment area.

EFFECTIVE DATE: Effective on June 17, 1983.

ADDRESSES: Incorporation by reference material is available for inspection during normal business hours at the following locations:

FOR FURTHER INFORMATION CONTACT:

Kathryn M. Griffith, State Implementation Plan Section, Environmental Protection Agency, Region 6, Air and Waste Management Division, Air Branch, 1201 Elm Street, Dallas, Texas 75270, (214) 767–9853.

SUPPLEMENTARY INFORMATION: On April 12, 1982, the Governor of Oklahoma submitted a SIP revision to Regulation 1.4. EPA reviewed the State's submittal and developed an evaluation report [1], which is based on the minimum criteria established in 40 CFR 51.18 Review of new sources and modificatons. This evaluation report is available for inspection by interested parties during normal business hours at the EPA Region 6 Office and the other addresses listed above.

Regulation 1.4's revision and the letter of commitment from the State dated April 30, 1982, adequately provides for the preconstruction review of a major new source or major modification which would locate in a nonattainment area. The State committed that:

1. Source proposing to locate in an attainment area where monitoring data indicates the area is in fact nonattainment (1.4.5(c)(1)(C)(ii)), will be required to apply LAER, demonstrate that all other sources are in compliance, and offset:

2. Section 1.4.5(d)(2) is interpreted to mean that only secondary emissions are exempt from the conditions of 1.4.5(c)(1)(C)(vi) and 1.4.5(e)(1) (A), (B) and (C) and not the source as a totality;

3. Copies of the public notification for permits will be sent to EPA and to all other local air pollution control agencies as required by 40 CFR 51.18(h)(4); and

4. Whenever the word "enforceable" appears in a definition (1.4.5(b)(1–20)), they will interpret it to include "federally enforceable."

On August 7, 1980, at 45 FR 52728, EPA noted that many Part D SIP revisions based their attainment demonstrations on the actual emissions of the sources in a nonattainment area rather than the sources allowable emissions. This means that to be consistent with RFP, sources must reduce their actual, rather than their allowable, emissions. Otherwise, sources could claim credit for offsets in situations where the offset would actually interfere with RFP.

On December 9, 1982, the State submitted a letter of clarification stating that because they use actual emissions to demonstrate reasonable further progress (RFP) towards attainment they also use actual emissions to determine credit for emission reductions. In the 1979 SIP, EPA approved Section 1.4.5(e)(1)(D)(ii) which enables a source to use the total allowable emissions in the region for offsets and to represent RFP toward attainment. But, under the States RFP reporting section (page 4–138, 1979 SIP), it states that "The report shall contain an updated emission inventory on an actual ton-per-year basis for the entire county or nonattainment area."

On August 17, 1982, the United States Court of Appeals for the District of Columbia Circuit held that EPA may not use the plantwide definition of source in programs regulating growth in nonattainment areas in the *Natural Resources Defense Council* vs. *Gorsuch* ruling, 685 F.2d 71 D.C. Cir. 1982. Oklahoma's revision to Regulation 1.4 retains the dual definition of source and therefore is not affected by the decision.

EPA is approving Regulation 1.4's revision because it fulfills the provisions of Section 173 of the Act and adequately provides for the preconstruction review of a major new source or major modification which would locate in a nonattainment area.

EPA is taking no action on Section 1.4.5(e)(1) (D) and (E), which was fully approved on November 28, 1980 (45 FR 79051).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 18, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See Sec. 307(b)(2).)

This notice of proposed approval is issued under the authority of Section 110 of the Clean Air Act as amended, 42 U.S.C. 7410.

Approval and Promulgation of State Implementation Plans; Revision to Oregon State Implementation Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: By this Notice EPA approves the Oregon State Implementation Plan (SIP) for lead and the Oregon ambient air quality standard for lead. These revisions were adopted to satisfy Sections 110 and 116, respectively, of the Clean Air Act, as amended in 1977 (hereinafter referred to as the Act).

EFFECTIVE DATE: This action will be effective on July 18, 1983, unless notice is received before June 17, 1983, that someone wishes to submit adverse or critical comments. If such notice is received, EPA will open a formal 30-day comment period on this action.

ADDRESSES: Copies of the materials submitted to EPA may be examined during normal business hours at:

Central Docket Section (10A–83–3), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

State of Oregon, Department of Environmental Quality, 522 S.W. Fifth, Yeon Building, Portland, Oregon 97207.

Copy of the State's submittal may be examined at: The Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, D.C.

Comments should be addressed to: Laurie M. Kral, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Richard F. White, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, M/S 532, Seattle, Washington 98101, Telephone: (206) 442–4016, FTS: 399–4016.

SUPPLEMENTARY INFORMATION: On December 3, 1982 the State of Oregon Department of Environmental Quality (DEQ) submitted a draft lead SIP for EPA's review prior to public hearing and adoption. EPA's review comments are contained in a technical evaluation document, which is available at the addresses shown earlier.

EPA provided DEQ with written comments, which were considered at the public hearing on January 14, 1983. The SIP was adopted with all requested corrections on January 14, 1983 and submitted to EPA on January 24, 1983.

Technical Evaluation

Lead SIP

The requirements for an approvable lead SIP are contained in 40 CFR Part 51 Subpart E. As described in the technical evaluation document, the Oregon SIP satisfies all requirements for standard attainment demonstration, emission data and projections and air quality data and projections. In addition, the SIP provides for statewide review of all new lead sources under its Air Contaminant Discharge Permit rules (OAR 340–20–140 to 185) previously approved by EPA (47 FR 35191).

Because the standard violations are caused by mobile source emissions, the only control strategy, the Federal program for reduction of lead in gasoline, demonstrates attainment of the standard by the end of 1983. Past violations of the lead standards were recorded in the vicinity of the Gould Battery facility, in Portland, which has since closed. The site is being cleared and covered and will be monitored to assure continued attainment. The other major point source, Bergsoe Metal Corporation, a new secondary lead smelter in St. Helens, Oregon, has not caused and is not expected to cause violations of the ambient standard. This facility was reviewed and approved by EPA in 1979 under provisions of the Prevention of Significant Deterioration regulations, which call for use of best available control technology (BACT).

Ambient Air Quality Standard

In conjunction with developing a lead SIP which demonstrates attainment of the National Ambient Air Quality Standard for lead, DEQ revised their ambient air standard from 3.0 ug/m^3 per calendar month to 1.5 ug/m^3 average per calendar quarter. By this action DEQ's standard is now consistent with the National standard.

Air Quality Monitoring

The SIP also contains a description of the current statewide lead monitoring network. Discussions between EPA and DEQ are now underway to agree on a network to meet the requirements of 40 CFR Part 58 (Ambient Air Quality Surveillance). Because the network has not yet been finalized and submitted, EPA will take separate action on it at a later date.

Final EPA Action

Based on evaluation of DEQ's submittal, the Administrator has determined that the Oregon lead SIP revision meets the requirements of the Clean Air Act and 40 CFR Part 51. Accordingly, this revision is approved as a revision to the Oregon SIP.

Pursuant to the provisions of 5 U.S.C. Section 605(b), the Administrator has certified that SIP approvals under Sections 110 and 172 of the Clean Air Act will not have a significant impact on a substantial number of small entities (46 FR 8709, January 27, 1981). This action constitutes a SIP approval under Section 110 within the terms of the January 27, 1981 certification.

Under Executive Order 12291, EPA must judge whether or not a regulation is "major" and therefore subject to the requirements of regulatory impact analysis. This regulation is not judged to be major, since it merely approves actions taken by the State and does not establish any new requirements.

The Office of Management and Budget has exempted this rule from the

requirements of Section 3 of Executive Order 12291.

This notice of final rulemaking is issued under the authority of Section 110 and 116 of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7610).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydorcarbons.

Dated: May 10, 1983.

Lee L. Verstandig,

Acting Administrator.

Note.—Incorporation by reference of the Implementation Plan for the State of Oregon was approved by the Director of the Office of Federal Register in July 1982.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40 Code of Federal Regulations is amended as follows:

Subpart MM—Oregon

In § 52.1970, paragraph (c)(60) is added as follows:

§ 52.1970 Identification of plan.

* * * * *

(c) * * *

(60) On January 24, 1983 the State of Oregon Department of Environmental Quality submitted a revision to add a lead strategy to the Oregon Implementation Plan and revise the State lead ambient air quality standard to agree with the Federal standard.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611, 672, and 675

[Docket No. 30509–77]

Foreign Fishing, Groundfish of Gulf of Alaska, and Groundfish of Bering Sea and Aleutian Islands Area

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Rule-related notice; inseason adjustment.

SUMMARY: This document announces the apportionment of amounts of Alaska groundfish that were eligible in April 1983 for apportionment to the total allowable level of foreign fishing and to the domestic annual harvest, under provisions of the fishery management plans for Groundfish of the Bering Sea and Aleutian Islands Area and for the Groundfish of the Gulf of Alaska. Apportionment is prescribed by regulations implementing those FMPs. The intended effect of this action is to assure optimum use of groundfish resources by allowing the foreign and domestic fisheries to proceed without interruption.

EFFECTIVE DATE: May 12, 1983.

FOR FURTHER INFORMATION CONTACT: Robert W. McVey (Director, Alaska Region, National Marine Fisheries Service), 907–586–7221; or Janet Smoker (Fishery Biologist), 907–586–7230.

SUPPLEMENTARY INFORMATION:

Background

Optimum yields (OY) for various groundfish species are established by the fishery management plan (FMP) for the Groundfish of the Bering Sea and Aleutian Islands Area and by the FMP for the Groundfish of the Gulf of Alaska. The FMPs were developed under the Magnuson Fishery Conservation and Management Act, and are implemented by rules appearing at 50 CFR 611.92 and 611.93 and 50 CFR 672 and 675. The OYs are apportioned initially to domestic annual harvest (DAH), reserve, and total allowable level of foreign fishing (TALFF). Each reserve amount, in turn, is to be apportioned to DAH and/or TALFF during the fishing year, under 50 CFR 611.92(c), 611.93(b), 672.20(c), and 675.20(b). In addition, surplus amounts of the three components of DAH (DAP—domestic processed fish, DNP—fish retained for bait or consumption, and JVP—foreign processed fish) may be apportioned to TALFF during the fishing year under those same regulations. The Director, Alaska Region, National Marine Fisheries Service, announces the apportionments described below under these authorities.

The first scheduled date for the apportionment of reserves in the Bering Sea and Aleutian Islands Area was in February 1983. At that time all reserves were retained as explained in a **Federal Register** notice published on March 15, 1983 (48 FR 10846). Amounts eligible at that time are added to the amounts eligible for the scheduled April 1983 apportionment.

This action apportions certain Bering Sea, Aleutian Islands, and Gulf of Alaska reserve amounts that became eligible for apportionment in April 1983.

1. *Bering Sea and Aleutian Islands.* Although there has been little activity to-date, U.S. fisheries in this area are expected to continue expanding in 1983. Expansion of shoreside and floating processing capacity is expected to facilitate processing of DAP amounts. The execution of planned joint ventures is anticipated to result in harvests exceeding some JVP amounts. All DNP amounts are expected to be taken.

DAP: The stated capacity and intentions of domestic processors indicate the DAP amounts of sablefish in the Aleutian Islands Area, Pacific ocean perch, and Pacific cod may be insufficient. DAP amounts specified for all other species appear to be adequate.

DNP: DNP amounts for all species appear sufficient for projected U.S. harvests.

JVP: The stated intentions of U.S. fishermen planning to deliver to foreign processors indicate that JVP amounts of pollock, yellowfin sole, Pacific cod, Atka mackerel, turbots, and other rockfish are insufficient. JVP amounts specified for all other species appear to be adequate.

Reserves: Reserves of sablefish in the Aleutian Islands area and of pollock, Pacific ocean perch, yellowfin sole, Pacific cod and Atka mackerel are being retained to supplement DAP and JVP in subsequent apportionments if those amounts are insufficient as discussed above. The available reserves (50%) of all the other species are apportioned to TALFF (see Summary Table of Apportionments to TALFF). The remainders of the turbot and other rockfish reserves after this apportionment are sufficient to supplement any future shortfall in the JVP amounts of those species.

2. *Gulf of Alaska.* U.S. fisheries have already harvested large amounts of pollock in the Central Regulatory Area of the Gulf of Alaska. Additional activity by joint ventures and floating processors is expected in all three regulatory areas as are operations of shoreside processors. Apportionment of reserves is addressed by individual regulatory area.

Western Regulatory Area

DAP: The stated capacity and intentions of domestic processors indicate the DAP amounts of Pacific cod are insufficient. DAP amounts for all other species appear to be adequate.

DNP: The DNP amount for Pacific cod appears sufficient for projected U.S. harvests.

JVP: The stated intentions of U.S. fishermen planning to deliver to foreign processors indicate that JVP amounts of pollock, Pacific cod, and Atka mackerel may be insufficient. JVP amounts for all other species appear to be adequate.

Reserves: Reserves of pollock, Pacific cod, and Atka mackerel are being retained to supplement JVP in subsequent apportionments if the JVP

VOL 48 ISS 97 MY 18 1983 UMI

amounts are insufficient as discussed above. The available reserves (40%) for all other species are apportioned to TALFF (see Summary Table of Apportionments to TALFF).

Central Regulatory Area

DAP: The DAP amounts of all species appear sufficient for projected needs of U.S. processing

DNP: The DNP amount for Pacific cod appears sufficient for projected U.S. harvests.

JVP: U.S. fishing effort in joint ventures continues and large amounts of fish, mostly pollock, are being harvested. Pollock catches have far exceeded the JVP apportionment of pollock. JVP amounts for all other species appear sufficient.

Reserves: For reasons discussed above, the entire pollock reserve is allocated to JVP. For all other species, the available reserves (40%) are reapportioned to TALFF (see Summary Table of Apportionments to TALFF).

Eastern Regulatory Area

DAP: The DAP amounts of all species appear sufficient. A possible exception would be deliveries to processors in Seward and Cordova, Alaska, of sablefish caught in the Eastern Gulf of Alaska. Utilization of those processing facilities may lead to expanded U.S. fishing areas and effort in the Eastern Gulf.

DNP: The Pacific cod DNP amount appears sufficient for projected U.S. harvests.

JVP: A joint-venture longline fishery for sablefish (tentatively scheduled to begin in August) intends to catch sablefish in excess of the current JVP amount. JVP amounts for all other species appear to be adequate.

Reserves: Reserves of sablefish are being retained to supplement JVP. The reserves retained are also sufficient to provide for any DAH increases that may occur through landings in Seward or Cordova of sablefish caught in the Eastern Gulf of Alaska. For all other species, the available reserves (40%) are apportioned to TALFF (see Summary Table of Apportionments to TALFF).

Gulf of Alaska-wide

DAP: Present DAP amounts for all four Gulf-wide species appear to be sufficient for anticipated U.S. processing.

DNP: The DNP amount of "other species" appear sufficient for anticipated U.S. fisheries.

JVP: The JVP amounts initially specified for squid, thornyheads, and "other species" appear to be sufficient for projected needs of the U.S. fisheries. The amount initially specified for rockfish may be too low in view of an anticipated joint venture on rockfish; however, the total DAH appears sufficient to provide for the joint venture and domestic processed catches of rockfish combined.

Reserves: The available reserves (40%) for all four Gulf-wide species is apportioned to TALFF (see Summary Table of Apportionments to TALFF).

3. SUMMARY TABLE OF APPORTIONMENTS TO TALFF

(In metric tons)

Comments and Responses

In accordance with 50 CFR 611.92(c), 611.93(b), 672.20(c), and 675.20(b), aggregated reports on U.S. catches of Alaskan groundfish and the processing of those groundfish were available for public inspection. In addition, those provisions afforded the public an opportunity to submit timely comments on the extent to which U.S. fishermen will harvest and the extent to which U.S. processors will process Alaska groundfish. Three comments were received during the comment periods provided.

Comment: Available reserves of Pacific cod in the Central and Eastern Regulatory Areas of the Gulf of Alaska and of sablefish in the Western and Central Regulatory Areas of the Gulf of Alaska and in the Bering Sea and Aleutian Islands are excess to the needs of domestic fishermen and should be apportioned to TALFF.

Comment: Available reserves of sablefish and Pacific ocean perch in the Bering Sea and Aleutian Islands and of sablefish in the Gulf of Alaska should be apportioned to TALFF.

Response: Forty percent of the initial reserves of Pacific cod in the Central and Eastern Regulatory Areas of the Gulf of Alaska are apportioned to TALFF at this time. Forty percent of the initial reserves of sablefish in the Western and Central Regulatory Areas of the Gulf of Alaska are also apportioned to TALFF. Because of the uncertainty that currently specified DAH amounts are sufficient for Pacific ocean perch in both the Bering Sea and Aleutian Island areas and for sablefish in the Eastern Regulatory Area of the Gulf of Alaska and Aleutian area, reserves of these species for both areas are being retained at this time.

Comment: Available reserves of pollock in the Central Gulf Regulatory Area should be released to TALFF as soon as possible.

Response: Joint-venture catches of pollock in the Central Gulf Regulatory Area have already far exceeded the JVP apportionment and therefore the entire reserves must be apportioned to JVP.

Classification

This action is required by 50 CFR 611.92(c), 611.93(b), 672.20(c) and 675.20(b), and complies with E.O. 12291.

The apportionment to TALFF of reserve groundfish is announced in this notice in lieu of an amendment to the "TALFF table," which was formerly codified as Appendix 1 to 50 CFR 611.20, but which was removed by a rule appearing at 47 FR 44264 (October 7, 1982). The apportionment of groundfish reserve to DAH is announced in this document without amendment to 50 CFR § 675.20, Table 1, since that Table specifies initial rather than current DAH, DAP, JVP, DNP, reserve, and TALFF specifications (as of January 1 for the 1983 fishing year).

In view of the prior notice provided by the underlying regulation regarding the dates after which apportionment of reserves and reassessment of DAH to occur, together with the need to avoid disruption of U.S. and foreign fisheries and the obligation to afford a reasonable opportunity to achieve OY, the Agency has determined that to delay the effectiveness of this rule would be impracticable, unnecessary, and contrary to the public interest.

(16 U.S.C. 1801 *et seq.*)

Dated: May 11, 1983.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries Resources Management, National Marine Fisheries Service.

[FR Doc. 83-13204 Filed 5-13-83; 3:57 pm]

BILLING CODE 3510-22-M

50 CFR Part 662

[Docket No. 30510-80]

Northern Anchovy Fishery

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Emergency rule.

SUMMARY: The Secretary of Commerce issues emergency regulations amending the Northern Anchovy Fishery Management Plan and its implementing regulations. This emergency rulemaking (1) eliminates the minimum size limit for anchovies landed for reduction purposes, and (2) prescribes a reserve of the reduction harvest quota that would be withheld if scientific evidence demonstrates that the original biomass estimate was too high. The elimination of the minimum size limit will alleviate the severe economic hardship imposed on the reduction fishery in its spring fishery caused by having to curtail catches of anchovies less than 5 inches in length. The reserve quota procedures will provide an additional measure of protection to the anchovy biomass by providing a mechanism to correct any significant errors in biomass determinations identified after the establishment of the yearly quota.

EFFECTIVE DATE: Amendment 4 to the FMP and its implementing regulations are effective May 16, 1983, inspection with the Office of the Federal Register and will remain effective until August 15, 1983.

ADDRESS: Floyd S. Anders, Jr., Acting Director, Southwest Region, National Marine Fisheries Service (NMFS), 300 South Ferry Street, Room 2016, Terminal Island, California 90731.

FOR FURTHER INFORMATION CONTACT: Floyd S. Anders, Jr., 213-548-2575.

SUPPLEMENTARY INFORMATION: The Northern Anchovy Fishery Management Plan (FMP) was prepared by the Pacific Fishery Management Council (Council), was approved by the Secretary of Commerce on July 13, 1978, and implementing regulations were effective on September 15, 1978 (43 FR 40868). A basic purpose of Amendment 4 to the FMP is to remove the minimum size limit prohibiting the landing, for reduction purposes, of anchovies less than five inches in total length, with a 15 percent tolerance for undersized fish. Proposed regulations and the rationale for implementing Amendment 4 were published in the **Federal Register** on April 25, 1983 (48 FR 17627). When it approved Amendment 4 at its November 17-18, 1972 meeting, the Council intended and was given assurance that implementing regulations would be effective in time for the spring fishing season. The spring reduction fishery occurs from April 1 through June 30. In the last four years, an average of nearly 80 percent of the annual reduction landings were made during the spring fishing season. Because of administrative delay, the regulations implementing Amendment 4 were not published by April 1.

Currently, the northern anchovy population off California is apparently composed predominantly of fish less than five inches in total length. Until the present length restriction is changed as contemplated by Amendment 4, the reduction fishery cannot operate in the spring 1983 fishing season without severely limiting its catch. The resulting conflict between the actual and intended regulations is creating a severe economic hardship for the anchovy reduction fishery. This problem will be resolved by implementing portions of Amendment 4 regulations on an emergency basis as provided for by section 305(e)(1) of the Magnuson Fishery Conservation and Management Act (Magnuson Act). Due to uncertainty over the accuracy of the official biomass estimate on which harvest quotas are based, for the 1983-84 season, this emergency regulation would reserve half of the total annual reduction quota for later release if experience in harvesting the first part of the quota verifies the original biomass estimate. The second half of the reduction quota would not be released if scientific evidence of anchovy abundance, submitted to the Director, Southwest Region, NMFS, indicated that the spawning biomass would fall below one million tons (expressed in terms of a larva census or equivalent) if continued harvest in U.S. waters were allowed.

Classification

The NOAA Assistant Administrator for Fisheries has determined that this amendment to the FMP and the proposed implementing regulations comply with the national standards, other provisions of the Magnuson Act (16 U.S.C. 1981 *et seq.*), and other applicable law.

The amendment is deemed consistent with the California Coastal Zone Management Plan. Concurrence with this position has been requested from the California Coastal Commission.

An Environmental Assessment (EA) was filed with the Environmental Protection Agency on February 25, 1983. The EA concludes that implementation of this amendment would not have a significant effect on the environment. The optimum yield (OY) specified in the FMP remains unchanged. The environmental impacts are positive because the amendment is designed to reduce waste of undersized anchovy, increase efficiency of the reduction fishery, and permit in-year decrease of the reduction harvest quota in light of a revised biomass estimate.

Based on a regulatory impact review, the Administrator of NOAA has determined that the regulations implementing this amendment are not major under Executive Order 12291 and do not require a regulatory impact analysis. These regulations are designed to increase the efficiency of the anchovy reduction fishery in achieving OY without significant adverse impact. Economic impacts will be beneficial. Fishermen will be able to save the effort they previously spent dumping catches of anchovy that exceed the current size-limit tolerance factor.

The General Counsel of Commerce certified to the Small Business Administration that the regulations implementing this amendment will not have a significant economic impact on a substantial number of small entities; therefore no regulatory flexibility analysis is required under provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*)

The proposed regulations do not require any new "collection of information" as defined in the Paperwork Reduction Act; therefore, no paperwork reduction analysis is required.

List of Subjects in 50 CFR Part 662

Fish, Fisheries, Fishing.

Dated: May 13, 1983.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

For the reasons stated in the preamble, 50 CFR Part 662 is amended as follows:

VOL 48 ISS 97 MY 18 1983 UMI

PART 662—NORTHERN ANCHOVY FISHERY

1. The authority citation for 50 CFR Part 662 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 662.3, a new paragraph (f) is added to read as follows:

§ 662.3 Quota.

* * * * *

(f) Reduction harvest quotas derived according to the procedures in paragraphs (a) through (d) of this section will be allocated in two halves. The first half will be released at the beginning of the open season. When 25 percent of the total reduction harvest quota has been landed, but not later than February 1, the Regional Director will issue a public notice of the intent to release the second half and will provide the opportunity for the submission of evidence that the second half should not be released. The Regional Director will not release the second half of the reduction quota if, after consultation with the California Department of Fish and Game and the Pacific Fishery Management Council, documented indices of anchovy abundance indicate that the anchovy spawning biomass would fall below one million short tons (expressed in terms of a larva census or equivalent) if continued harvest in the U.S. waters were allowed. The second half of the reduction harvest quota will be released no later than April 1 if no evidence is submitted or if the Regional Director, in consultation with the California Department of Fish and Game and the Pacific Fishery Management Council, determines that the evidence is insufficient to warrant withholding the second half of the reduction harvest quota.

3. In § 662.5, the heading of paragraph (c) is revised and the text is removed and reserved as set forth below.

§ 662.5 Reduction fishery.

* * * * *

(c) *Minimum mesh size.* [Reserved].

7 CFR Part 1013

[Docket No. AO-286-A30]

Milk in the Southeastern Florida Marketing Area; Decision on Proposed Amendments to Marketing Agreement and to Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision adopts a change in the Southeastern Florida milk order which ensures that the Southeastern Florida Class I price for milk transferred for fluid use from a pool plant located outside Florida to a plant regulated under another Federal order would not be lower than the other order's Class I price at the location of the pool plant. The change, based on a proprietary handler's proposal, was considered at a public hearing held at Philadelphia, Pennsylvania, on August 24, 1982. The change is necessary to reflect current marketing conditions and to insure orderly marketing conditions in the Southeastern Florida and other marketing areas.

Cooperative associations will be polled to determine whether producers favor the issuance of the proposed amended order. The adopted amendment must be approved by at least two-thirds of the producers supplying the marketing area or by producers supplying at least two-thirds of the volume produced for the market.

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Chief, Order Formulation Branch, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, 202/447-6273.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. The amendments would promote orderly marketing of milk by producers and regulated handlers.

Prior documents in this proceeding:

Notice of Hearing: Issued August 4, 1982; published August 10, 1982 (47 FR 34573).

Suspension of rule: Issued September 27, 1982; published September 30, 1982 (47 FR 42962).

Partial decision: Issued October 13, 1982; published October 18, 1982 (47 FR 46289).

Order amending the Middle Atlantic order; Issued November 12, 1982; published November 17, 1982 (47 FR 51731).

Recommended decision: Issued March 10, 1983; published March 15, 1983 (48 FR 10848).

Extension of Time for Filing Exceptions: Issued March 30, 1983; published April 5, 1983 (48 FR 14613).

Preliminary Statement

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the Southeastern Florida marketing area. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice (7 CFR Part 900), at Philadelphia, Pennsylvania, on August 24, 1982. Notice of such hearing was issued on August 4, 1982 (47 FR 34573).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Marketing Program Operations, on March 10, 1983, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein, subject to the following modifications:

Five new paragraphs are added after the next to last paragraph of the findings and conclusions in the recommended decision.

The material issue on the record of the hearing that is dealt with in this decision is the location adjustments applicable to milk received at a Southeastern Florida pool plant located outside the defined marketing area and transferred to a plant regulated under another Federal order.

Note.—The hearing record also included an issue relating to the amendment of the Middle Atlantic order that was dealt with in a decision issued October 13, 1982 (47 FR 46289).

Findings and Conclusions

The following findings and conclusions on the material issue are based on evidence presented at the hearing and the record thereof:

The plant location adjustment provision should be changed to ensure that fluid milk transferred to an other order plant for Class I use from a Southeastern Florida pool plant located outside Florida would be subject to a Class I price no lower than that which would be applicable at the transferor plant if it were regulated under the other Federal order. The effect of this change would be to limit the amount of the location adjustment credit to Southeastern Florida handlers so that the Class I price for milk moved to other order plants would be comparable to the Class I price applicable to handlers competing with the transferee plants.

For plants located outside the State of Florida, the location adjustment provisions of the Southeastern Florida order presently provide that the Class I price be adjusted downward by 1.5 cents per hundredweight for each 10 miles a plant is located from West Palm Beach, Florida. The basic purpose of this provision is to provide a transportation allowance to handlers who assemble milk at plant locations outside the marketing area and move it to plants within the marketing area for use in Class I so that handlers' cost of milk so moved is more competitive with that for milk obtained locally.

Cumberland Farms, which operates distributing plants regulated under both the Southeastern Florida and the Middle Atlantic Federal orders, since October 1981 has obtained most of its milk supply for its Southeastern Florida pool distributing plant at Riviera Beach from its supply plant located at Dover,

VOL 48 ISS 97 MY 18 1983 UMI

Delaware. The Dover plant, which is located within the Middle Atlantic, or Order 4, marketing area, delivers a large enough proportion of its receipts to the Riviera Beach plant to be an Order 13 pool plant. The remainder of the Dover plant's receipts are sent to the handler's fluid milk plant at Florence, New Jersey, an Order 4 pool plant, where the milk is allocated to Class I and Class II use according to the terms of the Middle Atlantic order. The hearing record indicates that over 75 percent of the milk transferred from Dover to Florence is classified in Class I use, on which there is a location adjustment credit under the Florida order.

The proponent of the pricing change adopted in this decision is the Southland Corporation, a handler operating fluid milk plants in both the Middle Atlantic and Southeastern Florida markets. Southland's concern is the erosion of uniform pricing of Class I milk used by handlers regulated under Order 4. According to proponent's witness, the principal basis of the problem is the severe misalignment of Class I prices at the Dover, Delaware, plant location between the Southeastern Florida and Middle Atlantic milk orders.

Class I price differentials under Federal milk orders generally increase 1.5 cents for each 10 miles of distance from Eau Claire, Wisconsin. Because the Northeast markets and the Florida markets are a substantial distance from Eau Claire, prices in those respective areas are approximately the same. The Class I differential at Philadelphia under the Middle Atlantic order is $2.78, to which is added a 6-cent direct delivery differential for a total differential cost of $2.84. Under the Southeastern Florida milk order, the Class I price differential is $3.15. However, when Class I price differentials in Federal order markets that are in different directions from Eau Claire are again adjusted 1.5 cents per 10 miles toward locations other than Eau Claire, substantial differences in Class I prices at a given plant location can result. When the Southeastern Florida order differential is adjusted to Dover, a location approximately 1,080 miles from West Palm Beach, the Order 13 Class I price differential there becomes $1.53. At Dover the Class I price differential under Order 4 is $2.66. Milk at Dover, therefore, is available to the Middle Atlantic pool plant at Florence for Class I use for $1.13 per hundredweight less than the same milk would cost if the Dover plant were pooled under Order 4. As a result, the Florence plant enjoys a competitive advantage in the Order 4 market of $1.13 per hundredweight on all milk moved from Dover to Florence which is assigned to Class I. Proponent's witness estimated the volume of such milk to be as much as 2.5 million pounds per month, and asserted that the increased number of producers pooled on the Southeastern Florida market is an indication that Cumberland is pooling increasing volumes of milk at Dover under Order 13 in order to gain a greater advantage in the Order 4 market.

An apparent misalignment between Class I prices would not necessarily lead to competitive inequities in a market if the handler with a Class I price advantage must pay more than the price required under the order under which he is pooled to attract milk from producers who would normally supply another market. Southland's witness pointed out, however, that a high percentage of Class I use in Southeastern Florida combined with a large Class I price differential result in an Order 13 blend price to producers adjusted to Dover which is often above the Order 4 price to producers for deliveries of base milk to the same location. Using June 1982 as an example, the witness calculated that the handler's obligation to the same producers who were owed $13.66 per hundredweight for all their milk delivered to Dover under the Southeastern Florida order would have been $13.50 for the portion of production that was base milk and $12.19 for excess milk under the Middle Atlantic order. The handler operating the Dover plant under Order 13 is, therefore, able to attract a sufficient quantity of producer milk by paying its producers a price at least equivalent to prices paid to neighboring producers by Order 4 handlers without giving up any of the price advantage it enjoys on the portion of its receipts which are used in Class I in the Order 4 area.

The witness stated that the cost of operating the Dover plant as an Order 13 supply plant should be viewed as outside the purview of the order program and irrelevant to consideration of the price advantage in question. He also asserted that the modification of the Order 13 location adjustment provisions offered by proponent would maintain competitive equity in the Middle Atlantic area while continuing to accommodate the movement of milk from Dover to Florida.

A post-hearing brief submitted by Southland supported amendment of Order 13 as the best solution to the problem of price uniformity to handlers under Order 4. The Florida orders were described as lending themselves more readily than others to such pricing inequities largely because of their high Class I differentials and utilization. It is the Southeastern Florida location adjustment provisions which Southland sees as the source of the problem. In addition, the handler indicated that the occurrence of nonuniform prices to handlers in markets other than Middle Atlantic would be likely to spread if the location adjustment provisions are not corrected in the Southeastern Florida order. The Southland brief pointed out that handlers in other markets might not become aware of such a problem even if it did develop. It was noted that correction of the problem in a number of other markets would involve multiple hearing proceedings and time to carry them out.

Southland argued that although its proposed amendment to Order 13 may be a departure from provisions generally found in Federal milk orders, provisions must be tailored to meet marketing conditions in order to assure equitable treatment to competing handlers. The brief concluded that Order 13 is the appropriate order to amend under the particular circumstances of the present situation.

The manager of Independent Dairy Farmers' Association (IDFA), the cooperative association supplying 92 percent of the producer milk pooled under the Southeastern Florida milk order, testified in favor of the proposed amendment as assuring uniform pricing to regulated handlers distributing milk in the Middle Atlantic marketing area. He stated that uniform pricing of milk for similar uses at similar locations has been one of the most consistently adhered-to principles of the Federal order program, and that the lack of such uniformity disrupts the market and erodes confidence in the Federal milk order program. He asserted that the continued existence of a $1.13 price difference at Dover is not in the best interests of orderly milk marketing.

The cooperative spokesman cited the example of a distributing plant located in one of the Florida markets which sold enough packaged fluid milk into another Federal order market to become regulated under the other order, thereby becoming subject to a minus 16-cent location adjustment. The plant then possessed a 16-cent per hundredweight advantage in its local market. As a result of the 1972 hearing held to correct that pricing inequity, the Department established a pricing structure for all three Florida orders within which location pricing was adjusted to assure that Class I prices at a given plant location in Florida would be the same under each of the orders. The witness expressed his belief that the situation

corrected by that proceeding and the marketing conditions under consideration at the present hearing are similar and that the proposal under consideration in this proceeding supports the same principle followed in that Florida decision.

In a post-hearing brief, the IDFA representative argued that the proposal would not deny equitable treatment to handlers regulated under Order 13, but would assure equitable treatment to Order 4 handlers. He also pointed out that one-third of the Federal milk orders contain provisions which limit the amount of price adjustment which may be allowed for location. In such cases the 1.5-cent per 10-mile rate is not allowed to operate fully in order that unrealistic price relationships with adjacent areas may be avoided. Milk orders cited as containing limits on location adjustments include Orders 7, 11, 30, 68, and 124 (Georgia, Tennessee Valley, Chicago Regional, Upper Midwest, and Oregon-Washington).

A witness representing two associations consisting of some 25 milk distributors which process and/or distribute more than half of the Class I milk within the State of New Jersey and the Philadelphia metropolitan area testified in favor of the proposal. He stated that competition for milk sales between handlers within the New Jersey-Philadelphia area is keen, and introduced evidence to show that the margin between prices paid to producers for raw milk and prices paid by consumers for processed milk is narrower in this area than in many other major U.S. metropolitan areas. He testified that winning bids by handlers for sales to suppermarkets and institutions are often determined by prices per unit carried out to four or five decimal places, with the Class I cost of milk constituting by far the greatest cost element in such a bid price. The witness asserted that a competitor's regulated buying advantage affects the ability of even the associations' members who are vertically integrated to compete at the retail level.

The representative of the dealers' associations voiced their position that the Federal order program requires equity of raw milk costs among competing handlers. He observed that the situation considered in this proceeding, i.e., milk being available for Class I use in the Middle Atlantic market which is regulated by an order for a market located more than 1,000 miles to the south, never could have been visualized when the appropriate Class I location adjustments for these markets were considered and adopted. The witness stated that Federal milk orders must be amended in response to changing marketing conditions to provide continuing equity among regulated handlers.

The witness testified that sales by handlers in order areas other than those in which they are regulated are quite common, but that substantial price inequities are not a problem between most orders. The large volume of sales by Order 4 handlers in the adjacent New York-New Jersey (Order 2) marketing area and by Order 2 handlers in the Order 4 area was cited as an example of inter-order sales which do not disrupt orderly marketing. The witness expressed an apprehension that inequity of pricing in the Order 4 market would be likely to have an unstabilizing effect on marketing conditions in the Order 2 market, given the interrelationship between the two markets. He then referred to a provision formerly incorporated in the New York-New Jersey Federal order which required Order 2 handlers to pay the Order 2 Class I price for milk used in Class I which was received from handlers regulated under the Connecticut order. The proposal under consideration in this proceeding was characterized as a method similar to that "Connecticut differential" for dealing with inter-order price misalignment.

A witness for Dairymen, Inc. (DI), a cooperative association marketing a significant volume of producer milk in the Order 4 market, testified in favor of the proposed change. He stated that because only 50 percent of the milk received at Dover must be moved to the Order 13 distributing plant to qualify the Dover plant for pooling under Order 13, the amount of milk available at Dover for sale to Order 4 distributing plants at $1.13 under the Order 4 Class I price could represent a significant volume of sales. Such a volume at a $1.13 lower price would, he considered, lead to disorderly marketing in the Order 4 area. The witness characterized the situation as an obvious misalignment of prices between Federal milk order markets which must be corrected if the objective of orderly marketing is to be achieved.

A representative of a handler operating a pool plant in the Order 13 area and a plant in Kentucky under the Louisville order testified in favor of the proposed change to Order 13. He observed that if no action were taken to rectify the price alignment problem, it could expand to other order areas such as Louisville.

Cumberland Farms was represented by an expert witness who described the nature of Cumberland's business as complete vertical integration. He stated that Cumberland processes a limited product line which is sold only through its own stores, and asserted that not only could such an operation involve lower costs than those incurred by most conventional handlers but that it should have only a minimal impact in competition with other handlers. Since Cumberland does not compete directly for wholesale accounts with other handlers, he claimed, a lower raw product cost would not affect other handlers' ability to compete in the market. He did admit, however, that the existence of a lower-cost operator may force others to meet his price if they are to remain competitive.

The witness attributed the decision to move milk to Florida from Dover to the sizable premiums over the minimum order prices which were being charged by the predominant cooperative association in the Southeastern Florida area. He ascribed the cooperative's ability to exact such premiums to its domination of the market, and Cumberland's decision to obtain milk elsewhere to a desire to avoid an over-order price it regarded as excessive. The witness stated that the Dover plant qualifies as a pool supply plant under the terms of the Southeastern Florida milk order by shipping more than 50 percent of the milk received at the Dover plant to the Order 13 distributing plant at Riviera Beach, and characterized the milk moved from Dover to Florence as surplus to the needs of the Riviera Beach plant. The Florence plant was described as a pool plant under the Middle Atlantic milk order which receives milk from sources other than the Dover supply plant and distributes it through approximately 260 Cumberland Farms stores in New Jersey, Pennsylvania, and Delaware.

Cumberland's witness explained that when a handler disposes of fluid milk products from a pool plant into more than one Federal order marketing area, the plant generally is regulated by the order for the market into which it disposes of the greatest quantity of milk. Disposition by one plant into two or more marketing areas, he stated, has become a rather common occurence. Milk moved into marketing areas of orders other than the one under which it is regulated customarily is priced according to the distance of the plant disposing of it from the primary consumption center of the order under which the plant is pooled.

Although he recognized that in the early days of the Federal milk order program a few orders provided for

VOL
48

97
MAY
18
1983
UMI

differentials on Class I sales outside the marketing area, the witness expressed his veiw that such a differential is neither specifically authorized by the Agricultural Marketing Agreement Act of 1937, nor is it reasonable to contend that any such pricing policy is necessary to effectuate the other provisions of the Federal order program.

The witness described the alignment of prices between orders as determined by distance from Eau Claire, Wisconsin, to permit milk to move freely between markets without creating advantages or disadvantages for handlers in the markets involved. He stated that price misalignment between markets can only occur when location differentials are substantially different from actual hauling costs, and denied that the term "price misalignment" could be applied accurately to the existing price structures of Order 4 and Order 13. Instead, he claimed, the marketing condition which proponents wish to have corrected is caused by the existence of large premiums over the Order 13 Class I price which are exacted by the principal cooperative supplying the Order 13 market. Using data published by USDA, the witness showed that the over-order price in Order 13 ranged from $1.58 per hundredweight in May 1981 to $1.89 in November 1981, dropping to approximately $1.20 for April–July 1982. He stated that the decline in over-order prices from the time Cumberland began obtaining its milk supply from Dover was probably related to Cumberland's change in supply, and argued that the Secretary of Agriculture has no authority to amend an order to strengthen the effectiveness of cooperative pricing over the minimum order level.

The witness stated that the costs of operating the Dover plant as a supply plant for Southeastern Florida, which are additional to the minimum prices required by the order, are factors which the Secretary must consider in reaching a decision on an appropriate method of pricing milk received there. He observed that although the cost of moving milk from Dover to Riviera Beach is offset by the 1.5-cent per 10-mile location adjustment on milk used in Class I, milk assigned to Class II is not subject to location adjustments and is therefore moved entirely at Cumberland's expense. In a similar manner, the differential pricing for location between Dover and Florence under Order 4, which is 12 cents on milk used in Class I with an additional 6 cents on all milk, is not a great enough allowance to cover the costs of receiving milk at Dover and moving it to Florence. The witness pointed out that in a recent amendment to the New England order, handlers were allowed a total of 22 cents per hundredweight to cover fixed hauling costs and reload costs. Such costs, he asserted, are of the type incurred in Cumberland's operations and serve to offset any price advantage over Order 4 handlers which Cumberland might enjoy by being pooled under Order 13.

Another offsetting factor pointed out by the witness was the allocation of the milk transferred to Florence. Under the allocation provisions of Order 4, receipts at Cumberland's Florence plant from the other order supply plant at Dover are assigned the Order 4 marketwide utilization (limited to the actual Class II use availale in the receiving handler's plant). The witness claimed that because the Class I utilization percentage of the Middle Atlantic market is substantially lower than that at the Florence plant, a disproportionate share of the other other receipts at Florence are allocated to Class II, eliminating applicability of the 12-cent location adjustment from the Dover milk assigned to Class II at Florence.

The witness indicated that because the Order 13 Class II price ranges from 3 to 25 cents per hundredweight higher than the Order 4 Class II price, milk from Dover assigned to Class II at Florence is priced higher than if it were Order 4 pool milk. He also indicated that other costs involved in Cumberland's operation which he felt should not be ignored by the Secretary include contractual arrangements with producer cooperatives supplying the Dover plant which result in Cumberland paying more than order prices for its milk supply. When asked if the Secretary should not consider any savings to which the Cumberland operation might be subject, as well as offsetting costs, the witness agreed that savings from special hauling arrangements could be considered. He differed, however, with a conclusion that cost savings resulting from Cumberland's vertically integrated structure or from its avoidance of the Florida cooperative's over-order price should be included in any consideration of costs and savings.

The witness differentiated between the small over-order prices imposed by cooperatives in the Middle Atlantic and New England markets and the much larger premiums in the Southeastern Florida market by describing those in the Northeast as handling charges for services of economic value performed by the cooperatives, while the cooperative prices over the Order 13 minimum prices are a reflection of the supplier's market power. He explained that in return for over-order charges cooperatives in the New England and Middle Atlantic markets maintain manufacturing facilities and balance the supply of producer milk for the market, but indicated that he was not aware of what services the Florida cooperative might provide its customers.

In answer to questions about ways in which the situation at issue could be handled without adoption of the proposed amendment, Cumberland's witness explained that milk could not be diverted directly from producers' farms to Florence for Class I use without being pooled under Order 4. Such an approach, he conceded, would eliminate any problem of nonuniform pricing to Order 4 handlers but pointed out that that approach would result in portions of some producers' milk being pooled on both orders. He stated that such a procedure could be confusing to farmers whose milk was pooled under two orders and would make difficult the administration of the Order 4 12-month base plan. The witness responded to a hypothetical case of milk transferred to pool plants of several orders from a supply plant which failed to meet pooling qualifications of any order by stating that under all Federal milk orders such milk allocated to Class I at the transferee pool plant would be subject to a compensatory charge at the difference between the Class I and blend prices of the receiving order.

Cumberland's witness also stated that if Cumberland were to be assessed more than the present Order 13 price adjusted to Dover for milk moved from Dover to Florence and used in Class I, the Order 4 pool rather than the Order 13 pool should benefit from such a charge. In a post-hearing brief, a cooperative representing a large percentage of Order 4 producers argued in this regard that it would not be equitable to give the Order 13 pool the benefit of adjustments resulting from milk used for Class I in Order 4 pool plants. The brief asserted that since Order 4 producers bear the principal responsibility for balancing milk supplies for the Middle Atlantic market it would be only equitable for any benefits to follow those burdens. It was argued that payment of a higher price under Order 13 for Class I milk transferred to an Order 4 plant would benefit Order 13 producers without those producers assuming any responsibility for servicing the Order 4 market. The cooperative urged that if the proposal were adopted, the benefits of the higher price should accrue to the Middle Atlantic pool rather than to Southeastern Florida producers.

An employee of Cumberland Farms gave testimony relative to Cumberland's actual costs of operating the Dover plant. He submitted an exhibit detailing costs which offset all but 5 cents of Cumberland's $1.13 lower Class I price under Order 13 relative to Order 4 on milk moved from Dover to Florence. For Class I milk, he detailed those costs as 29.1 cents per hundredweight for hauling costs from Dover to Florence, another 29 cents for the cost of operating the Dover plant, a 9-cent contractual payment in excess of the Order 13 blend price to producer cooperatives supplying the Dover plant, and 14.2 cents per hundredweight for shrinkage at the Dover plant.

The employee indicated that costs incurred in handling Class II milk at Dover were the same as those for Class I milk except for price differences under the two Federal orders. Under the class price provisions of the Southeastern Florida order, the Class II price is the basic formula price (Minnesota-Wisconsin price at 3.5 percent butterfat) plus 15 cents, while under the Middle Atlantic order the Class II price varies seasonally from 10 cents under to 12 cents over the same basic formula price. The employee noted that this price variation results in an Order 13 Class II price for milk moved from Dover to Florence which averages 12.5 cents over the Order 4 Class II price. When offset by the 6-cent direct delivery differential which is applicable to all milk received at Florence under Order 4, the effective Class II price for milk delivered to Florence over the course of a year averages 6.5 cents per hundredweight more when the milk is pooled under Order 13 than when it is pooled under Order 4.

The costs itemized by the witness which offset the $1.13 lower price which Cumberland has on Class I milk sold in the Order 4 market amount to $.813, leaving a net price advantage of $.317. The same costs, when combined with the 6.5-cent difference in Class II prices between the two orders, result in a disadvantage to Cumberland of $.878 for milk pooled under Order 13 and allocated to Class II at the Order 4 distributing plant at Florence. Under the allocation provisions of Order 4, milk received at a pool plant from an other order plant is allocated on a marketwide utilization percentage to uses in the plant. As a result, the witness testified, 77.7 percent of the Dover milk received at Florence was allocated to Class I, and 22.3 percent to Class II, from October 1981 through June 1982. When these percentages are applied to the 31.7-cent Class I price advantage and the 87.8-cent Class II price disadvantage, the net result, the witness claimed, is a mere 5.05-cent advantage for Cumberland on all the milk moved from Dover to Florence.

The witness stated that his computations did not include the Order 4 12-cent location adjustment between the Dover and Florence locations on Class I milk or the 6-cent direct delivery differential applicable on all milk received at Florence, which would have the effect of reducing the 29.1-cent cost of hauling milk from Dover to Florence by 18 cents. He also indicated that the shrinkage costs quoted were those experienced at the Dover plant, and that additional shrinkage occurs at the Florence and Riviera Beach plants where the milk is processed.

According to Cumberland's employee, Cumberland's Class I sales out of the Middle Atlantic pool plant at Florence account for only one to two percent of Order 4 producer receipts, and probably two or three percent of Order 4 Class I sales. He also estimated that the volume of sales distributed from Florence is approximately twice the amount processed and sold from the handler's Riviera Beach plant. Considering the Order 13 requirement that a supply plant transfer at least 50 percent of its receipts to an Order 13 pool plant in order to meet pooling qualifications, the witness initially testified that no more than 25 percent of the milk processed at Florence could come from the Dover plant if the Dover plant were to remain pooled under Order 13. He agreed, however, that up to 50 percent of the milk pooled at Dover could be moved to Florence. When asked about the accuracy of the exhibit which gave estimates of the amount of milk pooled at Dover under Order 13 and moved to Florence, the witness stated that those estimates were overstated by roughly 5 to 10 percent.

Dairymen, Inc.'s post-hearing brief questioned the validity of offsetting Cumberland's Class I price advantage in the Order 4 market with the costs of operating the Dover plant. DI asserted that with the exception of moving milk from Dover to Florence, such costs are irrelevant, and have never been considered in the determination of appropriate price levels for different locations in the Federal order program.

The post-hearing brief submitted by Southland challenged the cost factors which the Cumberland employee had testified offset the $1.13 price advantage over Order 4 handlers at Dover in addition to the 18-cent price difference between Dover and Florence which should have been used to reduce the cost of hauling between those two points. Southland claimed that the 9-cent "contractual adjustment" offset should be removed from consideration because it is equivalent to service charges paid to cooperatives by other Order 4 handlers. With respect to this latter point, the exhibit introduced by Cumberland's witness shows that for January through June 1981 the cooperative price exceeded the minimum Federal order price in the cities of Baltimore, Maryland, and Washington, D.C., by 15 cents, and in Philadelphia, Pennsylvania, by 10 cents. Southland also claimed that the cost of shrinkage claimed by Cumberland should be reduced by 25 to 50 percent to allow for accounting at farm weights and tests, since that amount of shrinkage would occur no matter where the milk was first received.

Southland observed that no order requires Cumberland to operate a supply plant for Order 13 at Dover; that the costs of doing so are self-imposed and a result of actions undertaken to avoid the premium imposed by IDFA. The brief pointed out that Cumberland had supplied no analysis of costs at the Riviera Beach plant, or of advantages Cumberland may have gained in the Southeastern Florida market as a result of operating the Dover supply plant.

A representative of Eastern Milk Producers' Cooperative Association, Inc., which supplies the Cumberland plant at Dover, testified in opposition to the proposal. The members of the cooperative who supply milk to the Dover plant represent nearly 63 percent of the producers pooled on the Southeastern Florida market. Among the reasons for which Eastern advocated that the proposal not be adopted is that the Cumberland operation at Dover is a specific target of the proposal. The representative stated that other concerns, such as Order 13 Class I price misalignment with orders other than Order 4 and price misalignment for interorder transfers of milk classified as Class II, should have been included for consideration in the hearing procedure. He also pointed out that proponent addresses only the $1.13 difference in order prices, with no allowance for Cumberland's operating costs which serve to offset the advantage in order prices.

The cooperative representative claimed that price discrepancies between orders must, to warrant correction, result in substantial procurement cost differences, involves significant quantities of products, and impair competitive equity among handlers in the market. He asserted that

VOL 48 ISS 97 MAY 18 1983 UMI

since none of those conditions prevail in the present situation the proposal should not be adopted. Observing that a misalignment of order prices in the Middle Atlantic area should be of concern only to Order 4 handlers, the witness questioned whether proponent actually distributes milk in the same area in which Cumberland's Order 4 stores are located or if proponent's concern relates instead to its role as a competitor with Cumberland in the Southeastern Florida area. He indicated that a problem im the Middle Atlantic market should not be remedied by amending Order 13, but had no suggestion for a means of solving the problem by amendment to Order 4.

Finally, Eastern's witness objected to the proposal as representing a major departure from the manner in which milk transferred between Federal order markets is customarily priced. He asserted that adoption of the proposal would create another class of use with its own price and could have the effect of disrupting pricing provisions throughout the order program.

In the brief filed by Eastern the proposed amendment was described as predatory discrimination against the actions of a single handler to force him to abandon a procurement operation which is economically justified. Eastern charged that the proposal is designed to disrupt Cumberland's milk supply for its Riviera Beach plant and force Cumberland to obtain its supply from IDFA at a price considerably above the minimum order price. It was claimed that such action would serve to reinforce premium pricing in an area in which both minimum order Class I prices and the cooperative's premium exceed those in any other market. In addition, an increase in the price of milk moved from Dover to Florence would, according to the brief, create a clearly illegal economic barrier to the movement of milk between markets. Eastern's brief also stated that if Cumberland is forced to abandon the Dover plant as a supply of milk for its Florida operations, 140 producers and 3.5 million pounds of milk per month currently pooled on Order 13 would be shifted onto the Order 4 market, disrupting marketing conditions in the Middle Atlantic area.

The attorney representing Cumberland Farms testified against adoption of the proposal on the basis that resale price regulation by the State of Pennsylvania limits the potential of differences in raw product costs to disrupt milk marketing in the Middle Atlantic area. He introduced an exhibit that showed retail prices for milk in North Jersey and South Jersey for July 1982, and indicated that Cumberland's price is at the lowest end of the 16-cent range for stores surveyed. He also testified that Cumberland's sales in Pennsylvania are at the minimum price allowable under Pennsylvania's retail price regulation, with some handlers' prices somewhat higher. He expressed the opinion that with such price differences already existing in the market, any raw product cost advantage Cumberland might have would result in no realistic potential for Order 4 market disruption.

The post-hearing brief filed on behalf of Cumberland Farms stressed the argument that proponent, the Southland Corporation, actually has no direct interest in the effect of Cumberland's operations on price equity in the Order 4 market. Instead, according to Cumberland, Southland has proposed this order change for the sole purpose of making Cumberland's Dover operation unprofitable and helping Independent Dairy Farmers' Association to force Cumberland back into the cooperative's superpool.

IDFA members were described as large producers who enjoy a high Class I utilization percentage and are able to exact high premiums because of their large market share. The brief denied that the IDFA members are small farmers in need of regulatory protection and speculated that due to their large estimated gross income they would not fall within the definition of small businesses with which the Regulatory Flexibility Act is concerned. Furthermore, Cumberland argued, action by the Secretary for the purpose of maintaining cooperative over-order pricing would be outside the scope of the Act.

Cumberland also argued that the nature of its business causes very little impact on competiton in the Order 4 marking area as a result of any price advange Cuumberland might have in that area. It was noted that the handler's vertically integrated structure keeps it from competing directly with other handlers for accounts. In addition, Cumberland claims that its limited-line processing operation and vertically integrated distribution system diminishes any effect on the market which a cost advantage normally would cause. According to the brief, however, extra costs incurred in operating the supply plant should be taken into account to determine whether Cumberland has any material advantage, as the costs incurred by Cumberland in shipping milk from Dover to Florence are not experienced by most Order 4 handlers.

A further argument against the adoption of the proposal is the relative insignificance of the amount of milk subject to any price advantage. According to the brief, no more than 25 percent of the milk supply at Florence can be received from the Dover plant if the Dover plant is to remain pooled under Order 13. The 25-percent limit was determined by considering the fact that route disposition from Florence is twice that from the Riviera Beach plant, and that to qualify as an Order 13 supply plant, the Dover plant must move at least 50 percent of its receipts to Southeastern Florida distributing plants. Since the quantity of milk processed at Cumberland's Florence plant represents only 1 to 2 percent of total producer receipts under Order 4 and only 25 percent of the milk received at Florence can be supplied by the Dover plant at a price advantage, the problem was described in the brief as infinitesimal.

Cumberland's briefing again emphasized that the record shows no evidence of actual marketing disorder as a result of any price advantage and claimed that there was no evidence that Order 4 handlers are concerned about handler equity. The testimony of the representative for two dealers' associations was described as a general statement in favor of handler equity, and was challenged as an inaccurate representation of the views of the associations' members.

Finally, the proposal was characterized in Cumberland's brief as a radical departure from the general Federal order policy of pricing the milk of handlers distributing in more than one regulated marketing area under the order for the area into which they distribute the largest quantity of milk.

Although opponents of the proposals deny that the price discrepancy between Orders 4 and 13 at Dover results in any substantial procurement cost advantage for Cumberland, that the advantage impairs competitive equity between handlers, or that it affects a significant amount of milk, examination of the record indicates that Cumberland has a substantial cost advantage on a significant amount of milk, and thereby has the capability of impairing competitive equity in the market.

Under the provisions of the Middle Atlantic and Southeastern Florida milk orders, there is clearly a price advantage of $1.13 at Dover for a plant pooled under Order 13. The costs of operating the Dover supply plant should not be considered as offsetting that advantage. Nearly all of the costs claimed by

Cumberland would be incurred in operating the Dover plant under any Federal order. If the Dover plant were an Order 4 supply plant, milk received there and used in Class I would be subject to the Order 4 price at that location, $1.13 more than the Class I price applicable under Order 13. No allowance would be made for the extra costs of operating a supply plant. The fact that few or no other plants regulated under order 4 are subject to the same costs as Dover is because most milk marketed in the Middle Atlantic area is delivered directly from farms to the plants where it is used. The lack of supply plants in the Order 4 market is primarily due to the proximity of producers to the locations at which milk is used. If Cumberland were not operating the Dover plant to ship milk long distance to Florida, most of the milk currently transferred to Florence could be delivered more economically by direct shipments from the farm rather than through a supply plant. The cost of operating a supply plant is one of the factors implicitly accepted by Cumberland in its decision to use that facility to supply milk to the Riviera Beach plant, and should not be considered as offsetting the Order 13 price advantage at Dover.

The fact that Cumberland incurs the cost of moving milk that is allocated to Class II use between the Dover and Florence plants should not be considered a valid offsetting cost factor. Under the terms of Federal milk orders, handlers are purposely discouraged from moving Class II milk between plants at producers' expense. Transportation allowances under the plant location adjustment provisions of orders are limited on transfers between pool plants to the amount of Class I use available at the receiving plant after direct receipts have been deducted from Class I use. With respect to milk received from a plant regulated under another order, such milk is allocated on a marketwide utilization basis (limited to the actual use available in the receiving handler's plant). This intermarket allocation is for the purpose of discouraging the uneconomic transfer of milk for Class II use. Also, it tends to assure that other order producers carry their share of the burden of the reserve milk supply for the receiving market.

With respect to the matter of the plant location adjustment provisions of Order 4 not fully reflecting Cumberland's costs of reloading and transporting Class I milk between Dover and Florence, this is an issuance that could be addressed as a possible amendment to Order 4. No such issue was included in the hearing notice with respect to Order 4. It is obvious that there are reloading and fixed transportation costs of assembling milk through supply plants. However, such costs are rarely incorporated in the transportation allowance provisions of milk orders. The 22-cent reloading and fixed transportation allowance under the New England order that was alluded to by one of Cumberland's witnesses is unique to that order and reflects the unique relative geographic locations of supply plants and distrubuting plants in that market.

The milk moved from Dover to Florence may represent a small percentage of the total marketed in the Middle Atlantic area, but when Cumberland's $1.13 price advantage is considered the potential disruptive effect of the amount of milk involved is not negligible. If proponent's estimate of the volume of milk in question is reduced by the 5 to 10 percent overestimate claimed by a Cumberland witness, an average of over 35,000 pounds of milk per day has been moved from Dover to Florence since October 1981. This volume would represent the production of approximately 30 of the producers (and ¼ of the production) pooled under Order 13 at Dover. Such an amount of milk available at a price substantially lower than the Middle Atlantic Federal order Class I price certainly affects the uniformity of pricing to handlers similarly located.

Contrary to a Cumberland witness's testimony, approximately half of the Florence plant's fluid milk needs could be received from the Dover plant with the Dover plant remaining pooled under Order 13. According to the witness, distribution by the Riviera Beach plant is approximately half that of the plant located at Florence and at least half of the milk received at Dover must be transferred to Riveria Beach if the Dover plant is to remain on Order 13 pool plant. The witness thus claimed that receipts at Florence from Dover could represent no more than 25 percent of the Florence plant's total supply. However, if all of the milk used at Riviera Beach were supplied from Dover and a nearly equal amount were moved to Florence, that amount would supply approximately half of the Florence plant's needs. The impact of the present pricing inequities on the Middle Atlantic market could, therefore, double with the use of a supply plant pooled under Order 13.

Although Cumberland witnesses asserted that Cumberland, due to its vertically integrated structure, does not compete directly with other handlers for contracts, a handler selling through its own 260 stores is as much a competitive factor in the market as one which packages milk to be sold through grocery chains. Southland, in contracting with other handlers to supply its stores in the area in which Cumberland operates, is damaged just as much by nonuniform pricing as if it were supplying those stores from its Order 4 plant at Waldorf, Maryland. Nonuniform pricing may also affect competition even when there is no obvious undercutting in store prices. In the presence of state regulation of minimum out-of-store prices, it could scarcely be expected that even a handler with a substantial competitive advantage would be able to undersell all of its competitors. Such a handler could, however, exert downward pressure on store prices when costs of obtaining and processing milk are rising, thereby making competition ruinous for handlers paying the order price. Another possibility for a handler operating in more than one area, as Cumberland does, to use a competitive advantage is to use the proceeds from the advantage possessed in one market to subsidize prices lower than those prevailing in an area in which retail prices are not regulated.

The price difference at Dover between Orders 4 and 13 is a rather extreme example of price misalignment, nearly 10 cents per gallon. Price alignment between the Middle Atlantic and Southeastern Florida marketing areas was not considered when the appropriate Class I price levels were established for the Florida markets. In a 1970 decision (35 FR 18618) increasing the Southeastern Florida Class I differential from $2.95 to its present level of $3.15, the Secretary stated that milk was imported from the Georgia and Chattanooga, Tennessee, areas to Florida. When supplemental milk was needed because of those areas' limited supplies, it generally had to come from the Minnesota-Wisconsin region. The Atlanta, Chattanooga, and Chicago prices for July 1970 adjusted for transportation to Miami by 1.5 cents per 10 miles were computed to be $7.915, $7.945, and $7.91, respectively, while the Class I price at Miami was $7.56. Although a 20-cent increase in the Order 13 Class I differential did not result in perfect alignment between these orders, it did improve the ability of plants located in Southeastern Florida to attract needed supplies of milk. Because the Middle Atlantic market was not considered a regular or even supplemental source of supply for Southeastern Florida, alignment between those two markets has not

VOL
48
ISS
97
MY
18
1983
UMI

been a factor in determining appropriate price levels for either order. Now that the Southeastern Florida market has begun to obtain a supply of milk from the Middle Atlantic area, however, price alignment between the two markets must be considered.

Price alignment between Federal milk orders is considered not only when deficit supply areas must obtain supplemental milk from other areas, but when handlers regulated under different marketing orders are competitive in the same region. A 1972 decision (37 FR 16953) made the Class I price at any given plant location within the State of Florida the same under each of the three Florida orders. Prices under the three orders had been aligned to reflect the cost of hauling milk from alternative sources, but a handler which shifted regulation from one Florida order to another obtained a 16-cent price advantage over competitors by doing so. The handler accomplished a change in regulation by distributing a slightly larger proportion of its sales in an order area other than the order area where its plant was located. The 1972 amendment corrected the order provisions which made inequitable pricing possible in that situation. Similarly, as was stated at the hearing and alluded to in certain post-hearing briefs, the location adjustment provisions of many orders limit or designate the amount of price adjustment applicable to plants located in other order areas to ensure that handlers are unable to use the pricing provisions of the orders to gain a competitive advantage over other handlers similarly located but regulated under another order. Such consideration is usually limited to nearby or adjacent Federal order marketing areas. In the Texas order (Order No. 126), price adjustments applicable at locations within neighboring marketing areas for handlers regulated under Order 126 are specified in fixed amounts to be equivalent to the prices applicable at the same location under the other order. If the prices at those locations were determined by mileage from a given Texas city, they would be somewhat lower than the prices applicable under the orders in which those points are located. Under such location adjustment provisions, a handler whose plant is located in an order area other than the one under which he is regulated is assured that the price he pays for milk is uniform with the prices paid by handlers similarly located. Similarly, handlers regulated under the other order are assured that a handler located in their vicinity will not be able to underprice them solely because of the difference in regulation. The handler located outside his order area may, as a result, experience some competitive disadvantage in selling Class I milk into the area under which he is regulated since hauling costs may exceed the price difference between the two areas. That effect of such location adjustment provisions, however, is mitigated by the relatively small distances and price differences normally involved between adjacent areas.

Incorporation of the kind of location adjustment provision found in the Texas order and others into the Southeastern Florida order would cause all milk pooled at Dover to be subject to a price equivalent to the Middle Atlantic price at that location. Effectively, the Class I price differential at Dover under Order 13 for all milk pooled at Dover would be increased from $1.53 to $2.66 per hundredweight, or only $.49 less than the Order 13 price at Rivera Beach. It would reduce the present transportation allowance for moving milk from Dover to Rivera Beach from $1.62 to $.49 per hundredweight.

The record of this hearing does not reveal any problem with respect to the $1.62 per hundredweight location adjustment at the Dover plant with respect to milk moved to Florida. But a substantial price alignment problem exists with reapect to the Class I milk disposed of in the Middle Atlantic market from the Dover plant. Use of the Order 13 location adjustment provision to obtain a supply of milk in another order market, such as the Order 4 market, at a price substantially less than the price applicable under the other order should not be allowed. It is unfair to handlers competing under the other order, and does not provide uniform prices to handlers similarly located.

It is common practice to incorporate provisions under Federal milk orders to ensure that handlers are faced with comparable costs for milk used in Class I irrespective of the source of such milk supply. In most Federal milk orders, including Orders 4 and 13, any volume of fluid milk received from unregulated sources and used in Class I at a pool plant is subject to a charge on such milk to be added to the receiving handler's pool obligation at the difference between the Class I price and the marketwide weighted average price to producers. This charge is based on the assumption that the handler has probably paid his producers the weighted average price for the unregulated milk. From October 1981 to July 1982, the Order 4 Class I-weighted average price difference averaged $1.46 per hundredweight. This is 33 cents more than the added cost to Cumberland under the proposal adopted.

Similar charges on receipts from other order plants generally are not incorporated in a handler's pool obligation under Federal orders on the basis that the Class I price has been paid for the milk at some location for which pricing is aligned with that at the receiving handler's plant. That assumption fails in the case of a plant regulated under Order 13 but located within the Order 4 area and selling Class I milk to an Order 4 handler. Additionally, if milk from the Dover plant were moved to any of the nearby markets where prices are aligned with Order 4, it would tend to disrupt competition in those markets also. It would be appropriate to solve the problem of nonuniform pricing by amending Order 13 if the solution would provide alignment to pricing on milk moved to other order handlers.

The proposal to correct the problem of inequitable pricing in an other order area by amending Order 13 to provide that the Class I price applicable on milk transferred to an other order plant be adjusted for location to a level no lower than the price applicable at that location under the other order is a reasonable and effective method of dealing with the situation. Adoption of the proposal would result in uniform prices paid by handlers regulated by Order 4 and at the same time would not create economic barriers to the movement of milk from Dover to Florida.

Adoption of the proposal would not establish a barrier to movements of milk between Federal order marketing areas. The milk transferred from Dover to Florence does not move between Federal order marketing areas but between plants regulated under different orders but located within the same marketing area. The adopted change would assure uniform pricing of milk to handlers located within the same area and by that assurance would not inhibit milk transfers between those handlers.

Cumberland Farms is not the target of the amendment adopted in this decision inasmuch as any handler with a plant located outside Florida but pooled under Order 13 who elects to sell milk for fluid use to nearby plants would be restrained from doing so at less than the local Federally regulated price. The facility at Dover, which is rented by Cumberland could be operated instead by any other handler, even one who could establish a bottling and distributing operation there. Such opportunities for use of Federal order provisions to obtain a position of

competitive advantage in the market should be eliminated.

The fact that the additional money collected under the adopted proposal would be paid into the Order 13 pool rather than into the Order 4 pool may be considered equitable even though the milk moved to Florence from Dover is considered surplus to the fluid needs of the Riviera Beach plant. The Order 13 producers are already carrying their share of the reserve supply to the Middle Atlantic market through the operation of the Order 4 allocation provisions which prorate other order receipts at Florence to Classes I and II on the basis of the Order 4 marketwide utilization. In fact, since the milk of the Dover producers is not adding to the already-large surplus of milk in the Middle Atlantic pool and is absorbing a proportionate share of Class II use at Florence, producers pooled under Order 4 are already benefitting from the pooling of the Dover milk Order 13. If the Florida plant obtained its supplemental milk supply from some other region, the milk supply now being moved to Florida from Dover would likely be added to the Order 4 pool as Class II milk.

Exceptions filed by Eastern Milk Producers Association and Cumberland Farms largely reiterated those parties' objections, expressed at the hearing, to adoption of the proposed amendment. For the most part, those objections were addressed in the recommended decision. Both Eastern and Cumberland criticized the recommended decision as using vague and speculative words rather than actual numbers, while failing themselves to cite anything concrete in the record that contradicted the conclusions reached in the recommended decision. After criticizing the decision for not being based on specific figures, Cumberland's exceptions went on the argue that the specific figures on which the decision was based were inflated or misleading. Cumberland re-asserted that the $1.13 per hundredweight price advantage at Dover under Order 13 is largely offset by the costs of operating the Dover supply plant, and that 35,000 pounds per day is an insignificant volume of milk in the Middle Atlantic market. Eastern argued that the record contained no evidence to support a finding of any threat to orderly marketing conditions in either order. Eastern and Cumberland both characterized the adopted proposal as aimed solely at Cumberland's operation. The exceptors insisted that the only purpose of the amendment, which affects only milk transferred to other order plants, is to make uneconomical the transfer of milk to Florida which Cumberland has undertaken in order to avoid the over-order charges imposed by IDFA. At the same time, Cumberland objected to the point made in the recommended decision that a competitive advantage enjoyed in one marketing area could be used to subsidize operations in another area.

The number primarily relied upon in adoption of the proposed amendment is the $1.13 per hundredweight price advantage effective at Dover under Order 13 over Order 4 handlers. The reasons for not offsetting that price advantage by Cumberland's costs of operating the Dover supply plant were explained in the recommended decision. In summary, those costs can be viewed as the cost to Cumberland of balancing the supply for the Riviera Beach distibuting plant. Balancing would be one of the function undertaken by IDFA if the cooperative were suplying Comberland's plant, and would be one of the components of the over-order price charged by IDFA. It would appear that in addition to not wanting to pay the cooperative to perform balancing and other services, Cumberland also wishes to avoid bearing the cost for supplying those services for its own plants. The effect of allowing the full location adjustment to cover the movement of milk from Dover to Florida for Class I use on milk which is instead transferred to Florence, New Jersey, is to reduce the value of the Order 13 pool at the expense of the Florida producers, who provide most of the milk in that pool. As a result, those producers are required to bear part of the cost of balancing the milk supply for the Riviera Beach Plant, for which they supply none of the milk.

The 35,000 pounds of milk per day moved from Dover to Florence was cited in the recommended decision as an indication that in addition to balancing the Cumberland plant in Florida, Cumberland is using the Dover plant as a regular source of supply for the Florence, New Jersey, plant regulated under Order 4. The milk of nearly one-quarter of the producers pooled at Dover under Order 13 is moved to the fluid milk plant at Florence rather than to Florida. That milk is subject to the location adjustment determined by the distance between West Palm Beach and Dover. As a result, the value of the Order 13 pool is reduced by a location adjustment that also results in the Class I price paid by an Order 4 handler to be $1.13 per hundredweight less than the minimum price required at the same location under that order. In this situation, there is every incentive for Cumberland to pool as much milk as possible at the Dover plant to transfer to Florence, while assuring that the supply plant remains pooled under Order 13.

The fact that 35,000 pounds of milk per day represents a small proportion of the Order 4 market is immaterial. Under Order 4, there are no provisions for exemption from full minimum Order 4 price regulation on the basis of volume of sales. The only Order 4 provision in which volume is a factor in determining regulation under Order 4 is the 10,000-pound per month limit on the amount of pool milk a producer-handler may purchase without being subject to the pricing and pooling provisions of the order. Such purchases of pool milk would, of course, be fully subject to minimum Order 4 pricing. In that context, a volume of 35,000 pounds per day available at $1.13 less than the Order 4 price certainly may be described as "substantial."

The question of Cumberland as the "target" of the amendment was discussed in the recommended decision. It is difficult to see how adoption of the amendment will discourage the movement of milk from Dover to Florida, or how the amendment could make such transfers uneconomical. The operation of the location adjustment provisions in regard to the milk moved to Florida will be unaffected by the amendment. A requirement that milk sold to an other order handler be subject to the minimum Class I price under the other order should not affect the economics of moving milk from an Order 13 supply plant to an Order 13 distributing plant. Since adoption of the amendment will not affect the pricing of intra-order movements of milk, the insistence of both Eastern and Cumberland that the amendment is designed to support IDFA's over-order pricing policy by eliminating any incentive to bring milk in from Dover strongly implies that the principal incentive for doing so is the $1.13 price advantage on milk transferred to Florence and used in Class I.

A proposal was published in the hearing notice to consider increasing the plant location adjustment rate under the order. This proposal was abandoned at the hearing by the proponent and no testimony was offered on the matter. Thus, no findings can be made with respect to the merits of the proposal on the basis of this hearing record.

Ruling on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs,

VOL
48
ISS
97
MY
18
1983
UMI

proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Ruling on Exceptions

In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a marketing agreement regulating the handling of milk, and an ORDER amending the order regulating the handling of milk in the Southeastern Florida marketing area which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the **Federal Register**. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which is published with this decision.

Determination of Producer Approval and Representative Period

January 1983 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Southeastern Florida marketing area is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing area.

List of Subjects in 7 CFR Part 1013

Milk marketing orders, Milk, Dairy products.

Signed at Washington, D.C., on: May 13, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

Order [1] Amending the Order, Regulating the Handling of Milk in the Southeastern Florida Marketing Area

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Southeastern Florida marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Southeastern Florida marketing area shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

The provisions of the proposed marketing agreement and order amending the order contained in the recommended decision issued by the Deputy Administrator, Marketing Program Operations, on March 10, 1983, and published in the **Federal Register** on March 15, 1983, (48 FR 10848), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

PART 1013—MILK IN THE SOUTHEASTERN FLORIDA MARKETING AREA

In § 1013.52(a), the text preceding the table is revised to read as follows:

§ 1013.52 Plant location adjustments for handlers.

(a) The Class I price for producer milk and other source milk at a plant located outside the State of Florida or within the State of Florida but outside of the defined marketing area shall be adjusted at the rates set forth in the following schedule: *Provided*, That the resulting adjusted price for fluid milk products transferred from a pool plant to a plant regulated under another Federal order shall not be less than the Class I price under such other Federal order that is applicable at the location of the transferor plant:

* * * * * *

[FR Doc. 83-13292 Filed 5-17-83; 8:45 am]

BILLING CODE 3410-02-M

7 CFR Parts 1033 and 1036

[Docket Nos. AO-166-A51, AO-179-A46]

Milk in the Ohio Valley and Eastern Ohio-Western Pennsylvania Marketing Areas; Decision on Proposed Amendment to Marketing Agreements and to Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision adopts on an emergency basis temporary amendments to the Ohio Valley and Eastern Ohio-Western Pennsylvania milk orders. The order changes would provide for a reduction of 40 cents per hundredweight in the price for producer milk used to produce butter, nonfat dry milk and cheese. The changes, which would apply through July 1983, are based on evidence presented at a public hearing held on March 3 and 4, 1983, in Middleburg Heights, Ohio. The hearing was requested by a cooperative association representing a majority of the producers who supply milk to the two markets.

The adopted order changes are necessary to reflect current marketing conditions and to assure orderly marketing. Because of the limited time to complete the rulemaking procedures, a recommended decision and the opportunity to file exceptions thereto have been omitted. The proposed amended orders must be approved by at least two-thirds of the producers in the respective markets before they can become effective.

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Chief, Order Formulation Branch, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202) 447-6273.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. The amendments will promote more orderly marketing of milk by producers and regulated handlers.

Prior documents in this proceeding

Notice of hearing: Issued February 15, 1983; published February 22, 1983 (48 FR 7462).

Reopening of hearing: Issued March 23, 1983; published March 25, 1983 (48 FR 12552).

A public hearing was held upon proposed amendments to the marketing agreements and the orders regulating the handling of milk in the Ohio Valley and Eastern Ohio-Western Pennsylvania marketing areas. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice (7 CFR Part 900), at Middleburg Heights, Ohio, on March 3 and 4, 1983. Notice of such hearing was issued on February 15, 1983, and published February 22, 1983. Notice of reopending the hearing was issued March 23, 1983, and published March 25, 1983.

Interested parties were given until April 7, 1983, to file post-hearing briefs on the proposals as published in the notice of hearing and on whether these proposals should be considered on an expedited basis.

The material issues on the record of the hearing relate to:

1. Whether the two orders should be amended to provide handlers with price relief on producer milk used in butter, nonfat dry milk and hard cheese during April, May, June and July 1983.

2. Whether emergency marketing conditions exist in the two regulated areas to warrant the omission of a recommended decision and the opportunity to file written exceptions thereto.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Price relief on milk used in hard manufactured products.* The Ohio Valley and Eastern Ohio-Western Pennsylvania orders should be amended to provide a temporary price reduction of 40 cents per hundredweight to handlers for producer milk utilized in the production of butter, nonfat dry milk and cheese (except cottage cheese and cottage cheese curd). The credits should be made available as soon as possible and should continue through July 1983.

Milk Marketing, Inc. (MMI), a cooperative association of about 7,000 producers who supply about 77 percent of the milk marketed under the Ohio Valley order and about 50 percent of the milk marketed under the Eastern Ohio-Western Pennsylvania order, requested that the orders be amended to lower a handler's obligation to the pool by 40 cents per hundredweight for all producer milk used to make butter, nonfat dry milk and cheese (except cottage cheese and cottage cheese curd) during the months of April, May, June and July 1983. The cooperative indicated that the proposed amendments are needed to offset losses being incurred by handlers in marketing the recent surge in the volume of surplus milk on the markets that is processed into storable manufactured products, primarily butter, nonfat dry milk and cheese.

The MMI witness pointed out that receipts of milk from producers are up substantially while producer milk classified as Class I has declined. Consequently, with production and Class I sales moving in opposite directions, there is a substantial increase in the amount of milk in the two markets that is not needed by pool distributing plants. This milk must be disposed of to manufacturing plants with the highest volumes coming during the seasonally high production months of April, May, June and July. The witness stated that historically, the milk not needed by pool distributing plants in these markets has been moved to manufacturing plants that primarily produce butter, nonfat dry milk and cheese.

The proponent cooperative indicated that it is marketing a disproportionate share of the increased volume of milk being moved to manufacturing plants. The cooperative spokesman entered an exhibit showing the pounds of producer milk used to manufacture butter, nonfat dry milk and cheese in each of the markets and the amounts handled by MMI. The exhibit shows that for the Ohio Valley market in 1980 MMI handled 46.8 percent of the milk that was utilized to produce butter, nonfat dry milk and cheese. In 1981 this increased to 61.4 percent and in 1982, to 70.9 percent. During the period of October, November and December 1982, and January 1983, MMI handled 77.8 percent of the producer milk made into butter, nonfat dry milk and cheese. In the Eastern Ohio-Western Pennsylvania market in 1980, MMI handled 50.7 percent of the milk that was utilized to

1983
UMI

produce butter, nonfat dry milk and cheese. In 1981 this increased to 55.4 percent and in 1982 to 64.7 percent. During the period of October, November and December 1982, and January 1983, MMI handled 71 percent of the milk used to make butter, nonfat dry milk and cheese.

The MMI witness stated that, historically handlers in the two markets have been able to dispose of milk not needed by pool distributing plants to manufacturing plants and fulfill their obligation to the pool at the Class III price with minimal loss. However, last year this situation started to change. He testified that under the Eastern Ohio-Western Pennsylvania order (Order 36) during April, May, June and July 1982, MMI diverted 257 million pounds of milk to manufacturing plants, which was 29 percent above the same period in 1981. He indicated that since the prices offered by nonpool manufacturing plants were substantially below the Class III price and because MMI incurred additional hauling costs to get milk to manufacturing plants, MMI's cost of marketing member milk pooled under Order 36 and used to manufacture butter, nonfat dry milk and cheese was over $1 million, or 39.7 cents per hundredweight during April, May, June and July 1982. In the Ohio Valley market during April, May, June and July of 1982, MMI diverted 261 million pounds of milk to manufacturing plants at a loss of $138,285, or 5.3 cents per hundredweight. The cooperative indicated that its losses on marketing surplus milk in 1982 were covered by over-order prices on Class I milk.

However, the cooperative spokesman stated that its surplus disposal problem had gotten much worse during the past several months. He entered an exhibit showing that milk used to manufacture butter, nonfat dry milk and cheese in both markets as a whole during the 3-month period of November 1982 through January 1983 had increased an average of 29,000,000 pounds per month, or 23.6 percent as compared to the same period a year ago. The exhibit indicated that for the same period MMI, on the other hand, marketed 41,000,000 more pounds per month, or an increase of 57.4 percent, to manufacturing plants. The witness stated that last year all the pool manufacturing plants were operating at nearly 100 percent of capacity and one pool manufacturing plant with a capacity of 10,000,000 pounds per month closed shortly after the 1982 spring flush. He concluded that this means that the additional surplus milk this year must be marketed through nonpool plants located both within and outside the marketing areas of these two orders.

The cooperative, during its planning process for handling the surplus this spring, contacted four major cheese plants to ascertain the quantity of milk they would receive and the price they would pay during the months of April, May, June and July 1983. The witness stated that the replies indicated that they could accept quantities somwhat in excess of what they received last year from MMI. However, they said the prices they would be paying would be less than a year ago. The cooperative"s best estimate from these replies is that the prices they will pay during this 4-month period will average about $11.45 per hundredweight, which is $1.17 below the January Class III price. MMI's witness stated that its only alternative to accepting such reduced prices is to sell the milk to manufacturing plants in the upper Midwest and incur a transportation cost of as much as $2.00 per hundredweight. On the basis of cost experienced last year and the cost of marketing additional milk this, year, MMI projected that its cost to send milk to manufacturing plants during April, May, June and July of 1983 will approximate $3.7 million or 52.7 cents per hundredweight of member milk pooled in Orders 33 and 36 and used to manufacture butter, nonfat dry milk and cheese.

In these circumstances the cooperative maintains that it will be impossible for it to fulfill its obligation to the pools at the class III price without paying its members a price substantially below the blend price, unless relief is provided by amendment to the orders

Reiter Dairy, a proprietary handler under both of the orders with pool distributing plants in Barberton, Ohio, and Springfield, Ohio, supported MMI's proposals. The witness for this handler stated that about 75 percent of its milk supply is obtained from independent producers and during the flush season of 1982 it incurred a loss of about 40 cents per hundredweight on the disposal of surplus milk due to the prices received for such milk.

Superior Dairy, Inc., a handler operating pool distributing plant under Order 36 at Canton, Ohio, supported MMI's request for relief in the disposition of surplus milk in the months of April, May, June and July 1983. The witness for Superior Dairy stated that during those months of 1981 and 1982 it was forced to dispose of surplus milk to cheese and butter plants at substantially less than the Class III order price. He stated that, at times, the price received for surplus milk was $1.50 below the Class III price. Superior Dairy mantains this surplus milk supply in the flush production months, he said, in order to have an ample supply during the remaining eight months of the year, since most of its milk supply is from independent producers.

A handler who operates a pool supply plant under Order 33, Defiance Milk Products Company, urged that, if it is necessary to adopt MMI's proposals, the price reduction should apply to all Class III products. This handler manufactures evaporated and condensed milk and its witness pointed out that these products are interchangeable for many uses with nonfat dry milk. He contended, therefore, that all Class III products should continue to be priced on the same basis. In its post-hearing brief the company modified its position by requesting that only evaporated and condensed milk be added to the product uses to be considered for a price reduction.

Tri-County Producers' Cooperative, whose 38 members ship their milk to Superior Dairy, a pool distributing plant under Order 36, opposed MMI's proposals on the basis that the proposals would result in a reduction in the uniform price paid to producers by regulated handlers. Tri-County's witness further stated that all of Tri-County's milk is taken and paid for by Superior Dairy of Canton, Ohio, and there has been no objection by Superior to taking all the milk that Tri-County Producers' Cooperative can produce and there has been no problem selling all their milk.

Dairylea Cooperative, Inc., a cooperative of approximately 3,000 members, of whom 185 are producers under the Eastern Ohio-Western Pennsylvania order, opposed MMI's proposals to reduce the price by 40 cents per hundredweight on milk used to produce butter, nonfat dry milk and cheese. The Dairylea witness contended that the proposals, if adopted, would cause a severe misalignment of prices among Federal order markets and between order and non-order manufacturing operations. Handlers buying Order 36 milk for manufacturing use sell those manufactured products in competition with handlers regulated under markets in which Dairylea members sell milk. Consequently, he stated the proposals would put non-order and other order manufacturers at a competitive disadvantage in selling on the national market for butter, nonfat dry milk and cheese.

The National Farmers Organization (NFO), who has some members that are producers under Orders 33 and 36 and who operates a pool supply plant under Order 33, opposed the proposals to reduce the minimum order prices by 40 cents for certain manufactured dairy products for four months. NFO's witness stated that the proposals are a drastic departure from the long established policy of uniform classification among the various Federal orders. He pointed out that the market for butter, nonfat dry milk and cheese is a national market and questioned why manufacturers of these products in the Midwest and Northeast areas of the United States should have to pay the producers more for milk being used to produce these products than manufacturers using Order 33 or Order 36 milk. NFO maintained that it has not experienced the problems of being forced to sell milk at less than the Class III price like MMI has and does not anticipate they will have the problems that MMI has stated in their testimony. Thus, NFO claims it would be inequitable to NFO producers to lower the blend price to all producers by the adoption of MMI's proposals.

Several persons representing organization outside the Order 33 and Order 36 areas testified in opposition to the proposals to reduce the order prices 40 cents on milk used to make butter, nonfat dry milk and cheese. These organizations include: Farmers Union Milk Marketing Cooperative, Madison, Wisconsin; Land O'Lakes, Inc., Arden Hills, Minnesota; Wisconsin Federation of Cooperatives, Madison, Wisconsin; Trade Association of Proprietary Plants, Baraboo, Wisconsin; Wisconsin Cheese Makers Association, Madison, Wisconsin; and Beatrice Foods Company, Chicago, Illinois (on behalf of its cheese plants). In summary, the opposition testimony of these organizations covered the following points: (1) Adoption of the proposals would disrupt the national market for manufactured dairy products; (2) problems of managing reserve milk supplies are universal in the dairy industry; (3) processing margins have been adequate to justify the addition of new capacity to handle the extra milk; (4) selling milk at a loss during part of the year is likely a profitable strategy for MMI; and (5) the costs of supply balancing services should be recovered as a service charge to Class I milk handlers.

As indicated earlier, current marketing conditions in the Ohio Valley and Eastern Ohio-Western Pennsylvania markets warrant temporary amendment action to provide more equitable sharing among all producers on the markets of the cost of disposing of surplus milk. The surplus milk is processed into storable manufactured dairy products, primarily butter, nonfat dry milk, and cheese. The amount of milk being processed into these products is up by substantial amounts in each market. Under Order 33, 54.8 million more pounds of milk were processed into these products during November and December 1982 and January 1983 than during the same 3-month period a year ago, up from 158 million to 212.8 million pounds, or an increase of 34.7 percent. Under Order 36, 31.2 million more pounds of milk were processed into those products during November and December 1982 and January 1983 than during the same 3-month period a year ago, up from 206 million pounds to 237.2 million pounds, or an increase of 15.1 percent.

The evidence supports MMI's claims that it is not only the major balancer of milk supplies in the two markets but that indirectly it is balancing the surplus of nonmember producers. In the Ohio Valley market, milk handled by MMI and processed into butter, nonfat dry milk and cheese amounted to 167.2 million pounds during the 3-month period of November 1982–January 1983, compared to 94.3 million pounds for the same 3 months a year ago, or up 72.9 million pounds. This represents an increase of 77.3 percent. All other handlers in the market handled a combined total of 45.6 million pounds of milk that was processed into butter, nonfat dry milk and cheese during November 1982–January 1983. This was 18.1 million pounds less than for the same 3-month period a year ago, or down 28.4 percent.

Similarly, under Order 36, MMI handled 168.6 million pounds of milk used to produce butter, nonfat dry milk and cheese during November 1982–January 1983, compared to 119 million pounds during the same 3-month period a year ago. This represents an increase of 41.7 percent. All other handlers under Order 36 handled a combined total of 68.5 million pounds of milk processed into butter, nonfat dry milk and cheese during November 1982–January 1983, compared to a total of 86.9 million pounds during the same 3-month period a year ago. This amounted to a decrease of 18.4 million pounds, or 21.2 percent less. Thus, on the basis of recent market history, it is clear that MMI currently handles a disproportionate share of the increased amounts of surplus milk on the Ohio Valley and Eastern Ohio-Western Pennsylvania markets.

The record demonstrates that MMI is currently handling a disproportionate share of the total surplus milk supplies on the two markets, also. In January 1983, MMI handled 70.1 percent of the milk used in making butter, nonfat dry milk and cheese under Order 36, but it handled only 50 percent of the total milk supply on the market. In the Ohio Valley market, MMI handled 81.7 percent of the milk used to produce butter, nonfat dry milk and cheese, but handled 75.9 percent of the total milk supply on the market.

The plants that have manufactured the majority of surplus milk on these two markets are relatively few in number. Surplus milk under Order 36 is processed primarily at the following plants: A regulated butter and nonfat dry milk plant of MMI's at Orrville, Ohio; nonpool butter and nonfat dry milk plants at Somerset, Pennsylvania; Collins Center, New York; and Batavia, New York; and nonpool cheese plants at Brewster, Ohio; Middlefield, Ohio; New Wilmington, Pennsylvania; Cleveland, Ohio; and Fremont, Ohio. Surplus milk under Order 33 is processed primarily at the following plants: Two regulated butter and nonfat dry milk plants of MMI's at Dayton, Ohio; and Goshen, Indiana; a regulated butter and nonfat dry milk plant at New Bremen, Ohio; and three nonpool cheese plants at Upper Sandusky, Ohio; Wapakonita, Ohio; and Salem, Indiana.

The outlets for surplus milk under the orders are much fewer in number and more widely dispersed geographically than are the distributing plants that take about two-thirds of the producer milk supply. In the Eastern Ohio-Western Pennsylvania market, there are 39 pool distributing plants compared to the 9 manufacturing plants scattered over a 3-state area that serve as outlets for surplus milk. In the Ohio Valley market, there are 28 pool distributing plants compared to the 5 manufacturing plants in a two-state area that serve as outlets for surplus milk. In these circumstances, it is typical for farm-to-plant hauling costs to be greater on milk moved to manufacturing plants than on milk moved to distributing plants.

In these markets, it is a practice for handlers to deduct from payments to producers the cost of hauling milk from the farm to the plant of normal receipt, which for the most part is a pool distributing plant. When part of a handler's milk supply is diverted to a manufacturing plant, the hauler typically charges an extra amount when the farm-to-plant distance is significantly greater. It is not unusual, though, for the handler to absorb such extra hauling costs. Also, if a handler first receives the surplus milk at his distributing plant and then transfers it to a manufacturing plant, he incurs the cost of transferring the milk.

VOL 48 ISS 97 MY 18 1983 UMI

Handler witnesses stated that they incur hauling costs in disposing of surplus milk. In the case of MMI, the additional hauling costs incurred by the cooperative in moving milk to manufacturing outlets amounted to $545,745 in the Order 36 market and $89,087 in the Order 33 market during the period of April-July 1982. MMI projected that its additional cost of hauling milk for use in butter, nonfat dry milk and cheese during April through July 1983 will be $2,152,000 in the two markets. This is an average of 30.6 cents per hundredweight of the projected 703,800,000 pounds of milk that the cooperative expects to market to butter, nonfat dry milk and cheese plants.

MMI's projected 30.6 cents per hundredweight loss on hauling surplus milk is a cost far above the amount of farm-to-plant hauling that manufacturing grade milk plants in Minnesota and Wisconsin could reasonably be expected to incur, and whose pay prices serve as the basic formula price for Class III milk under the orders. Moreover, handlers in the Order 33 and Order 36 markets who are not balancing the seasonal surplus supplies would not incur such cost, which places MMI at a competitive disadvantage in these markets.

The other type of loss that MMI listed in its projected cost of marketing surplus milk is the difference between the prices received for milk it sells to nonpool plants and the Class III price at which it must account to the pool. During the period April-July 1982, MMI incurred a net loss of $471,688 in the Order 36 market and a net loss of $49,198 in the Order 33 market due to the differences between prices received and MMI's obligation to the pool on milk used to manufacture butter, nonfat dry milk and cheese. Its projected loss due to prices received is $1,560,000 for the two markets over the period April-July 1983. This would amount to an average of 22.1 cents per hundredweight of the 703,800,000 pounds of milk that MMI expects to move to butter, nonfat dry milk and cheese outlets during the 4-month period.

MMI's projected loss of 22.1 cents per hundredweight due to below-order prices received and 30.6 cent per hundredweight for extra hauling costs, or a total of 52.7 cents per hundredweight on all the milk it expects to move to butter, nonfat dry milk and cheese outlets, would be an inequitable burden on the cooperative since it would not be able to pay a competitive price to its members. Moreover, proprietary handlers who balance their own supplies would have to bear the losses that they expect to incur, since they would have to pay their producers the uniform prices computed under the orders.

Unless relief is provided under the orders to alleviate the financial burden handlers are faced within handling the recent surge in the volume of surplus milk on the markets, substantial inequities among handlers and among producers will clearly exist. Handlers who are performing the balancing services in the markets will undoubtedly incur costs that other handlers will not, thus detracting from the intent of the uniform class prices to handlers under the order. Cooperatives who are performing the balancing services in the market will undoubtedly incur costs that other cooperatives will not, thus detracting from the intent of the uniform prices to producers.

Since the record indicates that the burden of handling surplus milk in these markets is not uniformly distributed among all handlers, it would be appropriate to provide price relief under the orders to cover the actual losses incurred. Also, the price reduction should be on marketings of milk in only those uses that proponent stated are the normal outlets for seasonal surplus milk on these markets, namely butter, nonfat dry milk and cheese (except cottage cheese and cottage cheese curd) plants. As proposed by MMI, the order changes should apply only through July 1983.

Opposition testimony to making any changes in the orders came primarily from organizations that were concerned about the possible disruption of finished product markets. Limiting the relief to only the amount of the extraordinary losses incurred relative to the Class III price should minimize this concern since the net cost to handlers for surplus milk would be the Class III price, which is the same under all Federal orders for milk used to produce butter, nonfat dry milk and storable cheese. Moreover, the prices of these finished products are essentially floored in effect at the levels established under the dairy price support program. Also, the price reduction applies only to storable manufactured products, for which processors are not under pressure to market because the product may spoil. It does not apply to some storable products such as canned milk and blends of margarine and butter, for which there was no demonstration on the record that handlers incur losses in marketing milk for such uses. Nor does the price reduction apply to transfers of cream, for which ice cream processors may be competing with butter makers.

A further argument by opponents is that the cost of supply balancing services should be recovered as a service charge to Class I milk handlers. To some degree, the costs of balancing the markets' supplies with demand are now being assessed to distributing plant operations by means of an over-order charge by MMI on milk sold to the distributors. The witness for MMI stated that the current over-order charge would not reduce its projected loss of 52.7 cents per hundredweight below the 40-cent per hundredweight price reduction it proposed. Thus, the rate adopted herein covers only the costs the cooperative expects will not be covered by over-order charges.

With respect to opponents' argument that the problems of managing reserve milk supplies are universal in the dairy industry, the degree of the problem for MMI is greatly different this season. The volume of surplus milk being handled by MMI is up 77 percent in the Ohio Valley market and 42 percent in the Eastern Ohio-Western Pennsylvania market. This is an unusual surge in the volume of surplus milk for any cooperative to handle.

A further point advanced by opponents was that selling milk a loss during part of the year is likely a profitable strategy for MMI relative to building plant capacity to handle the milk. This could well be the case; however, it is more equitable for such losses to be shared uniformly by all producers in the markets. The losses can be expected to amount to about 15 cents per hundredweight of all producer milk.

2. *Omission of a recommended decision and the opportunity to file exceptions thereto.* The omission of a recommended decision was requested by MMI. Proponent cooperative indicated that its cost of balancing the surplus milk supplies on the markets will increase sharply beginning in April 1983. For this reason, the cooperative requested that the Department adopt its proposals on an emergency basis to insure that all producers share as soon as possible in the high cost of marketing surplus milk supplies on the markets.

Opponents of the proposals contended that proponent should have known earlier that surplus milk supplies were increasing and made its request for a hearing in time to allow the normal procedure of issuing a recommended decision.

The evidence in the record of this proceeding strongly indicates that surplus milk supplies in the two markets will be substantially larger than usual during April, May, June and July of this year. The amendments adopts herein

are in response to these marketing conditions and are for the purpose of accommodating the handling of surplus milk under unusual circumstances. Unless amendatory action is taken on an emergency basis, the opportunity to assure producer and handler equity in these markets will be lost. The normal procedure of issuing a recommended decision and providing time to file exceptions thereto will not permit the implementation of the amendments in time for them to serve their intended purpose.

It is therefore found that due and timely execution of the Secretary's function in this proceeding imperatively and unavoidably requires omission of the recommended decision and the opportunity for filing exceptions thereto.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth supplement those that were made when the Ohio Valley and Eastern Ohio-Western Pennsylvania orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

The following findings are hereby made with respect to each of the aforesaid tentative marketing agreements and orders:

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a *marketing agreement* regulating the handling of milk, and an ORDER amending the orders regulating the handling of milk in the Ohio Valley and Eastern Ohio-Western Pennsylvania marketing areas, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the **Federal Register**. The regulatory provisions of the marketing agreement are identical with those contained in the orders as hereby proposed to be amended by the attached order which is published with this decision.

Determination of Producer Approval and Representative Period

January 1983 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Ohio Valley marketing area, is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the aforesaid marketing area.

Referendum Order To Determine Producer Approval; Determination of Representative Period; and Designation of Referendum Agent

It is hereby directed that a referendum be conducted and completed on or before the 30th day from the date this decision is issued, in accordance with the procedure for the conduct of referenda (7 CFR 900.300 *et seq.*), to determine whether the issuance of the attached order as amended and as hereby proposed to be amended, regulating the handling of milk in the Eastern Ohio-Western Pennsylvania marketing area is approved or favored by producers, as defined under the terms of the order (as amended and as hereby proposed to be amended), who during the representative period were engaged in the production of milk for sale within the aforesaid marketing area.

The representative period for the conduct of such referendum is hereby determined to be January 1983.

The agent of the Secretary to conduct such referendum is hereby designated to be Myron R. McKinley.

List of Subjects in 7 CFR Parts 1033 and 1036.

Milk marketing orders, Milk, Dairy products.

Signed at Washington, D.C., on: May 13, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

Order[1] Amending the Orders, Regulating the Handling of Milk in Certain Specified Marketing Areas

Findings and Determinations

The findings and determinations hereinafter set forth supplement those that were made when each of the aforesaid orders were first issued and when they were amended. The previous findings and determinations are hereby ratified and confirmed, except where they may conflict with those set forth herein.

The following findings are hereby made with respect to each of the aforesaid orders:

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the Ohio Valley and Eastern Ohio-Western Pennsylvania marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that: Final Decision—Ohio Valley and Eastern Ohio-Western Pennsylvania.

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

VOL
48

UMI

price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in each of the specified marketing areas shall be in conformity to and in compliance with the terms and conditions of each of these orders, as amended, and as hereby amended, as follows:

PART 1033—MILK IN THE OHIO VALLEY MARKETING AREA

In § 1033.60, paragraph (h) is added to read as follows:

§ 1033.60 Computation of the net pool obligation of each handler.

* * * * *

(h) With respect to milk marketed on and after the effective date of this amendatory action through July 1983, subtract an amount determined by multiplying the pounds of producer milk used to make butter, nonfat dry milk and cheese (except cottage cheese and cottage cheese curd) by 40 cents per hundredweight.

PART 1036—MILK IN THE EASTERN OHIO-WESTERN PENNSYLVANIA MARKETING AREA

In § 1036.60, paragraph (f) is added to read as follows:

§ 1036.60 Handler's value of milk for computing uniform price.

* * * * *

(f) With respect to milk marketed on and after the effective date of this amendatory action through July 1983, subtract an amount determined by multiplying the pounds of producer milk used to make butter, nonfat dry milk and cheese (except cottage cheese and cottage cheese curd) by 40 cents per hundredweight.

BILLING CODE 3410-02-M

7 CFR Parts 1120, 1126, 1132, and 1138

[Docket Nos. AO-231-A50, et al.]

Milk in the Texas and Certain Other Marketing Areas; Cancellation of Public Hearing and Order To Terminate Proceeding on Proposed Amendments to Tentative Marketing Agreements and Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Cancellation of public hearing and order to terminate proceeding on proposed rulemaking.

7 CFR Parts	Marketing area	AO Numbers
1126	Texas	AO-231-A50.
1120	Lubbock-Plainview, Texas	AO-328-A24.
1132	Texas Panhandle	AO-252-A34.
1138	Rio Grande Valley	AO-335-A29.

SUMMARY: This action cancels a public hearing and terminates a proceeding on industry proposals to amend the orders regulating the handling of milk in the marketing areas listed above. The proposals previously noticed and scheduled for hearing on June 27, 1983, at Dallas, Texas, would have merged the four marketing areas under one order and expanded the merged area to include additional territory in the States of Texas, New Mexico and Arkansas. The cooperative association proposing the 4-market merger has decided not to pursue its merger proposal and has requested that the proceeding be terminated.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington D.C. 20250, 202-447-4824.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing—Issued March 30, 1983, published April 5, 1983 (48 FR 14613).

Notice of Rescheduled hearing—Issued April 15, 1983, published April 21, 1983 (48 FR 17104).

A notice was issued on April 15, 1983, giving notice of a rescheduled hearing to be held at the Sheraton Grand Hotel, Dallas-Ft. Worth Airport, Highway 114 and Esters Boulevard, Dallas, Texas 75261 on June 27, 1983, with respect to proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the aforesaid specified marketing areas.

Associated Milk Producers, Inc., a cooperative association which represents a substantial majority of the producers supplying these markets, has requested that no further consideration be given at this time to its proposal to merge 4 southwest milk orders and that the proceeding in this matter be terminated.

Notice is hereby given, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900) that the said rescheduled hearing is cancelled and the proceeding in this matter is terminated.

Commodity Credit Corporation

7 CFR Part 1446

General Regulations Governing 1982 Through 1985 Crops Peanut Warehouse Storage Loans and Handler Operations

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of intent to review and request for comment.

SUMMARY: This notice and request for comment concerns whether any country should be considered ineligible to receive exports of contract additional peanuts in the form of products. This issue is important because of its potential effect with respect to net outlays by the Commodity Credit Corporation (CCC) under the peanut price support loan program, the net dollar return to producers on both quota and additional peanuts and the quantities of peanuts and peanut products which can be exported. The issue was the subject of public comment in an Interim Rule published in the **Federal Register** on June 28, 1982 (47 FR 28069), and was addressed in a Final Rule published in the **Federal Register** on April 13, 1983 (47 FR 21533). Prior to the issuance of the Final Rule, peanut processors filed comments in response to the Interim Rule asking that the Department eliminate the restriction on the exportation to Canada and Mexico of contract additional peanuts in the form of peanut products. That view was not adopted, but the issue is one which the department has determined warrants additional comments and consideration.

DATE: Comments must be received on or before July 18, 1983, in order to be assured of consideration.

ADDRESS: Written comments should be addressed to the Director, Tobacco and Peanuts Division, ASCS, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Bruce Starnes, Agricultural Stabilization and Conservation Service, 202-382-0151.

SUPPLEMENTARY INFORMATION: The restriction on the exportation of contract additional peanuts in the form of products to Canada and Mexico was implemented to protect against the possibility of contract additional peanuts being processed into products in the United States, exported to Canada or Mexico and then imported back into the U.S. in competition with quota peanuts for a share of the domestic market.

Under the two-tiered price support program—i.e., the system where there are separate support prices for quota peanuts and additional (i.e., nonquota) peanuts—additional peanuts may be use in the domestic market only if purchased from CCC loan stocks at the quota support level plus handling costs. This means that peanut products may be offered in the domestic market only if they are: (1) processed from quota peanuts; (2) processed from additional peanut loan stocks priced at the quota support level; or (3) processed from imported peanuts brought into the United States within applicable import quota levels. Under the provisions of § 359(j) of the Agricultural Act of 1938, as amended, additional peanuts can be used only for export or for crushing into oil and peanut meal, except in those limited instances where a substitution of additional peanuts for quota peanuts is permitted by CCC regulations. The incentive for the reentry into the United States of contract additional peanuts in the form of products has become substantial. During the 1978 through 1981 crop years, prices for contract additional peanuts were near the quota loan rates, thus making it relatively uneconomical to export, process, and import the products back into the domestic U.S. market. However, recent legislation and weak world market prices, together with the fact that certain peanut products are not covered by existing import quotas, now provide a substantial potential for the reimportation into the U.S. of peanut products made from contract additional peanuts purchased at prices lower than statutory minimum U.S. domestic edible prices.

The Agriculture and Food act of 1981 amended Section 108A of the Agicultural Act of 1949 to increase the minimum quota support level to $550 per short tone for the 1982 crop and to allow potential increases in the minimum quota support level for any crop of peanuts of up to 6 percent a year from the level which was applicable to the previous crop, depending on changes in the cost of producing peanuts. The additional support level, however, continues to be based mainly on crushing value and was established at $200 per short ton for the 1982 crop. For the 1983 crop, the support level for additional peanuts has been established at $185 per short ton. Data collected by the Department has indicated that 1982 crop contract additional peanuts were purchased for export by handlers at prices ranging from $200 to $450 per ton. Those figures are $100 to $350 per ton below the quota loan rate and this price spread is substantially wider than the $20 to $50 per ton spread experienced during 1978-1981 crop years.

Seven commentators who responded to the Interim Rule requested that the restriction on the exportation of contract additional peanuts in the form of products to Canada and Mexico, be eliminated to permit additional marketing opportunities for such products. As set forth in the supplementary information filed with the final rule, it was determined that the restriction should be continued to avoid interference with quota sales and thus to avoid potential losses of the funds committed to the program. However, this issue is one which the department believes warrants additional consideration. This notice is being issued to encourage maximum public comment.

Reconsideration will permit the question to be reviewed in light of such new information as may be forthcoming concerning sales of 1982 quota peanuts, as well as any new information concerning the present levels at which peanut products made outside the United States are entering the country. Presently, the 1982 crop is still in the process of being marketed. After reviewing the comments, the Department will consider whether action should be taken to eliminate the restriction.

BILLING CODE 3410-05-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Ch. III

Semiannual Agenda of Regulations

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Publication of Semiannual Agenda of Regulations.

SUMMARY: The Federal Deposit Insurance Corporation ("FDIC") is publishing its agenda of regulations for April 1983. The agenda includes descriptions of final rules adopted during the past six months, proposed amendments to FDIC regulations, and regulations under development.

FOR FURTHER INFORMATION CONTACT: John R. Keiper, Jr., Paperwork and Regulation Control Coordinator, Office of the Executive Secretary, telephone (202) 389-4351, or other persons identified under regulations listed in the agenda. The address for all FDIC staff identified in the agenda is Federal Deposit Insurance Corporation, 550-17th Street, N.W., Washington, D.C. 20429.

SUPPLEMENTARY INFORMATION: Twice each year, the FDIC publishes an agenda of regulations to inform the public of its regulatory actions and to enhance public participation in the rulemaking process. Publication of the agendas is in accordance with both the Regulatory Flexibility Act (sec. 3, Pub. L. No. 96-354; 94 Stat. 1166 (5 U.S.C. 602)) and the FDIC statement of policy entitled "Development and Review of FDIC Rules and Regulations" (44 FR 31007, May 30, 1979; 44 FR 32353, June 6, 1979; 44 FR 76858, December 28, 1979).

Based on an assessment by the staff, none of the regulations listed in this agenda is expected to have a significant economic impact on a substantial number of small entities, except as otherwise noted. FDIC amends its regulations under the general rulemaking authority prescribed in section 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819) and under specific authority granted by the Act and other statutes.

Interested persons may petition the FDIC for the issuance, amendment or repeal of any regulation by submitting a

VOL 48 ISS 97 MY 18 1983 UMI

written petition to the Executive Secretary. Petitioners should include complete and concise statements of their interests in the subject matters and reasons why the petitions should be granted.

SECTION A—PROPOSALS OUTSTANDING

Proposed amendments to regulations listed under this heading have been published for comment and have not yet been issued in final form.

1. Applications

(12 CFR Parts 303, 304 and 347)

The FDIC has proposed changes to the information and notification requirements relating to applications for branches, remote service facilities and relocations (47 FR 29554, July 7, 1982). The changes would substantially reduce burdens on applicants.

Pursuant to the Regulatory Flexibility Act, an initial regulatory flexibility analysis was prepared.

Comments were due by September 7, 1982.

Full consideration by the FDIC staff of all the issues raised by the proposal and the comments received have required a substantial amount of time. The staff anticipates that a final regulation will be submitted to the FDIC Board of Directors for approval in the near future.

For further information, contact Robert F. Miailovich, Assistant Director, Division of Bank Supervision, telephone (202) 389–4677.

2. Credit Card Agreements and Check Guarantees

(12 CFR Parts 332 and 337)

The FDIC published a proposed amendment to its regulations that would allow banks: (1) To sponsor credit card agreements with other banks and (2) to issue check gurantee cards (46 FR 31018, June 12, 1981). The proposal would provide an exemption from prohibitions in the regulations against banks guaranteeing the obligations of third parties.

Comments were due by August 11, 1981.

FDIC has postponed final action on these amendments pending the completion of an analysis of the underlying regulations Part 332 and Part 337. Amendments to Part 332 which are being evaluated may make the proposed exemptions unnecessary.

For further information, contact Janis R. Blake, Attorney, Legal Division, telephone (202) 389–4171.

3. Special Reporting Basis for Insured Savings Banks

(12 CFR Part 350)

On May 24, 1982, the FDIC proposed a new regulation that would require current value reporting of all debt and equity securities acquired by a savings bank on or after January 1, 1983, for purposes of the reports of condition and income filed with the FDIC by savings banks, and that would permit savings banks to defer and amortize gains and losses on dispositions of financial assets acquired prior to January 1, 1983 (47 FR 23743, June 1, 1982). The regulation would provide savings banks with an opportunity to restructure their asset portfolios and place a market discipline over decisions to acquire or hold investment securities.

Comments were due August 2, 1982.

The FDIC staff and staffs of the other Federal financial institutions regulatory agencies are presently engaged in a study of current value accounting applications for all financial institutions. Final action on this proposal has, therefore, been postponed until completion of the study.

For further information, contact Paul L. Sachtleben, Project Specialist, Division of Bank Supervision, telephone (202) 389–4141.

4. Delegation of Authority To Act on Merger Applications

(12 CFR Part 303)

On October 5, 1982, the FDIC published a proposed rule delegating to the Director of the Division of Bank Supervision and to the regional directors authority to approve, but not deny, merger applications that meet certain routine characteristics (47 FR 43983, October 5, 1982). The action is expected to reduce the time and costs of processing applications.

Comments were due on or before December 6, 1982.

For further information, contact Jules E. Bernard, Senior Attorney, Legal Division, telephone (202) 389–4171, or Donald F. Pfeiffer, Supervising Review Examiner, Division of Bank Supervision, telephone (202) 389–4701.

5. Management Official Interlocks

(12 CFR Part 348)

The FDIC, the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the National Credit Union Administration and the Federal Home Loan Bank Board have proposed amendments to their regulations implementing the Depository Institution Management Interlocks Act (47 FR 47406, October 21, 1982). The proposed amendments would relax certain interlock restrictions on depository institutions and clarify certain provisions of the Act.

Comments were due by December 27, 1982.

For further information, contact Pamela E. F. LeCren, Senior Attorney, or Barbara I. Gersten, Senior Attorney, Legal Division, telephone (202) 389–4171.

6. Maximum Balance Restriction on Savings Deposits

(12 CFR Part 329)

On August 2, 1982, the FDIC published proposed amendments to its regulations that would remove the $150,000 maximum balance limitation that applies to savings deposits accepted by a commercial bank from corporations, partnerships, associations or certain other organizations (47 FR 33276, August 2, 1982). The amendment was proposed to allow commercial banks to compete for funds more effectively.

Comments were due by October 1, 1982.

The FDIC Board of Directors has decided to defer action on this amendment until the Depository Institutions Deregulation Committee (DIDC) addresses the issue of eligibility for "Super NOW" accounts. The DIDC's position on this issue may impact on FDIC's action.

For further information, contact Peter Kravitz, Senior Attorney, Legal Division, telephone (202) 389–4171.

7. Payment of Interest on Deposits Situated Outside of the Continental United States

(12 CFR Part 329)

The FDIC proposed an amendment to its regulations that would subject any deposit to interest rate ceilings if the deposit may be accessed through an account maintained within the United States or the District of Columbia, or through instruction for payment by any person who is not a resident of the extraterritorial sovereignty, possession or territory where the deposit account is maintained (48 FR 6718, February 15, 1983).

Comments were due by March 2, 1983.

For further information, contact F. Douglas Birdzell, Counsel, or Barbara Messe, Attorney, Legal Division, telephone (202) 389–4171.

8. Securities of Insured Nonmember Banks

(12 CFR Part 335)

The FDIC proposed an amendment to its securities disclosure regulation in accordance with the Securities Exchange Act of 1934, which requires that the FDIC issue regulations substantially similar to regulations of the Securities and Exchange Commission ("SEC"), or publish reasons for not doing so (47 FR 53893, November 30, 1982). The proposed amendment conforms to recent changes to SEC regulations.

Comments were due by December 30, 1982.

For information, contact Gerald J. Gervino, Senior Attorney, telephone (202) 389–4171, or Mulford H. Smith, Senior Financial Analyst, telephone (202) 389–4651.

9. Disclosure of Deposit Information

(12 CFR Parts 304 and 309)

The FDIC has proposed an amendment to its regulations that would make information regarding size and number of deposit accounts available for public disclosure. In the past, the FDIC's position has been that this type of information, if made accessible to the public, could cause financial injury to reporting banks from competing financial institutions. Confidentiality of this type of information is now unnecessary since banks are no longer required to report different classifications of deposits in detail. Since June 1982, only an aggregate total for deposit accounts with balances exceeding $100,000, the number and size of such accounts, and an aggregate total of deposit accounts with balances of less than $100,000 has been required.

Comments are due by June 3, 1983.

For further information, contact William P. Carley, Planning and Program Development Specialist, Division of Bank Supervision, telephone (202) 389–4141.

10. Prior Approval Requirement on Insider Loans

(12 CFR Part 337)

The FDIC has proposed an amendment that would eliminate the current requirement for prior approval by a bank's board of directors of all extensions of credit exceeding, in the aggregate, $25,000 made to its insiders (directors, executive officers, principal shareholders, or any related interests of such persons). Substituted in its place would be a new formula whereby prior approval would be required for (1) extensions of credit that exceed, in the aggregate, the greater of $25,000 or five percent of the bank's capital and unimpaired surplus, and (2) all extensions of credit exceeding $500,000 in the aggregate, regardless of a bank's capital and unimpaired surplus.

Comments are due by July 5, 1983.

For further information, contact Pamela E. F. LeCren, Senior Attorney, Legal Division, telephone (202) 389–4171.

11. Unsafe and Unsound Banking Practices

(12 CFR Part 337)

In its policy statement concerning the applicability of the Glass-Steagall Act to securities activities of subsidiaries of insured nonmember banks (47 FR 38984, September 3, 1982), the FDIC Board of Directors expressed its opinion that the Act does not prohibit an insured nonmember bank from establishing an affiliate relationship with, or organizing or acquiring, an subsidiary corporation that engages in securities activities. In this connection, the FDIC has proposed for public comment an amendment to its regulations that would (1) define "bona-fide" subsidiary (2) limit a bank's permissible investment in a securities subsidiary (3) require notice of intent to invest in such a subsidiary (4) limit the permissible securties activities of nonmember bank subsidiaries, and (5) place certain other restrictions on loans, extensions of credit, and other transactions between nonmember banks and their subsidiaries or affiliates that engage in securities activities.

The staff anticipates that this proposal will have "a significant economic impact on a substantial number of small entities;" therefore, a regulatory flexibility analysis has been prepared.

Comments are due 60 days after publication in the **Federal Register**. A public hearing on the proposed amendments will be held on Friday, June 17, 1983, from 9:00 a.m.–5:00 p.m., at the FDIC Building, 550 17th Street, N.W., Washington, D.C. 20429. Requests to participate should be addressed to Hoyle L. Robinson, Executive Secretary, at the above address.

For further information, contact Pamela E.F. LeCren, Senior Attorney, Legal Division, telephone (202) 389–4171.

SECTION B—POTENTIAL ACTIONS

Entries under this heading describe regulations that are either being developed or are anticipated to be developed for consideration by FDIC's Board of Directors. Entries are the result of evaluations of present circumstances; consequently, subsequent action may be taken on matters not included or may not be taken on matters included.

1. Deposit Insurance Coverage

(12 CFR Part 330)

The FDIC is developing an amendment to its regulations which would include in the definitions of "insured deposit" for insured commercial and savings banks the amount of accrued earnings (either interest or dividends).

For further information, contact Frederic H. Karr, Senior Attorney, Legal Division, telephone (202) 389–4171.

2. Disclosure of Information

(12 CFR Part 309)

The FDIC is developing an amendment that, if adopted, would remove restrictions placed on the disclosure of information to Federal financial institutions supervisory agencies. The amendment would conform FDIC's regulations to the Right to Financial Privacy Act of 1978.

For further information, contact MaryBeth Triano, Attorney, Legal Division, telephone (202) 389–4151.

3. Employee Responsibilities and Conduct

(12 CFR Part 336)

A proposed amendment, which would modify existing restrictions on transactions between FDIC employees and FDIC-supervised banks, is under development. The amendment may be subject to consultation or negotiation wiht recognized labor organizations.

For further information, contact Margaret M. Olsen, Assistant Executive Secretary, telephone (202) 389–4446.

4. Interest Rate Differential for Stock Organizations

(12 CFR Part 329)

FDIC staff is developing an amendment that, if approved by the Board of Directors, would allow a stock savings bank that conforms to the definition of "savings bank" in 12 U.S.C. 1813(g) to pay the interest-rate differential on deposits that is available to mutual savings banks. The staff may propose that a mutual savings bank that converts to a stock organization that does not conform to the definition in Section 1813(g) would retain the right to pay the differential for deposit accoutns in existence at the time of the conversion. This amendment would remove a condition that stands in the way of a mutual savings bank improving its capital base by converting to a stock organization.

For further information, contact F. Douglas Birdzell, Counsel, Legal Division, telephone (202) 389–4171.

VOL
48

5. Investments in Bank Service Corporations

(12 CFR Parts 303 and 304)

The Garn-St Germain Depository Institutions Act of 1982 mandates that an insured bank must request permission from its Federal bank supervisory agency to invest in bank service corporations that engate in "banking" activities. The staff is, therefore, developing a form for use by nonmember insured banks applying for such permission.

For further information, contact Jules E. Bernard, Senior Attorney, Legal Division, Telephone (202) 389–4171.

6. Termination of Insured Status

(12 CFR Part 307)

The FDIC is proposing to amend its regulation governing the notice procedures to be followed by a bank whose insured status has been terminated other than by action of the FDIC Board of Directors. This action is intended to conform FDIC's regulations to the Garn-St Germain Depository Institutions Act of 1982 (Garn-St Germain Act). The Garn-St Germain Act deleted from the Federal Deposit Insurance Act a provision that required an insured bank which assumes the deposit liabilities of another insured bank to notify the latter's depositors of the assumption. The deleted provision was the primary authority for the portion of Part 307 proposed to be eliminated.

For further information, contact MaryBeth Triano, Attorney, Legal Division, telephone (202) 389–4151.

SECTION C—FINAL RULES ISSUED FROM OCTOBER 26, 1982 THROUGH MAY 9, 1983

1. Assessment of Civil Money Penalties

(12 CFR Part 308)

The Garn-St Germain Depository Institutions Act of 1982 (Garn-St Germain Act) gives FDIC the authority to remit, modify or compromise civil money penalties for violations of any final order issued under sections 8 (b) or (c) of the Federal Deposit Insurance Act, sections 22(h) and 23A of the Federal Reserve Act and section 106(b) of the Bank Holding Company Act Amendments of 1970. The Garn-St Germain Act also gives FDIC authority to remove from office any director or officer of an insured bank who has violated the Depository Institution Management Interlocks Act. FDIC amended its regulations to implement the Garn-St Germain Act, effective March 7, 1983 (48 FR 9514, March 7, 1983).

For further information, contact James L. Meador, Senior Attorney, Legal Division, telephone (202) 389–4171.

2. Delegation of Authority to Act on Enforcement Matters

(12 CFR Parts 303 and 308)

On November 22, 1982, the Board of Directors delegated authority to the FDIC's Board of Review, the Director of the Division of Bank Supervision, the Deputy General Counsel for Open Bank Regulation and Supervision, and, where confirmed in writing, to the appropriate regional director or regional counsel, or both, to act on certain enforcement matters, including the initiation of cease-and-desist proceedings and the issuance of cease-and-desist orders (47 FR 53837, November 30, 1982). The authority to act on certain procedural motions was delegated to the Executive Secretary. The delegations became effective November 30, 1982.

For further information, contact Arthur L. Beamon, Counsel, Legal Division, telephone (202) 389–4171.

3. Delegation of Authority to the Executive Secretary

(12 CFR Part 308)

The FDIC's Executive Secretary has been delegated the authority to designate presiding officers for hearings of (1) individuals subject to suspension and removal proceedings under section 8(g) of the Federal Deposit Insurance Act, and (2) banks or individuals that have petitioned for reconsideration of denials of applications under section 19 of the Act. The Executive Secretary has been delegated additional authority to schedule hearings beyond the 30-day period for setting hearing dates after a request for a hearing has been filed. Formerly, these responsibilities were undertaken by FDIC's Board of Directors. The FDIC has amended its rules of practice and procedures to reflect the delegations (48 FR 11421, March 18, 1983).

For further information contact, Margaret M. Olsen, Assistant Executive Secretary, telephone (202) 389–4446.

4. Eligibility for NOW Accounts

(12 CFR Part 329)

The FDIC amended its regulations, effective January 11, 1983, to conform to a provision of the Garn-St Germain Depository Institutions Act of 1982 which allows all public units to maintain NOW accounts (48 FR 1182, January 11, 1983). The regulation previously prohibited establishment of NOW accounts by any public unit that was not operated primarily for religious, philanthropic, charitable, educational, fraternal, or other similar purposes.

For further information, contact F. Douglas Birdzell, Counsel, or Fredric H. Karr, Attorney, Legal Division, telephone (202) 389–4171.

5. Management Official Interlocks

(12 CFR Part 348)

Effective October 26, 1982, the FDIC amended its regulations, in conjunction with the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the Federal Home Loan Bank Board and the National Credit Union Administration, to reflect recent statutory changes (47 FR 47369, October 26, 1982). The changes provide that a management official whose service in an interlocking relationship is grandfathered under the Depository Institution Management Interlocks Act may continue such service for the duration of the ten-year grandfather period provided in the Act, notwithstanding changes in circumstances. Additionally, a management official of a depository organization and a nondepository organization may continue such service after the nondepository organization becomes a diversified saving and loan holding company.

For further information, contact Pamela E. F. LeCren, Senior Attorney, or Barbara I. Gersten, Senior Attorney, Legal Division, telephone (202) 389–4171.

6. Procedure on Applications

(12 CFR Part 303)

The FDIC has amended its regulations, effective March 9, 1983, (1) to provide that any petition for reconsideration of a denied request for relief from the requirement of making reimbursements to consumers for violations of the Truth in Lending Act (or any other requests, applications or petitions) be addressed to the FDIC's Board of Review, if the initial request, application or petition was denied by the Board of Review acting under its delegated authority, and (2) to clarify that actions by the Board of Review on enforcement matters brought under section 8 of the Federal Deposit Insurance Act are subject, upon request, to review by FDIC's Board of Directors (48 FR 9841, March 9, 1983).

For further information, contact James L. Meador, Senior Attorney, Legal Division, telephone (202) 389–4171.

7. Resumption of Management Interlocks

(12 CFR Part 348)

On January 24, 1983, FDIC amended its regulation on management interlocks to allow management officials who terminated their interlocking service because of a change in circumstances to resume such service for the duration of the grandfather period under the Depository Institution Management Interlocks Act ("Interlocks Act"). The Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Home Loan Bank Board and the National Credit Union Administration have similarly amended their respective regulations. The amendment allows uninterruption of interlocks that were established prior to enactment of the Interlocks Act. The amendment became effective upon publication in the **Federal Register** (48 FR 5533, February 7, 1983).

For further information, contact Pamela E. F. LeCren, Senior Attorney, or Barbara I. Gersten, Senior Attorney, Legal Division, telephone (202) 389–4171.

8. Retail Repurchase Agreements

(12 CFR Part 329)

Effective January 3, 1983, the FDIC amended its regulation governing interest on deposits to eliminate the requirement that retail repurchase agreements ("repos") be issued for 89 days or less (48 FR 9, January 3, 1983). The amendment is in compliance with the Depository Institutions Deregulation Act of 1980, which mandates removal of interest rate ceilings by March 31, 1986.

CIVIL AERONAUTICS BOARD

14 CFR Parts 253 and 254

[EDR-458; Economic Regulations Docket 41443*]

Notice of Terms of Contract of Carriage; and Domestic Baggage Liability

Dated: April 20, 1983.

*For administrative purposes, Dockets 40366 and 38621 have been merged into Docket 41443.

AGENCY: Civil Aeronautics Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The CAB is proposing to amend its recently issued domestic baggage liability requirements. It proposes to modify its requirement that each airline provide specific notice on all tickets of its liability limitations, to allow the option of stating the minimum liability allowed by Board rule. The Board also proposes to add baggage liability to the subjects required to be listed on the tickets under the rule allowing incorporation of contract terms by reference. In addition, the CAB is requesting comment on alternative levels ($1,000 and $1,250) of minimum airline baggage liability. Pending the completion of this rulemaking, the effective date of the new rules has been stayed and the previous rules remain in effect. This action is in response to a petition by certain Members of the Air Transport Association to repeal the domestic liability rule prior to its effective date.

DATES: *Comments by:* June 17, 1983.

Comments and other relevant information received after this date will be considered by the Board only to the extent practicable.

Requests to be put on the Service List: May 25, 1983.

The Docket Section prepares the Service List and sends it to each person listed on it, who then serves comments on others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 41443, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT: Joanne Yancey Hitchcock, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; 202–673–5442.

SUPPLEMENTARY INFORMATION:

Background

In two recent rulemakings, the Board adopted final rules governing domestic baggage liability (14 CFR Part 254) and notice of terms of contracts of carriage (14 CFR Part 253).

In EDR–438, 47 FR 5232, February 4, 1982, the Board proposed three alternatives with respect to baggage liability: (1) eliminate all regulation of baggage liability, (2) retain only the $750 limit, and (3) codify the most significant elements of the Board orders governing baggage liability. In response to the notice of proposed rulemaking, sixteen formal comments were filed by airlines, trade associations, law firms and a chamber of commerce. Nearly 100 individuals also wrote letters expressing their opinions.

Based on the comments received, the Board adopted Part 254 (ER–1305, 47 FR 52987, November 24, 1982). That final rule simplified and codified the rule for airline baggage liability. It provided that airlines in interstate and overseas air transportation may not limit their liability to less than $1,000 per passenger for loss, damage, or delay in the carriage of passenger baggage. In addition, carriers were required to provide written notice to passengers on or with their tickets concerning any limitation on baggage liability, including rules for fragile or perishable goods, and the availability, if the carrier provides it, of excess valuation insurance coverage. Although the rule was originally scheduled to become effective January 1, 1983, to coincide with the end of the Board's domestic tariff authority, the effective date was changed to February 22, 1983, in response to a petition by the Air Transport Association.

During the same period, the Board conducted a rulemaking proceeding that considered whether to set disclosure requirements for airlines that incorporate by reference some terms of their contracts of carriage. In EDR–444, 47 FR 28681, July 1, 1982, the Board proposed to include baggage liability within the notice of incorporated terms that carriers would provide under this part. The Board did not adopt that aspect of the proposal in the final rule (14 CFR Part 253, ER–1302, 47 FR 52128, November 19, 1982, effective January 1, 1983), because domestic baggage requirements were being handled in a separate proceedings, and as noted above, the new baggage rule required direct notice on the tickets of a carrier's baggage liability limitations.

On December 17, 1982, certain members of the Air Transport Association (ATA) petitioned the Board to repeal the new domestic baggage liability rule prior to its effective date. ATA argued, first, that the notice requirement was not practical, and second, that the Board failed to give adequate notice and an opportunity to comment before raising the minimum liability limitation from $750 to $1000. In addition, its also alleged that the Board did not fulfill the requirements of the Administrative Procedure Act in adopting the notice provisions in Part 254. Answers were filed by Associated Travel Nationwide (ATN) and the

VOL 48 ISS 97 MY 18 1983 UMI

Aviation Consumer Action Project (ACAP). The two main issues will be discussed separately. All comments filed in response to this NPRM will be in Docket 41443. Relevant materials from Dockets 40772, 40366 and 38621 will, however, be considered in this proceeding.

Notice Requirements

ATA argued that, "the requirement for specific ticket notice on general liability limits, on rules for fragile and/or perishable items and on excess valuation coverage presents extremely serious problems with respect to, standard industry ticket stock and carrier-issued tickets that involve interline transportation." It stated that since uniform liability limits are not envisioned or permitted by Part 254, travel agents and airlines must include additional, specific information concerning liability limitations for each airline on every ticket. According to ATA, the rule results in undue burden and undermines the efficiencies of universal ticket stock.

ATA listed a number of practical problems. First, travel agents and air carrier personnel writing interline tickets would need to know the liability limits, and any other applicable rules, of well over 100 air carriers. If ticket stuffers were used, each ticketing location would have to keep an adequate inventory on hand for each carrier represented. ATA also believed that if there were an error, the transporting carrier would be bound by the error or omission. ATA, therefore, asked that baggage liability limits be among those areas incorporated by reference pursuant to § 253.5(b).

In support of its petition, ATA noted that baggage liability information is now available from three different sources. It has already voluntarily included the following notice on its standard ticket stock: "Incorporated terms may include, but are not restricted to * * * 2) Limits on liability for baggage, including fragile or perishable goods, and the availability of excess valuation coverage." Second, under § 253.5(b), detailed information must now be available at all U.S. ticketing locations. According to ATA, their publication "Conditions of Carriage—Summary of Incorporated Terms," provides such information. Finally, under § 253.4(c), carriers are required to provide full text copies of their terms that are incorporated by reference to passengers on request.

ATA also argued that the CAB has taken no action to correct the mandatory ticket notice contained in § 221.176. Since ATA filed its petition, the Board has acted by adopting a conforming amendment (ER–1310, 48 FR 277, January 4, 1983). ER–1310 eliminated all Board-mandated language on tickets and countersigns concerning domestic baggage liability, so that carriers would remain free to provide notice as they choose. The effective date of this rule has not been stayed.

Finally, ATA argued that the notice of proposed rulemaking contained no discussion of air carriers' duty to provide notice to passagers in the area of baggage liability. It stated that contrary to the requirements of the Administrative Procedure Act, the Board failed to provide adequate notice, opportunity to comment and did not provide a statement of basis and purpose that would enable a reviewing court to evaluate the reasonableness of the regulation.

Associated Travel Nationwide (ATN) supported ATA's petition. It stated that "the only possible means of accommodating the Board regulations would be the insertion of individual carrier stuffers in each ticket or a requirement that agents fill in a blank on each ticket." It argued that the notice requirement is extremely burdensome to travel agents and that implementation would be almost impossible.

The Aviation Consumer Action Project (ACAP) opposed ATA's petition to allow airlines to incorporate their baggage rules by reference. ACAP argued that the current requirement in § 254.4 not only gives passengers much better notice than would be provided through incorporation by reference, but will help the marketplace work by highlighting an important area of service competition. It stated that incorporation makes no sense in such an important consumer area, given the fact that there have always been a large number of complaints in this area, and that inadequate notice may result in substantial loss for passengers. ACAP further argued that by leaving the notice requirements as they are, the Board would be able to compare the adequacy of the notice given by airlines under the common law with the adequacy of notice given by airlines under Part 253. ACAP rejected ATA's argument that ticket stuffers will be required, since carriers have been able to prepare a uniform notice for subjects on which carrier practices vary. Finally, it argued that the burden of providing notice to passengers of the baggage rules is outweighed by the benefits to passengers of having a more complete, readily accessible notice.

At the time it issued the new baggage rule, Part 254, the Board did not fully consider the consequences of the notice requirements of the rule. They were not greatly changed: the carriers had been providing specific notice of baggage liability limitations for years, pursuant to a requirement contained in the rules dealing primarily with tariffs, 14 CFR 221.176. Section 221.176 had specified the actual notice to be provided, including the amount. This relieved carriers from any discretion in the matter, and the notice could therefore be printed routinely on all uniform ticket stock.

The new Part 254 would require carriers to state their limitations as before, but does not specify what those limitations are to be. The intent is for carriers to develop their liability limitations individually, under the influence of competitive forces. The difference, it seems, is crucial. Now the routine printing of a uniform baggage liability limit on ticket stock by a central agency such as ATA or the Air Traffic conference, would have anticompetitive implications. Thus, under Part 254 as it stands each carrier must separately print and distribute to all ticketing locations—all travel agencies—its own version of its baggage liability limits, to be included with each ticket for that carrier's service. As ATA pointed out, this would levy significant costs on travel agencies, and on the writing of each ticket, and would undermine the uniform ticket stock system that was sought to be preserved by the issuance of the incorporation by reference of terms of contract rule, 14 CFR Part 253.

The Board tentatively finds that such costs would be unjustified, and hereby is proposing to amend both Parts 253 and 254 to allow carriers to incorporate their baggage liability terms by reference. Paragraph (b)(1) of § 253.5 would be amended to add limits on air carriers' liability, including those for fragile or perishable items, and the availability of excess valuation insurance, to the list of items on which passengers are advised to ask for information at their ticketing location. In Part 254, § 254.4, requiring specific notice on or with each ticket of baggage liability limitations, would be amended to allow either of two optional forms. The first would be a statement of the carrier's actual monetary baggage liability limitation. The second would be the following statement: "Federal rules require any limit on an airline's bagage liability to be at least $1000 per passenger, except for flights on small aircraft where lower limits may apply. Airlines may have higher limits." The statement in the second option could be printed on standard ticket stock, thus avoiding the excessive costs of individualized ticket notice in the case of sales by travel agents, while still alerting passengers to their possible exposure in the case of baggage losses. The Board is of the opinion that these modifications to the notice requirements will solve potential practical problems as well as giving interested persons additional opportunity to comment on this issue.

The likelihood of a standardized notice on uniform ticket stock has also brought to the Board's attention the possibility that passengers might be misled as to their loss exposure when flying on small aircraft. The Board has until now not imposed any baggage liability requirements on air taxis. Passengers may, however, use a commuter air taxi as part of a trip that is ticketed on standard stock, which contains the notice described above. The language at the end of the notice is designed to alert passengers to the fact that small-aircraft flights may involve lower baggage liability limits.

Many commuters have liability limits below the Board-prescribed minimum. When a bag is lost during interline travel involving large and small aircraft, it is often difficult for the passenger to establish which airline is at fault and therefore which liability limit applies. This variance in liability limits is confusing and may result in unfairness to passengers.

The Board would like to receive comment on whether the proposed notice would be sufficient to warn the public about possible lower baggage liability limits on small-aircraft segments of multisegment trips. In the alternative, the Board is proposing to require any carrier, regardless of aircraft size, to observe the minimum baggage liability specified by the Board for large aircraft, for all flight segments included on the same ticket with a large-aircraft segment. Under this alternative, any carrier using small aircraft would have to use separate ticketing in order to have a baggage liability limit lower than the Board's minimum, thus avoiding the misleading effect of the statement appearing on regular ticket stock.

Liability Limitation

ATA argued that the Board did not meet the requirements of the Administrative Procedure Act (APA) in raising the minimum liability limitation from $750 to $1000. It stated that the Board failed to give adequate notice that it was considering raising the liability limitation, that as a result no ATA member addressed such a possibility in its comments to the rulemaking, and that the final rule failed to incorporate "a concise general statement of the basis and purpose" concerning the change.

ATA argued that the Board was limited in its final rule to choosing among the three alternatives presented for comment, and that if additional issues remain, that they should be the subject of separate rulemaking initiatives.

ACAP argued that the public was given adequate notice of the $1000 limit. It stated that the issue of the reasonableness of a $1000 limit was directly at stake in the proceeding, and that if the airlines felt that the Board was acting correctly in dropping the $1000 limitation, they should have commented, just as ACAP commented that the Board was acting incorrectly. Accordingly to ACAP, the baggage rulemaking offered airlines a second chance, in addition to Order 80–6–133, to express their views.

The Board believes that it has fully complied with the requirements of the APA, contrary to ATA's assertions. Previous limits were embodied in orders, not rules, and the show-cause proceeding to raise the limit to $1,000 was precisely analogous to a notice of proposed rulemaking under 5 U.S.C. 553. Many answers were filed in response to that show-cause order. The appropriate limitation level was noted in the NPRM and was logically a central feature of the proposed alternative rules. However, because the Board is inviting additional public comment on the notice issue, it is taking this opportunity to lay to rest the issue raised by ATA. The Board has suspended the effectiveness of Part 254, as noted below, and hereby invites interested persons to submit data, views, and arguments on the appropriateness of various liability limitations.

As noted in the NPRM and final rule, the Board is of the opinion that an increase in the minimum liability limitation is called for because of inflation over the last 6 years. In the orders setting the $750 baggage liability limitation (Orders 75–3–18 and 77–2–9), the Consumer Price Index was relied upon together with data concerning actual baggage claims to determine the approximate limit. The Board does not have precise data upon which to base a minimum liability level, because a new reporting requirement would have been needed in order to collect such data, while the Board's emphasis since adoption of the Airline Deregulation Act has been on reducing reporting requirements. The criteria used by the Board in 1976 and 1966 did not establish a strict correlation between increases in the CPI and increases in the minimum baggage liability limit. The Board had increased the minimum baggage liability by approximately two-thirds of the increase in the CPI from 1966 to 1977 when we last raised the limit to $750. Since the last increase in the baggage liability limitation from $500 to $750 became effective in May 1977, the Consumer Price Index for all Urban Consumers (US City Average; all items) has increased at an annualized inflation rate of 6.875 percent. The $1000 minimum would be about two-thirds of the increase in the CPI from 1977 to 1982. Overall, this would represent an annual inflation rate of about 5% since the $750 level was adopted in May 1977. The Board also proposes and requests comment on a minimum baggage liability of $1250 per passenger since, if the limitation were raised to reflect this actual rise in prices to December 1982, it would be $1214. Adding 3% in consideration of the current inflation rate and a projected effective date in mid-1983 would be $1250.

Excess Valuation Insurance

In ER–1305, the Board did not include a requirement that carriers offer excess valuation insurance. The rule merely required air carriers to give notice to passengers of the availability of such coverage, by written material on or with the ticket. The Board had assumed that most carriers would continue to make this insurance available. As the Board noted in the *Baggage Liability Rules Case*, 45 CAB Reports at 195, "[b]y providing a choice of rates with varying degrees of liability based on declared value, the basic limitation of liability is rendered legal, and is not considered an attempt by a carrier to free itself of responsibility for its own negligence." We assumed that it was in carriers' self-interest to provide such coverage in order to avoid potential unlimited liability under the common law.

Upon reconsideration, we are concerned that the absence of a requirement for excess valuation insurance may cause inconvenience or hardship for some travelers. Furthermore, in adopting a domestic baggage rule, the Board is setting a Federal standard and preempting States from regulating in the subject area. If carriers do not offer excess valuation coverage, passengers may not be able to recover for losses beyond the basic liability limitation offered by the carrier, and have no opportunity to protect themselves.

The Board is therefore proposing to add a requirement that carriers subject to Part 254 offer passengers the opportunity of purchasing excess valuation coverage, and provide conspicuous notice that it is available.

The Board recognizes that, as proposed, the requirement for excess

VOL 48 ISS 97 MY 18 1983 UMI

valuation insurance does not provide specifics: where and how it should be offered, in what amounts, with what coverage or exclusions, and at what cost. The practices of most carriers appear to be satisfactory in these aspects. The Board would at this point prefer, if possible, to assume that, under the general requirement, all carriers will establish reasonable practices, without the need for detailed requirements. The Board could, of course, monitor industry practices, attempt informally to have airlines modify unsatisfactory provisions, and if necessary change its rules at a later time. Comments are requested on the desirability of this approach.

Comments are also requested on how the availability of excess valuation insurance can be made compatible with expedited check-in procedures, such as curbside check-in.

Effective Date of Part 254

In a related rulemaking (ER–1305A, 48 FR 6981, February 17, 1983), the Board stayed the February 22, 1983, effective date of Part 254. In the interim, the baggage orders that currently govern domestic baggage liability will remain in effect, without any of their tariff-filing requirements. ATA's petition and the answers in response to it have raised important questions concerning the practicality of the notice requirement and the need for additional public comment in general. Rather than implement the rule as scheduled and then face the possibility of changes shortly thereafter, the rule has been stayed pending completion of this rulemaking.

The Board is setting a 30-day comment period in this rulemaking. There already have been lengthy rulemaking proceedings on both domestic baggage liability and incorporation by reference. Many comments were filed on most of the major issues by the industry, the public and other interested persons. The Board wishes to resolve these questions as soon as possible so that airlines and the public can adjust to the new post-tariff system.

Initial Regulatory Flexibility Analysis

Under the Regulatory Flexibility Act, Pub. L. 96–354, the Board concludes that this rule, if adopted, may have a significant economic impact on travel agents. There are about 20,000 travel agents, most of whom are small businesses. The effect of this rule would be to relieve travel agents of the burden of having to maintain different ticket notices for each carrier for which they sell tickets.

This rule may have a substantial economic impact on a substantial number of small air carriers. Under one proposal, small carriers that interline with other carriers using large aircraft would be required to provide written notice to passengers on or with their tickets of any monetary limitation for baggage limitation, or the Board-mandated language. Air taxis are presently required to post a sign stating their baggage liability limits. Small interlining airlines that chose to use the Board-mandated notice would have to have new ticket notices or use the ticket stock of the airline using large aircraft.

If the alternative proposal to extend the substantive requirements of Part 254 is adopted, there may be an additional economic impact on small carriers. The Board presently does not regulate the baggage practices of air taxis, except for the general notice requirement. If small carriers are held to the Part 254 levels, it might result in significantly higher liability limitations and higher claims. Because these carriers may choose to continue to offer a lower limitation for their on-line operations, some carriers may have a two-tier rule, depending on the type of operation. Such a system would require the printing and distribution of two types of notices. If a small carrier chose not to interline in order to avoid the higher limit, it might result in fewer passengers and increased costs per passenger.

Passengers in small communities might be affected if small carriers choose not to interline and therefore could not offer joint fares. Under the present system, many carriers offer interline passengers a joint fare that is less than the sum of the local fares. Curtailment of interline service might also result in passengers being required to make two or more reservation transactions and to pick up their luggage at connecting points.

The need, objective, and legal basis for this rule and the reporting and recordkeeping requirements involved are described above. It would not duplicate, overlap, or conflict with other Federal rules.

Advertising, Air carriers, Air transportation, Claims, Consumer protection, Freight, Law, and Travel.

All Members concurred and Members Bailey and Morales filed the following separate statements:

Statement of Member Elizabeth E. Bailey:

In this order the Board is proposing that airlines be required to make excess valuation insurance available to their passengers. I have some doubts about the need to regulate baggage liability; even without government intervention carriers have incentives to exercise reasonable care in the handling of passenger baggage and to insure passengers against possible loss. However, given the Board's determination that carriers must offer a minimum amount of insurance, a decision to require excess valuation insurance is unnecessary. Moreover, the Board is placing itself in the difficult position of having to rule on the details of the insurance including the reasonableness of the amounts offered and the manner in which it is sold. In these cases, the Board is intruding in an area where it doesn't belong and in a manner which may have the effect of limiting remedies already available to passengers in the courts. The more intimately involved the Board becomes in spelling out the details of insurance sales—including levels and manner of sale—the less likely courts will be to interpose their own judgment on the reasonableness of carrier practices when called upon to settle disputes in this area.

If the Board is concerned with the availability of excess valuation insurance, it should merely require that carriers make such insurance available and not require carriers to offer any minimal level of baggage liability insurance. This will have the effect that carriers will determine not only the rates of any excess valuation insurance, but to determine the level to which they will insure lost or damaged baggage if insurance is not purchased.

Such a system will give carriers the greatest degree of flexibility in determining their baggage liability and insurance. There is every reason to believe that this will lead to a better system of protection than the ad hoc framework the Board is attempting to fashion.

Elizabeth E. Bailey.

Statement of Member Diane K. Morales

I believe that a minimum airline baggage liability is both the best and the least regulatory way to ensure that air carriers can reasonably limit their liability and to ensure that consumers have the minimum necessary protection for loss, damage or delay in the carriage of their baggage by airlines.

Consumers should take many self-help measures to protect themselves against baggage losses. They do not have to pack valuables in checked luggage. They can make sure luggage is properly marked with identification tags and destination tags. They can check in early enough to ensure that baggage will make it on to their intended flight and that enough time is available between connections or stopovers to ensure transfer to successive flights. These important and readily available self-help measures convince me that consumers can and should bear much of the responsibility for preventing loss or damage to or delay in receiving their baggage.

However, even using these precautions, there is a point after which the consumers lose the ability to protect their luggage. It is possible that in the absence of government regulation in this area, carriers would have unlimited liability in the baggage area. Besides the constant threat of lawsuits, the removal of federal restrictions invites states to step in and impose new and possibly more restrictive regulations for airline liability. On the other hand, I think sound public policy requires us to provide a liability limitation so that some basic monetary recovery can be obtained, but that amount should truly be a minimum. The Board Members do differ on what that basic level should be. I initially preferred maintaining the current level of $750. However, given the Board's proposal to consider increases to this level, my tentative preference is to find that $1,000 is the appropriate minimum and is in keeping with the decisional standards established in previous Board proceedings. I do not believe our goal is to require absolute liability on the part of the carrier or to provide full monetary recovery for whatever may have been inappropriately packed in baggage.

The history of the Board's baggage liability regulations reveals that in years past, carriers have in fact attempted to set liability limits too low for loss or damage of, or delay to passenger baggage. The minimum liability amount has served over the years as a guarantee to consumers that, if they can *prove* their losses to a carrier or, if necessary, to a court, they will not be denied some modest monetary recovery because carriers had in advance unreasonably limited the responsibility they assumed for passenger baggage. The minimum liability amount does not guarantee a monetary settlement. Consumers have always had and will continue to have to prove their damages under the rule described in this Notice of Proposed Rulemaking. I do not believe that the Board is interfering with any remedies now available to consumers and to carriers in the courts.

My concerns about the availability of excess valuation insurance are many. Aside from the minimum baggage liability provided by carriers, it has been suggested that consumers who desire to insure their baggage for a higher amount should have guaranteed access to excess valuation insurance. For the past several years many carriers have voluntarily offered this insurance to customers who specifically requested it. It has recently been argued that all carriers should be required to promote and sell excess insurance either instead of or in addition to the minimum liability insurance.

I believe that, indeed, excess valuation insurance should be available to those passengers who require it; however, I am not now convinced that the burden should be on all carriers—majors, nationals, and commuters—to provide it. Such a proposal may tend to upset the fair balance of burdens the Board has weighed for carriers and consumers.

I wonder whether the administrative and operational complications of high volume purchases of excess valuation insurance may not exceed the benefits. Airlines presently require passengers to arrive at the airport at some specified period before departure time. Entitlement to the non-smoking seating and the denied boarding compensation is also based on early arrival to meet a carrier's check-in time. If excess baggage insurance is an added step to the purchase of tickets or express baggage lines at the airline counter, carriers will have additional administrative expense, especially personnel, to move the passengers along quickly. Carriers currently have an efficient system for processing passengers. Passengers who purchase and receive their tickets before the date of travel are able to stop in an express line to check their baggage, pass through a security point, and pick up their boarding pass at the gate.

Rather than interrupt this process, it is possible that excess valuation insurance can be purchased by alternative means. Passengers requiring additional baggage insurance often have personal homeowners insurance policies to cover these needs. Also, companies such as American Express offer a $3.00 insurance policy (with those tickets charged on American Express) for excess life insurance and $1,250 baggage liability insurance. In airports, passengers may purchase at concession stands additional life insurance before boarding any airline. Perhaps excess baggage insurance would continue to be offered voluntarily by carriers and/or insurance companies at the check-in counter or at concession stands as additional life insurance is sold. There are surely additional alternatives not mentioned here. I look forward to reading all comments the Board receives on the question of excess valuation insurance and whether and how it should be administered.

Again, I am seeking both the best and least regulatory way to ensure that air carriers can reasonably limit their liability and to ensure that consumers have the necessary protection in the carriage of the luggage by airlines.

Diane K. Morales.

PART 253—[AMENDED]

Accordingly, the Civil Aeronautics Board proposes to amend 14 CFR Chapter II as follows:

1. In Part 253, *Notice of Terms of Contracts of Carriage*, paragraph (b)(1) of § 253.5 would be revised by adding a reference to baggage terms so that it would read:

§ 253.5 Notice of incorporated terms.

* * * * *

(b) * * *

(1) Limits on the air carrier's liability for personal injury or death of passengers, and for loss, damage, or delay of goods and baggage, including fragile or perishable goods; and the availability of excess valuation insurance coverage.

* * * * *

2. Part 254, *Domestic Baggage Liability*, would be revised to read as follows:

PART 254—DOMESTIC BAGGAGE LIABILITY

Sec.

254.1 Purpose.
254.2 Applicability.
254.3 Definitions.
254.4 Carrier liability.
254.5 Excess valuation insurance.
254.6 Notice requirement.

Authority: Secs. 204, 403, 404, and 411, Pub. L. 85–726, as amended, 72 Stat. 743, 758, 760, 769; 49 U.S.C. 1324, 1373, 1374, 1381.

§ 254.1 Purpose.

The purpose of this part is to establish rules for the carriage of baggage in interstate and overseas air transportation. The part sets permissible limitations of air carrier liability for loss, damage, or delay in the carriage of passenger baggage and requires air carriers to provide certain types of notice to passengers.

§ 254.2 Applicability.

This part applies to air carriers with respect to charter or scheduled passenger service in interstate or overseas air transportation.

§ 254.3 Definitions.

"Large aircraft" means any aircraft designed to have a maximum passenger capacity of more than 60 seats.

§ 254.4 Carrier liability.

In any flight segment using large aircraft, an air carrier shall not limit its liability for provable direct or consequential damages resulting from the disappearance of, damage to, or delay in delivery of a passenger's personal property, including baggage, in its custody to an amount less than $1000 for each passenger.

Alternative Proposals for § 254.4: 1. After the opening phrase "In any flight segment using large aircraft," the following language would be added: "or on any flight segment that is included on the same ticket as another flight segment that uses large aircraft,".

2. Instead of the figure "$1000" in the above section, the figures "$750" or "$1250" would be substituted.

§ 254.5 Excess valuation insurance.

In any flight segment subject to this part, an air carrier shall make available excess valuation insurance.

§ 254.6 Notice requirement.

For any flight segment using large aircraft, or that is included on the same ticket as another flight segment that uses large aircraft, an air carrier shall provide to passengers, by written material included on or with its ticket, the notices set forth in paragraphs (a) and (b).

(a) Either—

(1) Notice of any monetary limitation on its baggage liability to passengers; or

(2) The following notice: "Federal rules require any limit on an airline's baggage liability to be at least $1000 per passenger, except for flights on small

VOL 48 ISS 97 MY 18 1983 UMI

aircraft where lower limits may apply. Airlines may have higher limits."

(b) Conspicuous notice that excess valuation insurance is available to cover any flight segment subject to this part.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 275

[Rel. No. IA-860, File No. S7-974]

Proposed Amendments to Investment Adviser Requirements Concerning Agency Cross Transactions for Advisory Clients

AGENCY: Securities and Exchange Commission.

ACTION: Proposed amendments to rule.

SUMMARY: The Commission is publishing for comment proposed amendments to a rule under the Investment Advisers Act of 1940 which deems registered investment advisers who effect agency cross transactions for advisory clients pursuant to blanket consents to be in compliance with the Advisers Act if they follow the procedures specified in the rule. The amendments would reduce the cost and burden to advisers of complying with the rule in effecting agency cross transactions for clients by eliminating the requirement that the client's written consent to such transactions be revewed at least annually. In view of the other protections of the rule, the Commission believes that the benefits to investment advisory clients of requiring annual renewals may not justify the burden to investment advisers in obtaining them.

DATES: Comments should be received on or before June 28, 1983.

ADDRESSES: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Stop 6-9, Washington, D.C. 20549. Comment letters should refer to File No. S7-974. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Mary S. Champagne, Special Counsel (202) 272-2079 or Arthur E. Dinerman, Esquire (202) 272-3021, Office of Regulatory Policy, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, N.W., Stop 5-2, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: Rule 206(3)-2 [17 CFR 275.206(3)-2] under the Investment Advisers Act of 1940 ("Advisers Act") [15 U.S.C. 80b-1 et seq.] [1] provides a method for a registered investment adviser or a registered broker-dealer controlling, controlled by or under common control with such an adviser, to effect agency cross transactions [2] for an advisory client in compliance with Section 206(3) of the Advisers Act [15 U.S.C. 80b-6(3)]. As here pertinent, that section generally prohibits an investment adviser from effecting an agency cross transaction involving a client's account without disclosing to the client in writing before the completion of such transaction the capacity in which he is acting and obtaining the client's consent to the transaction.

Rule 206(3)-2 deems a registered adviser to be in compliance with Section 206(3) if the adviser obtains written blanket client consent to agency cross transactions for a period not to exceed one year, provided other conditions specified in the rule are met. Under the rule, the investment adviser must make full written disclosure to the client that, with respect to agency cross transactions, the adviser or other person relying on the rule will act as broker for, receive commissions from, and have a potentially conflicting division of loyalties and responsibilities regarding, both parties to such transactions. In addition, the adviser or other person relying on the rule must send to the client at or before completion of each agency cross transaction a written confirmation containing certain specified information and offering to furnish specified additional information, and must send to each client, within 30 days prior to the expiration of the blanket consent, a written disclosure statement identifying the total number of transactions during the period and the total amount of all commissions or remuneration received by the adviser and any person relying on the rule in connection with agency cross transactions during the period. Finally, the rule requires that each written disclosure and confirmation required by the rule include a conspicuous statement that the client's blanket written consent can be revoked at any time by written notice from the client to the investment adviser of any other person relying on the rule.[3]

Prior to adoption of Rule 206(3)-2, investment advisers as a practical matter were precluded from entering into agency cross transactions involving client accounts because the requirement of Section 206(3) of the Advisers Act that the adviser make written disclosure to the client and obtain the client's consent prior to completion of each such transaction imposed delays which made expeditious execution of such transactions generally impossible. Rule 206(3)-2 is premised on the view that agency cross transactions can be of benefit to advisory clients and should be permitted, provided there are adequate safeguards to protect advisory clients from the potential for abuse which exists when the adviser acts on behalf of both parties to the transaction. The rule generally has provided an effective method to permit such transactions consistent with investor protection.

It appears, however, that the condition of the rule which requires the adviser to obtain express written renewal of the client's blanket consent at least annually may impose unwarranted administrative burdens on advisers. The Commission has been informed by a number of registered advisers which effect agency cross transactions for clients in reliance on the rule that, although practically all clients who give consents to such transactions renew those consents annually, the process of obtaining such renewals often involves numerous mailings and subsequent phone calls to clients. To the extent that obtaining annual renewals is costly and time consuming to advisers, the Commission believes that the benefits to clients of requiring annual renewals may not justify the burdens to advisers in obtaining them, in light of other provisions of the rule designed to protect advisory clients. Specifically, the

[1] Investment Advisers Act Release No. 589, June 1, 1977 [42 FR 29300].

[2] Under the rule, an agency cross transaction is defined to mean "a transaction in which a person acts as an investment adviser in relation to a transaction in which such investment adviser, or any person controlling, controlled by or under common control with such investment adviser, acts as broker for both such advisory client and for another person on the other side of the transaction".

[3] Rule 206(3)-2 expressly does not apply to a transaction if the investment adviser, or the adviser and any person controlling, controlled by or under common control with the adviser, recommended the transaction to both the seller and the purchaser. Nor does the rule relieve an adviser, or other person relying on the rule, from acting in the best interests of the client with respect to the transaction or relieve the adviser or other person from any disclosure obligation imposed by Section 206 (1) [15 U.S.C. 80b-6(1)] or (2) [15 U.S.C. 80b-6(2)] of the Advisers Act or by other applicable provisions of the federal securities laws.

requirements that: (1) Certain written disclosures be made to the client prior to obtaining the client's blanket consent, (2) confirmations of each transaction be sent to the client, (3) a summary of such transactions be furnished periodically, and (4) each writing sent to the client include conspicuous disclosure that the client's written consent to agency cross transactions can be revoked by the client at any time, would appear to protect adequately the interests of advisory clients with respect to such transactions. Accordingly, the Commission proposes to amend paragraph (a)(i) of Rule 206(3)-2 to delete the limitation that a client's written blanket consent to agency cross transactions authorize such transactions only for a period not to exceed one year. In addition, the Commission is proposing a conforming amendment to paragraph (a)(iii) of the rule. That paragraph, which now requires the adviser to furnish to the client, within 30 days of the expiration of the client's consent, certain summary information relating to agency cross transactions entered into during that period, would be amended to require that such summary information be furnished to the client at least annually.

The Commission also proposes to amend the rule by redesignating the paragraphs within paragraph (a) for the purpose of clarifying any possible ambiguity resulting from the present format.

Regulatory Flexibility Act

The Chairman of the Commission has certified that the proposed amendments, if adopted, would not have a significant economic impact on a substantial number of small entities.

Text of Proposed Amendment

PART 275—RULES AND REGULATIONS, INVESTMENT ADVISERS ACT OF 1940

It is proposed to amend Part 275 of Chapter II of Title 17 of the Code of Federal Regulations under the Investment Advisers Act of 1940 as follows:

By revising paragraph § 275.206(3)-2 to read as follows:

§ 275.206(3)-2 Agency cross transactions for advisory clients.

(a) An investment adviser registered under Section 203 of the Act (15 U.S.C. 80b-3), or a person registered as a broker-dealer under Section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 78o) and controlling, controlled by or under common control with an investment adviser registered under Section 203 of the Act, shall be deemed in compliance with the provisions of Section 206(3) of the Act (15 U.S.C. 80b-6(3)) in effecting an agency cross transaction for an advisory client, if:

(1) The advisory client has executed a written consent prospectively authorizing the investment adviser, or any other person relying on this rule, to effect agency cross transactions for such advisory client, provided that such written consent is obtained after full written disclosure that with respect to agency cross transactions the investment adviser or such other person will act as broker for, receive commissions from, and have a potentially conflicting division of loyalties and responsibilities regarding, both parties to such transactions;

(2) The investment adviser, or any other person relying on this rule, sends to each such client a written confirmation at or before the completion of each such transaction, which confirmation includes (i) a statement of the nature of such transaction, (ii) the date such transaction took place, (iii) an offer to furnish upon request, the time when such transaction took place, and (iv) the source and amount of any other remuneration received or to be received by the investment adviser and any other person relying on this rule in connection with the transaction, *Provided, however,* That if, in the case of a purchase, neither the investment adviser nor any other person relying on this rule was participating in a distribution, or in the case of a sale, neither the investment adviser nor any other person relying on this rule was participating in a tender offer, the written confirmation may state whether any other remuneration has been or will be received and that the source and amount of such other remuneration will be furnished upon written request of such customer;

(3) The investment adviser, or any other person relying on this rule, sends to each client, at least annually, and with or as part of any written statement or summary of such account from the investment adviser or such other person, a written disclosure statement identifying the total number of such transactions during the period since the date of the last such statement or summary, and the total amount of all commissions or other remuneration received or to be received by the investment adviser or any other person relying on this rule in connection with such transactions during such period;

(4) Each written disclosure and confirmation required by this rule includes a conspicuous statement that the written consent referred to in paragraph (a)(1) of this section may be revoked at any time by written notice to the investment adviser, or to any other person relying on this rule, from the advisory client; and

(5) No such transaction is effected in which the same investment adviser or an investment adviser and any person controlling, controlled by or under common control with such investment adviser recommended the transaction to both any seller and any purchaser.

* * * * *

Statutory Authority

The Commssion hereby proposes to amend Rule 206(3)-2 pursuant to the authority contained in Section 211(a) of the Advisers Act [15 U.S.C. 80b-11(a)].

By the Commission.

George A. Fitzsimmons,

Secretary.

May 12, 1983.

Regulatory Flexibility Act Certification

I, John S. R. Shad, Chairman of the Securities and Exchange Commission, hereby certify, pursuant to 5 U.S.C. 605(b), that the proposed amendments to Rule 206(3)-2 [17 CFR 275.206(3)-2] under the Investment Advisers Act of 1940 [15 U.S.C. 80b-1 et seq.] set forth in Investment Advisers Act Release No. 860, if promulgated, will not have a significant economic impact on a substantial number of small entities.

Rule 206(3)-2 provides a means for a registered investment adviser, or a broker-dealer affiliated with such an adviser, to enter into agency cross transactions involving a client's account without having to provide written disclosure and obtain client consent prior to each such transaction as otherwise required by Section 206(3) of the Advisers Act [15 U.S.C. 80b-6(3)].

The reason for this certification is that the proposed amendments will not affect a substantial number of small entities. The Commission's staff has estimated, based on its program of routine investment adviser examinations, that fewer than one percent of the 5,900 registered investment advisers (i.e., not more than 58 investment advisers) enter into agency cross transactions in reliance upon Rule 206(3)-2. The effect of the amendments would be to reduce the costs of compliance for these advisers. Although the staff does not know how many of the approximately 58 investment advisers using the rule are

VOL
48
ISS
97
MY
18
1983
UMI

small entities, the staff thinks the magnitude would not be greater than one-half, or 29 firms.

Dated: May 12, 1983.

John S. R. Shad,

Chairman.

BILLING CODE 8010-01-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2606

Rules for Administrative Review of Agency Decisions

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Proposed rule.

SUMMARY: The Pension Benefit Guaranty Corporation's regulation on Administrative Review of Agency Decisions sets forth the rules governing the issuance of certain initial determinations made by the Pension Benefit Guaranty Corporation (the "PBGC") and the procedures for requesting and obtaining administrative review by the PBGC of those determinations. This proposed amendment makes a number of modifications to the final regulation. The regulation, as the agency proposes to amend it, is reprinted in full for the convenience of the public. The modifications are being proposed to take into account agency experience during the three years this rule has been in effect. The amendments are intended to streamline the review process, clarify issues that have created confusion in the past, and modify the Appeals Board procedures to more effectively utilize the agency's resources. The amendments would also conform the regulation with the multiemployer Pension Plan Amendments Act of 1980.

DATE: Comments must be received on or before July 18, 1983.

ADDRESSES: Comments should be addressed to the Office of the General Counsel, Pension Benefit Guaranty Corporation, Suite 7200, 2020 K Street, N.W., Washington, D.C. 20006. Written comments will be available for public inspection at the PBGC, Suite 7100, at the above address, between the hours of 9:00 A.M. and 4:00 P.M. on regular business days.

FOR FURTHER INFORMATION CONTACT: Deborah West, Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006; (202) 254-3010. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On July 19, 1979, the PBGC published a final rule regarding administrative review of agency decisions (44 FR 42181). The purpose of the regulation was to ensure that persons who are adversely affected by certain determinations of the PBGC are provided with an opportunity to contest and to obtain review of those determinations. The current regulation applies to eleven types of determinations and provides for two types of agency review. Seven types of determinations are subject to appeal; four are subject to reconsideration. An Appeals Board was established to consider appeals. On April 25, 1983, the PBGC amended the regulation to change the composition of the Appeals Board, 48 FR 17070.

This proposal, if adopted, would modify the regulation in several ways. First, the formal reconsideration process under the regulation would be eliminated. This action is being proposed because the PBGC now believes a formal reconsideration procedure is unnecessary. The PBGC may informally reconsider determinations not subject to the regulation and will, of course, correct erroneous determinations, however discovered, without reference to the formal administrative review process. The amendment adds additional PBGC determinations to the list of determinations subject to administrative appeal. The regulation's provision concerning requests for assistance in obtaining information is modified in the proposed rule to make it clear that this provision applies to information in the possession of parties other than the PBGC and not to information available from the PBGC. The regulation is clarified to indicate that there is no appeal of determinations made final upon issuance.

The proposed rule provides that determinations regarding benefit entitlement of participants and beneficiaries under single employer plans (sections 4022 (a) and (b), and 4022B of the Act) shall be effective upon issuance. The regulation's provision on late-filed appeals is changed to provide that such appeals shall be reviewed by the Appeals Board if the Board determines that good cause is shown for the late filing.

The amendment makes technical changes that are necessary to clarify the regulation by conforming the regulation to the Multiemployer Act. Finally, minor clarifying changes are made in the language of several sections.

Elimination of Reconsideration Process; Additional Determinations Subject to Administrative Appeal

The formal reconsideration process under the regulation is eliminated in this proposal. PBGC now believes a formal reconsideration procedure is unnecessary. The current dichotomy between appeals and reconsideration has proven cumbersome and confusing. Determinations not subject to appeal may be informally reconsidered on request, and, of course, the PBGC will correct erroneous determinations, however discovered, whether or not subject to appeal.

The proposed amendment adds a new item to the list of PBGC determinations subject to appeal: determinations under section 4022B of the Act regarding limitations on guaranteed benefit entitlement under single employer plans.

If the amendment is adopted, cases in which a determination was made prior to the regulation's effective date will be processed pursuant to the current administrative review procedure.

Appeals Board Jurisdiction

The proposed regulation provides, at § 2606.3, that there shall be within the PBGC an Appeals Board to consider determinations listed as appealable at § 2606.1(b) of the regulation, other than those determinations made final upon issuance under § 2606.23(b). The Appeals Board shall consider, in reaching its decision, applicable law and policy, relevant facts, and equity.

PBGC Assistance in Obtaining Information

Section 2603.3 of the current regulation provides for PBGC assistance in obtaining information necessary to file an appeal (or necessary to a decision whether to file an appeal). This provision is intended to apply only to situations where the needed information is in the possession of a party other than the PBGC (for example, a bank or insurance company). Where the PBGC is in possession of revelant records, an appellant may make a request under the Freedom of Information Act or the Privacy Act. Thus, the provision, at § 2606.4 of the proposed rule, is being modified so that it is clear that this provision applies only to information in the possession of parties other than the PBGC.

Effective Date of Determinations Under Sections 4022 (a) and (b), and 4022B of the Act

Under the current regulation, the effective date of a determination that is subject to appeal and that is not made

"immediately effectively" under current § 2606.23(b) is stayed until the Appeals Board disposition of the appeal. Thus, when a participant who is receiving a benefit in excess of the amount guaranteed by Title IV of the Act files an appeal, the current regulation obligates the PBGC to continue paying the higher benefits until the Appeals Board rules on the appeal. Often these excess amounts paid are not recovered by PBGC. The result is that plan assets are depleted, and a greater expenditure of PBGC's insurance funds is required. To alleviate this problem, the proposed regulation provides, at § 2606.23, initial determinations of benefit amounts under sections 4022 (a) and (b), and 4022B of the Act shall be effective upon issuance. Should the Appeals Board determine that an appellant is entitled to a greater amount than the PBGC initially determined, appellant will be reimbursed for underpayments made during the period after the plan terminated.

The PBGC believes that the likelihood of an erroneous determination is small. Moreover, the proposed regulation provides that the effective date of the determination regarding benefit entitlement under sections 4022 (a) and (b) and 4022B of the Act may be stayed by the Appeals Board until the Board's disposition of the appeal. A temporary stay may be granted by the Appeals Board. Stays will be granted only where there exist extraordinary circumstances.

Review of Determinations Made Final on the Date of Issuance

Section 2606.23(b) of the current regulation provides that the PBGC may, in its discretion, make an initial determination "effective" on the date it is issued, and that, in such cases, there is no obligation to exhaust administrative remedies with respect to that determination by filing an appeal. As discussed above, the proposed regulation provides that PBGC benefit determinations are generally "effective" upon issuance. However, such determinations are still subject to Appeals Board review and thus even though effective immediately do not constitute the final agency action on the matter. To avoid confusion regarding terminology, the provision, renumbered § 2606.24(b), is changed to provide that when the PBGC intends a decision to be final agency action, that determination is "final" on the date of issuance.

As the preamble to the current regulation noted, there may be cases where it is warranted to make a determination final immediately. However, the preamble to the final regulation stated that "administrative review of the determination would still be available to the person if he or she requests it." The PBGC believes it necessary to clarify this statement. This statement does not mean that an administrative appeal is available. The words "administrative review" mean that the PBGC may informally review a determination under current § 2606.23(b), but would not stay the decision pending review. The same factors that lead the PBGC to make a determination final upon issuance will normally require that the delay resulting from the appeals process be avoided. Accordingly, in appropriate cases, PBGC will make a determination final upon issuance, eliminating Appeals Board review. To make this clear, the proposed amendment stated that there is no PBGC Appeals Board review of determinations that are made final on the date of issuance.

Nothing in the proposed regulation is intended to limit settlement discussions between the PBGC and the aggrieved party even while an appeal is pending. PBGC proposes to amend the regulation to state (1), at § 2606.23(b), that determinations under that subsection are final upon issuance, and (2) at § 2606.3, that the Appeals Board has no jurisdiction over such determinations. This is consistent with PBGC's regulation on employer liability for single employer plan terminations, which provides, at 29 CFR 2622.9(c), that there is no right to appeal the assessment of liability when a determination is made "immediately effective."

Finally, no determination issued by the Executive Director is subject to appeal under this part.

Non-timely Requests for Review

The current regulation provides that the PBGC will process a late-filed appeal if (1) the person requesting review demonstrates in his or her request that he or she did not file a timely appeal because he or she neither knew nor could have known of the initial determination, and (2) the appeal was filed within 45 days of the date the person first learned of the initial determination. The proposed regulation provides, at § 2606.36, that late-filed appeals, i.e., appeals filed after the 45-day appeals period plus any additional time granted by the Appeals Board pursuant to § 2606.35, may be processed if the Appeals Board determines that good cause is shown for the late filing.

Record Before the Appeals Board

The present regulation does not provide for a uniform method by which appellants may fully understand the basis for a disputed initial determination. The proposed regulation would add such a procedure. It provides that the Appeals Board shall serve the appeal upon the office within the PBGC that issued the disputed initial determination. The office shall, within 30 days, compile and submit to the Board a copy of the initial determination and any other documents which the office believes are necessary to support the initial determination. The office may also submit supporting statements within this 30 day period.

The Appeals Board shall then send all material submitted by the office to the appellant except such material as the appellant has already been provided. The appellant must file any response to the material within 15 days of the date of the Appeals Board letter transmitting the material. This change, then, is to ensure that all appellants have an opportunity to review and comment upon the records relied upon by the PBGC in making its initial determination.

Changes Due to the Enactment of the Multiemployer Pension Plan Amendments Act of 1980

Certain technical changes in the regulation are being made to conform the citations in the regulation to the proper section numbers of the Employee Retirement Income Security Act of 1974, as amended by the Multiemployer Act.

The regulation currently provides that determinations with respect to benefit entitlement under a plan under section 4022(a) and determinations of the amount of guaranteed benefits under section 4022(b) are subject to appeal. The Multiemployer Act added a new section on rules for aggregate limits on guaranteed benefits (section 4022B), which rules are essentially those previously contained in section 4022(b)(5). Accordingly, the proposed regulation authorizes appeal of determinations under section 4022B by the PBGC regarding limitations on guaranteed benefit entitlement under a covered single employer plan.

The regulation currently provides that coverage determinations under section 4082(b) of ERISA are subject to administrative review. Under the Multiemployer Act, section 4082(b) is redesignated as section 4402(b). The proposed regulation makes the necessary conforming changes.

Other Changes

Nonsubstantive clarifying changes were made in the language of several sections. To accommodate the changes discussed above and to make the

VOL
48
ISS
97
MY
18
1983
UMI

regulation clearer and more useful to the public, the regulation has been reorganized. The subpart on reconsiderations has been deleted, along with all other references to reconsideration.

The Pension Benefit Guaranty Corporation has determined that this regulation is not a "major rule" for the purposes of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This conclusion is based on the fact that this regulation is merely a procedural regulation which provides an administrative appeal route for aggrieved persons so that they may avoid, in certain instances, expensive federal court litigation.

Under section 605(b) of the Regulatory Flexibility Act, the Pension Benefit Guaranty Corporation certifies that this rule will not have a significant economic impact on a substantial number of small entities. The reason for this certification is that the rule is essentially procedural in nature. In addition, this regulation will have little or no adverse economic impact on small entities and will, in many cases, substantially lessen the financial burden of contesting agency action in expensive court proceedings by providing an avenue for expediting inexpensive administrative review. Therefore compliance with sections 603 and 604 of the Regulatory Flexibility Act is waived.

Interested parties are invited to submit comments on this proposed regulation. Comments should be addressed to: Deborah West, Office of the General Counsel, Pension Benefit Guaranty Corporation (240), Suite 7200, 2020 K Street, NW., Washington, D.C. 20006. Written comments will be available for public inspection at the above address, Suite 7100, between the hours of 9:00 a.m. and 4:00 p.m. Each person submitting comments should include his or her name and address, identify this proposed regulation, and give reasons for any recommendation. This proposal may be changed in light of the comments received.

For the convenience of the public and to have the entire proposed amended rule in one place, the regulation is being reprinted below in its entirety.

List of Subjects in 29 CFR Part 2606

Administrative practice and procedure, Conflict of interests, Penalties.

In consideration of the foregoing, the PBGC proposes to amend Chapter XXVI of Title 29, Code of Federal Regulations, by revising Part 2606 as follows:

PART 2606—RULES FOR ADMINISTRATIVE REVIEW OF AGENCY DECISIONS

Subpart A—General Provisions

Sec.

2606.1 Purpose and scope.
2606.2 Definitions.
2606.3 Appeals Board jurisdiction.
2606.4 PBGC assistance in obtaining information.
2606.5 Representation.
2606.6 Request for confidential treatment.
2606.7 Exhaustion of administrative remedies.

Subpart B—Determinations

2606.21 Purpose and scope.
2606.22 Form and contents of determinations.
2606.23 Effective date of determinations; final agency action.

Subpart C—Administrative Appeals

2606.31 Purpose and scope.
2606.32 Who may appeal or participate in appeals.
2606.33 When to file.
2606.34 Filing of documents.
2606.35 Extension of time.
2606.36 Non-timely request for review.
2606.37 Computation of time.
2606.38 Contents of appeal.
2606.39 Record before the Appeals Board.
2606.40 Opportunity to appear and to present witnesses.
2606.41 Consolidation of appeals.
2606.42 Appeals affecting third parties.
2606.43 Powers of the Appeals Board.
2606.44 Decision by the Appeals Board.
2606.45 Referral of appeal to the Executive Director.

Authority: Sec. 4002(b)(3), Pub. L. 93–406, as amended by Sec. 403(1), Pub. L. 96–364, 94 Stat. 1208, 1302 (1980) (29 U.S.C. 1302(b)(3)).

Subpart A—General Provisions

§ 2606.1 Purpose and scope.

(a) *Purpose.* This part sets forth the rules governing the issuance of all determinations issued on or after the effective date of this part by the PBGC involving the matters set forth in paragraph (b) of this section and the procedures for requesting and obtaining administrative review by the PBGC of those determinations.

(b) *Scope.* This part applies to the following determinations made by the PBGC on or after the effective date of this part and to the review of those determinations:

(1) Determinations that a plan is not covered under section 4021 or section 4402(b) of the Act;

(2) Determinations under section 4022(a) of the Act with respect to benefit entitlement of participants and beneficiaries under covered single employer plans;

(3) Determinations regarding the amount of guaranteed benefits of participants and beneficiaries under covered single employer plans under sections 4022(b) or 4022B of the Act;

(4) Determinations of the amount of money subject to recapture pursuant to section 4045 of the Act;

(5) Determinations of the amount of employer liability under section 4062 of the Act;

(6) Determinations of the amount of contingent liability under section 4063 of the Act;

(7) Determinations of the amount of employer liability under section 4064 of the Act;

(c) *Determinations not covered by this part.* Nothing contained in this part shall limit the authority of the PBGC to review informally, either upon request or on its own motion, determinations that are not subject to this part when the PBGC determines, in its discretion, that it is appropriate to do so.

§ 2606.2 Definitions.

As used in this part:

"Act" means the Employee Retirement Income Security Act of 1974, as amended.

"Aggrieved person" means any participant, beneficiary, plan administrator, plan sponsor, or employer, adversely affected by a determination of the PBGC covered by this part with respect to a pension plan in which such participant, beneficiary, plan administrator, plan sponsor, or employer has an interest. The term "employer" includes all trades and businesses under common control within the meaning of Part 2612 of this chapter, and all employers who contribute to or have contributed to a pension plan to which more than one employer contributes.

"Appeals Board" means a board consisting of a Chairperson appointed by the Executive Director of the PBGC and two senior agency official appointed by the Executive Director to serve as regular members. Other senior agency official may serve as alternate members in the event that a regular member is not available to serve or is unable to serve. Such alternates may be appointed pursuant to a list designated by the Executive Director and shall serve in the order designated in that list. The General Counsel, and the Executive Director or the Deputy Executive Director, in the absence of the Executive Director, shall be ex officio members of the Appeals Board. The General Counsel may, as an ex officio member of the Appeals Board, if he or she chooses, vote on any matter before the Board. Appeals shall be decided by a majority vote of the Board members, but if the General Counsel's vote on an appeal results in a tie vote, the appeal shall be referred to the Executive Director as specified in § 2606.45. The Executive Director may designate the Deputy Executive Director to decide any appeal referred to the Executive Director from the Appeals Board under this section in accordance with § 2606.45. A person may not serve on the Appeals Board with respect to any case in which he or she made a determination with respect to the merits of the determination subject to appeal.

"Appellant" means any person filing an appeal under Subpart C of this part.

"PBGC" means the Pension Benefit Guaranty Corporation.

§ 2606.3 Appeals Board jurisdiction.

There shall be within the Pension Benefit Guaranty Corporation an Appeals Board to consider administrative appeals from determinations listed at § 2606.1(b), other than those determinations made final upon issuance under § 2606.23(b) of this part.

§ 2606.4 PBGC assistance in obtaining information.

A person who lacks information or documents necessary to file an appeal pursuant to Subpart C of this part, or necessary to a decision whether to seek review, or necessary to participate in an appeal pursuant to § 2606.42 of this part, or necessary to a decision whether to participate, may request the Appeals Board's assistance in obtaining the information or documents when the information or documents are in the possession of a party other than the PBGC. The request shall state or describe the missing information or data, the reason why the person needs the information or documents, and the reason why the person needs the assistance of the Appeals Board in obtaining the information or documents. The request may also include a request for an extension of time to file an appeal pursuant to § 2606.35 of this part.

§ 2606.5 Representation.

A person may file any document or make any appearance that is required or permitted by this part on his or her own behalf or he or she may designate a representative. When the representative is not an attorney-at-law, a notarized power of attorney signed by the person making the designation authorizing the representation shall be filed with the Appeals Board in accordance with § 2606.34 (b) of this part.

§ 2606.6 Request for confidential treatment.

If any person filing a document with the Appeals Board believes that some or all of the information contained in the document is exempt from the mandatory public disclosure requirements of the Freedom of Information Act, 5 U.S.C. § 552, and wishes such material to be withheld by the PBGC, he or she shall specify the information with respect to which he or she requests confidentiality and the grounds therefor.

§2606.7 Exhaustion of administrative remedies.

Except as provided in § 26.623(b), a person aggrieved by a determination of the PBGC covered by this part has not exhausted his or her administrative remedies until he or she has filed an appeal under Subpart C of this part, and a decision granting or denying the relief requested has been issued.

Subpart B—Determinations

§ 2606.21 Purpose and scope.

This subpart sets forth rules governing the issuance of determinations of the PBGC on matters covered by this part.

§ 2606.22 Form and contents of determinations.

All determinations to which this part applies shall be in writing and shall state the reason for the determination. All determinations to which this part applies, other than determinations made final upon issuance under § 2606.23(b) of this part, shall include notice of the right to request review of the determination pursuant to Subpart C of this part and a brief description of the procedures review.

§ 2606.23 Effective date of determinations; final action.

(a) *General rule.* Except as provided in Paragraph (c) of this section, determinations regarding benefit entitlement under sections 4022(a) and (b), and 4022B of the Act shall be effective upon issuance. Except as provided in Paragraph (b) of this section, all determinations covered by this part will not become final until the prescribed period of time for filing an appeal under Subpart C of this part has elapsed, or if an appeal is filed, until the date of the Appeals Board decision regarding the appeal.

(a) *Exception.* The PBGC may, in its discretion, order that a determination is final on the date it is issued. When the PBGC makes such an order, the determination shall state that it is the final agency action with respect to the matter.

(c) *Stay.* The Appeals Board may order that the effective date of a determination regarding benefit entitlement or amount under sections 4022(a) and (b), and 4022B of the Act be stayed until the Appeals Board disposition of the appeal. Such an order may provide for complete or partial relief from the immediate implementation of the determination. A temporary stay may be granted by the Appeals Board.

Subpart C—Administrative Appeals

§ 2606.31 Purpose and scope.

This subpart establishes procedures governing administrative appeals to the Appeals Board from determinations relating to the matters set forth in § 2606.1(b) of this part, other than those determinations made final upon issuance under § 2606.23(b) of this part.

§ 2606.32 Who may appeal or participate in appeals.

Any person aggrieved by a determination of the PBGC to which this subpart applies may file an appeal. Any person who will be aggrieved by a decision of the Appeals Board under this part granting the relief requested in whole or in part may participate in the appeal as provided in § 2606.42.

§ 2606.33 When to file.

Except as provided in §§ 2606.35 and 2606.36, an appeal under this subpart must be filed within 45 days after the date of the determination being appealed.

§ 2606.34 Filing of documents.

(a) *Date of filing.* Any document required or permitted to be filed under this part is considered filed on the date of the United States postmark stamped on the cover in which the document is mailed, provided that the document was mailed postage prepaid properly packaged and addressed to the Appeals Board. If these conditions are not met, the document is considered filed on the date it is received by the PBGC. Documents received after regular business hours are considered filed on the next regular business day.

(b) *Where to file.* Any document required or permitted to be filed under this part in connection with an appeal shall be submitted to the Appeals Board, Pension Benefit Guaranty Corporation,

VOL 48 ISS 97 MY 18 1983 UMI

2020 K Street, N.W., Washington, D.C. 20006.

§ 2606.35 Extension of time.

When a document is required under this part to be filed within a prescribed period of time, an extension of time to file will be granted only upon good cause shown. The request for an extension of time shall be filed before the expiration of the time prescribed. The request for an extension shall be in writing and shall state why additional time is needed and the amount of additional time requested. The filing of a request for an extension shall stop the running of the prescribed period of time. When a request for an extension is granted, the Appeals Board shall notify the person requesting the extension, in writing, of the amount of additional time granted. When a request for an extension is denied, the Appeals Board shall so notify the requestor in writing, and the prescribed period of time shall resume running from the date of the letter denying the request. A request for an extension of time that is filed after the expiration of the time prescribed shall be considered only if good cause is shown for the late filing.

§ 2606.36 Non-timely request for review.

The Appeals board shall process a request for review of a determination that was not filed within the prescribed period of time for requesting review in § 2606.33 if the Board, in its discretion, determines that good cause is shown for the late filing.

§ 2606.37 Computation of time.

In computing any period of time prescribed or allowed by this part, the day of the act, eventy, or default from which the designated period of time begins to run is not counted. The last day of the period so computed shall be included, unless it is a Saturday, Sunday, or Federal holiday, in which event the period runs until the end of the next day which is not a Saturday, Sunday, or a Federal holiday.

§ 2606.38 Contents of appeal.

(a) An appeal shall—

(1) Be in writing;

(2) Be designated as an appeal;

(3) Contain a statement of the grounds upon which it is brought and the relief sought;

(4) Reference all pertinent information known to be in the possession of the PBGC; and

(5) Include any additional information believed to be relevant.

(b) In any case where the appellant believes that another person may be aggrieved if the PBGC grants the relief sought, the appeal shall also include the name(s) and address(es), if known, of such other person(s).

§ 2606.39 Record before the Appeals Board.

(a) Upon receipt of an appeal, the Appeals Board shall furnish a copy of the appeal to the office of the PBGC that issued the initial determination. The office shall compile and submit to the Board within 30 days a copy of the initial determination being appealed and a copy of any other documents which the office believes are necessary to support the initial determination. Supporting statements may accompany such material.

(b) All material submitted by the office pursuant to subsection (a) except that already provided to appellant shall be sent to appellant and to any person identified under § 2606.42 for response. Appellant and any third party under § 2606.42 shall file any response to the material submitted by the office with the Appeals Board within 30 days of the date of the letter transmitting the material.

(c) The Chairperson may, upon good cause shown, extend the time limits in paragraphs (a) and (b) of this section.

§ 2606.40 Opportunity to appear and to present witnesses.

(a) An opportunity to appear before the Appeals Board and an opportunity to present witnesses may be permitted at the discretion of the Appeals Board.

(b) Appearances permitted under this section will take place at the main offices of the PBGC, 2020 K Street, N.W., Washington, D.C., unless the Appeals Board, in its discretion, designates a different location.

(c) An appearance permitted under this subpart may be before a hearing officer designated by the Appeals Board.

§ 2606.41 Consolidation of appeals.

(a) *When consolidation may be required.* Whenever multiple appeals are filed that arise out of the same or similar facts and seek the same or similar relief, the Appeals Board may, in its discretion, order the consolidation of all or some of the appeals.

(b) *Decision by Appeals Board.* The decision of the Appeals Board in a consolidated appeal shall be binding on all appellants whose appeals were consolidated.

§ 2606.42 Appeals affecting third parties.

(a) When the Appeals Board makes a preliminary finding that the relief requested in an appeal should be granted in whole or in part, before issuing a decision the Board shall make a reasonable effort to notify third persons who will be aggrieved by the decision of the pendency of the appeal, of the grounds upon which the Appeals Board is considering reversing the initial determination, of the right to submit written comments on the appeal, and that no further opportunity to present information to the PBGC with respect to the determination under appeal will be provided.

(b) Written comments and a request to appear before the Appeals Board must be filed within 45 days after the date of the notice from the Appeals Board.

(c) Appellant shall be notified of material submitted by any third party under this section. Such material, to the extent permitted by law, will be made available to appellant upon request.

(d) If more than one third party is involved, their participation in the appeal may be consolidated pursuant to § 2606.41.

§ 2606.43 Powers of the Appeals Board.

In addition to the powers specifically described in this part, the Appeals Board, in its discretion, may cause additional information to be obtained, may request the submission of any information or the appearance of any person it considers necessary to resolve a matter before it and may enter any order it considers necessary for or appropriate to the disposition of any matter before it.

§ 2606.44 Decision by the Appeals Board.

(a) In reaching its decision, the Appeals Board shall consider those portions of the PBGC file relating to the issues raised by the appeal, material submitted by the appellant and third parties in connection with the appeal, and written statements or documents, if any, filed with the Appeals Board that are made available to the appellant.

(b) The decision of the Appeals Board constitutes the final agency action with respect to the determination which was the subject of the appeal and is binding on all parties who participated in the appeal and on all parties who were notified pursuant to § 2606.42 of their right to participate in the appeal.

(c) The decision of the Appeals Board shall be in writing, specify the relief granted, if any, state the reasons for the decision, and state that the appellant has exhausted his or her administrative remedies.

§ 2606.45 Referral of appeal to the Executive Director.

If the Appeals Board finds that an appeal presents a major unresolved policy issue for the PBGC, the Appeals Board shall refer such appeal to the Executive Director of the PBGC for appropriate action. The Executive Director may designate the Deputy Executive Director to decide any appeal referred to the Executive Director from the Appeals Board under this section. When acting on appeals which are referred by the Appeals Board under this section or § 2606.02, the Executive Director and the Deputy Executive Director shall have, in addition to all the powers vested in their offices, all the powers vested in the Appeals Board by this part. The decision of the Executive Director or the Deputy Executive Director shall meet the requirements of and have the effect of a decision issued under § 2606.44 of this part.

Issued this 13th day of May, 1983.

Charles C. Tharp,

Acting Executive Director, Pension Benefit Guaranty Corporation.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 4

[OA-FRL 2365-3]

Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970; Acquisition and Relocation for Federal and Federally Assisted Programs

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed model regulations and request for comments.

SUMMARY: The Department of Transportation (DOT), at the request of the Office of Management and Budget (OMB), published in the **Federal Register** on April 14, 1983, 48 FR 16198, a notice of proposed rulemaking (NPRM) under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (the Uniform Act). The proposed DOT rule, developed by an interagency working group, is intended to serve eventually as a model for regulations to be issued by all other Federal agencies with programs covered by the Uniform Act. Those agencies will be requested by OMB to review their existing regulations and to revise them to conform substantially to the final DOT regulations.

State and local agencies, organizations, and individuals affected by programs of the Environmental Protection Agency may wish to review and comment on the proposed regulation within the prescribed period. Appropriate DOT officials will be available to respond to any questions which may arise on this matter. To the extent possible, it is intended that all major issues be resolved through the DOT NPRM and that subsequent rules of this agency will adhere closely to the DOT model. Copies of comments sent to DOT may also be sent to EPA.

DATES: Comments must be received by the Department of Transportation on or before May 31, 1983.

ADDRESSES: Send comments to Docket Clerk, OST Docket No. 79, Department of Transportation, 400 7th St., SW., Room 10241, Washington, D.C. 20590. Copies of comments may also be sent to the Enviornmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Marshall Schy, Grants Administration Division (PM-216), (202) 382-5298.

Dated: May 10, 1983.

Alfred M. Zuck,

Acting Assistant Administrator for Administration.

BILLING CODE 6560-50-M

40 CFR Part 52

[A-5-FRL 2269-1]

Approval and Promulgation of Implementation Plans; Minnesota

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: On December 13, 1979 (44 FR 72116), EPA approved a transportation control plan for the St. Cloud, Minnesota, Metropolitan Area as a revision to the Minnestoa State Implementation Plan (SIP). The plan contains transportation strategies which reduce emissions of carbon monoxide (CO) and demonstrates attainment of the National Ambient Air Quality Standards (NAAQSs) for CO by December 31, 1982. On August 16, 1982, the Minnesota Pollution Control Agency (MPCA) submitted an amendment to the St. Cloud transportation control plan. The amendment adds five additional measures to the original transportation control plan which will result in reductions of CO emissions. The additional measures were proposed by the State in lieu of two projects which were approved in the original SIP and are now being delayed into 1983 or later. EPA proposes to approve the five additional meaures and disapprove the delay of the two projects. The purpose of this notice is to discuss EPA's evaluation of the amendment and to solicit public comment on EPA's proposed action.

DATE: Comments on this revision to the Minnesota SIP and EPA's proposed action must be received by June 17, 1983.

ADDRESSES: Copies of the SIP revision are available at the following addresses:

Regulatory Analysis Section, Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604

Minnesota Pollution Control Agency, 1935 West County Road, B-2, Roseville, Minnestoa 55113.

Written comments on this action should be addressed to: Gary Gulezian, Chief, Regulatory Analysis Section, Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Delores Sieja at the above EPA Region V address or call (312) 886-6038.

SUPPLEMENTARY INFORMATION: On March 3, 1978 (44 FR 8962, 9006), pursuant to the requirements of Section 107 of the Clean Air Act (Act), as amended in 1977, EPA designated the City of St. Cloud as not meeting the NAAQSs for CO.

Part D of the Act, which was added by the 1977 amendments, requires that each State revise its SIP to meet specific requirements for areas designated as nonattainment. These SIP revisions must demonstrate attainment of the primary NAAQS as expeditiously as practicable, but no later than December 31, 1982. Under certain conditions, the date may be extended to December 31, 1987. Minnesota did not request an extension of the attainment date for the CO standards for St. Cloud.

On My 17, 1979, the MPCA submitted a transportation control plan for the City of St. Cloud Metropolitan area as a revision to the Minnesota SIP. EPA determined that the transportation strategies would reduce emissions of CO and demonstrate attainment of the CO standard by December 31, 1982. On December 13, 1979 (44 FR 72116) EPA approved the St. Cloud transportation plan as a revision to the Minnesota SIP.

On August 16, 1982, the MPCA submitted an mendment to the St. Cloud transportation control plan. The amendment is for the addition of five transportation control measures that will be implemented in 1982 in lieu of two projects which were approved in the original SIP and are now being delayed into 1983. The five additional measures are:

VOL
48
ISS
97
MY
18
1983
UMI

(1) Enforcement of an existing ban on double parking and extended idling on St. Germain Street. St. Germain Street is a major traffic access to and through downtown St. Cloud, and is associated with hotspot nonattainment areas in the vicinity of its intersection with 10th Avenue.

(2) Implementation of a media campaign designed to encourage use of transportation routes which will improve air quality in the City.

(3) Distribution of a pamphlet by local merchants encouraging use of alternate transportation routes.

(4) Development of a signing plan to direct traffic to alternate routes.

(5) Creation of left-hand turn lanes on Division Street between 19 1/2 and 31st Avenues to decrease local traffic congestion and to allow easier access to routes around downtown St. Cloud.

The two delayed projects are:

(1) Construction project for 9th and 10th Avenues

(2) Construction project for T.H. 23/10th Avenue.

EPA has reviewed the amendment and determined that no quantitative analysis was provided on the amount of emission reductions that would result from the additional measures. Without such an analysis EPA cannot assess whether the additional measures will be an acceptable substitution for the two delayed projects. However, EPA believes these measures, even though not quantified, will result in some positive air quality impact. Therefore, EPA proposes approval of the additional measures as revisions to the Minnesota SIP. EPA proposes disapproval of the delay of the two projects because of lack of a quantitative equivalency analysis.

By disapproval of these measures EPA acknowledges that, at this time, the additional measures cannot be used as a replacement for the delayed projects. The delayed projects are an essential part of the 1979 SIP which demonstrated attainment of the CO standard by December 31, 1982. Without an analysis demonstrating that the emissions reductions from the five new projects are equivalent to those from the delayed projects, EPA cannot determine whether the new projects would be approvable substitutes for the delayed ones.

A final action disapproving the delay of the two original projects would not trigger a moratorium on new source construction under Section 110(a)(2)(I) of the Clean Air Act. By disapproving the request for delay, EPA leaves in effect the original schedules for these projects which were approved as part of the 1979 SIP revision and have not been disapproved.

On February 3, 1983, however, EPA proposed to disapprove SIPs for approximately 140 nonattainment areas (48 FR 4972). For many of these plans, EPA proposed disapproval because available air quality showed that it was unlikely that the area had in fact achieved attainment by December 31, 1982 as required under Part D. For the remaining areas, EPA proposed disapproval because the states had not completed the process of submitting an approvable Part D plan. As explained in that proposal, final disapprovals would trigger construction moratoriums under Section 110(a)(2)(I). EPA may also propose restrictions on Federal funding for these areas.

EPA proposed to disapprove the 1979 Part D CO SIP for St. Cloud because available data indicated that the area had not attained the CO standards by the 1982 deadline (48 FR 5013; February 3, 1983). This is a separate issue that is not part of today's action. Today's action responds to a new SIP revision submitted to EPA in 1982. It does not propose any finding concerning the adequacy of the SIP submitted in 1979. EPA's action on this newly submitted SIP revision thus can proceed independently of the action proposed on February 3.

EPA is providing a 30-day comment period on this notice of proposed rulemaking. Public comment received on or before June 17, 1983, will be considered in EPA's final rulemaking. All comments will be available for inspection during normal business hours at the Region V office listed at the front of this notice.

Under Executive Order 12291, today's action is not "Major". It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA, and any EPA response, are available for public inspection at the Region V office listed at the beginning of this notice. Pursuant to the provisions of 5 U.S.C. Section 605(b), the Administrator certified that the attached rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. This action proposes to approve and disapprove a State action. For approval, it imposes no new requirements beyond those which the State has already imposed. For disapproval, the sources affected will remain subject to the applicable provisions of the current Minnesota CO SIP. Thus no additional requirements will be imposed on these sources.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

This proposed rulemaking is issued under the authority of sections 110 and 172 of the Clean Air Act.

Dated: December 3, 1982.

Valdas V. Adamkus,

Regional Administrator.

BILLING CODE 6560-50-M

40 CFR Part 81

[A-5-FRL 2334-6]

Designation of Areas for Air Quality Planning Purposes; Attainment Status Designation; Ohio

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to change the Total Suspended Particulate (TSP) primary and secondary nonattainment designation of Mahoning County, Ohio. This revision is based on a request from the State of Ohio to redesignate this area and on the supporting data submitted by the State. Under the Clean Air Act, designations can be changed if sufficient data are available to warrant such change.

DATE: All comments must be received by June 17, 1983.

ADDRESSES: Copies of the redesignation request, technical support documents and the supporting air quality data are available at the following addresses:

U.S. Environmental Protection Agency, Region V, Air Programs Branch, 230 S. Dearborn Street, Chicago, Illinois 60604;

Ohio Environmental Protection Agency, Office of Air Pollution Control, 361 East Broad Street, Columbus, Ohio 43216.

Comments in this proposed rule should be addressed to (please submit an original and five copies if possible): Gary Gulezian, Chief, Regulatory Analysis Section Air Programs Branch (5AP-26), USEPS, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Anne E. Tenner, (312) 886-6036.

SUPPLEMENTARY INFORMATION: Under section 107(d) of the Act the Administrator of EPA has promulgated the National Ambient Air Quality Standards (NAAQS) attainment status for each area of every state. See 43 FR 8962 (March 3, 1978) and 43 FR 45993 (October 5, 1978). These area designations may be revised whenever the data warrants.

The current designations for TSP in Mahoning County, Ohio, as codified in 40 CFR 81.336, are:

Primary Nonattainment—Cities of Campbell, Youngstown, and Struthers; that portion of Poland Township north of U.S. 224; and that portion of Coitsville Township south of U.S. 422.

Secondary Nonattainment—Townships of Coitsville (north of U.S. 422 and east of S.R. 616), Boardman (all) Poland (south of U.S. 224), and Austintown (east of S.R. 46).

On October 14, 1982, the State of Ohio requested EPA to revise the TSP designation of Mahoning County, Ohio to:

Primary Nonattainment Area

1. From the north county line and Four Mile Run Road south on Four Mile Run Road to Meridian Road,
2. South on Meridian Road to Bears Den Road,
3. Southeast on Bears Den Road to Furnace Road,
4. Furnace Road east to Mill Creek,
5. East on a line from Mill Creek and Furnace Road to Warren Avenue,
6. East on Warren Avenue to Rosedale Avenue,
7. South on Rosedale Avenue to Chicago Avenue,
8. East on Chicago Avenue to Market Street,
9. South on Market Street to Dewey Avenue,
10. East on Dewey Avenue to Power Way,
11. Power Way south to Center Street,
12. Center Street northeast to Wilson Avenue,
13. Wilson Avenue north west to Dry Run Creek,
14. Dry Run Creek north to Oak Street,
15. West on Oak Street to Garland Avenue,
16. North on Garland Avenue to Parker Street,
17. West on Parker Street to Albert Street,
18. North on Albert Street to McGuffey Road,
19. West on McGuffey Road to Wick Avenue, and
20. North on Wick Avenue to Logan Avenue, then north to the county line
21. The county line west to Four Mile Run Road.

Secondary Nonattainment Area

The cities of Campbell, Struthers and Youngstown (excluding the Primary nonattainment area); Poland Township north of U.S. Route 224; Coitsville Township south of U.S. Route 42; Austintown Township east of State Route 46; and Boardman Township north of Canfield Poland Road.

To support the redesignation request, the State of Ohio submitted on October 14, 1982, and February 11, 1983, ambient data collected at ten monitors in the Youngstown area during the period of July 1980–December 1982. In addition, EPA considered modeling analyses based on July 1974 actual SIP allowable emission rates, performed previously for this area by the State as well as recent modeling performed by EPA.

The ambient data from the ten Mahoning County monitors are discussed in the technical support document which is available in EPA's Region V office. The data, which have been determined to be representative, support the proposed nonattainment boundaries. Additional technical support for the exact boundaries is contained in the October 14, 1982, State submittal.

The major effects of the revision are to change the area south of the Youngstown-Campbell-Struthers area from secondary nonattainment to attainment, and change the Campbell-Struthers area (around the J & L Campbell Coke Plant) from primary to secondary nonattainment. Both changes are acceptable based on a review of the available monitoring and modeling data. It should be noted that additional improvement in air quality in the Campbell-Struthers area is expected in the immediate future. In late January 1983, J & L began a phased 3-month permanent shut-down of the remaining two batteries at the coke plant. Therefore, ambient TSP concentrations in the area should continue to decline.

In summary, EPA finds this designation to be acceptable and proposes to approve the redesignation of Mahoning County, Ohio.

All interested persons are invited to submit written comment on the proposed redesignation. Written comments received by the data specified above will be considered in determining whether EPA will approve the redesignation. After review of all comments submitted, the Administrator of EPA will publish in the **Federal Register** the Agency's final action on the redesignation.

Under 5 U.S.C. 605(b), the Administrator has certified that redesignations do not have a significant economic impact on a substantial number of small entities (see 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

N-(Mercaptomethyl) Phthalimide S-(O,O-Dimethyl Phosphorodithioate); Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for the combined residues of the insecticide *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorodithioate) and its oxygen analog in or on the commodity tomatoes imported from Mexico. The proposed regulation to establish a maximum permissible level for residues of the insecticide was requested, pursuant to a petition, by the Stauffer Chemical Company.

DATE: Comments must be received on or before June 17, 1983.

ADDRESS: Written comments to: Product Manager (PM) 15, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 204, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-2400).

FOR FURTHER INFORMATION CONTACT: George LaRocca, PM-15, (703-557-2400) at the above address.

SUPPLEMENTARY INFORMATION: The Stauffer Chemical Company, 1200 South 47th Street, Richmond, CA 94804, submitted pesticide petition 1E2565 to the EPA. The petition requests that the Administrator propose that 4 CFR 180.261 be amended by establishing a tolerance for the combined residues of the insecticide *N*-(mercaptomethyl) phthalimide *S*-(O,O-dimethyl phosphorodithioate) and its oxygen analog in or on the commodity tomatoes imported from Mexico at 2.0 parts per million (ppm).

The data submitted in the petition and other relevant material have been evaluated. The toxicological data

VOL 48 ISS 97 MY 18 1983 UMI

considered in support of the proposed tolerance included a 2-year rat feeding/oncogenicity study which was negative for oncogenic effects and had a cholinesterase inhibition and systemic no-observed-effect level (NOEL) of 40.0 ppm; and 2-year dog feeding study which had a cholinesterase-inhibition and systemic NOEL of 40.0 ppm and 400.0 ppm respectively; rabbit and monkey teratology studies which were negative at 60 mg/kg/day and 8 mg/kg/day respectively; a rat reproduction study which had a NOEL of 80 ppm and acute delayed hen neurotoxicity study which was negative for acute delayed neurotoxicity.

The acceptable daily intake (ADI), based on the 2-year rat feeding study (NOEL of 40 ppm equivalent to 2.0 mg/kg/bw/day) and a 100-fold safety factor, is calculated to be 0.020 mg/kg/day. The maximum permissible intake (MPI) for a 60-kg human is calculated to be 1.2 mg/day. The current action will utilize 7.9 percent of the ADI. Published tolerances utilize 91.1 percent of the ADI. Desirable data that are currently lacking from the petition is a second oncogenicity study in a second mammalian species. In a letter dated December 7, 1979, the petitioner indicated that the second oncogenicity study will be submitted to the Agency by February 1984.

The metabolism of *N*-(mercaptomethyl) phthalimide *S*-(*O,O*-dimethyl phosphorodithioate) is adequately understood for this use, and an adequate analytical method, gas chromatography, is available for enforcement purposes. Residues on processed tomatoes are not likely to exceed the tolerance on whole tomatoes and therefore food additive tolerances are not needed on these items. Imported Mexican tomatoes are not processed into dried tomato pomace for animal feed, therefore, there is no reasonable expectation of secondary residues in eggs, meat, milk, or poultry. No actions are currently pending against registration of the insecticide, nor are there any other relevant consideration involved in establishing the proposed tolerance.

The pesticide is considered useful for the purpose for which the tolerance is sought. Based on the above information considered by the Agency it is concluded that the tolerance would protect the public health and is therefore proposed as set forth below.

Any person who has registered or submitted an application for registration of a pesticide under FIFRA, as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number [PP 1E2565/P295]. All written comments filed in response to this proposed rulemaking will be available in the product manager's office, Registration Division, at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

Dated: May 5, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, it is proposed that 40 CFR 180.261 be amended by adding and alphabetically inserting the commodity tomatoes to read as follows:

§ 180.261 N-(Mercaptomethyl)phthalimide S-(O,O-dimethylphosphorodithioate); tolerances for residues.

* * * * *

Commodities	Parts per million
Tomatoes	2.0

Wednesday, May 18, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 83-322]

Cooperative Gypsy Moth Suppression and Regulatory Program—1983; Decision Notice

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of a record of decision for the gypsy moth eradication treatment areas in Illinois, Indiana, Michigan, Minnesota, North Carolina, Ohio, Oregon, Virginia, Washington, and Wisconsin.

SUMMARY: This gives notice that a decision has been made to cooperate with the States of Illinois, Indiana, Michigan, Minnesota, North Carolina, Ohio, Oregon, Virginia, Washington, and Wisconsin in gypsy moth eradication programs. The State Departments of Agriculture for Indiana, Michigan, Minnesota, Ohio, and Oregon have decided to use carbaryl for the proposed treatment areas in Elkhart County, Indiana; Kalamazoo, Muskegon, and Van Buren Counties, Michigan; Ramsey and Washington Counties, Minnesota; Hamilton, Franklin, Knox and Lucas Counties, Ohio; and Salem County, Oregon. The State Departments of Agriculture for Illinois, Washington, and Wisconsin have decided to use *Bacillus thuringiensis (B.t.)* for the proposed treatment areas in Du Page and Kane Counties, Illinois; Clark, King, and Pierce Counties, Washington; and Waukesha County, Wisconsin. The State Departments of Agriculture for North Carolina and Virginia have decided to use dispalure for the proposed treatment areas in Carteret County, North Carolina; and Floyd and Patrick Counties, Virginia. Based on an evaluation of the Programmatic Environmental Impact Statement (PEIS) and a site-specific environmental analysis prepared for the proposed treatment areas in each state (Illinois, Indiana, Michigan, Minnesota, North Carolina, Ohio, Oregon, Virginia, Washington, and Wisconsin) the Animal and Plant Health Inspection Service (APHIS) has determined that these treatment methods pose no significant adverse impact on the environment of these areas.

FOR FURTHER INFORMATION CONTACT: Gary Moorehead, Staff Officer, Field Operations Support Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 663 Federal Building, Hyattsville, MD 20782, (301) 436-8295.

SUPPLEMENTARY INFORMATION: A notice of the availability of a site-specific environmental analysis document for the proposed treatment areas in Du Page and Kane Counties, Illinois; Elkhart County, Indiana; Kalamazoo, Muskegon, and Van Buren Counties, Michigan; Ramsey and Washington Counties, Minnesota; Carteret County, North Carolina; Hamilton, Franklin, Knox, and Lucas Counties, Ohio; Salem, Oregon; Floyd and Patrick Counties, Virginia; Clark, King, and Pierce Counties, Washington; and Waukesha County, Wisconsin, for the USDA Cooperative Gypsy Moth Suppression and Regulatory Program was published in the **Federal Register** on April 28, 1983 (48 FR 19190).

On or about April 1, 1983, the State Departments of Agriculture for each of these States decided to conduct ground or aerial spray treatment programs using either carbaryl, *B.t.*, or dispalure as indicated below in the proposed treatment areas.

The State Departments of Agriculture for Indiana, Michigan, Minnesota, and Ohio have decided to conduct aerial spray treatment programs using carbaryl.

The State Departments of Agriculture for Illinois, Washington, and Wisconsin have decided to conduct aerial spray treatment programs using *B.t.*

The State Departments of Agriculture for North Carolina and Virginia have decided to conduct aerial spray treatment programs using dispalure.

The State Department of Agriculture for Oregon has decided to conduct ground spray treatment program using carbaryl.

Based on the Department's review of the PEIS and the site-specific analysis, and in accordance with the National Environmental Policy Act and the Department's PEIS, the Department has decided to cooperate with the States of Illinois, Indiana, Michigan, Minnesota, North Carolina, Ohio, Oregon, Virginia, Washington, and Wisconsin in the conduct of these programs.

The Organic Act of September 21, 1944, as amended (7 U.S.C. 147a) authorizes APHIS to cooperate with States to retard the artificial, long-range spread of the gypsy moth and to eradicate isolated infestations of the pest.

Carbaryl, *B.t.*, and dispalure, in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136 *et. seq.*), are registered by the Environmental Protection Agency (EPA) for use against gypsy moth. They will be applied according to the label directions and APHIS operating procedures. Appropriate public involvement, notification and utilization of insecticide treatment measures will further reduce human exposure during periods of application.

Gypsy moth egg masses were expected to have reached peak hatching in Illinois, Indiana, Michigan, Minnesota, North Carolina, Ohio, Oregon, Virginia, Washington, and Wisconsin on or after May 1, 1983. The State Departments of Agriculture for each of these States have notified the Department that if a spraying program for gypsy moth in Illinois, Indiana, Michigan, Minnesota, North Carolina, Ohio, Orgeon, Virginia, Washington, and Wisconsin is to be effective, they must be prepared to commence spraying as close to the peak hatching time as possible. Therefore, implementation of the program may take place immediately after the date of publication of this decision.

Done at Washington, DC., this 13th day of May 1983.

William F. Helms,

Acting Deputy Administrator, Plant Protection and Quarantine, Animal and Plant Health Inspection Service.

[FR Doc. 83-13353 Filed 5-17-83; 8:45 am]

BILLING CODE 3410-34-M

VOL 48 ISS 97 MY 18 1983 UMI

Animal Inspection Station, Detroit, Michigan; Finding of No Significant Impact

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: The Animal and Plant Health Inspection Service (APHIS) has prepared an environmental assessment for the construction and operation of an animal inspection station on W. Jefferson Avenue in Detroit, Michigan. This 4,000 square foot, single story building will be constructed on a 2.2 acre site adjacent to the city dog pound. The building will be used to inspect animals that are shipped by truck and other vehicles into the United States from Canada over the Ambassador Bridge.

This assessment indicates that the proposed project will not cause any significant local, regional or national impacts on the environment. Based upon this Finding Of No Significant Impact (FONSI) it has been determined that the preparation and review of an Environmental Impact Statement is not needed for this project

Copies of this environmental assessment have been sent to the Environmental Protection Agency, appropriate State and local agencies and other interested parties.

FOR FURTHER INFORMATION CONTACT: Copies of the environmental assessment are available upon request from Mr. Dennis Wilmeth, Environmental Protection Specialist, APHIS, ASD, Room 260, 6505 Belcrest Road, Hyattsville, MD 20782, Area Code (301) 436–8775.

SUPPLEMENTARY INFORMATION: The environmental assessment indicates that the animal inspection station will comply with local plans and zoning regulations. Odors and noise should be minimal since animals will only be inspected and not kept overnight. The animal wastes left in the building will be washed into a sanitary sewer drain in the floor. The animal inspection station will have a minor impact on local air quality and traffic and no impact on water quality. The building will not be located in a 100 year flood plain and will not affect any endangered species. While this project will have no effect on any above-ground cultural resources, it may impact archaeological resources. Therefore, an archaeological survey and/or land use history will be conducted prior to construction activity.

Implementation of the proposed project will not be initiated until 30 days after publication of this notice in the **Federal Register.**

Done at Washington, D.C., this 12th day of May 1983.

James O. Lee, Jr.,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–M

Office of the Secretary

Forms Under Review by Office of Management and Budget

May 13, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Department Clearance Officer, USDA, OIRM, Room 103-W Admin. Bldg., Washington, D.C. 20250, (202) 447–6201.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, ATTN: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

CIVIL AERONAUTICS BOARD

Application of Michigan Peninsula Airways for Certificate Authority Under Subpart O

AGENCY: Notice of Order Instituting the Michigan Peninsula Airways Fitness Investigation, 83–5–61, Docket 41478.

ACTION: Notice.

SUMMARY: The Board is instituting an investigation to determine the fitness of Michigan Peninsula Airways to engage in interstate and overseas cargo and foreign cargo charter air transportation.

DATES: Persons wishing to intervene in the *Michigan Peninsula Airways Fitness Investigation* shall file their petitions in Docket 41478 by May 26, 1983.

ADDRESSES: Petitions to intervene should be filed in Docket 41191 and 41192, and addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

FOR FURTHER INFORMATION CONTACT: John F. Brennan, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428 (202) 673–5333.

SUPPLEMENTARY INFORMATION: The complete text of Order 83–5–61 is available from our Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 83–5–61 to that address.

By the Bureau of Domestic Aviation: May 12, 1983.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320–01–M

COMMISSION ON CIVIL RIGHTS

District of Columbia Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the District of Columbia Advisory Committee to the Commission will convene at 2:00 p.m. and will end at 4:00 p.m. on June 14, 1983, at the National Housing Center, in the Board Room, Washington, D.C. 20005. The Administration of Justice and Employment subcommittees will deliver reports, and the Commissioner of the D.C. Commission on Social Services will present a briefing on the effects of Federal block grants.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Walter E. Washington, 1025 15th Street, North West, Washington, D.C. 20005, (202) 659–3300 or the Mid-Atlantic Regional Office, 2120 L Street, North West, Room 510, Washington, D.C. 20037, (202) 254–6670.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., May 9, 1983.

John I. Binkley,

Advisory Committee Management Officer.

[FR Doc. 83–13329 Filed 5–17–83; 8:45 am]

BILLING CODE 6335–01–M

Illinois Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Illinois Advisory Committee to the Commission will convene at 3:00 p.m. and will end at 10:00 p.m. on June 3, 1983, at the Ramada Inn, 3000 West Main, Carbondale, Illinois 62901. The purposes of this meeting are to receive reports on the Industrial Revenue Bond and Chicago Affirmative Action projects, and conduct a forum on civil rights issues in Carbondale.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Thomas J. Pugh, 500 West Melbourne Avenue, Peoria, Illinois, 61604, (309) 671–7475 or the Midwestern Regional Office, 230 South Dearborn Street, 32nd Floor, Chicago, Illinois 60604, (312) 353–7479.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., May 9, 1983.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335–01–M

DEPARTMENT OF COMMERCE

Minority Business Development Agency

Financial Assistance Application Announcements; Boston

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Minority Business Development Center (MBDC) program to operate one project for a 12-month period beginning August 1, 1983 in the Boston SMSA. The cost of the project is estimated to be $275,000. The maximum Federal participation amount is $247,500. The minimum amount required for non-Federal participation is $27,500. The award number will be 01–10–83009–01.

Applicant shall be required to contribute at least 10% of the total program costs through non-Federal funds. Cost sharing contributions can be in the form of cash contributions, fee for services of in-kind contributions.

DATE: Closing date: June 10,1983.

ADDRESS: New York Regional Office, Minority Business Development Agency, 26 Federal Plaza, Room 36–116, New York, New York 10278.

FOR FURTHER INFORMATION CONTACT: Joseph F. Korpsak. Telephone: (212) 264–3262.

SUPPLEMENTARY INFORMATION:

A. Scope and Purpose of this Announcement. Executive Order 11625 authorizes MBDA to fund projects which will provide technical and management assistance to eligible clients in areas related to the establishment and operation of businesses. The MBDC program is specifically designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit through which and from which information and assistance to and about minority businesses are funneled.

B. Eligible Applicants. Awards shall be open to all individuals, non-profit organizations, for-profit firms, local and state governments, American Indian tribes and educational institutions.

C. Evaluation Process. All proposals received as a result of this announcement will be evaluated by a MBDA review panel.

D. Evaluation Criteria for Minority Business Development Center Applications.

The evaluation criteria is designed to facilitate an objective evaluation of competitive applications for the Minority Business Development Center program.

MBDA reserves the right to reject any or all applications, including the application receiving the highest evaluation, and will exercise this right when it is determined that it is in the best interest of the Government to do so (e.g., the apparent successful applicant has serious unresolved audit issues from current or previous grants, contracts or cooperative agreements with an agency of the Federal Government).

Evaluation of proposals will employ the following criteria:

I. *Capability and Experience of Firm/Staff*—provide information that demonstrates the organization's capabilities and prior experiences in addressing the needs of minority business individuals and firms. Provide information that demonstrates the staff's capabilities and prior experiences in providing management and technical assistance to minority individuals and firms. Indicate previous experience in MBE community to be served in terms of: inventorying resources and opportunities; the brokering thereof; and providing management and technical assistance.

The following are key factors to be considered in this section:

Firm

—The organization's receptivity in the MBE community to be served, i.e., business contacts in the public and

VOL 48 ISS 97 MY 18 1983 UMI

private sector; leadership responsibilities; and experience in assisting MBE business persons and firms. (References from clients assisted are pertinent.)

—Background credentials and references for the owners of the organization and a capability statement of what the organization can do.

—Knowledge of the geographic area to be served in terms of the needs of minority businesses and past ongoing relationships with local, public and private—entities that can possibly enhance the BDC program effort—i.e., Chambers of Commerce, trade associations, venture capital organizations, banks, SBA, HUD, state, city and county government agencies, etc.

Staff

—List personnel to be used. Indicate their salaries, educational level and previous experience. Provide resumes for all professional staff personnel.

—Demonstrate competence among staff to effectuate mergers, acquisitions, spin-offs and joint-ventures.

—Provide organizational chart, job descriptions and qualification standards involving all professional staff persons to be utilized on the project.

—If any contractors are to be utilized, identify and indicate areas and level of experience. *Primary consideration will be given to inhouse capability.*

Note.—All contracting proposed should be in accordance with procurement standards in Attachment O of OMB Circulars A–110 or A–102.

II. *Techniques and Methodology*—specify plans for achieving the goals and objectives of the project. This section should be developed by using the outline of the Work Requirements and the MBDC responsibilities as *guides* and will become part of the award document. Include start-up plan and example of work plan format. Fully explain the procedures for: outreach, screening, assisting and monitoring clients; maintaining the profile inventory of minority businesses; and brokering of new business ownership, market and capital opportunities and prevention of business failures. In summary, address how, when and where work will be done and by whom. Include level of performance.

III. *Resources*—address technical and administrative resources, i.e., computer facilities, voluntary staff time and space; and financial resources in terms of meeting MBDA's 10% cost-sharing requirement and including a fee for services for assistance provided clients. A fee for services in the amount of 10% of the cost of assistance will be charged to all clients receiving management and technical assistance.

Cost-sharing is that portion of project costs not borne by the Federal Government. The composition and amount of cost-sharing are key factors that will be considered in determining the merit of this section. The cost sharing requirement can be met through the following order or priority: (1) Cash contributions; (2) fee for services; and (3) in-kind contributions.

A. *Cash contribution*—means cash that is contributed or donated by the recipient, and other non-Federal sources, i.e., public agencies and institutions, private organizations, corporations and individuals.

B. *Fee for services*—is a charge to a client for assistance provided by the MBDC for M&TA and/or SCS.

C. *In-kind contribution*—represents the value of non-cash contributions provided by the recipient and other non-Federal sources. The order of priority for in-kind contributions are: high technology systems to be utilized to achieve program objectives; top level staff personnel and real and personal property donated by other public agencies, institutions and private organizations. Property purchased with Federal funds will not be considered as the recipient's in-kind contribution. Under no circumstances can the in-kind contribution exceed 50% of the total non-Federal contribution.

IV. *Costs*—demonstrate in narrative format that costs being proposed will give the minority business client and the government the most effective program possible in terms of quality, quantity, timeliness and efficiency.

Include the principal costs involved for achieving work plan under Cooperative Agreement by completing Part III—the Budget Information Section of the Request for Application.

Provide cost-sharing plan information in terms of methodology and format for billing the costs of management and technical assistance and specialized consulting services to clients.

Total project cost will be evaluated in terms of:

—Clear explanations of all expenditures proposed, and

—The extent to which the applicant can leverage Federal program funds and operate with *economy* and *efficiency*.

In conclusion, the applicant's schedule for start of the MBDC operation should be included in Part II. Part II will be known as the applicant's plan of operation and will be incorporated into the Cooperative Agreement Award.

A detailed justification of all proposed costs is required for Part III and each item must be fully explained.

The failure to supply information in any given category of the criteria will result in the application being considered non-responsive and dropped from competitive review.

All information submitted is subject to verification by MBDA.

E. Disposition of Proposals.

Notification of awards will be made by the Grants Officer, U.S. Department of Commerce (DOC). Organizations whose proposals are unsuccessful will be advised by MBDA, DOC.

F. Proposal Instructions and Forms.

This program is subject to OMB Circular A–95 requirements.

Questions concerning the preceding information, copies of application forms, and applicable regulations can be obtained at the above address.

Nothing in this solicitation shall be construed as committing MBDA to divide available funds among all qualified applicants.

(11.800 Minority Business Development (Catalog of Federal Domestic Assistance))

Dated: May 10, 1983.

Joseph F. Korpsak,

Acting Regional Director.

BILLING CODE 3510–21–M

Financial Assistance Application Announcement; California

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Minority Business Development Center (MBDC) program to operate three projects for a 12-month period beginning November 1, 1983, in the following locations:

Los Angeles SMSA—I.D. Number: 09–10–83021–01		
Maximum MBDA contribution	$1,008,000	
SCS contribution	100,800	
Total Federal contribution		$1,108,800
Minimum cost share contribution		195,670
Minimum total project cost		1,304,470
Oxnard SMSA—I.D. Number: 09–10–83025–01		
Maximum MBDA contribution	225,000	
SCS contribution	22,500	
Total Federal contribution		247,500
Minimum cost share contribution		43,676
Minimum total project cost		291,176
Santa Barbara SMSA—I.D. Number: 09–10–83026–01		
Maximum MBDA contribution	153,000	
SCS contribution	15,300	
Total Federal contribution		168,300
Minimum cost share contribution		29,700
Minimum total project cost		198,000

Applicants shall be required to contribute at least 15% of the total program cost through non-Federal funds. Cost sharing contributions can be in the form of cash contributions, fee for services or in-kind contributions.

Dates: Closing date: June 16, 1983.

ADDRESS: Minority Business Development Agency, U.S. Department of Commerce, 450 Golden Gate Avenue, Box 36114, San Francisco, California 94102.

FOR FURTHER INFORMATION CONTACT: Mr. Mikel Cook at 415/556/6733.

SUPPLEMENTARY INFORMATION:

A. Scope and Purpose of this Announcement. Executive Order 11625 authorizes MBDA to fund projects which will provide technical and management assistance to eligible clients in areas related to the establishment and operation of businesses. The MBDC program is specifically designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit through which and from which information and assistance to and about minority businesses are funneled.

B. Eligible Applicants. Awards shall be open to all individuals, non-profit organizations, for-profit firms, local and state governments, American Indian tribes and educational institutions.

C. Evaluation Process. All proposals received as a result of this announcement will be evaluated by a MBDA review panel.

D. Evaluation Criteria for Minority Business Development Center Applications.

The evaluation criteria is designed to facilitate an objective evaluation of competitive applications for the Minority Business Development Center program.

MBDA reserves the right to reject any or all applications, including the application receiving the highest evaluation, and will exercise this right when it is determined that it is in the best interest of the Government to do so (e.g., the apparent successful applicant has serious unresolved audit issues from current or previous grants, contracts or cooperative agreements with an agency of the Federal Government).

Evaluation of proposals will employ the following criteria:

I. *Capability and Experience of Firm/Staff*—provide information that demonstrates the organization's capabilities and prior experiences in addressing the needs of minority business individuals and firms. Provide information that demonstrates the staff's capabilities and prior experiences in providing management and technical assistance to minority individuals and firms. Indicate previous experience in MBE community to be served in terms of: inventorying resources and opportunities; the brokering thereof; and providing management and technical assistance.

The following are key factors to be considered in this section:

Firm

The organization's receptivity in the MBE community to be served, i.e., business contacts in the public and private sector; leadership responsibilities; and experience in assisting MBE business persons and firms. (References from clients assisted are pertinent.)

Background credentials and references for the owners of the organization and a capability statement of what the organization can do.

Knowledge of the geographic area to be served in terms of the needs of minority businesses and past ongoing relationships with local, public and private—entities that can possibly enhance the BDC program effort—i.e., Chambers of Commerce, trade associations, venture capital organizations, banks, SBA, HUD, state, city and county government agencies, etc.

Staff

List personnel to be used. Indicate their salaries, educational level and previous experience. Provide resumes for all professional staff personnel.

Demonstrate competence among staff to effectuate mergers, acquisitions, spin-offs and joint-ventures.

Provide organizational chart, job descriptions and qualification standards involving all professional staff persons to be utilized on the project.

If any contractors are to be utilized, identify and indicate areas and level of experience. *Primary consideration will be given to inhouse capability.*

Note.—All contracting proposed should be in accordance with procurement standards in Attachment O of OMB Circulars A–110 or A–102.

II. *Techniques and Methodology*—specify plans for achieving the goals and objectives of the project. This section should be developed by using the outline of the Work Requirements and the MBDC responsibilities as *guides* and will become part of the award document. Include start-up plan and example of work plan format. Fully explain the procedures for: outreach, screening, assisting and monitoring clients; maintaining the profile inventory of minority businesses; and brokering of new business ownership, market and capital opportunities and prevention of business failures. In summary, address how, when and where work will be done and by whom. Include level of performance.

III. *Resources*—address technical and administrative resources, i.e., computer facilities, voluntary staff time and space; and financial resources in terms of meeting MBDA's 10% cost-sharing requirement and including a fee for services for assistance provided clients. A fee for services in the amount of 10% of the cost of assistance will be charged to all clients receiving management and technical assistance.

Cost-sharing is that portion of project costs not borne by the Federal Government. The composition and amount of cost-sharing are key factors that will be considered in determining the merit of this section. The cost sharing requirement can be met through the following order or priority: (1) cash contributions; (2) fee for services; and (3) in-kind contributions.

A. *Cash contribution*—means cash that is contributed or donated by the recipient, and other non-Federal sources, i.e., public agencies and institutions, private organizations, corporations and individuals.

B. *Fee for services*—is a charge to a client for assistance provided by the MBDC for M&TA and/or SCS.

C. *In-Kind contribution*—represents the value of non-cash contributions provided by the recipient and other non-Federal sources. The order of priority for in-kind contributions are: high technology systems to be utilized to achieve program objectives; top level staff personnel and real and personal property donated by other public agencies, institutions and private organizations. Property purchased with Federal funds will not be considered as the recipient's in-kind contribution. Under no circumstances can the in-kind contribution exceed 50% of the total non-Federal contribution.

IV. *Costs*—demonstrate in narrative format that costs being proposed will give the minority business client and the government the most effective program possible in terms of quality, quantity, timeliness and efficiency.

UMI

Include the principal costs involved for achieving work plan under Cooperative Agreement by completing Part III—the Budget Information Section of the Request for Application.

Provide cost-sharing plan information in terms of methodology and format for billing the costs of management and technical assistance and specialized consulting services to clients.

Total project cost will be evaluated in terms of:

Clear explanations of all expenditures proposed, and

The extent to which the applicant can leverage Federal program funds and operate with *economy* and *efficiency*.

In conclusion, the applicant's schedule for start of the MBDC opertion should be included in Part II. Part II will be known as the applicant's plan of operation and will be incorporated into the Cooperative Agreement Award.

A detailed justification of all proposed costs is required for Part III and each item must be fully explained.

The failure to supply information in any given category of the criteria will result in the application being considered non-responsive and dropped from competitive review.

All information submitted is subject to verification by MBDA.

E. Disposition of Proposals.

Notification of awards will be made by the Grants Officer, U.S. Department of Commerce (DOC) Organizations whose proposals are unsuccessful will be advised by MBDA, DOC.

F. Proposal Instructions and Forms.

This program is subject to OMB Circular A–95 requirements.

Questions concerning the preceding information, copies of application forms, and applicable regulations can be obtained at the above address.

Nothing in this solicitation shall be construed as committing MBDA to divide available funds among all qualified applicants.

G. A pre-application conference to assist all interested applicants will be held at the: Inglewood City Hall, Community Room A-First Floor, One Manchester Boulevard, Inglewood, California 90301, May 25, 1983 from 1:30 to 5:00 P.M.

(11.800 Minority Business Development (Catalog of Federal Domestic Assistance))

Dated: May 12, 1983.

Powell McDaniel,

Acting Regional Director.

National Bureau of Standards

National Voluntary Laboratory Accreditation Program (NVLAP); Report of Laboratory Accreditation Actions for April 1983

AGENCY: National Bureau of Standards, Commerce.

ACTION: Announcement of laboratory accreditation actions.

SUMMARY: The National Bureau of Standards (NBS) announces the following laboratory accreditation actions for April 1983.

Gold Bond Building Products, a National Gypsum Division, Research Center, 1650 Military Road, Buffalo, NY 14217, which was previously accredited under the Acoustical Testing Services Laboratary Accreditation Program (Acoustics LAP), has been accredited for three additional test methods under that program.

The additional test methods for which accreditation has been granted are:

NVLAP Code	Designation	Short title
08/PO3	ANSI/ASTM C423–81	Sound Absorption and Sound Absorption Coefficients.
08/PO5	ASTM C523–69 (81)	Light Reflectance of Acoustical Materials.
08/PO6	ANSI/ASTM E90–82	Airborne Sound Transmission Loss of Building Partitions.

Lewis Engineering, Inc., 402 East Main Street, Plainfield, IN 46168 has voluntarily terminated its accreditation under the Freshly Mixed Field Concrete Labortary Accreditation Program.

FOR FURTHER INFORMATION CONTACT: Mr. John W. Locke, Manager, Laboratory Accreditation, TECH B141, National Bureau of Standards, Washington, DC 20234, (301) 921–3431.

Dated: May 11, 1983.

Guy Chamberlin,

Acting Director, National Bureau of Standards.

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

North Pacific Fishery Management Council, Scientific and Statistical Committee and its Advisor, Panel; Meeting Amendment

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: The agenda, as published in the **Federal Register**, May 5, 1983 (48 FR 20286), for the North Pacific Fishery Management Council, its Scientific and Statistical Committee and its Advisory Panel (AP), has been modified to include a new discussion item. The location of the Council's AP meeting as stated in the above **Federal Register** citation has also been changed.

New Agenda Item

Consideration of an appeals procedure for the halibut moratorium.

New AP Meeting Location

Anchorage Westward Hilton, Kenai Room.

All other information remains unchanged.

FOR FURTHER INFORMATION CONTACT: North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, Alaska 99510, Telephone: (907) 274–4563

Dated: May 13, 1983.

Richard B. Stone,

Acting Chief, Operations Coordination Group, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Office of the Secretary

President's Private sector Survey on Cost Control

AGENCY: Office of the Secretary, Commerce.

ACTION: Notice of Open Meeting of the Subcommittee of the President's Private sector Survey on Cost Control (PPSSCC).

SUMMARY: The Subcommittee was established by the Excutive Committee of the PPSSCC to: (i) Review the recommendations submitted, including task force reports and public comments, and (ii) determine which recommendations should be made to the President and the Departments and Agencies.

Time and Place: May 26, 1983, beginning at 11 a.m. The meeting will be held at the U.S. Department of Commerce Auditorium, First Floor, Herbert C. Hoover Building, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

Agenda

1. Draft reports from the following Task Forces of the Survey will be discussed by subcommittee members.

A. Boards/Commissions—Business.
B. Board/Commissions—Banking.
C. User Charges.
D. Low Income Standards.
E. Department of State/AID/USIA.
F. Land/Facilities/Personal Property.

2. Comments and recommendations received from public and other interested parties will be discussed by Subcommittee members.

In compliance with Federal Advisory Committee Act and Freedom of Information Act requirements, copies of the draft reports will be available on May 16 at the Department's Central Reference and records Inspection Facility, Room 6628 Hoover Building, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Please call Ms. Geraldine P. LeBoo on (202) 377–3271 for information concerning fees and procedures for obtaining copies by mail.

SUPPLEMENTARY INFORMATION: The Subcommittee will hold additional public meetings in May and June, 1983. Exact dates will be noticed in the **Federal Register**. Copies of all materials, including Task Force reports, to be considered at these meetings will be available approximately two weeks prior to each meeting at the Department's Central Reference and Records Inspection Facility, address above.

Public Participation: The May 26 meeting will be open to the public. Seating will be on a first-come, first-served basis, up to the safe capacity of the meeting room. Media representatives are encouraged to call Mr. Malcolm Barr, Director, News Relations Department of Commerce, 377–4901 to arrange for coverage of the meeting.

The public may file written statements for consideration by the Subcommittee any time before, at, or after the meeting. It is strongly recommended that statements concerning the matters to be considered at each meeting be filed before such meeting to ensure that they are considered by the Subcommittee before adoption of a report. The statements should be filed at the Department of Commerce's Central Reference and Records Inspection Facility, address and phone number as above. Because of the number of recommendations to be discussed, the meeting agenda will not include time for oral statements from public attendees. All public statements reveived will be available for public review.

FOR FURTHER INFORMATION CONTACT: Ms. Janet Colson, Committee Control Officer for the Exectuive Committee of the President's Private Sector Survey on Cost Control, telephone (202) 466–4665.

Dated: May 13, 1983.

Marilyn S. McLennan

Chief, Information Policy and management Division, Officer of the Secretary.

BILLING CODE 3510-(CW)-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Controlling Imports of Certain Man-Made Fiber Textile Products From Mexico

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Controlling imports of acrylic spun yarn in Category 604 pt. (only T.S.U.S.A. No. 310.5049), produced or manufactured in Mexico and exported during the ninety-day period which began on April 1, 1983 and extends through June 29, 1983.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (FR 55709), as amended on April 7, 1983 (48 FR 15175) and May 3, 1983 (48 FR 19924).

SUMMARY: On March 31, 1983 the Government of the United States requested consultations with the Government of Mexico with respect to acrylic spun yarn in Category 604 pt. (only T.S.U.S.A. No. 310.5049). This request was made on the basis of paragraph 6 of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of February 26, 1979, as amended, between the two governments. Paragraph 6 provides for consultations when the orderly development of trade between the two countries may be impeded by imports due to market disruption, or the threat thereof.

Under the consultation provision of the bilateral agreement, Mexico is obligated to limit its exports to the United States of these products during the ninety-day period to 256,609 pounds. Mexico is also obligated under the bilateral agreement, if no mutually satisfactory solution is reached during consultations, to limit its exports to the United States during the twelve months which began on January 1, 1983 to 759,421 pounds.

The United States Government has decided, pending a mutually satisfactory solution, to control imports of man-made fiber textile products in Category 604 pt. (only T.S.U.S.A. No. 310.5049) for the ninety-day period, at the level described above. The United States remains committed to finding a solution concerning this category. Should such a solution be reached in consultations with the Government of Mexico, further notice will be published in the **Federal Register**.

In the event the limit established for Category 604 pt. (only T.S.U.S.A. No. 310.5049) period is exceeded, such excess amounts, if they are allowed to enter, will be charged to the level (described above) for the twelve-month period.

EFFECTIVE DATE: May 19, 1983.

FOR FURTHER INFORMATION CONTACT: William Boyd, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212)

SUPPLEMENTARY INFORMATION: In the letter published below, pursuant to the bilateral agreement, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of man-made fiber textile products in Category 604 pt. (only T.S.U.S.A. No. 310.5049), produced or manufactured in Mexico and exported during the indicated ninety-day period, in excess of the designated level of restraint.

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

May 13, 1983.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of February 26, 1979, as amended, between the Governments of the United States and Mexico; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on May 19, 1983, and for the ninety-day period beginning on April 1, 1983, and extending through June 29, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of man-made fiber textile products in Category 604 pt. (only T.S.U.S.A. No. 310.5049), produced or manufactured in Mexico and exported on and after April 1, 1983, in excess of 256,609 pounds.[1]

[1] The level of restraint has not been adjusted to reflect any imports after March 31, 1983.

VOL
48
ISS
97
MY
18
1983
UMI

Textile products in Category 604 pt. (T.S.U.S.A. NO. 310.5049) which have been exported to the United States prior to April 1, 1983 shall not be subject to this directive.

Textile products in Category 604 pt. (only T.S.U.S.A. No. 310.5049) which have been released from the custody of the U. S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175) and May 3, 1983 (48 FR 19924)).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The action taken with respect to the Government of Mexico and with respect to imports of man-made fiber textile products from Mexico has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

DEPARTMENT OF DEFENSE

Department of the Army

United States Army Medical Research and Development Advisory Committee, Subcommittee on Medical Defense Against Chemical Agents; Partially Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Subcommittee meeting:

Name of Committee: United States Army Medical Research and Development Advisory Committee, Subcommittee on Medical Defense Against Chemical Agents

Date of meeting: June 1, 1983.

Time and place: 0830 hours, Room 14, US Army Medical Research Institute of Chemical Defense, Aberdeen Proving Ground, MD.

Proposed agenda: This meeting will be open to the public from 0830 to 0945 hrs for the administrative review and discussion of the scientific research program of the US Army Medical Research Institute of Chemical Defense. Attendance by the public at open sessions will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), U.S.C., Title 5 and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 0945 to 1700 on 1 June 1983 for the review, discussion and evaluation of individual programs and projects conducted by the US Army Medical Research and Development Command, including consideration of personnel qualifications and performance, the competence of individual investigators, medical files of individual research subjects, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

COL Richard Lindstrom, US Army Medical Research Institute of Chemical Defense, Aberdeen Proving Ground, MD 21010 (301/671-2833) will furnish summary minutes, roster of Subcommittee members and substantive program information.

Harry G. Dangerfield,

Colonel, MC, Deputy Commander.

BILLING CODE 3710-08-M

Corps of Engineers; Department of the Army

Intent to Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Flood Control Project for the O'Hare System of the Chicagoland Underflow Plan in Cook County, Illinois

AGENCY: Army Corps of Engineers, Chicago District, DOD.

ACTION: Notice of intent to prepare a draft environmental impact statement (DEIS).

SUMMARY: 1. The study involves the potential construction of flood damage reduction reservoirs in the combined sewer service are a of the O'Hare Water Reclamation Plant in Cook County, Illinois. The surface reservoirs would be excavated below existing ground level and could be either wet or dry during non-flood periods. Each reservoir would include necessary appurtenant works for dewatering, operation and maintenance of the reservoir in conjunction with an existing deep tunnel system for combined sewer overflow abatement and treatment. The intent of the proposed project is to reduce flood damages caused by combined sewer system backflow into basements, ponding of surface runoff, and overbank flooding.

2. Alternatives studied in detail are:

a. No action.

b. Structural alternatives consisting of a system of two reservoirs, one on-line and one off-line, which would be connected to deep tunnels via drop shafts, connecting structures and pumping stations, most of which are already in place.

c. A series of plans based on an incremental analysis of the overall effects of each reservoir individually and in combination as well as in combination with other measures. The plan finally selected for implementation may consist of none, one, or both of the two reservoirs investigated.

d. The other measures to be considered in combination with the basic reservoir plan may include combined sewer system upgrades (i.e. separtation, increased capacities or bypass sewers), small, local detention reservoirs with pump stations, sewer inlet restrictors, downspout disconnection, flood proofing basements, excavation, and flood warning systems.

3. The basic reservoir plan considered in this study is essentially from the plan developed by the Metropolitan Sanitary District of Greater Chicago (MSDGC). Designs for the Tunnel and Reservoir Plan (TARP) were released in 1974 and have been subsequently divided into Phase 1 and Phase 2. Phase 1 which mainly involves water quality enhancement, has been implemented by MSDGC for the area under consideration, and Phase 2 which mainly concerns flood damage reduction, involves the proposed reservoirs. The U.S. Army Corps of Engineers began a feasibility study of this plan in 1979. Public participation has included numerous meetings and coordination with the State of Illinois, MSDGC and interested Federal, State and local agencies. Additional coordination has also been undertaken with the U.S. Fish and Wildlife Service, U.S. Environmental Protection Agency, and the Northeastern Illinois Planning Commission.

4. Significant issues to be analyzed in depth are destruction or disruption of terrestrial and aquatic habitat; mitigation for habitat losses; effects on water quality; disposal of excavated material; and aesthetic effects.

5. No formal scoping meeting will be held. A public meeting is tentatively scheduled for the comment period following release of the DEIS. No definite date has been set. Notice of the specific time and location will be issued to the appropriate media and parties expressing interest.

6. The DEIS is expected to be available in September 1983.

7. Questions about the proposed action and DEIS can be answered by: Rose Austin, U.S. Army Corps of Engineers, Chicago District, Environmental and Social Analysis Section, 219 S. Dearborn Street, Chicago, Illinois 60604 (312/353-6464).

DATE: May 10, 1983.

Christos A. Dovas,

LTC, Corps of Engineers, District Engineer.

BILLING CODE 3710-HN-M

Intent To Prepare a Draft Environmental Impact Statement for a Proposed Navigation Improvements for the Existing Federal Project in Sheepshead Bay, Brooklyn, New York

AGENCY: Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a draft environmental impact statement.

SUMMARY: 1. Description of Proposed Action. The plan of improvement proposes to realign, widen, and lengthen the existing Federal project. This plan would provide for a channel 12 feet deep at mean low water (mlw) and a 125 foot width for a distance of 4,125 feet within the Bay, and a channel 14 feet deep at mlw, with a 300 foot width extending from the terminus of the Bay channel into Rockaway Inlet for a distance of 7,050 feet ending at buoys 1 and 2.

Ocean disposal of the dredged material is also proposed.

2. Reasonable Alternatives. a. Plans of Improvement for channel depths between 6 feet mlw (existing project) and 12 feet mlw were investigated. Intermediate depths of 8 and 10 feet were specifically investigated. The no-action plan was also considered.

b. (Disposal Alternatives) The New York District is presently examining alternative sites and methods of dredge material disposal for maintenance dredging projects under separate studies. The subject project Draft EIS will refer to these studies and summarize findings for other feasible alternatives such as upland disposal, sub-aqueous borrow pits, and wetlands creation.

3. Scoping Process. a. Public Involvement. Public input was received in preparation of a Reconnaissance Report, dated 15 December 1980. On 28 February 1980, the Corps took part in an open community meeting concerning the future of Sheepshead Bay sponsored by State Senator Donald Halperin. Preliminary EIS development includes the development of background information (fish and wildlife resources) in coordination with the U.S. Fish and Wildlife Service, and contact with other Federal, State and local agencies for background input. Any others who are interested in the proposed project may contact the EIS coordinator listed below.

b. Significant Issues Requiring In-depth Analysis. Water quality impacts, archaeological and cultural resources inpacts and aquatic resources impacts.

c. Assignments. None anticipated.

d. Environmental review and consultation. Review will be as outlined in Council on Environmental Quality regulations dated November 29, 1978 (40 CFR Parts 1500-1508) and Corps regulations ER 200-2-2, dated August 25, 1980 (revised 2 March 1981).

4. Scoping Meeting will ☐ * will not ☐ be held

* Date · Time Location

5. Estimate date of statement availability August 1983.

Address:

Project Manager (Army Corps of Engineers), Pamela Tames, Attn: NANPL-EN, Tel No. (212) 264-9077

EIS Coordinator (Army Corps of Engineers), Peter Doukas, Attn: NANPL-E, Tel No. (212) 264-1275

BILLING CODE 3710-08-M

Office of the Secretary

Defense Science Board Summer Study Panel on Joint Service Acquisition Programs; Notice of Advisory Committee Meeting

The Defense Science Board 1983 Summer Study Panel on Joint Service Acquisition Programs will meet in closed session on June 6-7, June 29-30, and July 14-15, 1983 in Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meetings on June 6-7, June 29-30, and July 14-15, 1983, the Panel will examine past and present joint Service programs and the factors which contribute to their success or failure.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

Dated: May 13, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

National Advisory Council on Women's Educational Programs

AGENCY: National Advisory Council on Women's Educational Programs.

ACTION: Amendment of Notice.

SUMMARY: This document is intended to notify the general public of changes in the notice of meeting of the National Advisory Council on Women's Educational Programs published May 10, 1983, on 47 FR 20978.

The times, locations and agenda remain the same, except that the Executive Committee will meet in closed session on June 2, 1983 from 8:30 a.m. to 9:30 a.m. at the Hotel Washington, Pennsylvania Avenue at 15th Street, N.W., Washington, D.C. 20004.

Discussion will be held of personnel matters, including the evaluation of the Executive Director. The review and subsequent discussion will include consideration of the competence of the Executive Director and would constitute a serious invasion of privacy if conducted in open session. The meeting will be closed under the authority of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. Appendix I) and under exemptions (2) and (6) contained in the Government in the Sunshine Act (Pub. L. 94-409, 5 U.S.C. 552b(c) (2) and (6).

A summary of the activities of the closed session and related matters which would be informative to the public consistent with the policy of Title 5 U.S.C. 552b(c) will be available to the public within 14 days of the meeting at the Council's office, 425 13th Street, N.W., Suite 416, Washington, D.C. 20004.

Signed at Washington, D.C., on May 13, 1983.

Rosemary Thomson,

Executive Director.

1983
UMI

ACTION: Application Notice for Transmittal of Applications for New Awards; and Establishment of Final Funding Priorities for Fiscal Year 1983.

SUMMARY: Applications are invited for new awards under the Training Program for Special Programs Staff and Leadership Personnel.

Authority for this program is contained in sections 417A and 417F of the Higher Education Act of 1965, as amended.

(20 U.S.C. 1070d, 1070d–1d)

The Secretary is authorized to make grants under this program to institutions of higher education and other public and private nonprofit institutions and organizations.

The purpose of the grant awards is to improve the operation of the Special Programs for Students from Disadvantaged Backgrounds (Talent Search, Upward Bound, Special Services for Disadvantaged Students, and Educational Opportunity Centers) by providing training for staff and leadership personnel employed in, or preparing for employment in, such programs and projects.

EFFECTIVE DATE: Unless the Congress takes certain adjournments, the priorities included in this notice will take effect 45 days after publication in the **Federal Register**. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

Closing Date for Transmittal of Applications

An application for a training grant must be mailed or hand delivered by July 5, 1983.

Applications Delivered by Mail

An application sent by mail should be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.103 (Training Program for Special Programs Staff and Leadership Personnel), Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept a private metered postmark or a private mail receipt as proof of mailing. An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered mail or at least first class mail.

Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand

An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets SW., Washington, D.C.

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information

The Secretary is accepting applications for one year of funding to support a variety of training projects that respond to the training needs and priorities of the Special Programs staff and leadership personnel. An applicant may submit more than one application for funding under this program, and the Secretary strongly urges that separate applications be submitted for separate proposed training activities.

The applications for new awards will be evaluated competitively under the selection criteria for new awards, 34 CFR 642.31, published in the **Federal Register** on April 23, 1982, 47 FR 17786–17790. In addition, applicants that have been funded within the previous three years to operate a Training Program project for Special Programs staff and leadership personnel will be evaluated on the basis of their prior experience under 34 CFR 642.32 which was published in the **Federal Register** on June 8, 1982, 47 FR 24938–24943.

SUPPLEMENTARY INFORMATION: On January 17, 1983, the Secretary of Education published in the **Federal Register**, 48 FR 2034–2035, proposed funding priorities for training activities to be funded under the Training Program for Special Programs Staff and Leadership Personnel for Fiscal Year 1983.

Interested parties were given 30 days to submit comments, suggestions or recommendations regarding the proposed priorities. A total of 20 comments were received. The following is a summary of the comments received and the Secretary's response to those comments, including any changes. All changes are described together with an explanation for the change.

Proposed Priority (1): Regional workshops for new Special Programs project directors (one year or less in their current positions) to improve their skills in administering a Special Programs project in order to prevent mismanagement or marginal results.

Comment: One commenter strongly believed that all project directors and other leadership personnel need additional training in improving supervisory skills. A second commenter recommended adding to the priorities short-term workshops on program evaluation for project directors.

Response: No change has been made in the category of eligible participants. New Special Programs project directors (one year or less in their current positions) are given priority for this training. The Secretary feels that development of sound supervisory skills are vital to the new project director in order to prevent mismanagement or marginal results. Further, the Secretary agrees that program evaluation should be included among the training topics for new project directors, and since program evaluation is directly related to the goals and objectives established within each project, the Secretary encourages applications which include training on how to write measurable outcome objectives.

Proposed Priority (2): Short-term workshops which enhance the skills of Special Programs instructional staff to provide basic skills development.

Comment: No comments were received.

Response: No change has been made in this priority. The Secretary feels emphasis should be given to programs that strengthen basic skills in math, science, and English language literacy.

Proposed Priority (3): Short-term workshops which provide Special Programs counselors/instructors with techniques and information on appropriate uses of standardized tests and student assessment procedures.

Comment: Two commenters reiterated the need to train Special Programs counselors/instructors in appropriate uses of standardized tests and student assessment procedures. The commenters suggested that the training also include the following topics:

1. Individualized student assessment;
2. Utilizing assessment information to assist students in decision-making;

3. Standardized testing experiences that assist students in using test data in planning;
4. Career and educational planning experience related to the students' career goals; and
5. The development of a longitudinal student tracking system.

Response: No change has been made. The Secretary agrees that the above topics may be included in a training workshop on standardized tests and student assessment procedures.

Proposed Priority (4): Seminars/workshops to enhance the knowledge of Special Programs project directors, instructors, and counselors in cost-effective uses of computers and other advanced educational technology.

Comment: Two commenters indicated that the use of computers is important because of the integral part that they are playing and will play in the overall TRIO program functions. The commenters noted further that, as more and more emphasis is placed on the use of computers, there is a need to supplement the academic remediation which disadvantaged students receive with the help of computer technology. They stated that one major benefit of the use of computers and other advanced technology is that it will increase the educational potential of the disadvantaged student.

A third commenter suggested that a knowledge of college and university admissions practices for disadvantaged students should be substituted for the priority regarding computers and advanced educational technology which seems to be little more than a concession toward current fads.

Response: No change has been made. The Secretary has determined that programs which support the effective use of computers for improving basic and higher level skills instruction or for improving the productivity of teaching should be given priority.

Proposed Priority (5): Regionally based training seminars/workshops for Special Programs project staff on availability of, and application processes for, student financial assistance for postsecondary educaton.

Comment: Two comments were received which supported this priority.

Other commenters recommended deleting priority five. These commenters noted that existing organizations of professional financial aid administrators now regularly conduct high-quality training for novices in the field as well as for more experienced persons and that this training is open to Special Programs personnel across the nation. The commenters went on to state that these existing workshops:

(a) Provide the necessary training and information in a high-quality, existing setting;

(b) Obviate the need for establishing a duplicative training program; and

(c) Have the added benefit of personally acquainting Special Programs personnel with many professionals in the student financial aid field.

Response: A change has been made. The Secretary has deleted this topic as a training priority to avoid duplicating the existing federal and State student financial aid training programs.

Proposed Priority (6): Seminars to enhance the skills of project staff who provide services to the physically disabled.

Comment: Many comments were received which strongly endorsed this training priority. Several commenters suggested that the need for such training is considerable since unprepared university personnel are often pressed into service due to the lack of qualified staff. Other commenters recommended maintaining this as a top priority on an extended basis because much training is needed to affect attitudes and improve skills of staff and clients.

Response: No change has been made. The Secretary has encouraged programs that address the special skill acquisition needs of the handicapped and is committed to seeking ways of supplementing state and local resources in order to meet the challenge of serving special student populations such as the physically disabled.

Other Comments: Other comments received suggested adding the following training priorities:

(a) Training to meet the educational needs of the adult learner;

(b) Training to assist project directors in improving retention of Special Services students;

(c) Regional workshops to assist project staff in securing strong institutional, local or private sector commitment to their objectives; and

(d) Regional training for organizational improvement and project management.

Response: While each suggested addition to the priorities has merit, the Secretary has decided to limit the number of priorities due to the limited amount of funds available. The Secretary will, however, consider applications for a Training Program project on these topics and other topics which are not listed as priorities if the applicant addresses another significant training need in the local area being served by the Special Programs.

After careful consideration of the comments received, the Secretary is adopting the following priorities as the final priorities that will be used to evaluate applications for new awards in Fiscal Year 1983:

Funding Priorities for Fiscal Year 1983

(1) Regional workshops for new Special Programs project directors (one year or less in their current positions) to improve their skills in areas such as supervision, program evaluation, and establishment of measurable outcome objectives, in order to prevent mismanagement or marginal results.

(2) Short-term workshops which enhance the skills of Special Programs instructional staff to provide basic skills development;

(3) Short-term workshops which provide Special Programs counselors/instructors with techniques and information on appropriate uses of standardized tests and student assessment procedures;

(4) Seminars/workshops to enhance the knowledge of Special Programs project directors, instructors, and counselors in cost-effective uses of computers and other advanced educational technology;

(5) Seminars to enhance the skills of project staff who provide services to the physically disabled.

As mentioned above, the Secretary will consider applications for Training Program project on topics other than those given priority if the applicant addresses another significant training need in the local area being served by the Special Programs.

Available Funds

The Second Continuing Resolution, which expires September 30, 1983, authorizes $960,000 to be made available for new awards under the Training Program for Special Programs Staff and Leadership Personnel in Fiscal Year 1983. It is estimated that these funds could provide for approximately ten (10) training grant awards.

Application Forms

Application forms and program information packages are expected to be ready for mailing by May 19, 1983. Application packages may be obtained by contacting the Division of Student Services, Information Systems and Program Support Branch, U.S. Department of Education (Room 3514, Regional Office Building 3), 400 Maryland Avenue, SW., Washington, D.C. 20202. Telephone 202–245–7070.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program

VOL

UMI

information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those imposed under the statute and regulations.

The Secretary suggests that the narrative portion of the application not exceed thirty (30) pages in length. The Secretary further suggests that only the information required by the application form be submitted.

Applicable Regulations

Regulations applicable to this program are:

(a) Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78; and

(b) Regulations governing the Training Program for Special Programs Staff and Leadership Personnel (34 CFR Part 642) which were published in the **Federal Register** on April 23, 1982, 47 FR 17786–17790, and amended on June 8, 1982, 47 FR 24943; and the final priorities included in this notice.

FOR FURTHER INFORMATION CONTACT: John L. Hunt, Program Development Branch, Division of Student Services, U.S. Department of Education (Room 3514, Regional Office Building 3), 400 Maryland Avenue, SW., Washington, D.C. 20202. Telephone: 202–245–2511.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Salt Deposits for Detailed Site Characterization, Recommendations on Issues To Be Addressed in Environmental Assessments and Site Characterizations Plans; Public Hearings on Proposed Nomination of Sites

AGENCY: Department of Energy.

ACTION: Notice of change to the period for written comments for public hearings in Louisiana, Mississippi, Texas, and Utah, and changes to the location of public hearings in texas.

SUMMARY: The U.S. Department of Energy has identified one or more potentially acceptable sites in salt deposits for a high-level radioactive waste repository and has announced public hearings on the proposed nomination of these sites for site characterization studies pursuant to Section 113 of the Nuclear Waste Policy Act of 1982 (Pub. L. 97–425) in the April 13, 1983, **Federal Register.** These sites are: the Richton and Cypress Creek salt domes in Mississipi, the Vacherie salt dome in Louisiana, and sites in Davis and Lavender Canyons in southeastern Utah. The U.S. Department of Energy announced identical hearings in the April 26, 1983, **Federal Register** for one or more potentially acceptable sites in Deaf Smith and Swisher counties in the Texas Panhandle. This notice identifies the revised locations for the Tulia and Austin, Texas hearings and an extension to the public comment period for all hearings. These hearings are to solicit: (1) Comments on the proposed nominations, (2) issues to be included in Environmental Assessments supporting the nomination of each site, and (3) issues to be addressed in the Site Characterization Plan.

Dates and Addresses

1. April 28, 1983, 4:00 p.m. to 10:00 p.m., Richton High School, Richton, Mississippi.

2. April 29, 1983, 2:00 p.m. to 9:00 p.m., Woolfolk State Office Building, 501 North West Street, Jackson, Mississippi.

3. May 3, 1983, 7:00 p.m. to 11:00 p.m., Monticello High School Auditorium, Monticello, Utah.

4. May 4, 1983, 2:00 p.m. to 9:00 p.m., Hotel Utah, Salt Lake City, Utah.

5. May 10, 1983, 2:00 p.m. to 9:00 p.m., Civic Center Auditorium, Minden, Louisiana.

6. May 12, 1983, 2:00 p.m. to 9:00 p.m., Auditorium, Jefferson Davis Campus, Gulf Coast Community College, Gulf Port, Mississippi.

7. May 16, 1983, 7:00 p.m. to 11:00 p.m., Hereford High School Auditorium, 200 Avenue F, Hereford, Texas.

8. May 17, 1983, 7:00 p.m. to 11:00 p.m., Tulia Junior High School Auditorium, 401 Northeast 3rd Street, Tulia, Texas.

9. May 18, 1983, 2:00 p.m. to 9:00 p.m., Austin Hilton Inn, 6000 Middle Fiskville Road, Austin, Texas.

Written Comments

The period for public comment has been extended to May 31, 1983. Parties may submit written comments on the proposed nomination; the issues to be addressed in the environmental Assessment; and the issues to be addressed in any Site Characterization Plan until this date. These comments will be added to the Hearing transcript and constitute the official Departmental record of the Hearing. Comments should be mailed to the address noted below.

FOR FURTHER INFORMATION CONTACT: For requests to speak at the hearings, and for further information contact: J. O. Neff, U.S. Department of Energy, NWTS Program Office, 505 King Avenue, Columbus, Ohio 43201, Telephone: (614) 424–5916.

Written comments should be submitted to: J. O. Neff, U.S. Department of Energy, NWTS Program Office, 505 King Avenue, Columbus, Ohio 43201, Telephone: (614) 424–5916.

For the Department of Energy, May 13, 1983.

Donald Paul Hodel,

Secretary of Energy.

[FR Doc. 83-13579 Filed 5-17-83; 11:59 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

Compliance With National Environmental Policy Act Environmental Impact Statement and Scoping Meeting for the Edge Moor Power Station Conversion to Coal, Wilmington, Delaware

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of intent to prepare an environmental impact statement and notice of scoping meeting.

SUMMARY: The Department of Energy (DOE) announces its intent to initiate the preparation of the Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act of 1969 (NEPA), to analyze the potential impact associated with its proposal to issue a Notice of Effectiveness, of prohibition orders issued, to the Edge Moor Power Station of Delmarva Power in the State of Delaware. This action is taken under the authority granted the Secretary of the Department of Energy in the Energy Supply and Environmental Coordination Act (ESECA), as amended by the Omnibus Budget Reconcilation Act of 1981 (OBRA).

The purpose of the EIS is to determine the impacts likely to result from the conversion from residual fuel oil and natural gas, to coal of the Edge Moor facility stemming from the DOE action.

The public is invited to attend an open scoping meeting in Wilmington, Delaware to express it view on the substantive scope of the environmental document and on the environmental issues of concern which the document should address.

DATE OF HEARING: June 7, 1983.

Meeting Location: Carvel State Office Building, Conference Room B, Third Floor, 820 French Street, Wilmington, Delaware 19801.

Time: 1:00 p.m. and 6:00 p.m.

Notification to Attend and Submission of Comments: Those individuals planning to attend the scoping meeting should contact Mrs. Ellen Russell at the address printed below. Written comments or suggestions for consideration at the meeting, in connection with the preparation of this EIS, should be transmitted to Mrs. Russell by June 1, 1983.

FOR FURTHER INFORMATION CONTACT:

Ellen Russell, Office of Fuels Programs, Economic Regulatory Administration, Department of Energy, 1000 Indenpendence Avenue, SW., Room GS–093, Washington, D.C. 20585, (202) 252–1316

Elizebeth V. Jankus, Office of Environmental Compliance, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–6374.

SUPPLEMENTARY INFORMATION: This site-specific environmental impact statement is the third tier in a three-tiered approach to environmental impact assessment, an approach which conforms to the intent of the National Environmental Policy Act (NEPA) in general, and to the Council on Environmental Quality Regulation on implementing NEPA procedures in particular (Section 1508.28).

The first tier in the impact assessment process associated with fuel conversion is the programmatic analysis. In April 1979, DOE issued a Final Programmatic Environmental Impact Statement for the Fuel Use Act (DOE/EIS–0038) assessing the major environmental impacts resulting from the implementation of the Powerplant and Industrial Fuel Use Act. Additional generic and historic information can be found in the Revised Programmatic Environmental Impact Statement for the Energy Supply and Environmental Coordination Act (FES 77–3) published by the Federal Energy Administration in May 1977.

The second tier of the impact analysis is the Northeast Regional Environmental Impact Statement (NEREIS) (DOE/EIS–0083–F) (October, 1982). This document assesses the potential for cumculative and interactive impacts among powerplants located in proximity to each other.

The NEREIS, and four technical documents which provide the data base for the regional analysis, emphasizes four major interrelated issues: (1) Air quality, (2) solid waste disposal, (3) fuel supply and transportation of fuel and solid waste, and (4) health effects. Detailed site-specific issues are not treated in the NEREIS; rather, generic issues that are cumulative or interactive on a regional basis are emphasized. When addressing issues in the site-specific documents where the use of generic information is most appropriate, the information is incorporated directly from the NEREIS.

The anlaysis in the Northeast Regional Environmental Impact Statement is based on an assessment of the impacts associated with four air pollution emission scenarios. This component of the analysis was conducted at the subregional level. The four subregions center around Boston, New York, Philadelphia, and Baltimore. In the Philadelphia subregion, the analysis in the NEREIS is based on the interaction of four generating stations with eight units with a potential for conversion. This analysis included the two Edge Moor units which are the subject of this site-specific EIS.

Nature of the Action: Under ESECA, as amended by the Omnibus Budget Reconciliation Act of 1981, if a prohibition order was pending under ESECA to a utility, the utility had the option of terminating the proceeding or electing to continue under the prohibition order process under ESECA. Continuation under the prohibition order process grants to the utility the status under the Clean Air Act of an existing emission source for that powerplant. DOE issuance of such orders may constitute a major Federal Action under NEPA, and thus requires the appropriate level of NEPA compliance.

Prohibition orders were issued to the Edge Moor Power Station on June 30, 1975, and Delmarva Power elected continued coverage under ESECA for Units 1 through 4 of the facility on November 2, 1981. The Edge Moor facility is currently burning coal in Units 3 and 4 under conditions defined by the State of Delaware's Department of Natural Resources and Environmental Control. Oil is burned in Units 1, 2, and 5. When the conversions of Units 3 and 4 to coal are complete, Delmarva Power plans to retire Units 1 and 2 and to continue to burn oil in Unit 5.

Purpose of the Environmental Review Process: The purpose of the Environmental Review Process is to assess the environmental impacts of Edge Moor Power Station's conversion of Units 3 and 4 from petroleum and natural gas to coal as a primary fuel. That assessment which complies with Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) will lead to the preparation of an appropriate NEPA document which addresses areas of concern. Currently, impacts related to air quality, water quality, solid waste disposal, transportation of fuel and solid waste, fuel availability, economic growth and health effects have been identified as issues of concern and will, therefore, be addressed in the analysis. Other impacts deemed to be potentially significant during the public scoping process will also be addressed.

The Energy Supply and Environemntal Coordination Act (ESECA) mandates that all facilities undergoing conversion meet all applicable environmental requirements. The EIS must also address the provisions of the Clean Air Act, as amended, and take into consideration the State Implementation Plan (SIP) as it applies to the units specified, and limits, other than the SIP, that are currently applied to specific units. The public is encouraged to recommend and identify other scenarios and impacts that should be assessed. Upon compeltion of the draft EIS, its availability will be announced in the **Federal Register** and comments will be solicited.

Purpose of Scoping Meeting: DOE desires to know what the public considers to be the major environmental issues associated with the potential conversion of the Edge Moor powerplant in Delaware from oil to coal. The meeting in Wilmington, Delaware will be held to receive comments on the structure of the EIS, anticipated energy/environmental problems, actions that might be taken to address them, and reasonable alternatives that should be considered.

The meeting is scheduled to begin at 1:00 p.m. and will continue until all persons wishing to speak have and an opportunity to do so. At that time the meeting will adjourn and reconvene at 6:00 p.m. to accommodate speakers unable to participate earlier.

If possible, participants are encouraged to submit to Mrs. Russell, by June 1, their intent to participate and copies of any written material. Although public participation is encouraged even without advance submission of written material, pre-registered speakers will precede all others. Attendees at the meeting will be asked to register, and this roster will be used to generate the mailing list for the draft document being prepared. The record of this meeting will remain open for submission of additional written material until 4:30 p.m., June 14, 1983.

Questions regarding the meeting should be addressed to Mrs. Russell at (202) 252–1316. Written comments should be submitted to Mrs. Russell at the above address.

VOL 48 ISS 97 MAY 18 1983 UMI

Issued in Washington, D.C. on May 13th, 1983.

William A. Vaughan,

Assistant Secretary, Environmental Protection, Safety, and Emergency Preparedness.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-025]

Bethlehem Steel Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Bethlehem Steel Corporation (Bethlehem), 8th & Eaton Avenue, Bethlehem, Pennsylvania 18106, filed an application on April 15, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Sparrows Point Plant in Sparrows Point, Maryland, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Bethlehen indicates that the volume of natural gas for which it requests certification is approximately 30,000 Mcf per day. This volume is estimated to displace the use of approximately 206,760 gallons of No. 6 fuel oil (1.0 percent sulfur) per day.

The eligible sellers are Enhanced Recovery Equipment Company, 25660 Saunders Road, Lake Forest, Illinois 60045; Mewborne Oil Company, P.O. Box 7098, Tyler, Texas 75711; and Exxon Company, U.S.A., P.O. Box 2180, Houston, Texas 77001. The Gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314; Columbia Gulf Transmission Company, 3805 W. Alabama Avenue, Houston, Texas 77027; Panhandle Eastern Pipeline Company, P.O. Box 1348, Kansas City, Missouri 64141; and Baltimore Gas & Electric Company, P.O. Box 1475, Baltimore, Maryland 21203.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to Bethlehem and any persons filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 12, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 83-13380 Filed 5-17-83; 8:45 am]

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-016]

Burlington Industries, Inc.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

On April 12, 1983, Burlington Industries, Inc. (Burlington), P.O. Box 21207, Greensboro, North Carolina 27420, filed with the Administrator of the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at three of its manufacturing facilities in North Carolina, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). On May 3, 1983, Burlington filed an amendment concerning the volume of gas requested. More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 100 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its amended application, Burlington indicates that the volume of natural gas for which it requests certification is approximately 892,790 Mcf per year. This volume is estimated to displace the use of approximately 4,962,541 gallons of No. 6 fuel oil (2.1 percent sulfur) per year at the three North Carolina facilities. The facilities are: Greensboro Finishing Plant in Greensboro; Burlington House Finishing Plant in Burlington; and Hillcrest Veneer Plant in High Point.

The quantities at each location are subject to variation with changes in demand, but estimated gas usage and resulting oil displacement volumes are listed below:

Location	Estimated volume (thousand cubic feet) per year	Estimated oil (No. 6) displacement (gallons) 2.1 percent sulfur
1. Greensboro Finishing Plant, Greensboro, North Carolina	203,670	1,398,534
2. Burlington House Finishing Plant, Burlington, North Carolina	655,540	4,501,375
3. Hillcrest Veneer Plant, High Point, North Caroline	33,580	230,583
Total	892,790	4,962,541

The eligible seller is Oklahoma Natural Gas Company, Post Office Box 871, Tulsa, Oklahoma 74102. The gas will be transported by Transcontinental Gas Pipeline Corporation, Post Office Box 1396, Houston, Texas 77251; Northern Natural Gas Company, 2223 Dodge Street, Omaha, Nebraska 68102; and Piedmont Natural Gas Company, Inc., Post Office Box 33068, Charlotte, North Carolina 28233.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any peron wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary, further notice will be given to Burlington and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 12, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 83-CERT-010]

Central Hudson Gas & Electric Corp.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Central Hudson Gas & Electric Corporation (CHGE), 284 South Avenue, Poughkeepsie, New York 12601, filed an application on April 4, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its Danskammer Point Steam Electric Generating Station (Units 1 and 2) in Newburgh, New York, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, CHGE indicates that the volume of natural gas for which it requests certification is approximately 2,000,000 Mcf per year. This volume is estimated to displace the use of approximately 302,000 barrels of No. 6 fuel oil (1.0 percent sulfur) per year.

The eligible seller is New York State Electric & Gas Corporation, 4500 Vestal Parkway East, Binghampton, New York 13902. The gas will be transported by Tennessee Gas Pipeline Company, P.O. Box 2511, Houston, Texas 77001; CHGE will serve as its own local distributor.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A Daigneault, within (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that a oral presentation is necessary, further notice will be given to CHGE and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 12, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-012]

J. P. Stevens & Company, Inc.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

On April 12, 1983, J. P. Stevens & Company, Inc. (Stevens), P.O. Box 2850, Greenville, South Carolina 29602, filed with the Administrator of the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at nine of its manufacturing facilities in North Carolina and South Carolina, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). On May 3, 1983, Stevens filed an amendment concerning the volume of gas requested. More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its amended application, Stevens indicates that the volume of natural gas for which it requests certification is approximately 520,125 Mcf per year. This volume is estimated to displace the use of approximately 3,569,524 gallons of No. 6 fuel oil (2.1 percent sulfur) per year at the Boger City Plant in Lincolnton, North Carolina, and at the following eight South Carolina facilities: White Horse Plant No. 1, White Horse Plant No. 2, Monaghan Plant, and Duncan Plant, all in Greenville; Chemical Plant No. 1 and Estes Plant in Piedmont; Slater Plant in Slater; and Appleton Plant in Anderson.

The quantities at each location are subject to variation with changes in demand, but estimated gas usage and resulting oil displacement volumes are listed below:

Location	Estimated volume (thousand cubic feet) per year	Estimated oil (No. 6) displacement (gallons) 2.1 percent sulfur
1. White Horse Plant No. 1, Greenville, South Carolina	29,200	200,507
2. White Horse Plant No. 2, Greenville, South Carolina	25,550	175,443
3. Monaghan Plant, Greenville, South Carolina	58,400	401,013
4. Boger City Plant Lincolnton, South Carolina	36,500	250,633
5. Chemical Plant No. 1, Piedmont, South Carolina	21,900	150,380
6. Slater Plant, Slater, South Carolina	91,250	625,583
7. Appleton Plant, Anderson, South Carolina	91,250	625,583
8. Estes Plant, Piedmont, South Caroline	56,575	388,482
9. Duncan Plant, Greenville, South Carolina	109,500	751,900
Total	520,125	3,569,524

The eligible seller is Oklahoma Natural Gas Company, Post Office Box 871, Tulsa, Oklahoma 74102. The gas will be transported by Transcontinental Gas Pipeline Corporation, Post Office Box 1396, Houston, Texas 77251; Northern Natural Gas Company, 2223 Dodge Street, Omaha, Nebraska 68102; and Piedmont Natural Gas Company, Inc., Post Office Box 33068, Charlotte, North Carolina 28233.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit coments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why

VOL 48 ISS 97 MAY 18 1983 UMI

an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to Stevens and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., May 12, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-007]

Stone Container Corp.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On March 7, 1983, Stone Container Company (Stone), 50 East Sixth Street, Franklin, Ohio 45005, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 360,000 Mcf per year of natural gas which is expected to displace the use of approximately 2,470,000 gallons (58,860 barrels) of No. 6 fuel oil (1.0 percent sulfur) per year at its paper mill facility, in Franklin, Ohio.

The application was amended on April 27, 1983, to add two eligible sellers and a transporter; the volumes remain the same. The eligible sellers of the natural gas are Ohio Gas Marketing Corporation, 3933 Price Road, Newark, Ohio 43055; Exxon Company, U.S.A., P.O. Box 2810, Houston, Texas 77001; and Texas Gas Corporation, 3800 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 42301. As amended, the gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, 1700 MacCorkle Avenue, S.E., Charleston, West virginia 25325; Texas Gas Transmission Corporation, 3888 Frederica Street, P.O. Box 1160, Owensboro, Kentucky 42301; and Cincinnati Gas and Electric Company, 139 East Fourth Street, Cincinnati, Ohio, a local distribution company.

Notice of that application was published in the **Federal Register** (48 FR 16101, April 14, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed Stone's application for certification in accordance with 10 CFR Part 595, and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that Stone's application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 12, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. CP83-275-000]

Arkansas Louisiana Gas Co.; a division of Arkla, Inc., Request Under Blanket Authorization

May 13, 1983.

Take notice that on April 14, 1983, Arkansas Louisiana Gas Company, a division of Arkla, Inc. (Arkla), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP83-275-000 a request pursuant to Section 157.205) of the Regulations under the Natural Gas Act (18 CFR 157.205) that Arkla proposes to construct and operate a sales tap on its jursidictional Line F-185 and related facilities costing an estimated $1,372,000 to permit direct sales of gas under the authorization issued in Docket Nos. CP82-384-000 and CP82-384-001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Arkla proposes to construct and operate a sales tap along with separation and metering equipment and approximately 7.7 miles of 8-inch line to permit direct sales of gas to Texas Eastman Company which would use up to 30,000 Mcf per day on an interruptible basis for chemical and plastic manufacturing processes. Arkla indicates it would charge a price of $3.75 per Mcf plus or minus a cost of gas adjustment equal to the amount by which Arkla's weighted average cost of gas during the preceding billing month exceeds or is less than $2.5692 per Mcf all subject to adjustment for Btu content provided that the maximum price until March 31, 1984, would not exceed $3.40 per million Btu and the maximum price during the balance of 1984 would not exceed $3.75 per million Btu.

Arkla states that the impact of service to the new customer would be *de minimis* upon Arkla's annual deliveries. Arkla indicates that although itprojects no curtailments on its system in the foreseeable future, except on spike peaks in the winter time, the proposed sale to Texas Eastman would be made under a completely interruptible basis and accordingly would not effect Arkla's ability to maintain service to any of its firm customers. Arkla also indicates that it has filed to make a tariff change in its curtailment plan to place this particular type of interruptible customer in Priority 8, the lowest priority of Arkla's curtailment plan. However, by letter filed April 19, 1983, Arkla advised that if curtailments are needed, Arkla will curtail according to whichever curtailment plan is in effect.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

Broad River Electric Cooperative, Cherokee Falls Associates; Application for Transfer of License (Major)

May 13, 1983.

Take notice that Broad River Electric Cooperative, Licensee for the Cherokee Falls Project, and Cherokee Falls Associates, have requested that the project license be transferred jointly to the Broad River Electric Cooperative and Cherokee Falls Associates. The Cherokee Falls Project is located on the Broad River in Cherokee County, South Carolina. The project proposed installed capacity is 3,500 kW.

Comments, Protests, or Motions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of Rules 211 or 214, 18 CFR 385.211 or 385.214, 47 FR 19025-26 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be filed on or before June 24, 1983.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426.

BILLING CODE 6717-01-M

[Docket No. CP83-296-000]

Columbia Gulf Transmission Co. and Transcontinental Gas Pipe Line Corp.; Application

May 13, 1983.

Take notice that on April 28, 1983, Columbia Gulf Transmission Company (Columbia Gulf), P.O. Box 683, Houston, Texas 77001, and Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP83-296-000 a joint application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and exchange of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Columbia Gas Transmission Corporation (Columbia Gas) has acquired a portion of gas reserves underlying High Island Block A-446 and Transco has acquired gas reserves in West Cameron Block 624, all offshore Louisiana. Pursuant to an exchange of transportation service agreement between Applicants dated February 12, 1983, Columbia Gulf and Transco have agreed to exchange natural gas transportation services on a best-efforts and thermally equivalent basis. It is stated that Transco would receive quantities of Columbia Gas Transmission Corporation's natural gas at an existing platform located in High Island Block A-446, offshore Louisiana, and provide transportation to an existing interconnection between the facilities belonging to Columbia Gulf and Transco in High Island Block A-446. In an equivalent exchange service, Columbia Gulf would receive Transco's gas at a platform in West Cameron Block 624 and transport such gas to an existing interconnection in the Southwest Leg of Columbia Gulf's Blue Water Project in West Cameron Block 624, offshore Louisiana; it is asserted. The benefits to be derived from this exchange of transportation services would be substantially equal and mutually beneficial, it is stated. Therefore, it is explained that no transportation charge would be made by either Columbia Gulf or Transco.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1983, file with the Federal Energy Regulatory Commission, Washington, DC. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedures (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-296-000]

Houston Pipe Line Co., Application

May 13, 1983.

Take notice that on April 28, 1983, Houston Pipe Line Company (Applicant), P.O. Box 1188, Houston, Texas 77001, filed in Docket No. CP83-296-000 an application pursuant to Section 311(a) (2) of the Natural Gas Policy Act of 1978 and § 284.127 of the Commission's Regulations for authority to transport certain quantities of natural gas for Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is currently engaged in the transportation of natural gas on behalf of Northern pursuant to a transportation agreement dated April 25, 1979. It is stated that service under this agreement commenced July 25, 1979, for an initial term of two years under the self-implementing provisions of

VOL 48 ISS 97 MY 18 1983 UMI

§ 284.122(a) of the Commission's Regulations and was extended for a period of two years commencing July 25, 1981, pursuant to § 284.125 of the Commission's Regulations. In order that the transportation service might be continued on an uninterrupted basis, Applicant requests the Commission to authorize a continuation of the transportation arrangement for a period of two years commencing July 25, 1983, and ending July 24, 1985.

Applicant proposes to transport up to 150,000 Mcf of gas per day for Northern or such additional daily volumes which Applicant determines that its operating conditions shall reasonably permit. Applicant states that it would transport Northern's volumes from a point or points located at one or more of: (i) The existing interconnections of Applicant's and Texas Eastern Transmission Corporation's pipeline facilities near Mont Belvieu, Chambers County, Texas, and near Mauriceville, Orange County, Texas, (ii) the existing interconnection of Applicant's and Tennessee Gas Pipeline Company, a Division of Tenneco Inc.'s pipeline facilities near the Sabine river, Newton County, Texas, (iii) the existing interconnection of Applicant's and Black Marlin Pipeline Company's pipeline facilities near Texas City, Galveston County, Texas, (iv) the existing interconnections of Applicant's and United Gas Pipe Line Company's (United) pipeline facilities near Bayside, Refugio County, Texas, and near Ingleside, San Patricio County, Texas, and (v) the existing interconnections of Applicant's and Transcontinental Gas Pipe Line Corporation's pipeline facilities near Loeb, Hardin County, Texas, near Fulshear, Fort Bend County, Texas, and in the Bammel Field Area, Harris County, Texas. A thermally equivalent quantity of gas so delivered, less applicable fuel if any, would be redelivered by Applicant for Northern's account to either or both Oasis Pipe Line Company (Oasis) and United at a point or points located at: (i) The existing interconnection of Applicant's and Oasis' pipeline facilities near Katy, Waller County, Texas, and (ii) the existing interconnection of Applicant's and United's pipeline facilities located near Bayside, Refugio County, Texas. Northern has agreed to pay Houston 6.0 cents per million Btu of gas delivered.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protest filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP79-332-002]

Natural Gas Pipeline Co. of America; Petition To Amend

May 13, 1983.

Take notice that on May 11, 1983, Natural Gas Pipeline Company of America (Natural), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP79-332-002 a petition to amend authorization pursuant to Section 3 of the Natural Gas Act granted to Natural in Docket Nos. CP79-332 and CP79-332-001 by order issued April 24, 1981, in *Northwest Alaskan Pipeline Company, et al.*, Docket No. CP78-123, *et al.*, by authorizing Natural to continue to import natural gas from Canada purchased at a change in price, as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Natural states that Ordering Paragraph (A) of the order of April 24, 1981, authorizes Natural to import up to 75,000 Mcf of natural gas per day purchased from ProGas Limited "at an import price of $4.94 per MMBtu". Natural states that on April 11, 1983 the Government of Canada lowered its border price from $4.94 per MMBtu to $4.40 per MMBtu.

Natural requests that Ordering Paragraph (A) of the Commission's April 24, 1981, order be amended to read "at an import price of up to $4.40 per MMBtu". Natural avers that such amendment would clarify its authority to purchase Canadian natural gas from ProGas at the current border price of $4.40 per MMBtu as well as at any lesser price implemented by the Canadian government.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or bo participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP78-220-005]

Northwest Pipeline Corporation; Petition To Amend

May 13, 1983.

Take notice that on April 22, 1983, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed in Docket No. CP78-220-005 a petition to amend the order issued October 4, 1978, as amended, in Docket No. CP78-220 pursuant to Section 7(c) of the Natural Gas Act so as to authorize the continued transportation and exchange of natural gas with Rocky Mountain Natural Gas Company (Rocky Mountain) pursuant to the terms of three amendments to their gas transportation exchange agreement, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Northwest states that by order issued on October 4, 1978, as amended, it was authorized to exchange up to 10,000 Mcf of natural gas per day with Rocky Mountain and RMNG Gathering Company (RMNG) pursuant to the terms of an exchange agreement dated January 27, 1978, as amended. The gas subject to the exchange is on acreage which Northwest owns or controls and is delivered by Northwest to Rocky Mountain at the intersection of Northwest's Great Divide Gathering System facilities and Rocky Mountain's Big Hole pipeline in Moffat County, Colorado, it is stated. RMNG then redelivers thermally equivalent volumes to Northwest at the Bar-X exchange meter station which is located at the intersection of RMNG's South Canyon gathering system facilities and Northwest's mainline facilities in Mesa County, Colorado, it is further stated. Rocky Mountain currently charges Northwest 14.3 cents per Mcf for providing the described transportation and exchange service, it is asserted.

Northwest requests herein amendment of its exchange service authorization pursuant to the terms of three amendments to the exchange agreement as follows:

(1) The amendment dated June 29, 1979, provides for an additional redelivery point from Rocky Mountain to Northwest to be located at an existing point of interconnection between the facilities of Rocky Mountain and Northwest in Rio Blanco County, Colorado (Piceance delivery point);

(2) The amendment dated October 30, 1979, requires Northwest to reimburse Rocky Mountain and RMNG for actual out-of-pocket costs of providing taps on Rocky Mountain's and RMNG's facilities which enable them to receive natural gas for the account of Northwest; and,

(3) The amendment dated April 15, 1982, provides for the addition of 1,600 acres to the Great Divide area covered by the exchange agreement dated January 27, 1978.

Northwest further requests blanket authorization to include additional acreage subject to the certified exchange as it becomes available in the Great Divide area. Accordingly, Northwest proposes to file any such changes between Northwest and Rocky Mountain or any other parties as part of its required annual tariff filing.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-297-000]

Oasis Pipe Line Co.; Application

May 13, 1983.

Take notice that on April 28, 1983; Oasis Pipe Line Company (Applicant), P.O. Box 1188, Houston, Texas 77001, filed in Docket No. CP83-297-000 an application pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 and § 284.127 of the Commission's Regulations for authority to transport certain quantities of natural gas for Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is currently engaged in the transportation of natural gas on behalf of Northern pursuant to a transportation agreement dated April 25, 1979. It is stated that service under this agreement commenced July 25, 1979, for an initial term of two years under the self-implementing provisions of § 284.122(a) of the Commission's Regulations and was extended for a period of two years commencing July 25, 1981, pursuant to § 284.125 of the Commission's Regulations. In order that the transportation service might be continued on an uninterrupted basis, Applicant requests the Commission authorize a continuation of the transportation arrangement for a period of two years commencing July 25, 1983, and ending July 24, 1985.

Applicant proposes to transport up to 150,000 Mcf of gas per day for Northern or such additional daily volumes which Applicant determines that its operating conditions shall reasonably permit. Applicant states that it would transport Northern's volumes delivered to Applicant by Northern at the existing interconnection of Applicant's and Houston Pipe Line Company's pipeline facilities located near Katy, Waller County, Texas, under the terms and conditions of a gas transportation agreement dated April 25, 1979, as amended March 28, 1983. A thermally equivalent quantity of gas so delivered, less Northern's *pro rata* share of compressor fuel on Applicant's system, would be redelivered by Applicant to Northern at the existing interconnection of Applicant's and Northern's pipeline facilities located near Ft. Stockton, Pecos County, Texas. It is stated that Northern has agreed to pay Applicant 12.39 cents per Million Btu of gas delivered.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-293-000]

Tennessee Gas Pipeline Co., A Division of Tenneco Inc.;

May 13, 1983.

Take notice that on April 27, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP83-293-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon its Hunt sales delivery meter station located in Kanawha County, West Virginia, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon its Hunt sales meter station which serves as delivery point to Consolidated Gas Supply Corporation (Consolidated). Consolidated has received authorization to abandon the facilities into which the Hunt sales meter station connects; hence, there is no further need for the station. Applicant states that it would continue to deliver the related volumes of gas to Consolidated at the Cornwall delivery point under Applicant's Rate Schedule CD-3.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be

VOL 48 ISS 97 MY 18 1983 UMI

taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-13328 Filed 5-17-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-294-000]

Tennessee Gas Pipeline Co., a Division of Tenneco Inc.; Application

May 13, 1983.

Take notice that on April 27, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Applicant), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP83-294-000 an application pursuant to section 7(c) of the Natural Gas Act and Subpart F of Part 284 of the Commission's Regulations for a certificate of public convenience and necessity authorizing the transportation of up to 25,000 Mcf of natural gas per day for Central Hudson Gas & Electric Corporation (Central Hudson) for a term of sixty consecutive days from the date of initial deliveries, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport daily volumes of up to 25,000 Mcf of natural gas to Central Hudson for a 60-day term commencing on the date of initial deliveries to enable it to reduce the use of fuel oil in the generation of electric energy at its electric generation stations. Applicant states that the gas to be transported would be purchased by Central Hudson from New York State Electric & Gas Corporation (NYSEG) and made available for transportation at Applicant's existing Lockport sales meter station delivery point to NYSEG in Niagara County, New York. Applicant states that it would redeliver equivalent quantities to Central Hudson at Applicant's existing Cedar Hills sales meter station delivery point to Central Hudson in Albany County, New York. Applicant states that the gas would be transported only to the extent its operating conditions and available capacity permit.

Applicant proposes to charge Central Hudson the rate contained in Applicant's Rate Schedule IT which is currently 21.32 cents per Mcf.

Applicant states that the subject gas would be used by Central Hudson solely to displace fuel oil it would otherwise use in its electric generating stations and that the source of the gas to be sold in NYSEG's general system supply which NYSEG purchases from Applicant and which, it is indicated, is surplus to NYSEG's market requirements.

Applicant further states that on April 4, 1983, Central Hudson filed for a certificate of eligible use from the Economic Regulatory Administration in ERA Docket No. 83-CERT-010.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-30227; PH-FRL 2364-8]

Certain Companies; Applications To Register Pesticide Products Containing New Active Ingredients

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register pesticide products containing active ingredients not included in any previously registered pesticide products pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act FIFRA), as amended.

DATE: Comment by June 17, 1983.

ADDRESS: Written comments, identified by the document control number [OPP-30227] and the file symbol, should be submitted to: Production Manager (PM), Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: The product manager at the telephone number cited.

SUPPLEMENTARY INFORMATION: EPA received applications as follows to register pesticide products containing active ingredients not included in any previously registered pesticide products pursuant to the provisions of section 3(c)(4) of FIFRA. Notice of receipt of these applications does not imply a decision by the Agency on the applications.

Applications Received

1. File Symbol: 7969-AG. Applicant: BASF Wyandotte Corp., 100 Cherry Hill Road., PO Box 181, Parsippany, NJ 07054. Product name: Campogran™ B Seed Treatment Fungicide. Fungicide.

Active ingredient: *N*-cyclohexyl-*N*methoxy-2,5-dimethyl-3-furancarboxamide 50.9%. Proposed classification/Use: General. A seed treatment for cottonseed. (Product Manager (PM) 21-Henry Jacoby (703-557-1900).)

2. File Symbol: 39541-EG. Applicant: Montedison USA, Inc., 1114 Avenue of the Americas, New York, NY 10036. Product name: Galben™ 25 WP Fungicide. Fungicide. Active ingredient: *N*-(2,6-dimethylphenyl)-*N*-(phenylacetyl)-DL-alanine methyl ester 25%. Proposed classification/Use: General. For the control of pythium on turf grasses. (PM 21-Henry Jacoby (703-557-1900).)

3. File Symbol: 3125-GUA. Applicant: Mobay Chemical Corp., PO Box 4913, Hawthorn Road., Kansas City, MO 64120. Product name: Baytan™ 150 FS Seed Treatment Fungicide. Fungicide. Active ingredient: Beta-(4-chlorophenoxy)-alpha-(1,1-dimethylethyl)-1*H*-1,2,4-triazole-1-ethanol 13.8%. Proposed classification/Use: General. For the control of certain diseases on small grains and corn. Type registration: Conditional. (PM 21-Henry Jacoby (703-557-1900).)

4. File Symbol: 48031-R. Applicant: International Flavors and Fragrances, Inc., 52 W. 47th St., New York, NY 10019. Product name: Summer Fantasy Fragrance/Inspect Repellant Formulation for Candles. Insecticide. Active ingredient: 2-methyl heptenone—10.0%, Coumarin 2%, Indde .2%. Proposed classification/Use: General. For use as insect repellant against mosquitoes and other biting insects. Type registration: Conditional. (PM 17-Timothy Gardner (703-557-2690).)

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. Except for such material protected by section 10 of FIFRA, the test data and other scientific information deemed relevant to the registration decision may be available after approval under the provisions of the Freedom of Information Act. The procedure for requesting such data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the product manager's office to ensure that the file is available on the date of intended visit.

(Sec. 3(c)(4) of FIFRA, as amended)

Dated: May 10, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 83-13300 Filed 5-17-83; 8:45 am]

BILLING CODE 6560-50-M

[OPTS-59122B/59123A; TSH-FRL 2365-1]

Certain Chemicals; Approval of Test Marketing Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of TM-83-42, and TM-83-43, applications for test marketing exemptions (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA). The test marketing conditions are described below.

EFFECTIVE DATE: May 9, 1983.

FOR FURTHER INFORMATION CONTACT: Theodore C. Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-204, 401 M St. SW., Washington, DC. 20460 (202-382-3725).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and to permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities.

EPA has determined that test marketing of the new chemical substances described below, under the conditions set out in the applications, and for the time periods specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, number of workers exposed to the new chemical, and the levels and duration of exposure must not exceed that specified in the applications. All other conditions described in the applications must be met. The following additional restrictions apply:

1. The applicant must maintain records of the date(s) of shipment(s) to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

2. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME.

TME 83-42

Date of Receipt: March 31, 1983.

Notice of Receipt: April 8, 1983 (48 FR 15323).

Applicant: Ethyl Corporation.

Chemical: Di (mixed alkyl) magnesium (Generic).

Use:

Polymerization catalyst.

Production Volume: Confidential.

Number of Customers: 1.

Process Information: Confidential.

Test Marketing Exemption Period: 1 year.

Commencing on: (Insert signature date.)

Risk Assessment: Overall concerns for health and environmental effects are low. Worker exposure to the new substance will be extremely low since manufacture will be in a closed system under nitrogen, and safe handling procedures are well-established for production, shipment and use of this class of chemicals to prevent worker exposure. Due to its reactivity, the test market substance is not available for environmental release.

Public Comments: None.

TME 83-43

Date of Receipt: April 1, 1983.

Notice of Receipt: April 15, 1983 (48 FR 16330).

Applicant: Confidential.

Chemical: Mixed polyalkoxy alkyl siloxanes and silsesquioxanes (Generic).

Use: Functional fluid additive.

Production Volume: Confidential.

Worker Exposure: Potential exposure will be by the dermal, inhalation and ocular routes. At the manufacturing site, a maximum of 12 workers will be potentially exposed for 2 hours/day for no more than 8 days. During processing during customer evaluation a maximum of 8 workers will be potentially exposed up to 6 hours/day for no more than 3 days.

Test Marketing Exemption Period: 1 year.

Commencing on: (Insert signature date.)

Risk Assessment: The Agency identified no significant health or environmental concerns. Human exposure and environmental release during manufacture, processing, and use,

VOL 48 ISS 97 MAY 18 1983 UMI

under the conditions specified in the application are expected to be low.

Public Comments: None.

The agency reserves the right to rescind approval of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk to health or the environment.

Dated: May 9, 1983.

Marcia Williams,

Acting Director, Office of Toxic Substances.

[FR Doc. 83-13239 Filed 5-17-83; 8:45 am]

BILLING CODE 6560-50-M

[SAB-FRL 2365-2]

Science Advisory Board; High-Level Radioactive Waste Disposal Subcommittee; Open Meeting

Under Pub. L. 92-463, notice is hereby given that a two-day meeting of the High-Level Radioactive Waste Disposal Subcommittee of the Science Advisory Board will be held in Conference Room 3906/3908, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C., on June 2-3, 1983. The meeting will begin at 9:00 a.m. and last until 5:00 p.m. each day.

The purpose of the meeting will be to continue the review of the scientific and technical basis of the Agency's proposed rules for the management and disposal of high-level radioactive wastes. The members of the Subcommittee, and the principal issues for the Subcommittee's consideration, were announced in the **Federal Register,** Wednesday, January 5, 1983, page 509.

The agenda for the meeting, which is the fifth in a series of meetings on the proposed rules, will include discussions of risk assessment, geochemistry and groundwater transport, environmental pathways and qualitative assurance requirements. The recent report of the National Research Council's Waste Isolation Systems Panel (WISP) will also be discussed, and the Subcommittee will be briefed on the public comments received by the Agency on the proposed rules.

The meeting is open to the public. Any member of the public wishing to attend or obtain further information about the meeting should contact Harry C. Torno, Executive Secretary, at (202) 382-2552, or Terry F. Yosie, Staff Director, Science Advisory Board, at (202) 382-4126. Public comment will be accepted at the meeting. Written comments will be accepted in any form, and there will be opportunity for brief oral statements. Anyone wishing to make such comment must contact Mr. Torno prior to May 27, 1983, in order to be placed on the agenda.

EPA has recently instituted new visitor control procedures. In order to minimize any inconvenience, persons wishing to attend are requested to call Mrs. Dorothy M. Clark at (202) 382-2552, so that they may be included on a roster that will be prepared for the building security guards. Attendees are also requested to enter the building at the West Tower entrance.

Dated: May 9, 1983.

Terry F. Yosie,

Staff Director Science Advisory Board.

BILLING CODE 6560-50-M

[OPP-50594; PH-FRL 2363-3]

Pesticides; Issuance of Experimental Use Permits; American Cyanamid Co. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each experimental use permit at the address below: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

241-EUP-96. Extension. American Cyanamid Company, P.O. Box 400, Princeton, NJ 08540. This experimental use permit allows the use of 5,000 pounds of the herbicide pendimethalin on cotton and soybeans to evaluate the control of weeds. A total of 5,000 acres are involved; the program is authorized only in the States of Arkansas, Illinois, Indiana, Mississippi, and Ohio. The experimental use permit is effective from April 5, 1983 to April 5, 1984. Permanent tolerances for residues of the active ingredient in or on cottonseed and soybeans have been established (40 CFR 180.361). (Robert Taylor, PM 25, Rm. 253, CM#2, (703-557-1800))

49548-EUP-1. Issuance. Bend Research, Inc., 64550 Research Road, Bend, OR 97701. This experimental use permit allows the use of nine pounds of the pheromones (Z,Z)-7,11-hexadecadien-1-ol-acetate and (Z,E)-7,11-hexadecadien-1-ol-acetate on cotton to evaluate the control of the pink bollworm. A total of 700 acres are involved; the program is authorized only in the State of Arizona. The experimental use permit is effective from May 1, 1983 to May 1, 1984. An exemption from the requirement of a tolerance for residues of the active ingredients in or on cottonseed has been established (40 CFR 180.1043). (Timothy Gardner, PM 17, Rm. 207, CM#2, (703-557-2690))

464-EUP-78. Issuance. Dow Chemical U.S.A., P.O. Box 1706, Midland, MI 48640. This experimental use permit allows the use of 245 pounds of the herbicide methyl 2-[4-[(3-chloro-5-(trifluoromethyl)-2-pyridinyl)oxy]phenoxy]propanoate on cotton and soybeans to evaluate the control of weeds. A total of 490 acres are involved; the program is authorized in the States of Alabama, Arizona, Arkansas, California, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Carolina, Ohio, South Caroina, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. The experimental use permit is effective from March 15, 1983 to March 15, 1984. This permit is issued with the limitation that all crops are destroyed or used for research purposes only. (Robert Taylor, PM 25, Rm. 253, CM#2, (703-557-1800))

279-EUP-88. Extension. FMC Corporation, 2000 Market St., Philadelphia, PA 19103. This experimental use permit allows the use of 20,000 pounds of the insecticide (±) alpha-cyano-(3-phenoxyphenyl)-methyl (±)-*cis,trans*-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane-carboxylate on cotton to evaluate the control of various insects. A total of 50,000 acres are involved; the program is authorized only in the States of Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, Missouri, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas. The experimental use permit is effective from June 7, 1983 to March 5, 1984. A temporary tolerance for residues of the active ingredient in or on cottonseed oil has been established. A food additive regulation for residues of the active ingredient in or on cottonseed oil has been established (21 CFR 193.87). (Timothy Gardner, PM 17, Rm. 207, CM#2, (703-557-2690))

8730-EUP-13. Issuance. Health-Chem Corporation, 1107 Broadway, New York, NY 10010. This experimental use permit allows the use of 2.75 pounds of the pheromone 9-dodecenyl acetate in forests and residential areas to evaluate the control of adult western pineshoot borer moths. A total of 125 acres are involved; the program is authorized only in the States of Idaho and Montana. The experimental use permit is effective from April 22, 1983 to April 22, 1984. (Timothy Gardner, PM 17, Rm. 207, CM#2, (703-557-2690))

10182-EUP-19. Extension. ICI Americas Inc., New Murphy Road and Concord Pike, Wilmington, DE 19897. This experimental use permit allows the use of 23,940 additional pounds (900 pounds originally authorized) of the insecticide (±)alpha-cyano-[3-phenoxyphenyl)-methyl (±)-*cis,trans*-3-(2,2-dichloroethenyl]-2,2-dimethylcyclo-propanecarboxylate on cotton to evaluate the control of various insects. A total of 57,000 acres are involved. (Timothy Gardner, PM 17, Rm. 207, CM#2, (703-557-2690))

10182-EUP-25. Extension. ICI Americas Inc., Concord Pike and New Murphy Road, Wilmington, Delaware 19897. This experimental use permit allows the use of 23,940 additional pounds (9,875 pounds originally authorized) of the insecticide (±) alpha-cyano-(3-phenoxy-phenyl) methyl (±)-*cis,trans*-3-(2,2-dichloroethenyl)-2,2-dimethyl-cyclopropane on cotton to evaluate the control of various insects. A total of 57,000 acres are involved. This program and the one above are authorized only in the States of Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas. Both permits are effective from March 5, 1983 to March 5, 1984. Temporary tolerances for residues of the active ingredient in or on cottonseed have been established. A food additive regulation for residues of the active ingredient in or on cottonseed oil has been established (21 CFR 193.87). The permits will use the same active ingredient but different formulations. (Timothy Gardner, PM 17, Rm. 207, CM#2, (703-557-2690))

618-EUP-10. Extension. Merck and Company, Inc., P.O. Box 2000, Rahway, NJ 07065. This experimental use permit allows the use of 178.13 grams of the insecticide mixture (5-0-demethyl-avermectin A_1a) and (5-0-demethyl)-25-de-(1-methylpropyl)-25-(1-methylethyl)avermectin A_1a) on non-grazed and non-croplands to evaluate the control of the imported fire ant. A total of 4,750 acres are involved; the program is authorized only in the States of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Texas. The experimental use permit is effective from March 23, 1983 to March 23, 1984. (George LaRocca, PM 15, Rm. 204, CM#2, (703-557-2400))

524-EUP-30. Extension. Monsanto Company, 1101 17th St., NW., Washington, D.C. 20036. This experimental use permit allows the use of 2,020 pounds of the herbicide butachlor on rice to evaluate the control of weeds. A total of 800 acres are involved; the program is authorized only in the States of Arkansas, Louisiana, Mississippi, and Texas and the Territory of Puerto Rico. The experimental use permit is effective from April 23, 1983 to April 23, 1984. Temporary tolerances for residues of the active ingredient in or on rice and rice straw have been established. A feed additive regulation for residues of the active ingredient in or on rice hulls and rice bran has been established (21 CFR 561.55). (Report Taylor, PM 25, Rm. 253, CM#2, (703-557-1800))

201-EUP-74. Issuance. Shell Oil Company, Suite 200, 1025 Connecticut Ave., NW., Washington, D.C. 20036. This experimental use permit allows the use of 175 pounds of the insecticide cyano (3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate on hardwood (deciduous) forests to evaluate the control of the gypsy moth. A total of 1,500 acres are involved; the program is authorized only in the State of Pennsylvania. The experimental use permit is effective from May 1, 1983 to May 1, 1984. (Timothy Gardner, PM 17, Rm. 207, CM#2, (703-557-2690))

47890-EUP-1. Extension. U.S. Department of Agriculture, 12th and Independence, SW., Washington, D.C., 20013. This experimental use permit allows the use of 0.1575 gram of the biological insecticide polyhedral inclusion bodies of the nuclear polyhedrosis virus of *N. lecontei* on forests to evaluate the control of the red-headed pine sawfly. A total of 1,650 acres are involved; the program is authorized only in the States of Florida, Michigan, Minnesota, and Wisconsin. The experimental use permit is effective from July 22, 1983 to July 22, 1984. (Timothy Gardner, PM 17, Rm. 207, CM#2, (703-557-2690))

Persons wishing to review these experimental use permits are referred to the designated product managers. Inquiries concerning these permits should be directed to the persons cited above. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate file may be made available for inspection purposes from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 92 Stat. 819, as amended, (7 U.S.C. 136))

Dated: May 5, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[PP 3G2821/T411; PH-FRL 2363-1]

Pesticides; Triforine; Establishment of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established a temporary tolerance for residues of the fungicide triforine in or on the raw agricultural commodity almond nutmeats. This temporary tolerance was requested by FMC Corporation.

DATE: This temporary tolerance expires March 1, 1985.

FOR FURTHER INFORMATION CONTACT: Henry Jacoby, Product Manager (PM) 21, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 229, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1900).

SUPPLEMENTARY INFORMATION: FMC Corporation, Agricultural Chemical Group, 2000 Market St., Philadelphia, PA 19103, has requested, in pesticide petition PP 3G2821 the establishment of a temporary tolerance for residues of the fungicide triforine (*N,N'*-[1,4-piperazinediylbis(2,2,2-trichloroethylidene)] bis [formamide]) in or on the raw agricultural commodity almond nutmeats at 0.02 part per million (ppm).

This temporary tolerance will permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of experimental use permit 279-EUP-96 which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended. (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerance will protect the public health. Therefore, the temporary tolerance has been established on the condition that the pesticide be used in

VOL
48
ISS
97
MY

1983
UMI

accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. FMC Corporation must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This tolerance expires March 1, 1985. Residues not in excess of this amount remaining in or on the raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked of if any experience or scientific data with this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 610–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Dated: May 5, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-01-M

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission herby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and may request a copy of each agreement and the supporting statement at the Washington, D.C. office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 40573, within 20 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in §522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: T–4106.

Title: Puerto Rico Ports Authority and Antilles Shipping Terminal Lease Agreement.

Parties: Puerto Rico Ports Authority (PRPA)/Antilles Shipping (Antilles).

Synopsis: Agreement No. T–4106 provides for the lease by PRPA to Antilles for the exclusive use of certain premises and the preferential use of certain other premises at Pier 6, San Juan. Antilles is to pay PRPA flat monthly rentals for each of the areas and minimum dockage and wharfage charges. The term of the agreement is 3 years.

Filing party: Nestor D. Ramirez Cuebas, General Counsel, Puerto Rico Ports Authority, G.P.O. Box 2829, San Juan, Puerto Rico 00936.

Agreement No. 6190–36.

Title: United States Atlantic & Gulf/Venezuela Conference.

Parties: Compania Anonima Venezolana De Navigacion (Venezuelan Line) and Delta Steamship Lines, Inc.

Synopsis: The basic agreement would be amended to (1) increase, from $25,000 to $50,000, the security deposit which each member is required to maintain as security for the fulfillment of its financial obligations under the agreement and, (2) require the countersignature of a member line of the Conference in addition to the signature of the Conference Chairman or Vice Chairman before the security deposit of a member line could be drawn upon.

Filing party: Nathan J. Bayer, Esq., Freehill, Hogan & Mahar, 80 Pine Street, New York, N.Y. 10005.

By Order of the Federal Maritime Commission.

Dated: May 13, 1983.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Formation of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Board of Governors of the Federal Reserve System (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Glasgow Bancshares Corporation,* Glasgow, Kentucky; to become a bank holding company by acquiring 84 percent of the voting shares of New Farmers National Bank, Glasgow, Kentucky. This application may be inspected at the offices of the Bord of Governors or the Federal Reserve Bank of St. Louis. Comments on this application must be received not later than June 10, 1983.

2. *Holcomb Bancshares, Inc.,* Ellsworth, Kansas; to become a bank holding company by acquiring 100 percent of the voting shares of First National Bank of Holcomb, Holcomb, Kansas. This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Kansas City. Comments on this application must be received not later than June 10, 1983.

Board of Governors of the Federal Reserve System, May 11, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Board of Scientific Counselors, NIMH; Reestablishment

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (5 U.S.C. Appendix I), the Alcohol, Drug Abuse, and Mental Health Administration announces approval and certification by the Secretary of Health and Human Services, with the concurrence of the General Services Administration Committee Management Secretariat, of the following advisory committee:

Designation: Board of Scientific Counselors, NIMH.

Purpose: The Committee shall advise the Secretary, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute of Mental Health on the NIMH Intramural Research Program through periodic visits to the laboratories. Its purpose is to assess the research in progress and to evaluate the productivity and performance of staff scientists.

Expiration Date: Authority for the Board of Scientific Counselors, MIMH, will expires January 4, 1985, unless the Secretary formally determines that continuance is in the public interest.

Dated: May 10, 1983.

William Mayer,

Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc. 83-13283 Filed 5-17-83; 8:45 am]

BILLING CODE 4160-20-M

Health Resources and Services Administration

Availability of Funds for Home Health Services and Training

AGENCY: Health Resources and Services Administration, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Health Resources and Services Administration (HRSA) announces that funds are available for grants and loans for the development and expansion of home health programs and services. Public Law (Pub. L.) 98–8, The Emergency Expenditures to Meet National Needs Act of 1983, signed on March 24, 1983, appropriates $5 million under section 339 of the Public Health Service (PHS) Act (42 U.S.C. 255) to provide home health services and for the training of paraprofessionals to provide home health services. This notice contains information of interest to prospective applicants for such funding.

DATE: To receive consideration as being on time, mailed applications must be postmarked on or prior to June 30, 1983 and received in time for processing. Hand delivered applications must be received by COB, June 30, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Harold J. Dame, Director, Special Programs Branch, Division of Primary Care Services, Bureau of Health Care Delivery and Assistance, 5600 Fishers Lane, Room 7A–30, Rockville, Maryland 20857. Telephone 301–443–2270.

SUPPLEMENTARY INFORMATION: The Orphan Drug Act (Pub. L. 97–414), passed on January 1, 1983, revised title III of the PHS Act (the Act) to establish the Home Health Services program. Section 339(a) of the Act provides that the Secretary may make grants to public and private nonprofit entities to meet the initial costs of establishing and operating home health programs, and may make loans to proprietary entities for these purposes. Grants and loans may also be awarded to existing entities for expanding home health services to a new geographic service area. Under section 339(b) of the Act, the Secretary may award grants to public and private entities for programs to train paraprofessionals, including homemaker home health aides, to provide home health services.

HRSA has decided to allocate the $5 million provide by Pub. L. 98–8 for carrying out section 339 as follows: $4 million will be awarded as grants and loans under section 339(a) of the Act for expanding the availability of home health care services, including services in rural towns and villages, and $1 million will be awarded as grant under section 339(b) of the Act for training programs for home health paraprofessionals.

In making loans or awarding grants for the development of new home health service programs or the expansion of existing home health service programs into new areas, HRSA's present intention is to give preference to those applicants which intend to provide services in areas where there is a high percentage of the population composed of individuals who are elderly (persons over 65 years of age), medically indigent (persons at or below the HHS poverty income guidelines, see 48 FR 7010, February 17,1983), or disabled (those disabled persons receiving assistance under old age survivors disability insurance and supplemental security income programs). HRSA also intends to give special consideration to those applicants which propose to provide services in areas with inadequate means of transportation to obtain necessary health services.

HRSA intends to give special consideration in the award of grants for training paraprofessionals (including homemaker home health aides) to applicants which propose to train persons over 50 years of age and which propose to provide a program to train paraprofessionals for an entire State or a geographic area of at least one million persons.

Applicants should be aware that HRSA intends to accept applications for section 339(a) support only as follows: Applications for grants and loans to provide home health services under section 339(a) will be accepted from entities which are home health agencies, that is, entities which are recognized as providers of home health services by the Health Care Financing Administration (HCFA) and are eligible for reimbursement under the Medicare program, and from entities which intend to become home health agencies. Applications will also be accepted from entitites which are at the present time directly providing or can directly provide one or more of the kinds of services listed in section 1861(m) of the Social Security Act and which propose to provide home health services to an area under a co-applicant arrangement with a home health agency.

Application may be made by completing the standard PHS Grant Application (form PHS–5161) for services grants and loans and for training grants. This application form calls for a program narrative giving a full description of the proposed project, including current and proposed services, a description of the service area and a budget justification. A competitive review of applications will be the basis for selecting successful proposals for grants and loans.

Grants and Loans for Home Health Service Projects

Applicants applying for grants and loans for home health services projects may wish to consider including the following information in the narrative: a time-phased staffing plan, information on their status as a HCFA provider, evidence of community support and compliance with State and local certificate of need laws, proposed fee structure, and other information showing the need of the area for home health services.

A description of a plan, if any, to train paraprofessionals, including homemaker home health aides, to provide services

VOL
48
ISS
97
MY
18
1983
18
UMI

as described in section 339(b)(2)(C) would be helpful in reviewing applications.

Grants For Training Projects

Applicants for training grants may wish to consider including in their application a training plan and curriculum, a description of the need in the area for the persons to be trained, the number of persons to be trained, and plans or arrangements, if any, for the utilization of trainees.

Regulations are now being developed to implement fully the home health services program. However, since there is such a short period of time available to implement and fund this program, applicants are advised to begin developing applications for submission by June 30, 1983, based on the guidelines of this notice.

Consultation, technical assistance and additional information regarding applying for these funds are available from the appropriate HHS regional offices. Curriculum content information may be obtained in the document entitled *"A Model Curriculum and Teaching Guide for the Instruction of the Homemaker-Home Health Aide,* as published by the National Home Caring Council, 235 Park Avenue South, New York, N.Y., 10003, Telephone 212–674–4990.

(The Home Health program is listed as No. *13.889* in the OMB Catalog of Federal Domestic Assistance.)

Dated: May 16, 1983.

John Kelso,

Acting Administrator.

[FR Doc. 83-13404 Filed 5-17-83; 8:45 am]

BILLING CODE 4160-16-M

Office of the Secretary

Privacy Act of 1974; Proposed Amendment to System of Records

AGENCY: Office of the Assistant Secretary for Personnel Administration, Office of the Secretary, HHS.

ACTION: Notice of proposed new routine uses for existing system of record.

SUMMARY: The Department is giving notice that it intends to add two new routine uses to the following Privacy Act record system notice: 09–90–0017—Pay, Leave, and Attendance Records, HHS/OS/ASPER. Records in this system of records are used to insure that each employee receives the proper pay and allowances; that proper deductions and authorized allotments are made from employees' pay; that employees are credited and charged with the proper amount of sick and annual leave; and to enforce employee responsibilities through such actions as income tax levies, garnishments for child support/alimony, and deductions for the payment of debts owed the United States. We invite public comment on these new routine use disclosures (numbers 18 and 19 in notice below).

EFFECTIVE DATE: This amendment shall become effective without further notice June 17, 1983, unless comments are received on or before that date which would result in a contrary determination.

ADDRESS: Comments should be address to: Director, Division of Policy, Room 2316 Switzer Building, 300 C Street, S.W., Washington D.C. 20201.

FOR FURTHER INFORMATION CONTACT: Jim Wormley, OASPER, Division of Policy, telephone: 202–245–1984.

SUPPLEMENTARY INFORMATION: The U.S. Department of Labor (DOL), Office of the Inspector General, has asked the U.S. Department of Halth and Human Services (HHS) for certain information applicable to every HHS employee that was paid during pay periods ending between October 3, 1981 and October 2, 1982 inclusive. The DOL has made the request because they are conducting, under the auspices of the President's Council on Integrity and Efficiency, a computerized crossmatch to identify HHS employees who have drawn unemployment benefits in violation of unemployment insurance laws. The data items which DOL is requesting are as follows: Social Security Number, employee name, agency code, agency sub-element/Division code, geographic location code, record length, pay period beginning date, pay period ending date, number of hours/days worked during the pay period, and gross pay. With two exceptions, Social Security account number and number of hours/days worked per pay period, the information requested by DOL is public information under 5 CFR 294.702. The purpose of the DOL computerized matching program is to reduce fraud and abuse in State unemployment compensation programs. HHS is serving as a matching source agency in this DOL anti-fraud matching program. As such, HHS has made the determinations required for source agencies by the Office of Management and Budget Guidelines for the Conduct of Matching Program.

The U.S. Department of Agriculture (USDA), Office of the Inspector General, has asked HHS for certain wage information on a single HHS employee. The information, which will be used to confirm eligibility, is needed in conjunction with a USDA audit of the Food Stamp Program in Fulton County, Goergia. A purpose of this audit, and all audits of loan and benefit programs performed by USDA and other Federal Agencies, is to reduce fraud and abuse in the administration of these programs.

The propose of this notice is to establish the routine uses required for the Privacy Act record system from which information will be provided to the DOL and the USDA (numbers 18 and 19 in the notice below) under the circumstances described above and to other Federal agencies under similar circumstances in the future.

The Privacy Act allows disclosure of information under a routine use for purposes that are compatible with the purposes for which the information was collected. Disclosure under these proposed routine uses will assist Federal agencies in their efforts to eliminate fraud, waste and abuse in loan and benefit programs they administer and in State and local programs over which they have cognizance. This goal is compatible with the OASPER functional responsibility for oversight of HHS employees' conduct, particularly with the requirement that employees conduct themselves in a proper manner, not obtain financial benefits in a fradulent manner, and pay their just obligations (see the HHS Standards of Conduct regulations in 45 Code of Federal Regulations Part 735). This responsibility is appropriately achieved through the use of this record system which is used to enforce these employee responsibilities through actions such as income tax levies, garnishments for child support/alimony, and deductions for the payment of debts owed the United States

Routine use number 17 was inadvertently omitted from the last publication of this notice in **Federal Register,** Volume 47, Number 198, October 13, 1982, pages 45759–45761. That routine use was added to this record system notice in **Federal Register,** Volume 47, Number 70, April 12, 1982, pages 15647–15650. This notice also updates the organizations and addresses of Payroll Liaison Officers in Appendix 1 of the record system notice.

A notice will be issued annually informing employees that these records may be disclosed to Federal agencies for the purpose of conducting computer matching programs designed to eliminate fraud, waste and abuse in loan and benefit programs.

May 11, 1983.

Thomas S. McFee,

Assistant Secretary for Personnel Administration.

SYSTEM NAME:

Pay, Leave and Attendance Records, HHS/OS/ASPER.

SECURITY CLASSIFICATION

None.

SYSTEM LOCATION:

Pay System's Division, Department of Health and Human Services, 330 Independence Avenue SW., Washington, D.C. 20201.

Payroll Liaison Representatives. See Appendix 1, Timekeepers in organizational units serviced by Payroll Liaison Representatives shown in Appendix 1. Personnel offices shown in HHS System 09900006, Applicants for Employment Records, Appendix 1.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All paid employees of the Department of Health and Human Services including PHS Commissioned Corps Personnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system consists of a variety of records relating to pay and leave determinations made about each employee of the Department of Health and Human Services. In addition to the name of the employee, the system includes information such as the employee's date of birth, social security number, home address, grade or rank, employing organization, timekeeper number, salary, Civil Service retirement fund contributions, pay plan, number of hours worked, annual and sick leave accrual rate and usage, annual and sick leave balance, FICA withholdings, Federal, state and city tax withholdings, Federal Employees Governmental Life Insurance withholdings, Federal Employees Health Benefits withholdings, garnishment documents, savings allotments, union and management association dues withholdings allotments, savings bonds allotments, and Combined Federal Campaign allotments; for Commissioned Corps Personnel, information such as the following is included: years of service, payroll number, base pay, incentive pay, hazardous pay, allowances and Servicemen's Group Life Insurance.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 5501 et seq., 5525 et seq., 6301 et seq.; 42 U.S.C. 201 et seq., and Pub. L. 90–83.

PURPOSE(S):

Records in this system are used to insure that each employee receives the proper pay and allowances; that proper reductions and authorized allotments are made from employees' pay; and that employees are credited and charged with the proper amount of sick and annual leave. These records are maintained in each component of the Department. See also "Retrievability" below.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information in this system of records is used or may be used.

(1) To prepare W–2 Forms to submit to the Internal Revenue Service and to disclose to state and local government agencies having taxing authority pertinent records relating to employees, including name, home address, social security number (in accordance with Section 7 of Pub. L. 93–579), earned income, and amount of taxes withheld.

(2) In the event that this system of records indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

(3) A record from this system of records may be disclosed as a "routine use" to a federal, state or local agency maintaining civil, criminal or other relevant enforcement records or other pertinent records, such as current licenses, if necessary to obtain a record relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

A record from this system of records may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the record is relevant and necessary to the requesting agency's decision on the matter.

(4) In the event that this system of records indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use to the appropriate agency, whether state or local charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

(5) Where federal agencies having the power to subpoena other federal agencies' records, such as the Internal Revenue Service or the Civil Rights Commission, issue a subpoena to the Department for records in this system of records, the Department will make such records available.

(6) Where a contract between a component of the Department and a labor organization recognized under E.O. 11491 of 5 U.S.C. Chapter 71 provides that the agency will disclose personal records relevant to the organization's mission, records in this system of records may be disclosed to such organization.

(7) The Department contemplates that it will contract with a private firm for the purpose of collating, analyzing, aggregating or otherwise refining records in this system. Relevant records will be disclosed to such a contractor. The contractor shall be required to maintain Privacy Act safeguards with respect to such records.

(8) By the Office of Personnel Management, Merit Systems Protection Board (including its Office of the Special Counsel), Equal Employment Opportunity Commission, and the Federal Labor Relations Authority (including the General Counsel of the Authority and the Federal Service Impasses Panel) in carrying out their functions.

(9) By the Department of Labor to make compensation determination in connection with a claim filed by the employee for compensation on account of a job-connected injury or disease.

(10) To respond to court orders for garnishment of an employee's pay for alimony or child support.

(11) To respond to orders from IRS for garnishment of an employee's pay for Federal income tax purposes.

(12) To the Department of Treasury for the purposes of preparing and issuing employee salary and compensation checks and U.S. Savings Bonds.

VOL 48 ISS 97 MAY 18 1983 UMI

(13) By state officers of unemployment compensation in connection with claims filed by former HHS employes for unemployment compensation.

(14) Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

(15) In the event of litigation where the defendant is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department of any of its components; or (c) any Department employe in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to present an effective defense, provided such disclosure is compatible with the purpose for which the records were collected.

(16) By financial organizations designate to receive labor organization or management association dues withheld from employee's pay, in order to account for the amounts of such withheld dues which they receive.

(17) A record from this system of records may be disclosed to a State or local agency for the purpose of conducting computer matching programs designed to reduce fraud, waste and abuse in Federal, State and local public assistance programs and operations.

(18) A record from this system of records may be disclosed to a Federal agency for the purpose of conducting computer matching programs designed to reduce fraud, waste and abuse using loan or benefit records of a Federal, State or local agency to identify employees improperly receiving loans or benefits and to facilitate the collection of debts owed the United States.

(19) A record from this system of records may be disclosed to a Federal agency in response to a written request from that agency, personally signed by a supervisor, specifying the particular portion desired and the law enforcement activity for which the record is sought. The request for the record must be connected with the agency's auditing and investigative functions designed to reduce fraud, waste and abuse; it must be based on information which raises questions about an individual's eligibility for benefits or payments; and it must be made reasonably soon after the information is received.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic tape, microfilm, punch cards and forms.

RETRIEVABILITY:

Records are maintained by pay period and are retrievable by name, SSN and Timekeeper number within each pay period. Records are also used to produce summary descriptive statistics and analytical studies in support of the functions for which the records are collected and maintained and for related personnel management functions or pay studies, and for other purposes compatible with the intent for which the records system was created.

SAFEGUARDS:

Access to and use of these records are limited to personnel whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

RETENTION AND DISPOSAL:

Records submitted by the individual, such as allotment authorization forms, home address forms, and tax withholding forms are retained until superseded by new forms of until the individual leaves the Department. Most of these records are then destroyed. Some of these records must be retained for an additional period, or forwarded to the new employing agency. Time and attendance records are retained for five years and are then destroyed. The automated payroll master record, established when the individual is first employed and continually updated throughout the period of his or her employment, is retained until the individual leaves the Department.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Pay Systems Division, P.O. Box 1825, Washington, D.C. 20013.

NOTIFICATION PROCEDURE:

An individual may contact the system manager. An individual also may contact, as appropriate, Payroll Liaison Representatives in Appendix 1 or Personnel Officers shown in HHS System 09900006, Applicants for Employment Record, Appendix 1. Provide name, social security number, timekeeper number and pay period about which inquiring.

RECORD ACCESS PROCEDURES:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410).

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested, and state the corrective action sought and the reasons for the correction with supporting justification. (These procedures are in accordance with Department Regulations (45 CFR 5b.7) *Federal Register*, October 8, 1975, page 47411.).

RECORD SOURCE CATEGORIES:

Information in this system of records is (1) supplied directly by the individual, or (2) derived from information supplied by the individual, or (3) supplied by timekeepers and other Department officials.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4150-04-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[I-18576]

Realty Action; Competing Sale of Public Lands in Camas County, Idaho

Correction

In FR Doc. 83-11160 beginning on page 19083 in the issue of Wednesday, April 27, 1983 make the following correction: In the second column, under **"Boise Meridian, Idaho"**, line two, "Sec. 11: W½NW¼—comprising 20 acres" should read "Sec. 11: W½NW¼NW¼—comprising 20 acres".

BILLING CODE 1505-01-M

[Serial No. AZ-AZ027-000005]

Arizona: Realty Action; Competitive Sale of Public Land in Maricope County

The Bureau of Land Management will offer the following described lands for sale at a public autcion on July 21, 1983, at 1:00 p.m. at the Ruth Fisher School in Tonopah, Arizona. There will be six tracts of land offered for sale. It has been determined that the sale of these tracts is consistent with Section 203 of the Federal Land Policy and Management Act of October 21, 1976. The lands will be offered for sale at no less than the appraised fair market value indicated below. It has also been determined that Clifford Wolfswinkel will have a preference bid for Tract 5 and will be allowed the opportunity to meet the high bid.

VOL 48 ISS 97 MY 18 1983 UMI

GILA AND SALT RIVER MERIDIAN, ARIZONA

[Maricopa sale area]

Tract No.	Legal description	Acres	Value
1	T. 2 N., R. 7 W., Sec. 20, E½SE¼	80.0	$108,000
2	T. 2 N., R. 7 W., Sec. 20, W½SE¼	80.0	110,000
3	T. 2 N., R. 7 W., Sec. 21, E½SE¼	80.0	112,000
4	T. 2 N., R. 7 W., Sec. 21, W½SE¼	80.0	108,000
5	T 4 S., R. 8 W., Sec. 15, SE¼NW¼	40.0	15,000
6	T. 1 S., R. 9 W., Sec. 7, Lots 1, 2, 3, 4; E½W½	303.0	61,500

The above aggregates 663.0 acres of land in Maricopa County.

Upon publication of this notice in the **Federal Register**, the land described above will be segregated from all forms of nondiscretionary appropriation under the public land laws, including the mining laws, except the mineral leasing laws, for a period of 2 years or until the lands are sold. The segregative effect may otherwise be terminated by the authorized officer by publication of a termination notice in the **Federal Register** prior to the expiration of the 2-year period.

Lands not sold on July 21, 1983, will be reoffered for sale by competitive bid at the Phoenix District Office at 10:00 a.m. on October 5, 1983. Any remaining unsold lands will be available for over-the-counter purchase for the reminder of the 2 years.

All of the tracts listed will be subject to the following reservations when patented:

1. A right-of-way for ditches and canals constructed by the authority of the United States. (Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.)

2. A reservation of all oil and gas to the United States with the right to prospect for, mine and remove such deposits.

3. A reservation of all minerals to the United States with the right to prospect for, mine, and remove such deposits.

The following tracts in Maricopa County have the following reservations:

Tracts 1, 2, 3, and 4

1. Will be sold subject to Arizona Public Service Company's powerline right-of-way AR–010364.

2. Will be subject to American Telephone and Telegraph Company telephone-telegraph line right-of-way PHX–093322.

3. Will be sold subject to oil and gas lease A–14241.

Tract 3

1. The eastern most 33' will be reserved to the United States for a public easement.

Tract 5

1. Will be sold subject to oil and gas lease A–16989.

Tract 6

1. Will be sold subject to El Paso Natural Gas Company's pipeline right-of-way AR–035846.

2. Will be sold subject to oil and gas lease A–16897.

There are no known mineral values in the land. If the successful bidder wishes, he/she may apply for the reserved mineral estate (by submitting a $50.00 filing fee) under the provisions of Section 209 of the Federal Land Policy and Management Act of October 21, 1976.

Additional information concering these lands, terms and conditions of the sale, and bidding instructions may be obtained from the Phoenix District Manager, 2929 West Clarendon Avenue, Phoenix, Arizona 85017 or by calling (602) 241–2511.

For a period of 45 days from the date of this notice, interested parties may submit comments regarding the Proposed Action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

Dated: May 12,1983.

W. K. Barker,

District Manager.

[U–50824]

Realty Action; Private Exchange; Public Lands in Uintah County, Utah

The following described lands have been determined to be suitable for a surface only private exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716. The federal lands that have been identified as suitable for disposal by exchange are:

Salt Lake Meridian, Utah

T. 3 S., R. 19 E.,
Sec. 14, NW¼NW¼.
Comprising 40 acres.

In exchange for these federal lands, the United States will acquire the surface estate of the following non-federal lands from Mr. Elden Gardner:

Salt Lake Meridian, Utah

T. 3 S., R. 19 E.,
Sec. 12, NE¼NW¼.,
Comprising 40 acres.

Upon publication of this notice, the federal lands are hereby segregated from appropriation under the public land laws, including the mining laws.

Lands to be transferred from the United States will be subject to the following reservations:

1. A reservation of a right-of-way for ditches and canals constructed by the authority of the United States in accordance with 43 U.S.C. 945.

2. All minerals with the right to prospect for, mine and remove the same under applicable laws and such regulations as the Secretary may prescribe.

For a period of 45 days from the date of the notice, interested parties may submit comments to the District Manager, Vernal District, 170 South 500 East, Vernal, Utah 84078.

Lloyd H. Ferguson,

District Manager.

BILLING CODE 4310–84–M

[M 348]

Revocation of Recreation and Public Purposes Classification

May 9, 1983.

Effective September 14, 1966, the following public lands were classified for lease under the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869) under serial number M 348:

Principal Meridian

T. 7 N., R. 47 E.,
Sec. 4.

Metes and Bounds

Beginning at a point on the south boundary of Tract No. 2 of the Montana Fish and Game Department, said point being S. 87°04' E. a distance of 497.5 feet from the Government Monument marking the ¼ corner common to Section 5 and Section 4; thence S. 48°25' E. along the Fish and Wildlife fence a distance of 1613.7 feet to an iron pipe B; thence S. 77°11' E. a distance of 755.7 feet to pipe C; thence N. 72°00' E. a distance of 401.6 feet to pipe D; thence N. 18°06' E. a distance of 457.3 feet to pipe E; thency N. 1°31' W. a distance 620.8 feet to pipe F; thence N. 26°32' W. a distance of 791.7 feet to pipe G; thence N. 12°20' W. a distance of 917.1 feet to pipe H; thency N. 52°17' W. a distance of 356.4 feet to pipe I; thence N. 16°21' W. a distance of 213.7 feet to pipe J; thence N. 20°56' E. a distance of 462.4 feet to pipe K; thence N. 15°34' W. a distance of 229.2 feet to pipe L which is the Government Witness Corner to the Meander Corner on the West Bank of Tongue River; thence N. 89°47' W. along the Township Line a distance of 145.1 feet to the south right-of-way line of the Northern Pacific Railway; thence S. 41°30' W. along said right-of-way line a distance of 1877.9 feet to point N the northeast corner of Tract No. 2 of the Montana Fish and Game Department; thence S. 48°30' E. a distance of 600 feet to Point O being the southeast corner of Tract No. 2 of the Montana Fish and Game Department; thence S. 41°30' W. along the south line of said Tract No. 2 a distance of 1089.2 feet to Point A the Point of Beginning.

The area described above contains approximately 123 acres in Custer County.

This classification segregated the lands from all forms of appropriation under the public land laws except the Recreation and Public Purposes Act and from location and entry under the general mining laws, but not from leasing under the mineral leasing laws.

The purposes for classification are no longer valid as the above lands have been conveyed by Pub. L. 97–401 to the City of Miles City subject to the reservation of all minerals to the United States, and the classification is hereby revoked.

At 8 a.m. on June 13, 1983, the lands will be open to location under the United States Mining laws, subject to valid existing rights and requirements of applicable law.

Inquiries concerning the lands may be addressed to the Bureau of Land Management, P.O. Box 30157, Billings, Montana, Montana 59107.

Kannon Richards,

Acting State Director.

Yuma District Advisory Council; Meeting

Notice is hereby given in accordance with Section 309 of the Federal Land Policy and Management Act of 1976 that the first meeting of the newly appointed Yuma District Advisory Council will be held on June 30 and July 1, 1983 at 9:00 AM at the Stardust Resort Motor Inn, 2350 South Fourth Avenue, Yuma, Arizona.

Agenda for the meeting will include:

1. Introduction of Arizona State Director, District Manager, and Advisory Council members.

2. Discussion of Charter, committees and functions of the Council.

3. Introduction of Area Managers and programs.

4. Election of chairperson, vice-chairperson and committee formation.

5. Discuss public input to Resource Management Plan from public participation meetings.

6. Make recommendations on issues identified at public meetings.

7. Accept oral statements from public.

The meeting is open to the public. Anyone wishing to make an oral statement must notify the District Manager at the Yuma District Office, 2450 South Fourth Avenue, P.O. Box 5680, Yuma, Arizona 85364 by June 22, 1983. Written comments will also be accepted for the council's consideration.

Summary minutes will be maintained in the District Office and will be available for public inspection and reproduction during regular business hours 30 days following the meeting.

Dated: May 9, 1983.

National Park Service

Appalachian National Scenic Trail Land Protection Plan

AGENCY: National Park Service, Interior.

ACTION: Notice of availability.

SUMMARY: Notice is hereby given of the availability for public review of the final draft of the land protection plan for the Appalachian National Scenic Trail. This plan was prepared in response to the Department of the Interior's policy for the Federal portion of the Land and Water Conservation Fund (47 FR 19784). It has been prepared in compliance with the National Environmental Policy Act, other Congressional Guidelines, Executive Orders, and Departmental and National Park Service Policies. Copies of the Plan are available for review at the following locations:

Appalachian Trail Land Acquisition Office, P.O. Box 908, Martinsburg, WV 25401

Appalachian Trail Land Acquisition Office, 850 No. 5th Street, Allentown, PA 18102

Appalachian Trail Land Acquisition Office, 8 Campbell Street, Lebanon, NH 03766

or may be obtained by writing the Appalachian Trail Project Office, Harpers Ferry Center, Harpers Ferry, WV 25425. The public is invited to comment. Comments should be submitted by June 17, 1983. Comments should be addressed to Project Manager, Appalachian Trail Project Office, Harpers Ferry Center, Harpers Ferry, WV 25425.

FOR FURTHER INFORMATION CONTACT: David A. Richie, Project Manager, Appalachian Trail Project Office, Harpers Ferry Center, Harpers Ferry, WV 25425.

SUPPLEMENTARY INFORMATION: On May 7, 1982 the Department of the Interior published a new final policy statement on Use of the Federal Portion of the Land and Water Conservation Fund (47 FR 19784). In response to this policy, the National Park Service began preparation of land protection plans for each unit in the National Park System containing non-Federal land or interest in land within its authorized boundary. The policy, as stated in 47 FR 19784, is to utilize, to the maximum extent possible, the most cost-effective methods of protecting nationally important natural, cultural and recreational resources. The Land Protection Plan for the Appalachian National Scenic Trail is simple, concise, has been prepared with public participation, and identifies protection techniques and priorities for protection.

Dated: May 4, 1983.

David A. Richie,

Project Manager.

Cape Cod National Seashore Advisory Commission, South Wellfleet, Massachusetts; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770 (5 U.S.C. App. 1 § 10)), that a meeting of the Cape Cod National Seashore Advisory Commission will be held at 1:30 pm on Friday, June 3, 1983 at the Headquarters building, Cape Cod National Seashore.

The Commission was established pursuant to Pub. L. 91–383 to meet and consult with the Secretary of the Interior on general policies and specific matters relating to the development of Cape Cod National Seashore.

At the meeting at 1:30 pm the Commission will consider the following:

1. Record of Decisions on:
   a. Water Resource Management Plan Alternatives.
   b. Dune Revegetation/Stabilization Alternatives.
2. Report on Mosquitoes of the Herring River Basin—1982.
3. Review of Gas Station Use.

The meeting is open to the public. It is expected that 30 persons will be able to attend the session in addition to the Commission members.

Interested persons may make oral/written presentations to the Commission or file written statements. Such requests should be made to the official listed below at least seven days prior to the meeting.

Further information concerning this meeting may be obtained from Herbert Olsen, Superintendent, Cape Cod National Seashore, South Wellfleet, MA 02663, Telephone (617) 349–3785. Minutes of the meeting will be available for public information and copying two weeks after the meeting at the Office of the Superintendent, Cape Code National Seashore, South Wellfleet, Massachusetts.

Herbert Olsen,

Superintendent, Cape Cod National Seashore.

BILLING CODE 4310–70–M

Office of the Secretary

Transfer of Surface Mining and Reclamation Appeals Functions

Notice is hereby given that the Secretary of the Interior has issued Order Number 3092 dated April 26, 1983. The order consolidates the functions of the Board of Surface Mining and Reclamation Appeals with the Interior Board of Land Appeals. The Order is published in its entirety below.

Additional information regarding the order may be obtained from the Director, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203, telephone 703–235–3810.

Dated: May 12, 1983.

John N. Stafford,

Director.

[Order No. 3092]

Subject: Consolidation of the Functions of the Board of Surface Mining and Reclamation Appeals into the Interior Board of Land Appeals

Section 1. *Purpose.* This order consolidates the functions of the Board of Surface Mining and Reclamation Appeals into the Interior Board of Land Appeals. The purpose of this action is to achieve greater economy in the use of Office of Hearings and Appeals resources in view of the declining number of appeals arising under the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. §§ 1201–1328.

Section 2. *Authority.* This order is issued in accordance with the authority provided by Section 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262).

Section 3. *Transfer of Function.* All of the functions and responsibilities delegated to the Board of Surface Mining and Reclamation Appeals with respect to appeals arising under the Surface Mining Control and Reclamation Act of 1977 are transferred to the Interior Board of Land Appeals.

Section 4. *Abolishment.* The Board of Surface Mining and Reclamation Appeals is abolished.

Section 5. *Implementation.*

(a) The Assistant Secretary—Policy, Budget and Administration is responsible for implementing this order with respect to personnel, property, records and funds.

(b) The Director, Office of Hearings and Appeals, in consultation with the Assistant Secretary—Policy, Budget and Administration, shall make such organizational arrangements for the performance of transferred functions as he deems necessary. In making these arrangements, the Director shall seek to ensure that the rights of parties bringing appeals under the Surface Mining and Reclamation Act of 1977 are protected and that no undue delay in consideration of such appeals occurs.

(c) On or after the effective date of this order, all notices of appeal and other filings required by 43 CFR Part 4, Subpart L, to be made with the Board of Surface Mining and Reclamation Appeals must be made with the Interior Board of Land Appeals, 4015 Wilson Boulevard, Arlington, VA 22203.

(d) Changes to Departmental regulations made necessary by this order will be published in the **Federal Register.**

Section 6. *Effective Date.* This order is effective immediately. The provisions of this order will terminate on December 31, 1983.

Dated: April 26, 1983.

James G. Watt,

Secretary of the Interior.

BILLING CODE 4310–01–M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Privacy Act of 1974; System of Records Amendment

AGENCY: Agency for International Development, IDCA.

ACTION: System of Records Amendment.

SUMMARY: The Agency for International Development is amending its System of Records AID–21, "Public Information Records", to make the system hybrid and update all other categories associated with this change.

DATE: This amendment becomes effective May 18, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Rhea Johnson, Area Code (202) 632–9614.

SUPPLEMENTARY INFORMATION: Pursuant to 5 U.S.C. 552a(e)(11), Pub. L. 93–579 the Agency is amending its System of Records AID–21, "Public Information Records", to change it from manual to hybrid. The full text of the System appeared at 42 FR 47384 on September 20, 1977. Changes associated with the amendment are: category of records in the system, the routine uses, the method of storage, safeguards retention and disposal and the records source category.

Because no substantive changes have been made that would significantly affect the public at large, the sixty day notification period has been waived. However, comments are invited and may be sent to James Harper, Public Information Specialist, Agency for International Development, Washington, D.C. 20523.

For easy reference, we are publishing the full text of the revised system below.

Kate Semerad,

Associated Deputy Administrator, Bureau for External Relations, Office of Public Affairs.

A.I.D.–21

SYSTEM NAME:

Public Information Records.

SYSTEM LOCATION:

a. Principal files are maintained in the Office of Public Affairs, A.I.D., 320 21st Street, NW., Washington, D.C. 20523.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of A.I.D., Members of Congress, individuals associated with foreign economic assistance, and individuals requesting information under the Freedom of Information and Privacy Acts.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographical information on Members of Congress, individuals officials within the agency. Biographical information on employees who serve as public speakers, press releases, news clippings, photographs, requests for access to A.I.D. records under the Freedom of Information and Privacy Acts, and related correspondence.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Foreign Assistance Act of 1961 as amended, especially Secs. 621, 634(b); Pub. L. 93–502; 5 U.S.C. 301; and the Freedom of Information Act (5 U.S.C. 552).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The Administrator and Deputy Administrator for personal contacts.

Persons or organizations requesting A.I.D. to make available an employee to speak in public on A.I.D. activities are provided a biographical sketch of the speaker in order to select and introduce the speaker.

To law enforcement agencies, U.S. Government agencies, courts, the Department of State, foreign governments and international agencies, Members of Congress, and individuals' medical advisers for the purposes set forth in the Statement of General Routine Uses immediately preceding these specific notices of systems of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper copies and photographs in file folders. Automated records on magnetic discs and permanently on line at the computer center.

RETRIEVABILITY:

By name of individual.

SAFEGUARDS:

Located in metal file cabinets with three-way combination lock in a secure space or secured premises with access limited to those whose official duties require access. The Resource Allocation Control Facility, in use on our computer system, lessens the potential for unauthorized use.

RETENTION AND DISPOSAL:

Destroyed after five years by burning. Computerized records are deleted fro(m the system when no longer needed for daily operations.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Public Affairs, Agency for International Development, 320 21st Street, NW., Washington, D.C. 20523.

NOTIFICATION PROCEDURE:

Requests by individuals concerning the existence of a record may be addressed to: Director, Office of Public Affairs, Attn: Privacy Liaison Officer, Agency for International Development, 320 21st Street NW., Washington, D.C. 20523, or presented in person at 320 21st Street NW., Washington, D.C. 20523.

For offices abroad, to the Privacy Liaison Officer at the applicable address in Appendix A.

Information Required: Individual's name, place and date of birth. The determination as to the existence of a record will be facilitated by the provision of the individual's Social Security Account Number and dates and places of service.

RECORD ACCESS PROCEDURE:

Requests from individuals should be addressed or presented in person to the same addresses as stated in the Notification Section above.

Requests should be accompanied by information sufficient to identify the individual pursuant to 22 CFR 215.4 (c) or (d).

VOL
48
ISS
97
MY
18
1983
UMI

CONTESTING RECORD PROCEDURES:

Written requests from individuals to amend their record should be mailed or presented in persoq to the same address as stated in the Notification Section above.

Requests for review of a refusal to amend a record should be made in writing and mailed or delivered to: Administrator, Agency for International Development, 320 21st Street NW., Washington, D.C. 20523, Attention: Executive Secretary—Privacy Review Request.

Both the envelope and the letter should be clearly marked Attention: Executive Secretary, Privacy Review Request.

RECORD SOURCE CATEGORIES:

Members of Congress, employees, public media information, A.I.D. records, and individuals requesting access to records under the Freedom of Information and Privacy Acts.

BILLING CODE 6116-01-M

Voluntary Foreign Aid Advisory Committee; Meeting

Pursuant to the Federal Advisory Committee Act, notice is hereby given of a meeting sponsored by the Advisory Committee on Voluntary Foreign Aid (ACVFA) which will be held June 15, 1983 (from 9:00 a.m. to 5:00 p.m.) and June 16, 1983 (from 9:00 a.m. to 12 noon) in the Lloyd Henderson International Conference Room, Department of State Building. Use the Diplomatic Entrance, C Street, between 21st and 23rd Streets, N.W., Washington, D.C.

The morning session on June 15 will be a plenary session on the subject of Food for Peace. The afternoon will be devoted to individual subcommittee meetings: Food for Peace, AID/PVO Policy, PVO/Corporate Relations, PVO/University Relations, Development Education, and Women in Development. On June 16 a plenary session will be held to hear reports on results of the subcommittee meetings.

The meeting will be open to the public. Any interested person may attend, request to appear before, or file statements with the Advisory Committee, in accordance with procedures established by the Committee. Written statements should be filed prior to the meeting and should be available in twenty (20) copies.

Persons wishing to attend the ACVFA meeting must contact Lillian Halter in the ACVFA office not later than May 31, 1983 to arrange entrance to the Department of State Building.

There will be AID representatives at the meeting. Those desiring further information may contact Lillian Halter, (703) 235-3336, or by mail, c/o The Advisory Committee on Voluntary Foreign Aid, Room 227, SA-8, Agency for International Development, Washington, D.C. 20523.

Dated: May 9, 1983.

Julia Chang Bloch,

Assistant Administrator, Bureau for Food for Peace and Voluntary Assistance.

BILLING CODE 6116-01-M

INTERNATIONAL TRADE COMMISSION

Termination of Investigation No. 731-TA-94 (Final)—Bicycle Tires and Tubes from Taiwan

AGENCY: United States International Trade Commission.

ACTION: Termination of final antidumping investigation.

FOR FURTHER INFORMATION CONTACT: Mr. Jim McClure, Supervisory Investigator, Telephone No. 202-523-0289.

SUPPLEMENTARY INFORMATION: On December 7, 1982, the Department of Commerce (Commerce) preliminarily determined that there was a reasonable basis to believe or suspect that certain bicycle tires and tubes from Taiwan were being sold in the United States at less than fair value (LTFV). Accordingly, effective December 7, 1982, the Commission instituted antidumping investigation No. 731-TA-94 (Final), bicycle tires and tubes from Taiwan. The purpose of the investigation was to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry is materially retarded by reason of the LTFV imports from Taiwan of bicycle tires and tubes, provided for in items 772.48 and 772.57, respectively, of the Tariff Schedules of the United States (1983).

On April 29, 1983, Commerce published tires in the **Federal Register**, a final determination with respect to bicycle and tubes from Taiwan. The notice states that bicycle tires and tubes from Taiwan are not being, nor are likely to be, sold in the United States at less than fair value and, therefore, Commerce is terminating its investigation. As a result, pursuant to its authority under section 207.20 of the Commission's Rules of Practice and Procedure, the Commission's antidumping investigation (No. 731-TA-94 (Final)), bicycle tires and tubes from Taiwan, is also hereby terminated.

By order of the Commission.

Issued: May 12, 1983.

Kenneth R. Mason,

Secretary.

[Investigations Nos. 701-TA-201 and 731-TA-133 (Preliminary)]

Forged Undercarriage Components From Italy; Clarification of Scope of Preliminary Countervailing Duty and Antidumping Investigations

AGENCY: United States International Trade Commission.

ACTION: Clarification of the scope of the preliminary countervailing duty and antidumping investigations.

EFFECTIVE DATE: May 13, 1983.

SUMMARY: The U.S. International Trade Commission hereby givens notice of clarification of the scope of its investigations to determine whether there is a reasonable indication that an industry in the United States is materially injured, or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Italy of forged components for the undercarriages of crawler-mounted machinery, provided for in items 664.08, 692.34, or 692.35 of the Tariff Schedules of the United States, upon which bounties or grants are alleged to be paid and which are alleged to be sold in the United States at less than fair value.

FOR FURTHER INFORMATION CONTACT: Ms. Mirian A. Bishop, Office of Investigation, U.S. International Trade Commission, telephone 202-523-0291.

This notice is published pursuant to § 207.12 of the Commission's Rule of Practice and Procedure (19 CFR 207.12).

By order of the Commission.

BILLING CODE 7020-02-M

[Investigation No. TA-203-14]

Certain Mushrooms; Institution of Investigation

AGENCY: United States International Trade Commission.

ACTION: Institution of an investigation under section 203(i)(3) of the Trade Act of 1974 (19 U.S.C. 2253(i)(3)) and scheduling of a hearing to be held in connection therewith.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission, following receipt on April 29, 1983, of a petition filed by certain domestic producers of prepared or preserved mushrooms, instituted investigation No. TA-203-14 under section 203(i)(3) of the Trade Act of 1974 for the purpose of gathering information in order that it might advise the President of its judgment as to the probable economic effect on the domestic industry concerned of the termination of the import relief presently in effect with respect to certain prepared or preserved mushrooms, provided for in item 144.20 of the Tariff Schedules of the United States (TSUS). Such import relief is in the form of increased rates of duty and is provided for in Presidential Proclamation 4801 of October 29, 1980 (45 FR 72617); the relief is described in item 922.56 of the Appendix to the TSUS. The relief is scheduled to terminate on November 1, 1983, unless extended by the President.

EFFECTIVE DATE: May 11, 1981.

FOR FURTHER INFORMATION CONTACT: Woodley Timberlake (202-523-4618), Office of Investigations, U.S. International Trade Commission.

SUPPLEMENTARY INFORMATION:

Participation in the investigation.—Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11) not later than 21 days after the publication of this notice in the **Federal register.** Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file entry.

Upon the expiration of the period for filing entries of appearance, the Secretary shall prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation, pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)). Each document filed by a party to this investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certtificate of service (19 CFR 201.16(c), as amended by 47 FR 33682, Aug. 4, 1982).

Hearing.—The Commission will hold a hearing in connection with this investigation beginning at 10:00 a.m. on August 2, 1983, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on July 8, 1983. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 10:00 a.m. on July 13, 1983, in room 117 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is July 27, 1983.

Testimony at the public hearing shall be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs. Posthearing briefs shall not exceed ten (10) pages of textual material, double spaced, on stationery measuring 8½ x 11 inches, and must be submitted not later than the close of business on August 8, 1983. In addition, the presiding offical may permit persons to file answers to questions or requests made by the Commission at the hearing within a specified time. The Secretary shall not accept for filing posthearing briefs or answers which do not comply with the provisions contained in this notice.

Written submissions.—As mentioned, parties to this investigation may file prehearing and posthearing briefs by the dates show above. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before August 8, 1983. A signed original and fourteen (14) true copies of each submission must be filed with the Secretary to the Commission in accordance with section 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired shall be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of section 201.6 of the Commission's rules (19 CFR 201.6).

For further information concerning the conduct of the investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR Part 201, as amended by 47 FR 33682, Aug. 4, 1982).

This notice is published pursuant to section 206.20 of the Commission's rules (19 CFR 206.20).

By order of the Commission.

Issued: May 12, 1983.

Kenneth R. Mason,

Secretary.

[FR Doc. 83-13379 Filed 5-17-83; 8:45 am]
BILLING CODE 7020-02-M

[Investigation No. TA-201-48]

Report to the President on Investigation; Stainless Steel and Alloy Tool Steel

Determination

On the basis of the information developed in the course of investigation No. TA-201-48, the Commission [1] determines that bars; wire rods; and plates, sheets, and strips, not cut, not pressed, and not stamped to nonrectangular shape; all the foregoing of stainless steel or certain alloy tool steel; and round wire of high speed tool steel, provided for in items 606.90 606.93

[1] Commissioner Stern dissenting with respect to plates.

VOL 48 ISS 97 MAY 18 1983

606.94, 606.95, 607.26, 607.28, 607.34, 607.43, 607.46, 607.54, 607.72, 607.76, 607.88, 607.90, 608.26, 608.29, 608.34, 608.43, 608.49, 608.57, 608.64, and 609.45 of the Tariff Schedules of the United States, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury to the domestic industries producing articles like or directly competitive with the imported articles.

Findings and Recommendations

Commissioners Stern and Haggart find and recommend that, in order to remedy the serious injury found to exist—

(1) It is necessary to impose quantitative restrictions for the 3-year period beginning January 1, 1983, as follows—

(a) For stainless steel sheet and strip, 8 percent of forecasted U.S. consumption, but not less than 62,900 short tons;

(b) For stainless steel plate, 10 percent of forecasted U.S. consumption, but not less than 10,700 short tons;

(c) For stainless steel bar, 17 percent of forecasted U.S. consumption, but not less than 27,000 short tons;

(d) For stainless steel wire rod, 42 percent of forecasted U.S. consumption, but not less than 19,100 short tons;

(e) For alloy tool steel, 20 percent of forecasted U.S. consumption, but not less than 22,400 short tons.

(2) The following articles should be exempted from any relief—[3]

(a) Razor blade steel provided for in TSUS item 608.26;

(b) Chipper knife steel provided for in the following items of the TSUSA (Annotated)—

606.9300	607.5405	608.3405
606.9400	607.7205	608.4905
607.3405	607.8805	608.6405

(c) Band saw steel provided for in the following TSUSA items:

606.9520	607.5405	607.3405
606.9525	607.7205	608.4905
607.3405	607.8805	607.6405

(d) The first 6,000 short tons of the following stainless steel sheet, which is provided for in TSUSA item 607.9020—

Stainless steel sheet not under 0.055 inch and not over 0.065 inch in thickness, not under 25.5 inches and not over 26.25 inches in width, which contains in addition to iron, each of the following elements by weight in the amounts specified and which is certified at the time of entry to be imported for use in the manufacture of stainless steel-clad aluminum automotive trim:

Carbon: not more than 0.12 percent;

Chromium: not less than 16 percent nor more than 18 percent;

Molybdenum: not less than 0.75 percent nor more than 1.25 percent;

(3) The period 1972–82, exclusive of 1975 and 1982, is the recent period most representative of imports of these articles;

(4) No more than 30 percent of each of the respective aggregate quantities specified in (1), above, for each class of articles may be entered during any calendar quarter; and

(5) In order to provide for a more equitable distribution of imports among supplying countries, the quantities specified in (1), above, for each class of articles should be allocated on a country-by-country basis.

Chairman Eckes finds and recommends that, in order to remedy the serious injury found to exist—

(1) It is necessary to impose quantitative restrictions for the 3-year period beginning January 1, 1983, as follows—

(a) For stainless steel sheet and strip, 7.3 percent of forecasted U.S. consumption, but not less than 56,887 short tons;

(b) For stainless steel plate, 4.8 percent of forecasted U.S. consumption, but not less than 5,919 short tons;

(c) For stainless steel bar, 19.8 percent of forecasted U.S. consumption, but not less than 33,513 short tons;

(d) For stainless steel wire rod, 38.0 percent of forecasted U.S. consumption, but not less than 21,729 short tons;

(e) For alloy tool steel, 26.9 percent of forecasted U.S. consumption, but not less than 29,592 short tons.

(2) The following articles should be exempted from any relief—

(a) Razor blade steel provided for in TSUS item 608.26;

(b) Chipper knife steel provided for in the following items of the TSUSA (Annotated)—

606.9300	607.5405	608.3405
606.9400	607.7205	608.4905
607.3405	607.8805	608.6405

(c) Band saw steel provided for in the following TSUSA items:

606.9520	607.5405	608.3405
606.9525	607.7205	608.4905
607.3405	607.8805	608.6405

(3) The period 1979–81 is the most recent period representative of imports of these articles; and

(4) The quantities of each class of articles should be allocated on a country-by-country basis.

[3] Commissioner Stern further finds that there would be no adverse economic effect on the domestic industries if the following items were to be exempted from relief, providing any necessary adjustments were to be made to the market share quotas and providing that such exemptions be specific to end uses: stainless flapper valve steel, Lummis strip steel, rotor steel for hysteresis motors, grade 253 MA stainless steel, grade 254 SMO stainless steel, and stainless steel sheet 72 to 80 inches in width.

Background

On December 9, 1982, the United States International Trade Commission instituted investigation No. TA–201–48, under section 201(b)(1) of the Trade Act of 1974, to determine whether bars; wire rods; and plates, sheets, and strips, not cut, not pressed, and not stamped to nonrectangular shape; all the foregoing of stainless steel or certain alloy tool steel; and round wire of high speed tool steel, provided for in items 606.90, 606.93 606.94, 606.95, 607.26, 607.28, 607.34, 607.43, 607.46, 607.54, 607.72, 607.76, 607.88, 607.90 608.26, 608.29, 608.34, 608.43, 608.49, 608.57, 608.64, and 609.45 of the Tariff Schedules of the United States, are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industries producing articles like or directly competitive with the imported articles.

The investigation was instituted following the receipt of a letter on November 23, 1982, from the United States Trade Representative (USTR), requesting an expedited investigation under section 201 concerning imports of certain stainless steel and alloy tool steel products. The USTR's request was in accordance with a determination of the President on November 17, 1982 (47 FR 51717), under section 301(a)(2)(A) of the Trade Act of 1974 (19 U.S.C. 2411(a)(2)(A)). The President's action followed the completion of investigations under section 301 of the act initiated by USTR on February 26, 1982 (47 FR 10107) and on August 9, 1982 (47 FR 36387). These investigations were instituted on the basis of petitions, filed by the Tool and Stainless Steel Industry Committee and the United Steel Workers of America, alleging that the European Community, Belgium, France, Italy, the United Kingdom, Austria, and Sweden had subsidized the production of stainless and alloy tool steel (specialty steel) in a manner inconsistent with their obligations under Articles 8 and 11 of the Agreement on the Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade (Subsidies Code).

Notice of the institution of the investigation and the scheduling of a public hearing to be held in connection with the investigation was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** of December 15, 1982 (47 FR 56218). A public hearing was held on February 9–10, 1983, at which time all persons who requested the opportunity were afforded an opportunity to be present, to present evidence, and to be heard.[3] On March 24, 1983, the Commission, meeting in public session, announced its affirmative injury determination.

As a result of the Commission's affirmative injury determination in this investigation, a public hearing on the subject of remedy recommendations was held on April 5, 1983, at which time all persons who requested the opportunity were afforded an opportunity to be present, to present evidence, and to be heard. The Commission announced its remedy findings and recommendations in a public meeting held April 27, 1983.

The Commission transmitted its report on the investigation to the President on May 6, 1983. A public version of the Commission's report, Stainless Steel and Alloy Tool Steel (investigation No. TA–201–48, USITC Publication 1377, 1983) contains the views of the Commission and information developed during the investigation.

Issued: May 6, 1983.

By Order of the Commission.

Kenneth R. Mason,

Secretary.

[Docket No. 38955 et al [1]]

Motor Carriers; Ericon International Corp.—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of final exemption of existing operations and provisional exemption of future operations.

SUMMARY: The provisional exemption of petitioners' existing operations granted at 48 Fed. Reg. 3429 (January 25, 1983) is made final. Additionally, in accordance with current Commission policy, a provisional exemption of petitioners' future contracts is granted.

DATES: Comments are due on June 2, 1983. The provisional exemption of petitioners' future contracts will become final on June 17, 1983, unless in response to timely filed adverse comments, the Commission issues a future decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: No. 38955 et al., Room 2139, Interstate Commerce Commission, Office of Proceedings, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Robin Williams (202) 275–7697

BILLING CODE 7035-01-M

[1] This proceeding embraces twelve petitions filed by motor contract carriers: No. 38955, Ericon International Corporation; No. 38957, Central Southern, Inc., No. 38958, Cherokee Lines, Inc., No. 38961, Trans-United, Inc., No. 38965, Dennis Moss and Gary Moss, d/b/a Motor West, No. 38966, Boncosky Transportation, Inc., No. 38967, Chemical Leaman Tank Lines, Inc., No. 38969, Motor Cargo Transport Corp., No 38970, Carrier Development Corporation, No. 38975, Watkins Motor Lines, Inc., No. 38980, Plate Valley Freightways, Inc., No. 38982, A. Luurtsema Truck Lines, Inc.

Motor Carriers; Finance Applications; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1161.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance

VOL

requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Please direct status inquiries about the following to Team 4 at (202) 275–7669.

Volume No. OP4 FC–291

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC–FC–81328, filed March 22, 1983. By decision of May 10, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 3 approved the transfer to COMANCHE ROAD TRANSPORT, LTD. of Calgary, Alberta, Canada, of Certificate No. MC–140656 (Sub-No. 7)X, issued July 10, 1981, and the underlying authority in MC–140656 (Sub-No. 4), issued March 12, 1981, to TROCHU TRUCKING SERVICES, LTD. of Calgary, Alberta, Canada, authorizing the transportation in foreign commerce only, of *dry fertilizer*, between ports of entry on the International Boundary line between the U.S. and Canada in WA, ID, MT and ND, on the one hand, and, on the other, those points in the U.S. in and west of MN, IA, MO, AR, and LA. Representative: William E. Seliski, 2 Commerce St., P.O. Box 8255, Missoula, MT 59807. (406) 543–8369, for both transferee and transferor.

Please direct status inquiries about the following to Team 5 at (202) 275–7289.

Volume No. OP5 FC–228

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC–FC–81403. By decision of May 10, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 1 approved the transfer to GREGORY V. ETCHISON, Springfield, OR, of Certificates Nos. MC–161309 and MC–161309 Sub 1, issued August 17, 1982, and May 28, 1982, respectively, to WILLIE K. HOLLAND AND GREGORY V. ETCHISON, d.b.a. VAIL NORTHWEST, Springfield, OR, authorizing the transportation of (1) glass, between points in WA, OR, CA, TX, OK, and MO, (2) sawmill machinery, between points in CA, AZ, WA, ID, and MT, (3) farm supplies and equipment, between points in TX, KS, NM, CA, NE, OK, MN, WY, and IA, on the one hand, and, on the other, points in CO, (4) lumber, between points in OR, WA, MI, IL, KY, TN, TX, CO, NM, NV, AZ, and CA, and (5) iron and steel articles, (a) between points in AZ, CA, LA, MI, OR, SD, and WA, and (b) between points in IN, NE, UT, and MN, on the one hand, and, on the other, points in CO, IA, ID, IL, IN, MN, NE, NM, OK, OR, UT, and WI; and (6) lumber and wood products, between points in OR, WA, and CA, and (7) metal products, machinery, and clay, concrete, glass or stone products, between points OR and WA. Representative: Gregory V. Etchison, P.O. Box 645, Springfield, OR 97477.

Volume No. OP5FC–229

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing. Member Ewing not participating.

MC–FC–81370. By decision of May 10, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 2 approved the transfer to LUKE G. BURKHOLDER, of Mohnton, PA, of Certificate No. MC–142988 issued March 2, 1978, authorizing the transportation of pulverized agricultural limestone, from the facilities of Martin Limestone, Inc., located in Lancaster County, PA, to points in Delaware, Maryland, New Jersey, and Virginia. An application for temporary authority has been filed. Representative: John W. Metzger, 49 North Duke Street, Lancaster, PA 17602.

MC–FC–81442. By decision of May 10, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 2 approved the transfer to A TRANSPORT COMPANY of Woodinville, WA, of certificate No. MC–147649 Sub 2 issued February 19, 1981, Sub 3 issued June 16, 1981 and Sub 4 issued Janury 22, 1982 to AMERICAN CONTAINER TRANSPORT, INC., of Seattle, WA., authorizing the transportation of (1) *General commodities* between points in WA, ID, MT, OR and CA restricted to traffic having a prior or subsequent movement by water, (2) *general commodities* for and on behalf of the U.S. Government between points in the U.S., and (3) *general commodities* (with exceptions) between points in WA, OR, CA, UT and MT. Representative: Kaaren Trott, 23809 57th Ave., South-East Woodinville, WA 98072.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register.** Failure seasonably to oppose will be construed as a waive of opposition and participation in the proceding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Decided: May 4, 1983.

By the Commission, Review Board Number 2, Members Carleton, Ewing, and Williams. Member Ewing not participating.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 3 (202) 275–5223.

MC–F–15252, filed April 20, 1983. GROSS COMMON CARRIERS, INC. (GROSS) (660 West Grand Ave., Wisconsin Rapids, WI 54494)—PURCHASE (PORTION)— G.M.W., INC., (GMW) (1665 West County Road C, Roseville, MN 55113). No. MC–1494 (Sub-No. 32), filed simultaneously with the above—GATEWAY ELIMINATION. Representative: James E. Ballenthin, 1016 Conwed Tower, 444 Cedar Street, St. Paul, MN 55101. Gross seeks authority to purchase a portion of the interstate operating rights and property of GMW. Ruth M. Gross, individually and as trustee under the Will of Florence Weinbauer and under the agreement of July 15, 1975, and First National Bank of Stevens Points, as trustee under the Residual Trust of Louis L. Gross, who controls Gross, seeks authority to acquire control of the operating rights and property through the transaction. Gross is seeking to acquire that portion of GMW's operating rights in Certificate No. MC–43475 (Sub-No. 59), which authorizes the transportation of general commodities (except classes A and B explosives) between points in the Upper Peninsula of Michigan. Gross is authorized to operate as a motor common carrier in MC–1494 and sub-numbers thereunder. Gross also seeks to eliminate gateways: general commodities (except classes A and B explosives, household goods, and commodities in bulk), between points in Illinois, Iowa, Minnesota, Upper Peninsula of Michigan, and Wisconsin.

Note.—A temporary authority application has been filed.

[FR Doc. 83–13273 Filed 5–17–83; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and houshold goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 FR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a mjaor regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verfied statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passenger are duly noted.

Please direct status inquiries about the following to Team One at (202) 275–7992.

Volume No. OP1–171

Decided: May 10, 1983.
By the Commission Review Board No. 2. Members Carleton, Williams and Ewing. Member Ewing not participating.

MC 121810 (Sub-1), filed April 26, 1983. Applicant: G.A.C. TRUCKING COMPANY, INC., P.O. Box 646, Clearwater, SC 29822. Representative: Jack L. Schiller, 111–56 76th Dr., Forest Hills, NY 11375, (212) 263–2078. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in GA, NC, and SC, on the one hand, and, on the other, points in the U.S. (except AK and HI). Condition: Issuance of a certificate in this proceeding is conditioned upon applicant's prior or coincidental cancellation at applicant's written request of its certificate of registration in No. MC–121810 issued February 15, 1978.

Motor Carriers; Republications of Grants of Operating Rights Authority Prior to Certification

The following grant(s) of operating right authority is republished by order of the Commission to give proper notice of the fact that this application is "public interest" in nature, which was not disclosed in the prior publication in the **Federal Register**, on December 29, 1982.

In addition to fitness grounds this application may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

An original and one copy of an appropriate petition for leave to intervene, setting forth in detail the precise manner in which petitioner has been prejudiced, must be filed with the Commission within 30 days after the date of this **Federal Register** notice.

By the Commission.

Agatha L. Mergenovich,

Secretary.

MC 164973, (Republication), filed December 2, 1982, published in the FR issue of December 29, 1982, and republished this issue. Applicant: MANCHESTER TRANSIT AUTHORITY, 110 Elm St., Manchester, NH 03103. Representative: Jeremy Kahn, Suite 733 Investment Bldg., 1511 K St. NW., Washington, DC 20005. A decision of the Commission, *Review Board 2*, decided April 25, 1983, and served May 4, 1983, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, over irregular routes, as a *common carrier*, by motor vehicle, transporting *passengers*, in charter and special operations, beginning and ending at points in New Hampshire, and extending to points in the United States (including Alaska, but excluding Hawaii), that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to give proper notice of the fact that this application is "public interest" in nature.

Note.—Applicant receives governmental financial assistance for the purchase or operation of buses, or is an operator for such a recipient.

BILLING CODE 7035–01–M

Motor Carriers: Notice of Approved Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of approved exemptions.

SUMMARY: The motor carriers shown below have been granted exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 1343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: The exemptions will be effective on June 17, 1983. Petitions for reconsideration must be filed by June 7, 1983. Petitions for stay must be filed by May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: For further information, see the decision(s) served in the proceeding(s) listed below. To purchase a copy of the full decision contact: TS Infosystems, Inc., Room 2227, 12th and Constitution Ave., NW., Washington, D.C. 20423; or call (202) 289–4357 in the D.C. metropolitan area; or (800) 424–5403 toll-free outside the DC area.

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: May 11, 1983.

The following restriction removal applications are governed by 49 CFR Part 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Review Board No. 1, Members Parker, Chandler and Fortier.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 1, at (202) 275–7992.

MC 108220 (Sub-5X), filed April 15, 1983. Applicant: EDWARD DARBY LAVENDER, d.b.a. LAMBERT-MARKS EXPRESS, P.O. Box 369, Marks, MS 38646. Representative: Henry E. [Finance Docket No. 30138]

Rail Carriers; Cairo Terminal Railroad Company—Trackage Rights Exemption—Illinois Central Gulf Railroad Company

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts the acquisition of trackage rights by Cairo Terminal Railroad Company over 4.5 miles of Illinois Central Gulf Railroad Company track between milepost 500 and Cairo, IL, via Davis IL, from the requirements of 49 U.S.C 11343, subject to standard employee protective conditions. Related connecting track construction is exempted from the requirements of 49 U.S.C. 10901.

DATES: The decision is effective on May 18, 1983. Petitions to reopen must be filed by June 7, 1983.

ADDRESSES: Send petitions to reopen referring to Finance Docket No. 30138 to: (1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423 and (2) Petitioners' representative: Peter A. Gilbertson, Suite 350, 1575 Eye Street, N.W., Washington, DC 20005.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. It appearing, that the National Railroad Passenger Corporation (Amtrak) has established through passenger train service between Oakland, California and Chicago, Illinois. The operation of these trains requires the use of the tracks and other facilities of Southern Pacific

VOL 48 ISS 97 MY 18 1983 UMI

Transportation Company (SP). A portion of the SP tracks in Utah over the Great Salt Lake are temporarily out of service because of flooding. An alternate route is available via The Western Pacific Railroad Company between Alizon, Nevada, and Salt Lake City, Utah.

It is the opinion of the Commission that the use of such alternate route is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

(a) Pursuant to the authority vested in me by order of the Commission decided April 29, 1981, and of the authority vested in the Commission by Section 402(c) of the Rail Passenger Service Act of 1970 (45 U.S.C. 562(c)), The Western Pacific Railroad Company (WP), is directed to operate trains of the National Railroad Passenger Corporation (Amtrak) between a connection with Southern Pacific Transportation Company (SP) at Alizon, Nevada, and Salt Lake City, Utah.

(b) In executing the provisions of this order, the common carriers involved shall proceed even though no agreements or arrangements now exist between them with reference to the compensation terms and conditions applicable to said transportation. The compensation terms and conditions shall be, during the time this order remains in force, those which are voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, the compensation terms and conditions shall be as hereafter fixed by the Commission upon petition of any or all of the said carriers in accordance with pertinent authority conferred upon it by the Interstate Commerce Act and by the Rail Passenger Service Act of 1970, as amended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(d) *Effective date.* This order shall become effective at 3:00 a.m., May 9, 1983.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., May 13, 1983, unless otherwise modified, amended, or vacated by order of this Commission.

This order shall be served upon Union Pacific Railroad Company, The Western Pacific Railroad Company, and upon National Railroad Passenger Corporation (Amtrak), and a copy of this order shall be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., May 9, 1983.

J. Warren McFarland,

Interstate Commerce Commission.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Attorney General

Proposed Consent Judgment in an Action Involving Claims by The United States To Enjoin Discharge of Water Pollutants

In accordance with Department Policy, 28 CFR 50.7, notice is hereby given that on April 29, 1983, a proposed Judgment (on consent) in *Township of Franklin Sewage Authority* v. *Middlesex County Utilities Authority* v. *The State of New Jersey, et al.*, Civil No. 80-4041 (D.N.J.), was lodged with the United States District Court for the District of New Jersey. The proposed judgment requires the City of Perth Amboy, New Jersey to meet the secondary treatment requirements of Section 301 of the Clean Water Act, 33 U.S.C. 1311.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments related to the proposed judgment. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *Township of Franklin Sewage Authority* v. *Middlesex County Utilities Authority* v. *The State of New Jersey, et al.*, D.J. Ref. #90-5-1-6-260.

The proposed judgment may be examined at the Region II Office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278, and at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice (Room 1515), Tenth Street and Pennsylvania Avenue, N.W. Washington, D.C. 20530. A copy of the proposed judgement may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 83-13369 Filed 5-17-83; 8:45 am]

BILLING CODE 4410-01-M

Proposed Final Judgment (on Consent) in Action To Enforce the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on May 3, 1983, a proposed final judgment (on consent) in *United States* v. *The Shultz Company, Inc.*, Civil Action No. 83-Civ-3551, was lodged with the United States District Court for the Southern District of New York. The proposed final judgment (on consent) enjoins defendant to comply with the volatile organic compounds standards of the New York State Clean Air Act Implementation Plan (SIP) and requires defendant to pay a civil penalty of $2,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this notice written comments relating to the proposed final judgment (on consent). Comments should be addressed to the Assistant Attorney General for the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *The Shultz Company, Inc.*, DOJ No. 90-5-2-1-570.

A copy of the proposed final judgment (on consent) may be examined at the offices of the United States Attorney, Southern District of New York, One St. Andrews Plaza, New York, New York 10007; the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278; and the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20530. A copy of the proposed final judgment (on consent) may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

Drug Enforcement Administration

Manufacturer of Controlled Substances; Application

Pursuant to § 1301.43(a) of Title 21 Code of Federal Regulations (CFR), this is notice that on October 18, 1982, Hoffman La Roche Inc., Kingland Road and Bloomfield Avenue, Nutley, New Jersey 07110, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer

of the basic classes of controlled substances listed below:

Drug	Schedule
Alphaprodine (9010)	II.
Levorphanol (9220)	II.

Any other such applicant and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, N.W., Washington, D.C. 20537, Attention: DEA Federal Register Representative (Room 1203), and must be filed no later than June 17, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

May 9, 1983.

BILLING CODE 4410-09-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 83-44]

NASA Advisory Council, Aeronautics Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of Meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Informal Executive Subcommittee.

DATE: Time: June 22, 1983, 8:30 a.m. to 5:45 p.m.; June 23, 1983, 8:30 a.m. to 3 p.m.

ADDRESS: National Aeronautics and Space Administration, 600 Independence Ave., SW, Room 625, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. C. Robert Nysmith, National Aeronautics and Space Administration, Code R, Washington, DC 20546 (202/755-8550).

SUPPLEMENTARY INFORMATION: The Informal Executive Subcommittee was established to provide overall guidance and direction to the discipline and vehicle class oriented activities of the Aeronautics Advisory Committee. The Subcommittee, chaired by Dr. Robert Loewy, is comprised of fourteen members. The meeting will be open to the public up to the seating capacity of the room (approximately 50 persons including the Subcommittee members and participants).

Type of meeting: Open.

Agenda

June 22, 1983:
- 8:30 a.m.—Chairperson's Remarks.
- 8:45 a.m.—Review of NASA Aeronautics Long Range Plan.
- 11 a.m.—Subcommittee Chairperson's Reports.
- 5:45 p.m.—Adjourn.

June 23, 1983:
- 8:30 a.m.—Reports of Ad Hoc/Special Subcommittee Activities.
- 10:45 a.m.—Discussion and Consolidation of Subcommittee Reports.
- 2 p.m.—Summary of Meeting Results to the Office of Aeronautics and Space Technology Management.
- 3 p.m.—Adjourn.

Dated: May 5, 1983.

Ann P. Bradley,

Acting Associate Administrator for Management, Office of Management.

[FR Doc. 83-13254 Filed 5-17-83; 8:45 am]

BILLING CODE 7510-01-M

NATIONAL COMMUNICATIONS SYSTEM

National Security Telecommunications Advisory Committee; Meeting

A meeting of the National Security Telecommunications Advisory Committee (NSTAC) Funding & Regulatory (F&R) Working Group will be held beginning at 9:00 a.m. on Thursday, June 2, 1983. The meeting will be held in the Westgate Building of the MITRE Corporation, 1820 Dolley Madison Boulevard, McLean, Virginia. The agenda is as follows:

A. Opening Remarks.

B. Presentation of the National Coordinating Mechanism (NCM) Report to the F&R Working Group.

C. Presentation of the Commercial Satellite Survivability (CSS) Report to the F&R Working Group.

D. NIAC Presentation on F&R Matters Pertaining to the NCM and CSS Reports.

E. Presentation and Analysis of Funding Alternatives.

F. Development of F&R Recommendations to the Industry Executive Subcommittee (IES).

G. Adjournment.

Any person desiring information about the meeting may telephone (Area Code 202-692-9274) or write the Office of the Manager, National Communications System, Washington, D.C. 20305.

Dated: May 12, 1983.

Joseph C. Wheeler,

Colonel, USAF, National Communications System, NSC Joint Secretariat.

[FR Doc. 83-13302 Filed 5-17-83; 8:45 am]

BILLING CODE 3610-05-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Subcommittee on Plant Features Important to Safety; Meeting

The ACRS Subcommittee on Plant Features Important to Safety will hold a meeting on June 7, 1983, Room 1046, 1717 H Street, NW., Washington, D.C. The Subcommittee will obtain a status report and program plans on equipment qualification and classification systems dealing with both mechanical and electrical components. New initiatives in the quality assurance area such as a graded approach to quality assurance will be explored.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Cognizant Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions during which the Subcommittee finds it necessary to discuss proprietary information. (Sunshine Act Exemption 4.) One or more closed sessions may be necessary to discuss such information. To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows:

Tuesday, June 7, 1983—1:00 p.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary

VOL 48 ISS 97 MY 18 1983 UMI

views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportuntiy to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Richard K. Major (telephone 202/634–1414) between 8:15 a.m. and 5:00 p.m., EDT

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close some portions of this meeting to public attendance to protect proprietary information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552(b)(c)(4).

Dated: May 13, 1983.

Samuel J. Chilk,

Acting Advisory Committee Management Officer.

[FR Doc. 83 13377 Filed 5–17–83; 8:45 am]

BILLING CODE 7590–01–M

Applications for Licenses To Import/Export Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following applications for import/export licenses. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, N.W., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requester or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for licenses to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported. The table below lists all new major applications.

Dated this 11th day of May, at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

James V. Zimmerman,

Assistant Director, Export/Import and International Safeguards, Office of International Programs.

FEDERAL REGISTER (EXPORTS/IMPORTS)

BILLING CODE 7590–01–M

[Docket No. 50–293]

Boston Edison Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 70 to Facility Operating License No. DPR–35 issued to Boston Edison Company (the licensee) which revised the Technical Specifications for operation of the Pilgrim Nuclear Power Station (the facility) located near Plymouth, Massachusetts. The amendment is effective as of its date of issuance.

The amendment revises the Technical Specifications to change the Minimum Critical Power Ratio limits as necessitated by the "spectral shift" mode of operation being used in the present cycle.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since it does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

For further details with respect to this action, see; (1) The Application for amendment dated April 5, 1983, (2) Amendment No. 70 to License No. DPR–35, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Plymouth Public Library on North Street in Plymouth, Massachusetts 02360. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 3d day of May 1983.

For the nuclear Regulatory Commission.

Vernon L. Rooney,

Acting Chief, Operating Reactors Branch No. 2, Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 83–13372 Filed 5–17–83; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–366]

Georgia Power Co., et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF–5, issued to Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, and City of Dalton, Georgia (the licensees), for operation of the Edwin I. Hatch Nuclear Plant, Unit No. 2 (the facility), located in Appling County, Georgia.

The amendment involves two principal sets of changes. The first set provides additional and revised trip setpoints that reflect design modifications to reduce containment loads from plant transients. These changes would: (1) Lower the opening and closing setpoints for subsequent actuation of selected safety relief valves, and (2) lower the main steam isolation valve water level trip setpoint. The second set relates to changes to the core design for the third fuel reload of Unit No. 2, to include operation with a new fuel type, 7 x 7 bundles. This requires numerical changes to the curves which specify maximum average planar linear heat generation rates and minimum critical power ratios. These changes are in accordance with the licensees' application for amendment dated February 23, 1983, as supplemented April 19, 1983, and application for amendment dated March 30, 1983.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibiity of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). One of the examples of actions likely to involve no significant hazards considerations relates to reload amendments involving no fuel assemblies significantly different than those previously found acceptable at the facility in question. While the fuel assemblies involved in this application are somewhat different from those previously authorized for Hatch Unit No. 2, 7 x 7 rather than 8 x 8, the Commission proposes to determine that the application does not involve a significant hazards consideration since fuel elements of this design have been previously reviewed and approved for use in Hatch Unit No. 1. While there are some differences between Hatch Unit No. 1 and Hatch Unit No. 2 operating characteristics which require a plant specific analysis for the use of the new fuel, these differences are not significant.

With respect to the changes in the trip setpoints, one of the examples of actions likely to involve significant hazards considerations relates to changes in plant operation designed to improve safety but which, due to other factors, allow plant operation with safety margins significantly reduced from those believed to have been present when the plant was licensed. The installation of the Low Level Set Safety Relief Valve (SRV) logic system is intended to mitigate the problems of containment loads during SRV operations identified in NUREG–0661, and as required by Order modifying the license dated January 13, 1981 (46 FR 9280, January 28, 1981) and Modification Order dated January 19, 1982 (47 FR 3901, January 27, 1982). In the present case, the changes involved in the Low Level Set SRV logic system, together with actions previously taken in response to the prior Commission Orders, essentially restore safety margins and consequently the changes would not have the effect of permitting plant operation with safety margins significantly reduced from those believed to be present before the problems discussed in NUREG–0661 were identified. Accordingly, the Commission proposes to determine that these changes do not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By June 17, 1983, the licensees may file a request for a hearing with respect to issuance of the amendment to the subject facility operating licesne and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be

VOL 48 ISS 97 MY 18 1983 UMI

made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment requests involve no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments recieved. Should the Commission take this action, it will publish a notice if issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission,Washington, D.C. 20555, Atttention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W. Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John F. Stolz: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to G. F. Trowbridge, Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW, Washington, D.C. 20036, attorney for the licensees.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presidingg officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the applications for amendment which are available for public inspection at the Commission's Public Document Room, 1717, H Street, NW., Washington, D.C. 20555, and at the Appling County Public Library, 301 City Hall Drive, Baxley, Georgia.

Dated at Bethesda, Md., this 12th day of May 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch No. 4, Division of Licensing.

[FR Doc. 83-13373 Filed 5-17-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-285]

Omaha Public Power District; Consideration of Issuance of Amendment to Facility Operating License and Proposed no Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-40, issued to Omaha Public Power District (the licensee), for operation of the Fort Calhoun Station, Unit No. 1 located in Washington County, Nebraska.

A reactor coolant system's (RCS) pressure-temperature limits must be revised periodically to take into account irradiation of the reactor pressure vessel. Various curves are used to analyze the RCS's pressure-temperature limits. The amendment would make more restrictive the curves that are use to make decisions about heating up and cooling down the reactor coolant system. These curves, specified in the licensee's technical specifications, must be changed periodically because of irradiation to the reactor pressure vessel, which is an integral part of the reactor coolant system. The pressure-temperature limits contained in the curves are needed to ensure that the reactor pressure vessel maintains adequate ductility while pressurized, in accordance with the licensee's applicaton for amendment dated March 7, 1983, as supplemented by letter dated April 28, 1983.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility or a new or different kind of accident from any accident previously evaluated: or (3) involve a significant reduction in a margin of safety.

The proposed changes constitute an additional limitation, not presently included in the technical specifications, which ensures that current margins of safety are maintained with respect to the periodic revision of the RCS's pressure-temperature limits. The proposed amendment is an example of an amendment that is considered not likely to involve significant hazards considerations such that the change constitutes an additional limitation, restriction, or control not presently in the technical specifications (*see* Example ii in the not likely category in 48 FR 14870, April 6, 1983).

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By June 17, 1983, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination of the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert A. Clark: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to LeBoeuf, Lamb, Leiby and MacRae, 1333 New Hampshire Avenue, N.W., Washington, D.C. 20036, attorneys for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102.

VOL 48 ISS 97 MY 18 1983 UMI

Dated at Bethesda, Maryland, this 12th day of May 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 83-13374 Filed 5-17-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-272 and 50-311; License Nos. DPR-70 and DPR-75]

Public Service Electric and Gas Co. (Salem Nuclear Generating Station, Units 1 & 2); Order Modifying License Effective Immediately

I

Public Service Electric and Gas Company (the licensee) holds License Nos. DPR-70 and DPR-75 which authorize operation of Units 1 and 2 of the Salem Nuclear Generating Station. The facilities are Westinghouse pressurized water reactors (PWRs) located at the licensee's site at Hancock's Bridge, Salem County, New Jersey.

II

On February 25, 1983, an event occurred at Unit 1 of the Salem Nuclear Generating Station when the control rods failed to insert when the reactor-trip circuit breakers failed to automatically open following receipt of a valid trip signal from the Reactor Protection System (RPS). The manual trip system was used to shut down the reactor. Subsequently, it was concluded by the licensee that the failure to trip was caused by a malfunction of the undervoltage (UV) trip attachments in both reactor-trip circuit breakers. Evaluation of the event of February 25, 1983 revealed that a similar failure had occurred on February 22, 1983, at Salem 1.

The NRC review of the event revealed a number of significant deficiencies. This review is set forth in NUREG-0977, "NRC Fact-Finding Task Force Report on the ATWS Events at Salem Nuclear Generating Station, Unit 1, on February 22 and 25, 1983," March 1983, which is hereby incorporated by reference.

If there were a potentially severe transient, from a worst case set of initial conditions, and the reactor shutdown system did not function, an extremely severe accident could occur in the absence of timely operator action. Therefore, the aforementioned failures are technically very serious.

III

Analysis of the event described in Section II reveals operational and management issues at the Salem facilities which are discussed in the staff's Safety Evaluation Report.

By letters dated March 1, March 8, March 14, March 18, March 23, April 4, April 7, April 8, April 11, April 13, April 22, April 27, and April 28, 1983, the licensee submitted its Corrective Action Program related to the reactor trip breaker failures. This program includes short-term remedial actions to be completed prior to startup of the unit and a number of longer term items which have not be completed but for which the licensee has established completion dates. The licensee's letter dated April 28, 1983 summarizes the licensee's commitments for corrective action.

The various remedial actions involve equipment, operational and management issues. The equipment issues involve (1) safety classification of breakers, (2) identification of cause of failure, (3) verification testing and (4) maintenance and surveillance procedures. The operational issues involve (1) operating procedure for reactor trips and anticipated transients without scram (ATWS), (2) operator training, and (3) operator response. The management issues involve (1) master equipment list, (2) procurement procedures, (3) work-order procedures, (4) post-trip review, (5) timeliness of event notification, (6) updating vendor-supplied information, (7) involvement of QA personnel with other station departments, (8) post-maintenance operability testing and (9) overall management capability and performance.

The NRC staff has reviewed the corrective action program as discussed in the staff's Safety Evaluation Report, and determined that the licensee's actions are necessary to assure continued safe operation of the facility. In addition, I have determined that because of the history of the Salem facility described above, the need for further long-term actions to increase the reliability of the mitigation features of the Salem facility must also be addressed.

Accordingly, in view of the importance of these issues to safe operation, I have determined that the licensee's corrective actions are required by the public health, safety, and interest, and, therefore, should be confirmed by an immediately effective Order.

IV

In view of the foregoing, pursuant to Sections 103, 161(i), and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered effective immediately that:

1. The licensee shall implement and/or maintain the items specified in the licensee's letter dated April 28, 1983.

V

The Licensee may request a hearing on this Order within 30 days of the date of this Order. Any request for a hearing shall be submitted to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy of the request or answer shall also be sent to the Executive Legal Director at the same address. Any request for a hearing shall not stay the immediate effectiveness of this Order.

If a hearing is held on this Order, the Commission will issue an order designating the time and place of hearing. If a hearing is held, the issue to be considered at such a hearing shall be whether this Order should be sustained.

Dated at Bethesda, Maryland this 6th day of May 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 83-13375 Filed 5-17-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-395]

Virgil C. Summer Nuclear Station, Unit No. 1; Issuance of Amendment to Facility Operating License No. NPF-12

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 16 to Facility Operating License No. NPF-12, issued to South Carolina Electric & Gas Company and South Carolina Public Service Authority (the licensees) for the Virgil C. Summer Nuclear Station, Unit No. 1 (the facility) located in Fairfield County, South Carolina. The amendment changes a license condition and the related Technical Specifications to permit operation of the modified Model D-3 steam generator. The license amendment is effective as of its date of issuance.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required

since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) South Carolina Electric & Gas Company letters, dated February 14, April 13 (two letters), May 3, and May 4, 1983, (2) Amendment No. 16 to Facility Operating License No. NPF-12 with Appendix A Technical Specifications page change, and (3) the Commission's related Safety Evaluation.

All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and the Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180. A copy of Amendment No. 16 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 5th day of May 1983.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

Chief, Licensing Branch No. 4, Division of Licensing.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Inquiry Concerning Federal Communications Commission Form 730, "Application for Registration of Equipment To Be Connected to the Telephone Network"

AGENCY: Office of Management and Budget, Office of Information and Regulatory Affairs.

ACTION: Notice of inquiry.

SUMMARY: Pursuant to the Paperwork Reduction Act of 1980, the Office of Management and Budget (OMB) solicits public comment on the above-named information collection. Comments will be considered when OMB decides whether to renew its approval of the information collection, and will be reviewed to determine how OMB can better implement the Paperwork Reduction Act.

FOR FURTHER INFORMATION CONTACT: Jim J. Tozzi, Room 3236 NEOB, Office of Management and Budget, Washington, D.C. 20503. Telephone (202) 395-5897.

SUPPLEMENTARY INFORMATION: On August 10, 1981, the Office of Management and Budget (OMB) approved a Federal Communications Commission (FCC) information collection entitled "FCC Form 730, Application for Registration of Equipment to be Connected to the Telephone Network" (OMB number 3060-0056). Under the Paperwork Reduction Act of 1980, a Federal agency may not conduct any collection of information that has not received OMB approval (44 U.S.C. 3507(a)). Approval for FCC Form 730 will expire on August 31, 1984, and we anticipate that the FCC will apply for renewal of OMB approval so that the information collection may continue.

Typically, public comment is solicited by an agency at the same time it submits an information collection for OMB approval or renewal. In this case, we are directly soliciting public comment regarding FCC Form 730 substantially before its approval expires. This is to give respondents a longer period to prepare comments and to give us a longer period to review them. This atypical treatment does not reflect any perceived deficiencies in FCC Form 730. Indeed, the FCC has been a leader in reducing Federal paperwork burden on the public,[1] and FCC Form 730 incorporates many principles central to the Paperwork Reduction Act and to the President's program of regulatory relief, such as self-certification and use of performance standards rather than design standards. In addition to the routine renewal evaluation of FCC Form 730, we want to determine through this inquiry whether an information collection that in some ways exemplifies the "state of the art" could be further improved.

This inquiry is pursuant to several provisions of the Paperwork Reduction Act (the Act). The Act gives the Director of OMB the functions of "evaluating agency information management practices" and "conduct of research with respect to, Federal collection * * * and use of information." (44 U.S.C. 3504(b) (5) and (6)) It also states that in determining whether an information collection is necessary, "the Director may give the agency and other interested persons an opportunity to be heard or to submit statements in writing." (44 U.S.C. 3508) Further, it directs that "in development of information policies, plans, rules, regulations, procedures, and guidelines and in reviewing information collection requests, the Director shall provide interested agencies and persons early and meaningful opportunity to comment." (44 U.S.C. 3517)

FCC Form 730 collects information from suppliers of equipment to be connected to the telephone network, known as "Interconnect equipment."[2] The information is used by FCC to determine whether the equipment conforms to standards in Part 68 of the FCC rules intended to prevent damage to the telephone network. We invite comment on the following topics from foreign and domestic suppliers of interconnect equipment, and other interested persons:

1. *Burden:* The FCC estimates that it takes an average of 24 work hours of effort for a respondent to complete FCC Form 730, including all time spent reading and understanding the form and its instructions, and developing, compiling, recording, and reviewing the required information.

a. Does this estimate appear accurate in light of respondents' experience?

b. Under what circumstances is more or less effort required?

c. How does this compare to the effort required to secure interconnect equipment approval in other countries?

2. *Non-discrimination:*

a. Does FCC Form 730 provide non-discriminatory treatment and direct and complete access to the registration procedure for interconnect equipment from all domestic and foreign producers?

b. How does it compare in this respect to other countries' interconnect equipment approval procedures?

c. Should FCC Form 730 solicit information regarding treatment of U.S.-made interconnect equipment in the home country of foreign applicants?

3. *Instructions:*

a. Do the instructions, regulations, and other guidance associated with FCC Form 730 provide full information regarding the interconnect equipment standards FCC applies and the procedures applicants must follow?

b. Is all this information readily available from a single contact point?

---

[1] The Paperwork Reduction Act set a target of a 25% reduction from FY 1980 to FY 1983 in the paperwork burden the Federal government imposes on the public. The FCC expects to achieve a 69% reduction during this period, reducing the annual paperwork burden it imposes on the public by 19.2 million hours.

[2] For convenience, we will refer to this information collection as "FCC Form 730." However, this inquiry and all the questions below refer to the entire information collection, including the form, its instructions, and any rules, procedures, or practices that specify how this information is collected and used.

VOL 48 ISS 97 MY 18 1983 UMI

c. How does the completeness and availability of this information compare to other countries' interconnect equipment approval procedures?

4. *Interconnect specifications:* The information collected by FCC Form 730 is oriented towards interconnect specifications, rather than internal design specifications.

a. Could the FCC Form 730 process move further towards using interconnect specifications rather than design standards without compromising regulatory goals?

b. Should FCC Form 730 collect information oriented more towards design standards, in order to provide better protection to the telephone network and/or to assure operating compatibility between interconnect equipment and the telephone network?

c. How does the balance between interconnect specifications and design standards compare to other countries' interconnect equipment approval procedures?

5. *Test data:*

a. Do domestic or foreign testing laboratories encounter any difficulties in generating test data acceptable to the FCC for the FCC Form 730 process?

b. How does this compare to the difficulty of generating test data acceptable for other countries' interconnect equipment approval procedures?

6. *Delay:* The FCC reports that 95% of applications are granted within 40 to 60 days after FCC Form 730 is accepted for filing.

a. Under what conditions have longer delays occurred?

b. How does this compare to the delay experienced in other countries' interconnect equipment approval procedures?

7. *Deficient applications:* The FCC reports that they have never denied an application on FCC Form 730. Instead, problems have been resolved by discussions between the FCC and the applicant or the applicant's representative.

a. When the FCC has detected problems with applications on FCC Form 730, has it provided a useful explanation of how the application was deficient, and if necessary a review procedure for complaints arising from its findings?

b. How do the FCC's procedures compare in these respects to other countries' interconnect equipment approval procedures?

Responses to this inquiry should be in writing, and should be directed to Information Policy Branch, Room 3235 NEOB, Office of Management and Budget, Wahington, D.C. 20503. Please submit an original and two copies. Responses should be clearly marked "Interconnect Equipment Inquiry". For full consideration in this inquiry, responses should be received before July 18, 1983. However, comments received any time before OMB reaches a determination on whether to renew approval of FCC Form 730 may be considered in reaching that determination.

Issued in Washington, D.C., May 5, 1983.

Christopher DeMuth,

Administrator for Information and Regulatory Affairs.

[FR Doc. 83-13282 Filed 5-17-83; 8:45 am]

BILLING CODE 3110-01-M

PEACE CORPS

Notice of Submission of Public Use Form Extension Review Request

AGENCY: Peace Corps.

ACTION: Notice of submission of public use form extension review request to the Office of Management and Budget.

SUMMARY: Pursuant to the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), the Peace Corps has submitted to the Office of Management and Budget a request to approve the continued use of the Peace Corps Volunteer Application Form through June 30, 1986. This form is completed voluntarily by applicants for the Peace Corps program and it provides basic information concerning background, education, qualifications, language skills, preferences, etc. This information is necessary for Peace Corps staff to perform the initial screening between qualified and unqualified candidates, selection from among the qualified, and the proper placement of the potential volunteers in suitable programs and settings. The request for racial and ethnic data is used solely for the purpose of determining compliance with federal civil rights law.

Information about the form:

Agency Address: Peace Corps, 806 Connecticut Avenue, NW., Washington, D.C. 20526.

Title and Agency Number: Peace Corps Volunteer Application, Form Number PC-1502.

Type of Request: Extension of approval.

Frequency of Collection: On occasion.

General Description of Respondents: Individuals applying for Peace Corps Volunteer service.

Estimated Number of Responses: 15,600 annually.

Estimated Hours for Respondents to Furnish Information: One hour each.

Respondents Obligation to Reply: Voluntary.

Comments: Comments on this form request should be directed to Francine Picoult, Desk Officer, Officer of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503. Comments should be received on or before July 18, 1983.

A copy of the form may be obtained from Robert Jackson, Office of Recruitment, 806 Connecticut Avenue, NW., Washington, D.C. 20526 or from any local Peace Corps Recruiting Office. Mr. Jackson may be called on area code 202-254-8387.

This is not a request to which 44 U.S.C. 3504(h) applies.

This notice is issued in Washington, D.C. on May 12, 1983.

Robert T. Spencer,

Associate Director for Management.

[FR Doc. 83-13312 Filed 5-17-83; 8:45 am]

BILLING CODE 6051-01-M

POSTAL RATE COMMISSION

[Docket No. R83-1; Order No. 498]

[Order No. 498]

E-Com Rate and Classification Changes, 1983, Order Scheduling Prehearing Technical Conference

Issued May 13, 1983.

On April 25, 1983, United States Postal Service filed a request for a recommended decision on proposed changes in rates of postage and certain classification provisions for electronic computer originated mail (ECOM). The Request was docketed, and notice was published in the **Federal Register** on May 4, 1983. (48 FR 20178-20179).

Pursuant to rule 24(a), the Commission hereby schedules a prehearing technical conference for the purpose of obtaining explanations and clarification of the evidence filed by the Postal Service in support of its Request. *See* Rule 24(d)(1). The conference will be held at 9:30 a.m. on Thursday, May 26, 1983, at the Commission hearing room, 2000 L Street, N.W., Washington, D.C. 20268. The Commission is particularly concerned with ways to expedite its proceedings and to assure that its decisions are made within the ten-month statutory deadline established by 39 U.S.C. 3624(c). One way to achieve that goal is to assure, to the extent possible, that the Commission and interested participants fully understand the bases and derivation of the evidence provided by the Postal Service in support of its Request. We are convinced that the technical conference scheduled by this order, carried out in accordance with the procedures set forth below, will make a substantial contribution toward achieving that goal.

Our rules presently require that evidentiary submissions be accompanied by detailed explanatory workpapers. For example, rule 54(p)(4) provides:

> Workpapers shall be sufficient to enable a reviewer to trace the derivation of numbers in the testimony back to published documents or, if necessary, primary data sources. Citations shall be sufficiently detailed to enable a reviewer to identify and locate the specific data used, e.g., by reference to document, page, line, column, etc.

The testimony submitted by the Postal Service in support of its Request in this docket is not supported by workpapers which meet this standard. It is our expectation that meaningful technical conferences will ameliorate delays resulting from inadequate explanations of methodology or incomplete references to source material in the evidence presented by the Postal Service.[1]

In order for these conferences to be of maximum benefit, we urge all participants to carefully examine the procedures set forth below, and to adhere to them. These procedures have been structured to allow participants to obtain clarification of the Postal Service's testimony, but not allow the type of adversarial questioning associated with cross-examination: Simply put, questions of *"how"* are permissible; questions of *"why"* are not permissible.

It is the present intention of the Commission to schedule prehearing technical conferences to clarify the testimony of other participants in this docket at the appropriate point in this case.

Procedures Applicable to Prehearing Technical Conference on Postal Service Evidence

A prehearing technical conference to clarify the evidence submitted by Postal Service witnesses shall be held on May 26, 1983 in accordance with the following procedures:

(1) Postal Service counsel shall preside.

(2) Postal Service counsel may schedule the order its witnesses shall respond to questions, with consideration to the convenience of its witnesses and participants attending the conference.

(3) This conference will be for the sole purpose of explaining how technical evidence was developed. Questions concerning why a particular step was taken will not be permitted. Similarly questions concerning management policy will not be permitted.

(4) Witnesses shall respond to questions concerning the subject matter of each section of their testimony in turn. Questions may be asked by any participant. Questions need not be posed by attorneys.

(5) Presiding counsel may object to questions beyond the scope of the conference as set forth in item 3 above; however, participants may appeal to the Commission to recall a witness to provide additional answers to questions deemed out of order by presiding counsel.

(6) Commissioners and members of their staff attending these conferences may address questions to the witness, however they shall abide by the rulings of presiding counsel.

(7) The Officer of the Commission or his designee shall attend the conference for the purpose of securing satisfactory explanation of the data sources and methodologies used by each section of testimony. Participants unable to attend the conference may request the Officer of the Commission to seek clarification of specific aspects of a witness' testimony or exhibits.

(8) It shall be proper for witnesses appearing at the conference to be accompanied by assistants; and they are encouraged to have available any reference material they might need. If a witness cannot respond to a reasonable request for clarification of his testimony or exhibits at the conference, an additional conference will be scheduled at the convenience of the questioning participant and the Postal Service.

(9) The conference will be transcribed, however witnesses will not be under oath, and responses will not be part of the evidentiary record. Parties wishing to utilize material from the technical conference shall submit interrogatories or requests for admission as provided for in the rules of practice, or propose an appropriate stipulation.

(10) The pendency of this conference shall not relieve Postal Service witnesses from responding to discovery requests within the time period provided by Commission rules of practice.

It is ordered:

That a prehearing technical conference be held at 9:30 a.m. on May 26, 1983, as described by this order.

Cyril J. Pittack,

Acting Secretary.

[FR Doc. 83-13340 Filed 5-17-83; 8:45 am]

BILLING CODE 7715-01-M

[1] We do not suggest that technical conferences are only useful when proper workpapers are not provided in support of evidentiary submissions. Technical conferences are likely to be beneficial whenever complex technical evidence is offered, and technical conferences have been extremely useful in past omnibus rate cases.

POSTAL SERVICE

Privacy Act of 1974; Systems of Records

AGENCY: Postal Service.

ACTION: Final Notice of Computer Matching Program: U.S. Postal Service/Philadephia School District, and final notice of a modification to an existing system of records.

SUMMARY: The purpose of this document is to provide information concerning the Postal Service's conduct of a computer matching program, and to add a new temporary routine use to system USPS 050.020, Finance Records-Payroll System.

EFFECTIVE DATE: May 18, 1983.

FOR FURTHER INFORMATION CONTACT: Martha J. Smith, (202)245-5568.

SUPPLEMENTARY INFORMATION: The Postal Service hereby publishes final notice of a new temporary routine use for Privacy Act System of Records USPS 050.020, "Finance Records-Payroll System," in connection with its efforts to identify postal employees who are also employed by the Philadelphia, Pennsylvania School District. The purpose of such identification is to determine the incidence of possible misuse of sick leave or the improper receipt of workers' compensation benefits. Advance notice of the proposed adoption of the temporary routine use was published on January 20, 1983, at 48 FR 2615.

One comment was received, objecting to the proposal, and expressing concern regarding the safeguarding of the released information subsequent to its disclosure. In responding to the comment, the Postal Service specified the nature of the information being disclosed, and the safeguards that will be taken in carrying out the matching program in accordance with the intent of the Privacy Act and the guidelines of the Office of Management and Budget for conducting computer matching programs. These matters are discussed below.

Report of Computer Matching Program

In accordance with its authority, in 39 U.S.C. 404, to investigate postal offenses

VOL 48 ISS 97 MY 18 1983 UMI

and civil matters relating to the Postal Service, the Postal Service will perform a match by computer of employees on the payroll of the Philadelphia, Pennsylvania Post Office against the Philadelphia School District's listing of its employees. The Philadelphia School District (PSD) will provide a computer tape of its employees by name and social security number which the Postal Service will match against its Payroll System files in order to identify Postal Service employees who appear on both lists. Upon completion of the match, the Postal Service will return to PSD its computer tape and will disclose to PSD only that information which is necessary to make a thorough analysis for determining which persons appear to have received PSD benefits improperly. The information will be limited to time and attendance and absence analysis records except in unusual (but currently unforeseen) cases where there may be a need to disclose the Postal Service's records of actual payments to the employees. Once identified, all records on nonsuspect cases, compiled as a result of this matching effort, will be promptly destroyed. In suspect cases, individual investigative case files will be established within the parameters of Privacy Act system USPS 080.010, Inspection Requirements Investigative File System (last published in 48 FR 10975 of March 15, 1983). All information obtained or utilized will remain under the control of the Postal Inspection Service and/or the investigative service for the PSD Internal Controller's Office.

In accordance with the Office of Management and Budget guidelines for conducting computer matching programs, 47 FR 21658, May 19, 1982, the Postal Service has obtained a signed agreement from the PSD specifying that the information released by the Postal Service will be used for purposes of the computer match and for no other purposes, and specifying that the information will be safeguarded against unauthorized disclosure.

System Modification to Add New Routine Use

Accordingly, on a one-time basis, the Postal Service will disclose a limited amount of information from the payroll records of certain postal employees to the Internal Controller's Office of the Philadelphia, Pennsylvania School District (PSD). This information will be used to identify postal employees who may have improperly received compensation or benefits from either the Postal Service or the PSD. The Postal Service believes that one basic reason for maintaining employee payroll records is to protect the legitimate financial interests of the Government; therefore, such a routine use is compatible with the purpose for maintaining these records. Accordingly, system USPS 050.020, Finance Records-Payroll System, is modified as follows:

USPS 050.020, Finance Records-Payroll System

26. (Temp.) Disclosure of information about particular postal employees on the employment rolls of the Philadelphia, Pennsylvania School District (PSD) may be made to the PSD for a one-time comparison with the PSD's time/attendance/payment files.

Note.—This routine use will be in effect for a period of one year from its effective date.

A complete statement of the system as modified appears below:

USPS 050.020

SYSTEM NAME:

Finance Records—Payroll System. 050.020.

SYSTEM LOCATION:

Payroll system records are located and maintained in all Departments, facilities and certain contractor sites of the Postal Service. However, Postal Data Centers are the main locations for payroll information. Also, certain information from these records may be stored at emergency records centers.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former USPS employees and postmaster relief/replacement employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records contain general payroll information including retirement deduction, family compensations, benefit deductions, accounts receivable, union dues, leave data, tax withholding allowances, FICA taxes, salary, name, social security number, payments to financial organizations, dates of appointment or status changes, designation codes, position titles, occupation code, addresses, records of attendance, and other relevant payroll information. Also includes automated Form 50 records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 401, 1003, 5 U.S.C. 8339.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Purpose—

1. Information within the system is for handling all necessary payroll functions and for use by employee supervisors for the performance of their managerial duties.

2. To provide information to USPS Management and executive personnel for use in selection decisions and evaluation of training effectiveness. These records are examined by the Selection committee and Regional Postmasters General.

3. To compile various lists and mailing lists, i.e., Postal Leader, Women's Programs, Newsletter, etc.

4. To support USPS Personnel Programs such as Executive Leadership, Non-Bargaining Positions Evaluations of Probationary Employees, Merit Evaluation, Membership and Identification Listings, Emergency Lacator Listings, Mailing Lists, Women's Programs, and to generate retirement eligibility information and analysis of employees in various salary ranges.

Use—

1. Retirement Deduction—To transmit to the Office of Personnel Management a roster of all USPS employees under Title 5 USC, Section 8334, along with a check.

2. Tax informtion—To disclose to Federal, State and local government agencies having taxing authority, pertinent records, relating to individual employees, including name, home address, social security number, wages and taxes withheld for other jurisdiction.

3. Unemployment Compensation Data—To reply to State Unemployment Offices at the request of separated USPS employees.

4. Employee Address File—For W–2 tax mailings and Postal mailing such as Postal Life, Postal Leaders, etc.

5. Salary payments and allotments to financial organizations—To provide pertinent information to organizations receiving salary payments or allotments as elected by the employee.

6. FICA Deductions—The Social Security Act requires that FICA deductions be made for those employees not eligible to participate in the Civil Service Retirement System (casuals). In addition, the Tax Equity and Fiscal Responsibility Act of 1982 requires that contributions to the Medicare program be deducted from all employees' earnings. (These statutes do not apply to employees in the Trust Territories who are not U. S. citizens.) Accordingly, records of earnings (i.e., W–2 information) mut be disclosed to the Social Security Administration in order that it may account for funds received and determine individual's eligibility for benefits. Information disclosed includes name, address, SSN, wages paid subject to withholding, Federal, state and local income tax withheld, total FICA wages paid and FICA tax withheld, occupational tax, life insurance premium and other information as reported on an individual's W–2 form.

7. Determine eligibility for coverage and payment of benefits under the Civil Service Retirement System, the Federal Employees' Group Life Insurance Program and the Federal Employees Health Benefits Program and transfer related records as appropriate.

8. Determine the amount of benefit due under the Civil Service Retirement System, the Federal Employees' Group Life Insurance Program and the Federal Employees Health Benefits Program and authorizing payment of that amount and transfer related records as appropriate.

9. Transfer to Office of Workers' Compensation Program, Veterans Administration Pension Benefits Program, Social Security Old Age, Survivor and Disability Insurance and Medicare Programs, military retired pay programs, and Federal Civilan employee retirement systems other than the Civil Service Retirement System, when requested by that program or system or by the individual covered by this system or records, for use in determinig an individual's claim for benefits under such system.

10. Transfer earnings information under the Civil Service Retirement System to the Internal Revenue Service as requested by the Internal Revenue Code of 1954, as amended.

11. Transfer information necessary to support a claim for life insurance benefits under the Federal Employees' Group Life Insurance, 4 East 24th Street, New York, NY 10010.

12. Transfer information necessary to support a claim for health insurance benefits under the Federal Employees' Health Benefits Program to a health insurance carrier or plan participating in the program.

13. To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature to the appropriate agency whether Federal, State, or local, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

14. To request or provide information from or to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement or other pertinent information, such as licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefits.

15. As a data source for management information for production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuals for personnel research or other personnel management functions.

16. May be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A–19 at any state of the legislative coordination and clearance process as set forth in that Circular.

17. Certain information pertaining to Postal Supervisors may be transferred to the National Association of Postal Supervisors.

18. Disclosure may be made to a congressional office from the record of an individual in response to any inquiry from the congressional office made at the request of that individual.

19. Disclosure may be made from the record of an individual, where pertinent, in any legal proceeding to which the Postal Service is a party before a court or administrative body.

20. Pursuant to the National Labor Relations Act, records from this system may be furnished to a labor organization upon its request when needed by that organization to perform properly its duties as the collective bargaining representative of postal employees in an appropriate bargaining unit.

21. Inactive records may be transferred to a GSA Federal Records Center prior to destruction.

22. To provide to the Office of Personnel Management (OPM) approximately 19 data elements (including SSAN, DOB, service computation date, retirement system, and FEGLI status) or use by OPM's Compensation Group. Data collected are not for the purpose of making determinations about specific individuals but are used only as a means of ensuring the integrity of the active employee/annuitant data systems and for analyzing and statistically projecting Federal retirement and insurance system costs. The same data submission will be used to produce summary statistics for reports of Federal employment.

23. Information contained in this system of records may be disclosed to an authorized investigator appointed by the Equal Employment Opportunity Commission, upon his request, when that investigator is properly engaged in the investigation of a formal complaint of discrimination filed against the U.S. Postal Service under 29 CFR Part 1613, and the contents of the requested record are needed by the investigator in the performance of his duty to investigate a discrimination issue involved in the complaint.

24. Records in this system are subject to review by an independent certified public accountant during an official audit of Postal Service finances.

25. May be disclosed to a Federal or State agency providing parent locator services or to other authorized persons as defined by Pub. L. 93–647.

26. (Temp.) Disclosure of information about postal employees on the employment rolls of the Philadelphia, Pennsylvania, School District (PSD) may be made to the PSD for a one-time comparison with the PSD's time/attendance/payment files.

Note.—This routine use will be in effect for a period of one year from its effective date.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Preprinted forms, magnetic tape, microforms, punched cards, computer reports and card forms.

RETRIEVABILITY:

These records are organized by location, name and social security number.

SAFEGUARDS:

Records are contained in locked filing cabinets; are also protected by computer passwords and tape library physical security.

RETENTION AND DISPOSAL:

Records are retained and updated throughout employment with the Postal Service. Upon separation, records become historical data, this data is retained at the local site for two years then forwarded to the Federal Records Center nearest the pay location.

SYSTEM MANAGER(S) AND ADDRESS:

APMG, Finance Department and APMG, Employee Relations Department at Headquarters.

NOTIFICATION PROCEDURE:

Request for information on this system of records should be made to the head of the facility where employed.

VOL

giving full name and social security number. Headquarters employees should submit requests to the System Manager.

RECORD ACCESS PROCEDURES:

See Notification above.

CONTESTING RECORD PROCEDURES:

See Notification above.

RECORD SOURCE CATEGORIES:

Information is furnished by employees, supervisors and the Postal Source Data System.

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

BILLING CODE 7710-12-M

RAILROAD RETIREMENT BOARD

Privacy Act of 1974; Proposed Changes to Systems of Records

AGENCY: Railroad Retirement Board.

ACTION: Notice of proposed changes to systems of records.

SUMMARY: The purpose of this document is to give notice of two proposed routine uses (one each for two systems of records) and three changes in the retention and disposal category (one each for three systems of records).

DATE: The two systems of records for which new routine uses are proposed shall be amended as proposed without further notice 30 calendar days from the date of this publication (June 17, 1983) unless comments are received before this date which would result in a contrary determination.

ADDRESS: Send comments to James T. Brown, Chief Executive Officer, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611.

FOR FURTHER INFORMATION CONTACT: LeRoy Blommaert, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611, Telephone 312-751-4548.

SUPPLEMENTARY INFORMATION:

Part I: Proposed Routine Uses

A proposed new routine use in the system of records RRB-21, Railroad Unemployment and Sickness Insurance Benefit System, would allow the agency to release names and addresses of claimants to a Member of Congress, upon request, in order that the Member might communicate with them about legislation which affects the railroad unemployment system. A similarly worded new routine use in system of records RRB-22, Railroad Retirement, Survivor, and Pensioner Benefit System, would allow the same disclosure in order that the Member of Congress might communicate with annuitants about legislation affecting the railroad retirement system.

The Railroad Retirement Board has determined that such communication would be in the best interests of claimants and annuitants and that it would be good public policy to facilitate Congressional communication with such individuals when such communication would be about legislation which affects the benefits these individuals are receiving.

Part II: Changes in Retention and Disposal

Systems of records RRB-1, Social Security Benefit Vouchering System, and RRB-22 Railroad Retirement, and Pensioner Benefit Systems are being amended to reflect retention and disposal of change of address source documents.

System of records RRB-19, Payroll Records System, is being amended to specify the paper and microform payroll records are to be destroyed by shredding and also to change the retention period for paper records from four to three years.

Part III: Previous Federal Register Publications

RRB-1, Social Security Benefit Vouchering System, was last published in its entirety on November 17, 1980, at 45 FR 75824-825; RRB-19, Payroll Record System, was last published in its entirety on March 13, 1980, at 45 FR 16373-374; RRB 21, Railroad Unemployment and Sickness Insurance Benefit System, was last published in its entirety on March 13, 1980, at 45 FR 16375-377; and RRB-22, Railroad Retirement, Survivor, and Pensioner Benefit System, was last published in its entirety of December 4, 1980, at 45 FR 80392-394.

Part IV: New or Altered System Report

The proposed action is not within the purview of the provisions of 5 U.S.C. 552(o) which require the submission of a new or altered system report.

Dated: May 11, 1983.

By authority of the Board.

James T. Brown,

Chief Executive Officer.

RRB-1

SYSTEM NAME:

Social Security Benefit Vouchering System—RRB.

* * * * *

RETENTION AND DISPOSAL:

Paper: Individual claim folders with records of all actions pertaining to the payment of claims are transferred to the Federal Records Center, Chicago, Illinois 5 years after the date of last payment or denial activity if all benefits have been paid, no future eligibility is apparent and no erroneous payments are outstanding. The claim folder is destroyed 25 years after the date it is received in the center. Accounts receivable listings and checkwriting operations daily activity listings are transferred to the Federal Records Center 1 year after date of issue and are destroyed 6 years and 3 months after receipt at the center. Other paper listings are destroyed 1 year after the date of issue. *Changes of address source documents are transferred to the Federal Records Center 6 months after the date of completion and are destroyed 4 years and 6 months after receipt at the center.* Magnetic tape: Tapes are updated at least monthly, writing over obsolete data. Microforms: Originals are kept for 3 months after receipt at the center. One duplicate copy is kept 2 years and destroyed by shredding. All other duplicate copies are kept 1 year and destroyed by shredding.

SECURITIES AND EXCHANGE COMMISSION

Cincinnati Stock Exchange; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

May 11, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f) (1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Cyprus Corporation (The)
Common Stock, $.030 Par Value (File No. 7-6628)

Instrument Systems Corp.
Common Stock, $.25 Par Value (File No. 7-6629)

Key Parmaceuticals Inc.
Common Stock, $0.074 Par Value (File No. 7-6630)

Mitchell Energy Development Corp.
Common Stock, $.10 Par Value (File No. 7-6631)

National Patent Development Corp.
Common Stock, $.01 Par Value (File No. 7-6632)

Ozark Air Lines Inc.
Common Stock, $.50 Par Value (File No. 7-6633)

Mary Kay Cosmetics Inc.
Common Stock, $.10 Par Value (File No. 7-6634)

Paradyne Corp.
Common Stock, $.10 Par Value (File No. 7-6635)

Pogo Producing Company
Common Stock, $1 Par Value (File No. 7-6636)

Sundstrand Corp.
Common Stock, $1 Par Value (File No. 7-6637)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 2, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[File No. 1–5694]

Kidde, Inc.; Application to Withdraw from Listing and Registration

May 11, 1983

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the Boston Stock Exchange, Inc. ("BSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

1. The common stock of Kidde, Inc. ("Company") (Common Stock, $2.50 Par Value) is listed and registered on the BSE, the New York Stock Exchange, Inc. ("NYSE") and the Pacific Stock Exchange, Inc. ("PSE"). The Company has determined that because of the small amount of trading activity on the BSE, the direct and indirect costs and expenses do not justify maintaining the listing of the common stock on the BSE, NYSE, and PSE.

2. This application relates solely to withdrawal of the common stock from listing and registration on the BSE and shall have no effect upon the continued listing of such stock on the NYSE or the PSE. The BSE has posed no objection to this matter.

Any interested person may, on or before June 2, 1983, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 13234; (812–4707); Administrative Proceeding File No. 3–6244]

Union-Investment-Gesellschaft m.b.H.; Order for Hearing on Application for an Order

May 11, 1983

On December 1, 1982, the Commission issued a notice (Investment Company Act Release No. 12863) of an application filed by Union-Investment-Gesellschaft m.b.H. ("Applicant") (c/o Franz M. Oppenheimer, Esq., Leva, Hawes, Symington, Martin and Oppenheimer, 815 Connecticut Avenue, N.W., Washington, D.C. 20006), a West German management company, on behalf of Unifonds, a West German mutual fund, for an order of the Commission pursuant to Section 7(d) of the Investment Company Act of 1940 ("Act") permitting registration of Applicant under the Act so that it may sell Unifonds shares in the United States, and pursuant to Section 6(c) of the Act granting exemptions from the following provisions of the Act and various rules adopted thereunder: Sections 10 (a), (b), (f) and (g); 12 (b) and (d)(3); 13; 15; 16; 17 (a), (e), (f), (g) and (j); 18(i); 22 (c), (d), and (e); 30 (a), (c), and (d); 31 (a) and (b); 32; and 34. The notice, which is imcorporated herein by reference, gave any interested person until December 27, 1982, to file a request in writing for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted.

On December 27, 1982, a request for a hearing was filed with the Commission by the Investment Company Institute ("ICI"), which was supplemented by a letter dated March 4, 1983. Counsel to Applicant on January 31, 1983, filed a letter with the Commission responding to the contentions made by the ICI in its hearing request. The ICI states in its hearing request that it is the national trade association of the American mutual fund industry and it asserts, among other things, that granting the requested approvals and exemptions could be detrimental to both the American investing public and the American mutual fund industry. Specifically, the ICI contends that Applicant has failed to meet the standard of enforceability that must be met to permit its registration under Section 7(d) of the Act. The ICI argues, with respect to Section 7(d) of the Act, that Applicant and Unifonds would fail to comply with what it asserts are among the most important provisions of Rule 7d–1, promulgated under that section, and that such failure would seriously undermine the ability of the Commission or a shareholder of Unifonds to enforce the provisions of the Act against those companies. In addition, the ICI questions the propriety of granting Applicant's specific exemptive requests which have been made pursuant to Section 6(c) of the Act, arguing that such requests do not meet the standards for exemptive relief set forth in Section 6(c).

It appears to the Commission that it is appropriate in the public interest and in the interest of investors that a hearing be held with respect to said application. Accordingly,

It is ordered, pursuant to Section 40(a) of the Act, that a hearing on said application under the applicable provisions of the Act and Rules of the Commission thereunder be held at a time and place to be fixed by further order as provided by Rule 6 of the Commission's Rules of Practice (17 CFR 201.6). Any person, other than Applicant, desiring to be heard or otherwise wishing to participate in this proceeding is directed to file with the Secretary of the Commission, on or before June 6, 1983, his application as provided by rule 9(c) of the Commission's Rules of Practice (17 CFR 201.9(c)), setting forth the nature and extent of his interest in the proceeding and any issues of fact or law which he desires to controvert, or any additional issues which he deems raised by this Notice and Order or by said application. A copy of such request shall be served personally or by mail upon applicant at the address noted above, and proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. Persons filing an application to participate or to be heard will receive notice of the date and place of the hearing, and any adjournments thereof, as well as other actions of the Commission involving the subject matter of this proceeding.

It is further order that any officer or officers of the Commission designated by it for that purpose shall preside at said hearing. The officer so designated is hereby authorized to exercise all the powers granted to the Commission under Sections 41 and 42(b) of the Act and to an administrative Law Judge under the Commission's Rules of Practice.

The Division of Investment Management has advised the Commission that it has made an examination of the application, the request for hearing, and the response to such request by counsel to Applicant and that, upon the basis thereof, the following matters and questions are presented for consideration without prejudice to its specifying additional matters and questions upon further examination:

(1) Whether, given the failure and/or inability of Applicant to agree to comply with all of the provisions of Rule 7d–1 under the Act in its offering of Unifonds shares in the United States, the conditions and representations which Applicant has agreed will govern the offering of such shares will make it both legally and practically feasible to enforce the provisions of the Act against Applicant;

(2) Whether allowing Applicant to offer shares of Unifonds in the United States in the manner proposed in its application, with the resultant reliance on provisions of West German law to provide protections to investors in this country, which are allegedly substantially equivalent to those contained in those provisions of the Act from which Applicant has requested exemption, is consistent with the public interest and the protection of investors;

(3) Whether it is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act to grant Applicant the exemptions it seeks from the various provisions of the Act, and relevant rules and regulations thereunder; and

(4) Whether the formation of a United States corporation is a reasonable alternative to Applicant's proposed operations and if so, what, if any, advantages or disadvantages would result from that approach.

It is further ordered that at the aforesaid hearing attention should be given to the foregoing matters.

It is further order that the Division of Investment Management shall be a party to the proceeding.

It is further ordered that the Secretary of the Commission shall give notice of the aforesaid hearing by mailing a copy of this Notice and Order by certified mail to Applicant at the address noted above and the Investment Company Institute; that notice to all other persons be given by publication of this Notice and Order in the **Federal Register**; that a copy of this Notice and Order shall be published in the "SEC Docket;" and that an announcement of the aforesaid hearing shall be included in the "SEC News Digest."

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–19762]

Advisory Committee on Tender Offers; Meeting

AGENCY: Securities and Exchange Commission.

ACTION: Notice of meeting of the Securities and Exchange Commission Advisory Committee on Tender Offers.

SUMMARY: This is to give notice that the Securities and Exchange Commission Advisory Committee on Tender Offers will conduct a meeting on June 2, 1983 in the Kensington Room of the Westbury Hotel, 15 E. 69th Street, New York, New York, beginnng at 9:00 a.m. The meeting will be open to the public.

FOR FURTHER INFORMATION CONTACT: David Martin, Division of Corporation Finance, Securities and Exchange Commission, Washington, D.C. 20549, (202) 272–2573.

SUPPLEMENTARY INFORMATION: In accordance with section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. 1, 10(a), the Securities and Exchange Commission Advisory Committee on Tender Offers[1] gives notice that it will conduct a meeting on June 2, 1983 in the Kensington Room of the Westbury Hotel, 15 E. 69th Street, New York, New York, beginning at 9:00 a.m. The Advisory Committee invited comments from members of the public in Release No. 34–19635 (March 29, 1983) (48 FR 13537). On the basis of the comments received, the Committee has determined that it will be useful to receive oral presentations from certain commentators and has scheduled the June 2 meeting for such purpose. The meeting, which will be open to the public, will be the fourth meeting of the Advisory Committee.

[1] The Advisory Committee was established on February 25, 1983. *See* Release No. 34–19528 (48 FR 9111).

George A. Fitzsimmons,

Advisory Committee Management Officer.

BILLING CODE 8010–01–M

[Release No. 34–19754; File No. SR–Amex–83–12]

Self-Regulatory Organizations; Proposed Rule Change by the American Stock Exchange, Inc.; Relating to Options on Stock Indices

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C 78s(b)(1), notice is hereby given that on April 29, 1983, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Subetance of the Proposed Rule Change

The American Stock Exchange, Inc. (the "Amex" or "Exchange") is propposing to trade options on a stock index which is directly proportional to the Dow Jones Industrial Average. This index will be known as the "Major Market-30 Index" or "Major Market-30." In the event the Commission approves this filing, the Amex will not commence trading in options on the Major Market-30 unless it believes it can do so based on the resolution of the litigation between Dow Jones & Company and the Chicago Board of Trade.

The Major Market-30 Index initially would be based on the Following stocks: Allied Corporation; Aluminum Co. of America; American Brands, Inc.; American Can Company; American Express Company; American Telephone and Telegraph Company; Bethlehem

VOL 48 ISS 97 MAY 18 1983 UMI

Steel Corporation; du Pont (E.I.) de Nemours & Co.; Eastman Kodak Company; Exxon Corporation; General Electric Company; General Foods Corporation; General Motors Corporation; Goodyear Tire & Rubber Company (The); INCO, Limited; International Business Machines Corporation; International Harvester Company; International Paper Company; Merck & Co., Inc.; Minnesota Mining & Manufacturing Company; Owens-Illinois, Inc.; Procter & Gamble Co.; Sears, Roebuck & Co.; Standard Oil Co. of California; Texaco Inc.; Union Carbide Corporation; United States Steel Corporation; United Technologies Corporation; Westinghouse Electric Corp.; Woolworth (F.W.) Co.

Transactions in Major Market-30 options will be governed by the rules of the Exchange which apply to stock index options generally (Part V, Section 11 of the Exchange's rules, captioned "Stock Index Options") In addition, the Exchange hereby proposes to further amend Rules 904C and 918C as set forth below in order to cover Major Market 30 options appropriately. *Italics* indicates words to be added and brackets [ ] indicate words to be deleted.

Rule 904C. Position Limits

(a) Position limits relating to stock index options shall be governed by the provisions of Rule 904 except that the position limit applicable to each account with respect to options on each underlying stock index group shall be the contract limit extablished by the Exchange pursuant to this Rule 904C.

(b) With respect to options on each stock index group, the Exchange shall establish (and may change from time to time) a position limit which shall be expressed in terms of a number of option contracts; provided, however, that the Exchange may not establish position limits in excess of the following dollar value equivalents:

Amex Market Value Index Options—$300 million
Major Market Index Options—$200 million
Major Market-30 Index Options—$250 million

For the purpose of establishing position limits, the dollar value of a position shall be deemed to be the product of the current index group value and the index multiplier, times the number of contracts on the same side of the market.

(c) In determining compliance with position limits applicable to stock index options, option contracts on a stock index group shall not be aggregated with option contracts on an underlying stock or stocks included in such group, and option contracts on one stock index group shall not be aggregated with option contacts on any other stock index group.

* * * * *

Rule 918C. Trading Rotations, Halts and Suspensions

(a) Opening trading rotations for a class of stock index options shall not be commenced until at least a specified number or percentage (established by the Exchange in regard to each stock index group) of the stocks comprising the underlying stock index group have opened for trading in the primary markets(s) for such stocks. One and one half hours after the opening rotation, trading in such class of stock index options shall become subject to the provisions of paragraph (b) of this Rule, unless the Exchange determines it is in the public interest to halt trading at an earlier time.

(b) Trading on the Exchange in options on a stock index group shall be halted or suspended whenever: (i) In the case of an underlying stock index group comprised of 50 stocks or more, trading has been halted or suspended in the primary market(s) for any combination of underlying stocks accounting for 20% or more of the current index group value, or (ii) in the case of an underlying stock index group comprised of less than 50 stocks, trading has been halted or suspended in the primary market(s) for any combination of underlying stocks accounting for such minimum percentage of the current index group value as the Exchange may establish from time to time pursuant to this Rule, or (iii) whenever the Exchange otherwise deems such action appropriate in the interests of a fair and orderly market to protect investors. Among the factors that the Exchange may consider in exercising its discretion to halt or suspend trading in options on a stock index group are that:

(1) The current calculation of the numerical index value derived from the current market prices of the underlying stocks in such stock index group is not available;

(2) trading in one or more of the underlying stocks comprising such stock index group has been halted in the primary market(s) under circumstances which indicate that such stock or stocks will likely re-open at a price or prices significantly different than the price or prices at which such stock or stocks last traded prior to the trading halt; or

(3) other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present.

Trading in any class or series of stock index options that has been the subject of a halt or suspension by the Exchange may be resumed upon a determination by the Exchange that the conditions which led to the halt or suspension are no longer present and that the interests of a fair and orderly market are best served by a resumption of trading.

Commentary

.01 For the purposes of this Rule, trading in an underlying stock which is not subject to real-time last sales reporting shall be deemed to be halted when the dissemination of quotations for such stock on an inter-dealer communications system has been halted.

.02 For purposes of this Rule, an underlying stock shall be deemed to have opened in the primary market where it is traded on any trading day if such primary market has: (i) Reported a transaction in such stock or (ii) reported a bid and asked price for such stock and not given any indication of a delayed opening.

.03 In the case of options of the Major Market Index, an opening trading rotation may not be commenced until more than 50% of the stocks comprising the Major Market Index have opened for trading in the primary market(s) for such stocks, and, subject to the provisions of paragraph (a) of this Rule, trading in such options will be halted if trading has been halted or suspended in the primary market(s) for any combination of underlying stocks accounting for 20% or more of the current index group value.

.04 In the case of options on the Major Market–30 Index, an opening trading rotation may not be commenced until more than 50% of the stocks comprising the Major Market 30 Index have opened for trading in the primary market(s) for such stocks, and, subject to the provisions of paragraph (a) of this Rule, trading in such options will be halted if trading has been halted or suspended in the primary market(s) for any combination of underlying stocks accounting for 20% or more of the current index group value.

In addition to proposing the above rule changes, the Exchange is proposing to establish the following contract specifications for Major Market–30 options:

The numerical index value (defined in Exchange Rule 900C) would be the actual index value. For example, if the Major Market–30 were at 120, the numerical index value would be 120 and the exercise price of an at-the-money option would also be 120.

Exercise prices would be established at five point intervals. Exercise prices would bracket the current numerical index value, and new exercise prices would be introduced as the numerical index value changed. The procedure for introducing new exercise prices would be the same as the procedure now used with respect to individual stock options.

The index multiplier for each Major Market option contract would be 100.

Major Market-30 options would be traded on a January-April-July-October expiration cycle, with three expiration dates available for trading at any given time (i.e., the options would be introduced with three, six and nine months to expiration).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The Exchange has determined to create and trade options on the Major Market-30 Index in order to make available for options trading, should the resolution of Dow Jones & Company's proprietary rights make it legal to do so, a fractional replica of the Dow Jones Industrial Average, viewed by many as the most popular broad stock market indicator. The Major Market-30 should be useful as a tool for capitalizing on or hedging against broad market price changes. A thorough description of the uses of options on broad market indices is contained in File No. SR–Amex–82–8, which was previously approved by the Commission.

The Major Market-30 is a price-weighted index, meaning that the index is based on equal numbers of shares of the component stocks and that changes in the index number would represent changes in the sum of its prices per share of those stocks.

The Major Market-30 Index will be calculated by summing the respective prices per share of each of the stocks included in the index and dividing by a constant. The constant divisor as of April 25, 1983 is 12.92. Ordinarily it will be revised in the event of a stock dividend, stock distribution, stock split or reverse split, rights offering, distribution, reorganization, recapitalization or similar event in respect of any component stock, or in the event a stock is added to or deleted from the index, or one stock is substituted for another. The purpose of adjusting the index divisor in the contex of such events is to maintain continuity of index values; the index divisor will not be revised for any other purpose.

As stated above, transactions in Major Market-30 options will be governed by all of the rules which apply to stock index options generally. Certain additional amendments to Rules 904C and 918C set forth herein would also apply to Major Market-30 index options.

The purpose of proposed amendment to Rule 904C is intended to specify a dollar value equivalent to function as an outer parameter for position limits for Major Market-30 options. In this submission, the Exchange is proposing $250 million in equivalent value as the ceiling for contract limits applicable to options on the Major Market-30 Index.

Rule 905C provides that the exercise limit for options on each stock index group will be the same as the position limit applicable to such options. Thus, that rule in conjunction with approval of the rule change proposed herein would automafically establish an exercise limit for options on the Major Market-30 Index at the same level as the respective position limit fixed by the Exchange for that option contract. The Exchange policies and procedures regarding the establishment of contract limits on stock index options is set forth in SR-Amex-82-22 Amendment No. 2 and will apply to Major Market-30 Index options.

In this submission, the Exchange is also proposing an amendment to Rule 918C to define the procedures which must be followed in opening trading in the Major Market-30 Index options and in halting and reopening trading when certain events occur. Under Paragraph (a) of Rule 918C, the Exchange is authorized to establish a minimum percentage or fixed number of stocks which must have opened in relation to each underlying stock index group as to which it trades options. The Exchange believes that this minimum percentage or fixed number of stocks which must have opened before trading in the option is permitted to commence should be sufficient to assure that the Index itself is providing investors with a realistic indication of the market trend at the time of such opening. Therefore, in proposed Commentary .04 to the Rule, the Exchange has provided that with respect to the Major Market-30 Index, trading in the option may not commence until more than 50% of the underlying stocks in the index have opened, either by an opening trade or quote.

Paragraph (b) of Rule 918C provides that, in the case of options on an underlying stock index group comprised of less than 50 stocks, the Exchange will establish standards, specifically applicable to those options, indicating when a mandatory option trading halt is to be imposed based on trading halts affecting stocks included in the underlying stock index group. In the case of the Major Market-30 Index, Commentary .04 would provide that a trading halt will be imposed if trading has been halted or suspended in the primary market for any combination of underlying stocks accounting for 20% or more of the current group value. The Exchange believes the 20% standard is appropriate.

The implementation of trading in options on the Major Market 30-Index under the Exchange's stock index option rules would be consistent with the requirements of the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange, and, in particular, Section 6(b)(5) of the Act. Such options would provide members of the public with useful new hedging and trading opportunities under a scheme of regulation designed to facilitate the maintenance of a fair and orderly market, prevent fraudulent and manipulative acts and practices, and promote just and equitable principles of trade.

B. *Self-Regulatory Organization's Statement on Burden on Competition*

The Exchange believes that the introduction of options on the Major Market-30 Index under the Exchange's existing and proposed rules will not impose any burden on competition, but, rather, will foster competition among exchanges trading derivative contracts involving stock indices.

C. *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others*

The Exchange neither solicited nor received written comments on the proposed rule change set forth herein.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal

VOL 48 ISS 97 MY 18 1983 UMI

Register or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reason for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, Judiciary Plaza, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, N.W. Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 10, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8025-01-M

Evergreen Capital Co., Inc.; Application for a License To Operate as a Small Business Investment Company

[License No. 06/06-5264]

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to Section 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1983)), under the name of Evergreen Capital Company, Inc., for a license to operate as a Section 301(d) small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (Act), (15 U.S.C. 661 *et seq.*), and the SBA Rules and Regulations promulgated thereunder.

The officers, directors and stockholders of the Applicant are as follows:

Shen-Lim Lin, 3307 Ashfield Drive, Houston, Texas 77082—Chairman of the Board and President—65 percent

Myung Won Chun, 1125 N. 11th Street, Beaumont, Texas 77702—President and Director—30 percent

Hsien-Wei Feng, 1723 Crosscoach, Houston, Texas 77049—Director

Li-Mei Lin, 3307 Ashfield Drive, Houston, Texas 77082—Secretary and Treasurer—5 percent

Jin Sung Chung, 12803 Villawood, Houston, Texas 77049—Director.

The Applicant, a Texas corporation, with its principal place of business at 8520 Tybor Drive, Suite 201, Houston, Texas 77074 will begin operations with $700,000 paid-in capital and paid-in surplus.

The Applicant will conduct its activities principally in the Houston, Texas area.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the application include the general business reputation and character of proposed managers, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Houston, Texas.

[License No. 04/04-0145]

Mountain Ventures, Inc., Filing of an Application for Approval of a Conflict of Interest Transaction

Notice is hereby given that Mountain Ventures, Inc. (MVI), 911 Main Street, London, Kentucky 40701, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act), has filed an application pursuant to § 107.1004 of the Regulations governing small business investment companies (13 CFR 107.1004 (1983)) for an exemption from the provisions of the conflict of interest regulation.

This exemption, if granted, will permit MVI and its parent, Kentucky Highlands Investment Corporation (KHIC), to provide equal Financing totalling up to $300,000, in the form of convertible debentures with common stock purchase warrants to Mount Vernon Plastics Corporation (MVPC), Highway 150, Mt. Vernon, Kentucky.

MVPC is considered to be an Associate of MVI because KHIC owns in excess of 10 percent of MVPC's common stock. As such, the transaction will require an exemption from the provisions of § 107.1004(b)(1) of the Regulations.

Notice is hereby given that any person may, no later than 15 days from the date of publication of this Notice, submit to the Small Business Administration, in writing, relevant comments on the proposed transaction. Any such communications should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this Notice shall be published in a newspaper of general circulation in London, Kentucky.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies).

Dated: May 12, 1983.

DEPARTMENT OF STATE

[Public Notice 862]

Agency Forms Submitted for OMB Review

AGENCY: Department of State.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980, the Department has submitted a proposed collection of information to the Office of Management and Budget for review.

Purpose: The Bureau for Refugee Programs of the Department of State plans to conduct phase III of the study of the effects of pre-entry training in the resettlement of Indochinese refugees. (See 47 CFR 49912, Public Notice 830 and 48 CFR 8620, Public Notice 849.) The final results will be used in the planning and development of future U.S. policy about the provision of training to refugees with little prior exposure to Western culture or the English language.

(1) Type of request—new.

(2) Title of information collection—Effects of Pre-Entry Training on Resettlement of Indochinese Refugees, phase III. Interviews with domestic agencies who provide services to incoming refugees.

(3) Originating Office—Bureau for Refugee Programs.

(4) Frequency—Nonrecurring.

(5) Respondents—Voluntary agencies, ESL service providers, and employment service providers.

(6) Estimated number of responses—94.

(7) Estimated total number of hours needed to respond—68.62. Section 3504(h) of Pub. L. 96-511 does not apply.

Additional Information or Comments: Copies of the proposed study and supporting documents may be obtained from Gail J. Cook, Departmental Clearance Officer (202) 632-3602. Comments and questions should be directed to (OMB) Francine Picoult (202) 395-7231.

Dated: May 2, 1983.

Thomas M. Tracy,

Assistant Secretary for Administration.

BILLING CODE 4710-24-M

DEPARTMENT OF TREASURY

Internal Revenue Service

Form 990 Advisory Committee; Notice of Establishment

AGENCY: Internal Revenue Service, Treasury

ACTION: Notice of Establishment of Form 990 Advisory Committee

SUMMARY: A Form 990 Advisory Committee is being established to evaluate proposed changes to Form 990, Return of Organization Exempt from Income Tax, and to provide its own recommendations to the Internal Revenue Service for changes to that form.

FOR FURTHER INFORMATION CONTACT: Robert W. Gardiner, Exempt Organizations Division, Internal Revenue Service, Room 2218, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, telephone 202-566-3137 (not a toll free call).

SUPPLEMENTARY INFORMATION: In accordance with section 9(a) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that the Secretary of the Treasury, with the concurrence of the Office of Management and Budget, has approved the establishment of the Form 990 Advisory Committee. Establishment of the Committee has been determined to be in the public interest in connection with the performance of duties imposed by law on the Internal Revenue Service. These duties include the administration of the provisions of the Internal Revenue Code of 1954 relating to tax-exempt organizations and nonexempt charitable trusts that are required to file an annual information return on Form 990. Formation of the Committee will also help the Service meet its obligation under the Paperwork Reduction Act of 1980 (Pub. L. 96-511) to minimize the recordkeeping and reporting burden borne by the public.

The Committee will evaluate substantive revisions to Form 990 and the instructions to that form that have been proposed by the Service or suggested by others and will make its own recommendations for form and instruction changes to the Service's Tax Forms Coordinating Committee. A secondary purpose of the Committee will be to perform those same functions in connection with Form 990-PF, Return of Private Foundation. The Committee will function solely as an advisory body in compliance with the Federal Advisory Committee Act, Treasury Directive 10-06.E and OMB Circular A-63, Revised.

VOL
48
ISS
97
MY
18
1983
UMI

Committee membership shall be fairly balanced among representatives of the parties having a significant interest in Form 990: Internal Revenue Service and state charity officials as well as Form 990 filers, preparers and other users. Committee meetings will be held not more than three times each year and all meetings will be open to the public.

Thirty-one of the thirty-five states and the District of Columbia that have reporting requirements for charities and other public benefit organizations under their jurisdiction have adopted Form 990 (and Form 990–PF in some cases) as the medium for reporting to the states. Some of the adopting states require information in addition to that which Form 990 provides. The Service recognizes that having a standard report form that does not require unneeded or excessive information is in the best interests of the states, the organizations that must report to them (particularly those that must submit financial reports to a number of states) and, ultimately, the public that is served by those organizations.

The states agreed to adopt Form 990 based, in part, on representations that the Service would not arbitrarily change the form or instructions and thereby alter or eliminate the reporting of information needed by the states. Being represented on the Committee will enable the states to be kept informed of proposed form and instruction changes, to express their views on those proposed changes so the Service can take them into account in reaching its final decision, and to advise the Service of any changes in the information needs of the states that might involve Form 990.

Establishment of the committee will be effective from the date of filing of the Committee's charter with the standing committees of Congress having legislative jurisdiction over the Service. The Committee will terminate two years from its establishment date unless its charter is renewed.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury Directive appearing in the **Federal Register** for Wednesday, November 8, 1978.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and the Delegation of Authority from the Director, USIA (47 FR 57600, December 27, 1982), I hereby determine that the objects in the exhibit, "Arp: The Dada Reliefs" (included in the list [1] filed as a part of this determination) imported from abroad for the temporary exhibition without profit within the United States are of cultural significance. These objects are imported pursuant to a loan agreement between the National Gallery of Art and foreign lenders. I also determine that the temporary exhibition or display of the listed exhibit objects at the National Gallery of Art, beginning on or about July 3, 1983, to on or about October 30, 1983, is in the national interest.

Public notice of this determination is ordered to be published in the **Federal Register.**

Dated: May 13, 1983.

Jonathan W. Sloat,

General Counsel and Congressional Liaison, United States Information Agency.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11:10 a.m. on Friday, May 13, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider an application for assistance under section 13(c) of the Federal Deposit Insurance Act (name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

At that same meeting, the Board also considered a personnel matter.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Ivine H. Sprague (Appointive), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant

to subsections (c)(2), (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

The meeting was held in the Chairman's Office, Room 6023 of the FDIC Building located at 550 17th Street, NW., Washington, D.C.

Dated: May 13, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, May 23, 1983, to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previsous meetings.

Application for consent to merge and establish five branches:

Northern Central Bank, Williamsport, Pennsylvania, an insured State nonmember bank, for consent to merge, under its charter and title, with The State Bank of Avis, Avis, Pennsylvania, and The Farmers National Bank of Rome, Rome, Pennsylvania, and to establish the four offices of The State Bank of Avis and the sole office of The Farmers National Bank of Rome as branches of the resultant bank.

Application for consent to merge and establish six branches and one seasonal facility:

First-Citizens Bank & Trust Company, Raleigh, North Carolina, an insured State nonmember bank, for consent to merge, under its charter and title, with Peoples Bank of North Carolina, Madison, North Carolina, and to establish the six offices and one seasonal facility of Peoples Bank of North Carolina as six branches and one seasonal facility of the resultant bank.

Application for consent to purchase assets and assumne liabilities and establish two branches:

Northridge Bank, Los Angeles (Northridge), California, an insured State nonmember bank, for consent to purchase the assets of and assume the liability to pay deposits made in the Thousand Oaks Branch and the Warner Center Branch of Indpendence Bank, Los Angeles (Encino), California, and to establish those two offices as branches of Northridge Bank.

Application for consent to relocate a branch:

California Commerce Bank, Los Angeles, California, for consent to relocate its San Diego Office from 230 West "A" Street to 401 West "A" Street, San Diego, California.

Request for consent to retire common stock:

The Citizens Bank of Ashburn, Ashburn, Georgia.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Memorandum and Resolution re: Midtown National Bank, Pueblo, Colorado.

Memorandum and Resolution re: Carroll County Bank, Huntingdon, Tennessee.

Memorandum and Resolution re: The Metro Bank of Huntington, Inc., Huntington, West Virginia.

Memorandum and Resolution re: Final amendment to Part 307 of the Corporation's rules and regulations, entitled "Termination of Insured Status," which would conform those rules and regulations with the Federal Deposit Insurance Act, as amended by the Garn-St Germain Depository Institutions Act of 1982, by removing provisions requiring that an assuming or resulting bank or institution that has assumed the liabilities of an insured bank give notice of the assumption to the depositors of the bank whose liabilities have been assumed.

Memorandum and Resolution re: Final amendment to Part 309 of the Corporation's rules and regulations, entitled "Disclosure of Information," which would conform those rules and regulations with the Right to Financial Privacy Act of 1978, as amended by the Garn-St Germain Depository Institutions Act of 1982, by removing restrictions on the disclosure of financial records and information to Federal financial institutions supervisory agencies.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications or requests approved by the Director or Associate Director of the Division and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Reports of the Director, Office of Corporate Audits and Internal Investigations:

Audit Report re: Audit of Merger Assistance Agreements—Mutual Savings Banks (dated April 19, 1983).

Memorandum re: Quarterly Certification of Division of Liquidation Approvals Under Delegated Authority.

Report of the Director, Division of Accounting and Corporate Services:

Memorandum re: Investment Management Report—March 31, 1983.

Discussion Agenda

Memorandum and Resoultion re: Final amendments to Part 303 of the Corporaton's rules and regulations, entitled "Applications, Requests, Submittals, Delegations of Authority, and Notices of Acquisition of Control," which would delegate to the Director of the Division of Bank Supervision and, where confirmed in writing by the Director, to the various Regional Directors, the authority to approve (but not to deny) routine merger transactions, if certain criteria are met.

Memorandum and Resolution re: Final amendments to Parts 303, 304, and 347 of the Corporation's rules and regulations, entitled "Applications, Requests, Submittals, Delegations of Authority, and Notices of Acquisition of Control," Forms, Instructions, and Reports," and "Foreign Activities of Insured State Nonmember Banks," respectively, which would revise the procedures relating to the processing of applications for consent to establish foreign and domestic branches (including remote service facilities) and to relocate offices.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Request for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Exective Secretary of the Corporation, at (202) 389-4425.

Dated: May 16, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, May 23, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda

No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and desist proceedings, termination-of-insurance proceedings, suspension or removal preceedings, or assessment of civil money penalties) against certain insured banks or officer, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda

Application for consent to purchase assests and assume liabilities and establish fourteen branches:

Commonwealth Bank, Bay Springs, Mississippi, an insured State nonmember bank, for consent to purchase the assests of and assume the liability to pay deposits made in First United Bank of Mississippi, Meridian, Mississippi, and Central Bank of Mississippi, Brandon, Mississippi, and to establish the ten offices of First United Bank of Mississippi and the four offices of Central Bank of Mississippi as branches of the resultant bank which would be known as "First United Bank."

Request for relief from adjustment for violations of Regulation Z:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8) and (c)(9)(A)(ii)).

Recommendations regarding the Corporation's assistance agreements with insured banks pursuant to section 13 of the Federal Deposit Insurance Act.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389-4425.

Dated: May 16, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

Federal Communications Commission

Publication of Sample FM Pre-Printed Hearing Designation Order and Sample Hearing Notice

VOL 48 ISS 97 MY 18 1983 UMI

FEDERAL COMMUNICATIONS COMMISSION

Publication of Sample FM Pre-Printed Hearing Designation Order and Sample Hearing Notice

AGENCY: Federal Communications Commission.

ACTION: Publication of Sample FM Standardized, Pre-Printed Hearing Designation Order and Sample Hearing Notice.

SUMMARY: The Commission required by Section 309(e) of the Communications Act of 1934, as amended, to publish in the **Federal Register** all issues which it has designated for hearing involving mutually exclusive applications for FM stations. The issues are initially specified at the Commission in a document known as a Hearing Designation Order (HDO). In the interest of administrative efficiency and resource economy, the Commission has decided to utilize the following standardized, pre-printed FM HDO (See Appendix A) to alleviate its current FM applications backlog, which has resulted, in part, from shortages of personnel to process these applications. In addition, effort to eliminate the cost of publishing the full text of all FM HDOs, the Commission, by its Mass Media Bureau, will publish instead a Notice summarizing the specific applicants and issues in each HDO (See Appendix B). Instead of printing the text of the standardized issues for each HDO, future Notices published concerning FM cases which have utilized the standardized, pre-printed HDO will refer the reader to the wording ot the standardized issues contained in the following sample HDO (See Appendix A).

FOR FURTHER INFORMATION CONTACT: W. Jan Gay, Mass Media Bureau (202) 632-8485.

Federal Communication Commission.

For Construction Permit
for a New FM Station

VOL 48 ISS 97 MY 18 1983 UMI

HEARING DESIGNATION ORDER

Adopted: Released:

By the Chief, Audio Services Division:

1. The Commission has before it the above-captioned mutually exclusive applications for a new FM station.

2. In the interest of administrative efficiency and resource economy, portions of this Order have been standardized. Consequently, opinion paragraphs, issues and ordering clauses will only apply where an "X" appears in an appropriate box. If the paragraph is directed to some, but not all, of the captioned applicants, those affected will be specified. In addition, non-standardized text in this Order, if any, will be set forth in an Appendix.

OPINION PARAGRAPHS

Local Notice

Appli- cable [ ] Inappl- icable [ ]

3. Applicants for new broadcast stations are required by Section 73.3580 of the Commission's Rules to give local notice of the filing of their applications. We have no indication that the applicant(s) below published the required notice. To remedy this deficiency, the applicant(s) must publish local notice of the application, if it has not already done so, and so inform the presiding Administrative Law Judge within 30 days of the release of this Order, or an appropriate issue will be specified by the Judge.
APPLICANT(S):

Appli- cable [ ] Inappl- icable [ ]

4. Applicants for new broadcast stations are required by Section 73.3580 of the Commission's Rules to give local notice of the filing of their applications. The applicant(s) below has published the required notice, but the notice is deficient. To remedy this deficiency, the applicant(s) must republish an amended local notice of the application, if it has not already done so, and so inform the presiding Administrative Law Judge within 30 days of the release of this Order, or an appropriate issue will be specified by the Judge.
APPLICANT(S) DEFICIENCY

Main Studio Justification

Appli- cable [ ] Inappl- icable [ ]

5. Section 73.1125 of the Commission's Rules requires that the main studio of an FM station be located within the city of license, but that on a showing of good cause may be located outside that community. The applicant(s) below proposes to locate its main studio outside the community and gives the following justification(s):
APPLICANT(S) LOCATION(S) JUSTIFICATION(S)

(a) good cause has been shown by the following applicants(s) for the proposed studio location:

(b) good cause has not been shown by the following applicant(s) and, accordingly, an issue will be specified:

Appli- cable [ ] Inappl- icable [ ]

6. Section 73.1125 of the Commission's Rules requires that the main studio of an FM station be located within the city of license, but that on a showing of good cause may be located outside that community. The applicant(s) below states in its response to Item 12, Section V-B, Form 301, that its main studio will be at a location to be determined, with no indication that the determination would be limited to sites within the city of license. Under these circumstances, the applicant(s) will be required to file with the presiding Administrative Law Judge, within 30 days of the release of this Order, either an amended response to the above-referenced item and/or, if applicable, a showing of good cause should it propose to locate its main studio outside the city of license, or an appropriate issue will be specified by the Judge.
APPLICANT(S):

City Coverage Waiver

Applicable [ ] Inapplicable [ ]

7. The engineering data submitted by the applicant(s) below does not clearly demonstrate that it provides a 3.16 mV/m signal to the entire proposed city of license, as required by Section 73.315(a) of the Commission's Rules:

APPLICANT(S) WAIVER JUSTIFICATION(S)

(a) The following applicant(s) has submitted facts and circumstances which persuade us that grant of a waiver of Section 73.315(a) would be in the public interest:

(b) The following applicant(s) has not shown circumstances which warrant a waiver of 73.315(a) and, accordingly, an issue will be specified:

(c) The following applicant(s) has not requested a waiver of 73.315(a) and, accordingly, an issue will be specified:

Financial Qualifications

Applicable [ ] Inapplicable [ ]

8. The material submitted by the applicant(s) below does not demonstrate its financial qualifications. Although the financial standards are unchanged, the Commission has changed the application form to require only certification as to financial qualifications. Accordingly, the applicant(s) will be given 30 days from the release of this Order to review the financial proposal in light of Commission requirements, to make any changes that may be necessary and, if appropriate, to submit a certification to the presiding Administrative Law Judge in the manner called for in revised

Section III, Form 301. If the applicant(s) cannot make the required certification, it shall so notify the Judge who shall then specify an appropriate issue.

APPLICANTS(S) DEFICIENCY

Applicable [ ] Inapplicable [ ]

9. The applicant(s) below has certified as to its financial qualifications. The certification, however, does not substantially meet the certification set out in revised Section III, Form 301. Accordingly, the applicant(s) will be given 30 days from the release of this Order to submit to the presiding Administrative Law Judge the certification required by the form or to advise the Judge that it cannot make the required certification. In the latter event, the Judge shall specify an appropriate issue.

APPLICANT(S):

Programming Statement

Applicable [ ] Inapplicable [ ]

10. The applicant(s) below has not submitted a description in narrative form of proposed programming relating to the issues of public concern facing its service area, pursuant to Paragraph 1, Section IV, Form 301. Accordingly, the applicant(s) will be required to file within 30 days of the release of this Order a narrative programming statement with the presiding Administrative Law Judge, or an appropriate issue will be specified by the Judge.

APPLICANT(S):

E.E.O.

Applicable [ ] Inapplicable [ ]

11. The material submitted by the applicant(s) below fails to indicate that it will have less than 5 full time employees. The Commission requires that if there will be five or more full-time station employees, the applicant must complete and file Section VI of Form 301, and supply a statement detailing hiring and promotion policies even though there may be only a few members of minorities residing within the proposed service area. Accordingly, the applicant(s) will be required to file this Section VI information within 30 days of the release of this Order with the presiding

VOL
48

UMI

Administrative Law Judge, or an appropriate issue will be specified by the Judge.
APPLICANT(S):

Late Filed Amendments
Applicable [ ] Inapplicable [ ]

12. The applicant(s) below has petitioned for leave to amend its application on the date(s) shown. The accompanying amendment(s) was filed after the "B" cut-off date, the last day for filing minor amendments as of right. Under Section 1.65 of the Commission's Rules, the amendment(s) is accepted for filing. However, an applicant may not improve its comparative position after the time for amendments as of right has passed. Therefore, any comparative advantage resulting from the amendment(s) will be disallowed.
APPLICANT(S) DATE AMENDMENT(S) FILED

Areas & Populations
Applicable [ ] Inapplicable [ ]

13. Data submitted by the applicants indicate that there would be significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, the areas and populations which would receive FM service of 1 mV/m or greater intensity, together with the availability of other primary aural services in such areas, will be considered under the standard comparative issue for the purpose of determining whether a comparative preference should accrue to any of the applicants.

Contingent Comparative
Applicable [ ] Inapplicable [ ]

14. The respective proposals, although for different communities, would serve substantial areas in common. Consequently, in addition to determining, pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will also be specified.

Different Communities 307(b)
Applicable [ ] Inapplicable [ ]

15. The respective proposals are for different communities. Consequently, it will be necessary to determine pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio services.

Air Hazard
Applicable [ ] Inapplicable [ ]

16. Since no determination has been received from the Federal Aviation Administration as to whether the antenna proposed by the applicant(s) below would constitute a hazard to air navigation, an issue with respect thereto will be included and the F.A.A. made a party to the proceeding.
APPLICANT(S):

17. Except as may be indicated by any issues specified below, the applicants are qualified to construct and operate as proposed. Since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

18. Accordingly, IT IS ORDERED, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications ARE DESIGNATED FOR HEARING IN A CONSOLIDATED PROCEEDING, at a time and place to be specified in a subsequent Order, upon the following issues:

ISSUES

Main Studio
Applicable [ ] Inapplicable [ ]

.To determine, pursuant to Section 73.1125, whether good cause exists for the proposed location of its main studio outside the community of license by the following applicant(s):

City Coverage
Applicable [ ] Inapplicable [ ]

.To determine whether the proposal of the following applicant(s) would provide coverage of the city sought to be served, as required by Section 73.315(a) of the Commission's Rules, and, if not, whether circumstances exist which warrant waiver of that Section:

307(b)
Applicable [ ] Inapplicable [ ]

.To determine: (a) the areas and populations which would receive primary aural service (1 mV/m or greater in the case of FM) from the proposals and the availability of other primary service to such areas and populations, and (b) in light thereof and pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service.

-8-

Contingent Comparative
Appli- cable [ ] Inappl- icable [ ]
.To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, best serve the public interest.

Comparative
Appli- cable [ ] Inappl- icable [ ]
.To determine which of the proposals would, on a comparative basis best serve the public interest.

Air Hazard
Appli- cable [ ] Inappl- icable [ ]
.To determine whether there is a reasonable possibility that the tower height and location proposed by the following applicant(s) would constitute a hazard to air navigation:

Ultimate
Appli- cable [ ] Inappl- icable [ ]
.To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted, if any.

ORDERING CLAUSES

Local Notice
Appli- cable [ ] Inappl- icable [ ]
19. IT IS FURTHER ORDERED, That within 30 days of the release of this ORDER, the following applicant(s) shall inform the presiding Administrative Law Judge as to whether local notice of filing of the application has been published:

Appli- cable [ ] Inappl- icable [ ]
20. IT IS FURTHER ORDERED, That within 30 days of the release of this Order, the following applicants shall inform the presiding Administrative Law Judge as to whether a corrected local notice of the filing of the application has been republished:

Late Filed Amendments

Appli- cable [ ] Inappl- icable [ ]

26. IT IS FURTHER ORDERED, That the petition for leave to amend filed by the following applicant(s) IS GRANTED, and the corresponding amendment(s) IS ACCEPTED to the extent indicated herein:

Air Hazard

Appli- cable [ ] Inappl- icable [ ]

27. IT IS FURTHER ORDERED, That the Federal Aviation Adminstration IS MADE A PARTY to this proceeding with respect to the air hazard issue only.

28. IT IS FURTHER ORDERED, That, to avail themselves of the opportunity to be heard, the applicants and any party respondent herein shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for hearing and to present evidence on the issues specified in this Order.

29. IT IS FURTHER ORDERED, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by Section 73.3594(g) of the Rules.

Appendix B—Sample Hearing Notice To Be Published in the Federal Register

Applications for Consolidated Hearing

1. The Commission has before it the following mutually exclusive applications for a new FM station:

Applicant	City/State	File No.	MM Docket No.
A.			
B.			
C.			

2. Pursuant to Section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon issues whose headings are set forth below The text of each of these issues has been standardized and is set forth in its entirety in a sample standardized Hearing Designation Order (HDO) which can be found at 48 FR——, May——, 1983. The issue headings shown below correspond to issue headings contained in the referenced sample HDO. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

Issue headings	Applicants

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an Appendix to this Notice. A copy of the complete HDO in this proceeding may be obtained, by written or telephone request, from the Mass Media Bureau's Contact Representative, Room 242, 1919 M Street, NW., Washington, D.C. 20554. Telephone (202) 632-6334.

Larry D. Eads,

Chief, Audio Services Division, Mass Media Bureau.

Department of Energy

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Act of 1978

VOL 48 ISS 97 MY 18 1983 UMI

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 895]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 13, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in acordance with 18 CFR 275.03 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS), at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
- 102-2: New well (2.5 Mile rule)
- 102-3: New well (1000 Ft rule)
- 102-4: New onshore reservoir
- 102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
- 107-GB: Geopressured brine
- 107-CS: Coal Seams
- 107-DV: Devonian Shale
- 107-PE: Production enhancement
- 107-TF: New tight formation
- 107-RT: Recompletion tight formation

Section 108: Stripper well
- 108-SA: Seasonally affected
- 108-ER: Enhanced recovery
- 108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

Transfer of Marine Mammal Management Authority to States

[NOTE: This document originally appeared in the issue of May 6, 1983 at 48 FR 20614. It is reprinted at the request of the Department of the Interior because pages 20615–20628 of that document were omitted in the production process from some copies of the May 6 issue.]

AGENCIES: Fish and Wildlife Service, Interior; National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Final rule

SUMMARY: The Fish and Wildlife Service (FWS) and the National Marine Fisheries Services (NMFS) are adopting a final rule to implement amendments to Section 109 of the Marine Mammal Protection Act (hereinafter referred to as "MMPA," or "the Act"). These regulations establish procedures for the transfer of marine mammal management authority to the states, the form and minimum requirements of a state application for the transfer of management authority, the relationship between Federal and state wildlife agencies both prior and subsequent to the transfer of management authority, and the revocation and return to the FWS or NMFS of management authority once transferred to the states.

EFFECTIVE DATE: June 6, 1983.

ADDRESSES: Chief, Division of Wildlife Management, Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240; or Assistant Administrator for Fisheries, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce, Washington, D.C. 20235

FOR FURTHER INFORMATION CONTACT: Mr. William Reffalt, Chief, Division of Wildlife Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240 (202) 632–2202; or Richard B. Roe, Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235 (202) 634–7461.

SUPPLEMENTARY INFORMATION: On October 9, 1981, the President approved Pub. L. 97–58 amending various provisions of the Marine Mammal Protection Act (MMPA), 16 U.S.C. 1361 *et seq.* One aspect of these amendments altered the mechanism for the transfer of marine mammal management authority to the states under section 109 of the Act, 16 U.S.C. 1379. Under the pre-existing statutory procedures, states were required to request the Fish and Wildlife Service (FWS) or the National Marine Fisheries Service (NMFS) to return management of the species. If a state sought authority to allow taking of the marine mammals under its management program, the state was required to request the FWS or NMFS to waive the moratorium on the taking of the species. This request required a formal Federal hearing before an Administrative Law Judge concerning the status of the requested species, and the permissible number of animals to be taken, as well as consideration of the state's proposed laws and regulations that would govern the taking of the species. The proposed waiver of the moratorium to allow taking of the species also required compliance with the provisions of the National Environmental Policy Act. In reviewing these procedures, Congress found that the lengthy process had resulted in a situation in which the goal of the Act—effective management to maintain healthy populations of marine mammals—was being impaired.

To remedy this problem, Congress established a simplified procedure under which a state could resume management of marine mammal species. This procedure entails a three-step process. First, the state must submit a request to the FWS or NMFS for transfer of management authority for a given species or a number of species of marine mammals. This request and its supporting documentation is reviewed by the appropriate Service to determine if the state has developed and will implement a program for the conservation and management of the species which meets certain requirements set forth in the Act. Second, if the FWS or NMFS publishes a proposed finding that the state program meets these requirements, the state must make a determination, under procedures set by the Act, of the optimum sustainable population ("OSP") of the species and the maximum allowable take of the species that is consistent with maintaining the species at OSP. Third, the state's determinations must be implemented through state laws and/or regulations and, if the range of the species extends beyond the territorial water of the state, the state and Federal governments must agree on a process for allocating the take of the species in areas under respective state and Federal jurisdictions. Once this "cooperative allocation agreement", if required, has been implemented and the OSP and maximum allowable take determinations are final and implemented under state law, the Service will publish a final finding and rule transferring exclusive authority to manage marine mammals to the state for the area within its jurisdiction, including its territorial waters. The only exception to this assumption of exclusive jurisdiction would be for takings by non-state personnel for scientific research and public display purposes and takings by Federal officials and agents for health and welfare purposes, activities which remain under the control of the Federal government pursuant to section 109 of the Act.

On May 12, 1982 the FWS published proposed regulations to implement the statutory procedures for transfer of marine mammal management authority to the states (47 FR 20508). The NMFS also published corresponding regulations for species under its jurisdiction (47 FR 20496). After consideration of 26 letters of public comment the proposed regulations have been amended slightly to clarify further certain provisions, especially those involving the timing of state and Federal actions, and subsistence use provisions relating to the State of Alaska.

The Marine Mammal Commission recommended that FWS's final regulations implementing statutory procedures to transfer marine mammal management authority to states, and any supplementary information explaining them in the notice of final rulemaking, be identical to those published by the NMFS. This is to avoid any potential confusion resulting from different explanations by the two agencies of the already complex transfer process. The Services decided that this recommendation has merit and that these regulations should be published jointly as a final rule and later codified at 50 CFR Part 403. Former regulations governing transfer of management authority in 50 CFR Parts 18 and 216 have been deleted and replaced with references to the joint regulations now found in 50 CFR Part 403.

Although three commentators registered opposition to the idea of a transfer of management authority to states, no party questioned any major interpretations of the Act as set forth in these regulations. The Marine Mammal Commission, for example, recommended that the proposed regulations be adopted subject to minor changes. The State of Alaska and the International Association of Fish and Wildlife Agencies supported the proposed regulations as a faithful interpretation of the transfer provisions of Pub. L. 97–58.

The Department of Game, State of Washington, commented on the complexity and difficulty of the statutory requirements for a transfer of management authority, but thought that the proposed regulations were fair and comprehensive. Similar views were expressed by private individuals and organizations.

The final rule adopted herein is essentially unchanged from the proposed rules. These regulations apply to the species of marine mammals currently managed by the FWS, under the authority of the MMPA, such as the polar bear, sea otter, walrus, dugong, manatee and marine otter, and to other species of marine mammals, including seals, sea lions, porpoises and whales which are managed by the NMFS.

Public Comments

Comments on the proposed regulations were solicited from all interested parties within a 60-day comment period, May 12–July 12, 1982. Since the FWS and the NMFS published identical proposed regulations, comments received by both agencies were jointly considered. The following parties submitted written comments:

Numan Kitlutsisti
Alaska Federation of Natives
Jean McCollom
Shell Oil Company
Washington Department of Fish and Game
Umpqua Commercial Fishermen's Wives Association
Defenders of Wildlife
Friends of the Sea Otter
Alaska Department of Fish and Game
Marine Mammal Commission
Friends of Wildlife
Texas Parks and Wildlife Department
Minerals Management Service, Department of the Interior
Environmental Defense Fund with Friends of the Earth, the Humane Society of the United States, and the Society for Animal Protective Legislation
Seal Rescue Fund
Alaska Oil and Gas Association
Conoco Oil Company
Kauernak, Inc.
Harlan L. Bay, Taxidermist
Mac's Taxidermy
Animal Welfare Society, Inc. with Maine Chapter, Defenders of Wildlife, and Marine Federation of Humane Societies
John E. Rowe
H. K. Grade, Taxidermist
Denna McLeod
Save Our Salmon
International Association of Fish and Wildlife Agencies

After the comment period closed, the Assistant Administrator for Fisheries, NMFS, also received comments from an employee concerning the State of Alaska's position on the 1981 MMPA Amendments.

Copies of all comments are available for inspection at the offices of the information contact listed above.

General Comments

Many of the letters we received reflect public views on the advisability or inadvisability of transferring marine mammal management authority to states, and do not specifically address our procedural regulations. In this regard, two commentators opposed any transfer of marine mammal management authority to states because of concern for the continued conservation of these species. One commentator opposed management transfer because of possible impacts on offshore oil development activities. Several groups and individuals, primarily commercial fishing and taxidermy interests, registered approval of an early transfer of authority to states.

The MMPA of 1972, as well as the 1981 amendments, anticipated the eventual transfer of management authority from the Federal Government to the states, and provided specific procedures to accomplish this transfer. The Act provides a mechanism for the transfer, from the Federal Government to the states, of marine mammal management authority based on Federal review and approval of state management plans. State marine mammal management programs must generally be consistent with the goals and policies of the MMPA and, specifically, the maintenance of marine mammal populations at optimum sustainable population (OSP) levels. The regulations adopted today implement current statutory procedures and contain only limited discretionary provisions to this end. Neither the Act, as amended, nor these regulations allow for any relaxation of the strict OSP management standard. The Services strongly encourage states to apply for marine mammal management authority and obtain jurisdiction over their resident marine mammal populations. As recognized by Congress, marine mammal management activities will be more efficient and less costly at the state agency level.

Oil and gas development interests are concerned that a transfer of management authority to states may impede offshore development because regulations governing the taking of small numbers of marine mammals under section 101(a)(5) of the Act may vary among states and between states and the Federal Government. One commentator requested that we provide a specific mechanism for interstate coordination of marine mammal permits. In addition, these reviewers were confused as to the possible impact of these regulations and the MMPA amendments on future Endangered Species Act (ESA) consultations.

Once management authority is transferred for a given species, the state has exclusive jurisdiction to manage marine mammals pursuant to the MMPA within the state and its territorial waters, except for takings by non-state personnel for scientific research and public display purposes or by Federal personnel for health and welfare purposes. Exceptions under MMPA section 101(a)(5) for the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in specified activities (other than commercial fisheries) within a specified geographical region within the state or its territorial waters, must be sought from the appropriate state agency, once management authority for the species has been transferred.

Once management authority has been transferred, the Federal Government will only regulate incidental takings, including those specified in sections 101(a)(2), 101(a)(4) and 101(a)(5), that occur outside state territorial waters and within the 200 mile zone described in section 3(14)(B) of the Act (Fishery Conservation Zone, of FCZ). It is possible, therefore, that because an activity takes place over a large geographical area, an individual or organization may need to apply to one or more states and the Federal Government for permission to take certain marine mammals under section 101(a)(5).

Current policies and procedures for the ESA consultations among agencies will not be affected by these regulations. Section 17 of the ESA provides that, in case of conflicts between the ESA and the MMPA, the more restrictive provision applies. Concurrent jurisdiction, rather than exclusive state authority, is provided for under the ESA. Since the consultation responsibilities of Federal agencies (under section 7) and the prohibitions (under section 9) specified in the Endangered Species Act will continue to apply for those marine mammals that are also listed as endangered or threatened under the ESA, the transfer of management authority to a given state would not affect Federal agency consultation responsibilities under the ESA. Furthermore, section 6(c) provides for state and Federal agreements for the conservation and management of endangered and threatened species. Nothing in the Act or in our regulations should be construed as affecting in any manner any cooperative agreement

VOL 48 ISS 97 MY 18 1983 UMI

entered into between a state and the Federal Government under section 6(c) of the ESA.

Several Alaska Native representatives requested a clarification of the subsistence use provisions which only apply to the State of Alaska. Some reordering of paragraphs and refinement of terms has been added to these provisions and is discussed in detail under § 403.03 below.

Many commentators questioned the submission of proposed statutes and regulations in the state management plan and suggested the word "proposed" be deleted, or that the approval of a state management plan, if based in part on proposed language, remain conditional until any proposed statutes and regulations are implemented. Specific aspects of this issue are discussed under § 403.03 below.

Section 403.01

This section describes the purpose and scope of these regulations. In response to comments the first sentence of this section has been revised to include the phrase "upon a finding by the Secretary of compliance with certain requirements," and an error in the last word of paragraph (a) has been corrected.

We have not accepted the recommendation to add a new paragraph (b)(3) which would exclude "reasonable and prudent development of resources in the state and national interest" (such as oil and gas), from activities affected by these regulations, since this is not within our authority under the MMPA. Paragraph (b) excludes the taking of marine mammals by Federal, state and local government officials in the course of their official duties. This activity is governed by 50 CFR 18.22 and 216.22, and the notification requirements of those sections remain in effect. Sections 18.22 and 216.22 relate to the taking of stranded and beached marine mammals and the taking of marine mammals for the protection of public health and welfare. The Services are in the process of revising §§ 18.22 and 216.22 to reflect the new statutory language contained in section 109(h) as requested by one commentator. These revisions will be proposed in separate Federal Register publications.

Section 403.02

This section defines certain terms used in this subpart. A new paragraph (a) has been added to read as follows. "The term 'species' includes any population stock." This provision is derived from the first sentence of section 109(a) of the Act which allows states the option of managing their marine mammals on the basis of population stocks. For example, states may choose where appropriate to determine optimum sustainable population (OSP) and allowable take levels for individual population stocks. This was the intent of the proposed regulation as evidenced by the definition of OSP, found at § 403.02(b) (formerly (a)), which provides that OSP is a population size for a "given species or stock." Section 3(10) of the MMPA defines the terms "population stock" or "stock" to mean "a group of marine mammals of the same species or smaller taxa in a common spatial arrangement, that interbreed when mature."

We have therefore adopted the recommendation to clarify the term "species" to reflect the provisions of sections 109(a) and 3(10) of the Act. Conversely, we are unable to adopt the recommendation of another commentator that marine mammal species should not be subdivided into population stocks for purposes of these regulations, since the Act requires that this management option be available.

Two commentators recommended changes or requested clarification of our OSP definition in paragraph (b) (formerly (a)). Congress has specifically reaffirmed that this definition accurately reflects the meaning of the term and the intent of Congress in passing the original Act. H.R. Rep. No. 97-228, 97th Cong., 1st Sess., p. 16 (1981). It is important to note that OSP is any population level within a range of population levels. The upper bound of the range is the largest supportable population level within a given ecosystem (carrying capacity). The lower bound of the range is the population level for a given species or stock that results in maximum net productivity.

This section also defines "state management program." The state management program consists of the legal framework under which the state will manage marine mammals. Components of this framework which are specifically required to be submitted in the state's request for transfer of management authority are set forth in paragraphs (b) and (c) of § 403.03 of the proposed regulations. Paragraph (d) of § 403.03 lists additional components required only in the State of Alaska's management program.

Several commentators objected to including proposed laws, regulations and policies within the definition of "state management program." The response to this comment is found below under the discussion of § 403.03. One commentator recommended that the term "statute" be substituted for the term "law," except in those cases where the term "law" is specifically meant to include both "statutes" and "regulations." We agree with this recommendation and have made this substitution in the definition of state management program, and throughout the final rule, where appropriate.

Section 403.03

This section delineates the form and minimum requirements of a state request for transfer of management authority. Any state requesting management authority from both the FWS and NMFS may combine the request in a single document and send copies to both agencies. The request must contain two elements: (1) Certain aspects of the proposed state management program and (2) supplemental information pertaining to the state management program. The request must include the text of relevant statutes, regulations, policies and other authorities of state law, and a narrative discussion of how these authorities blend to form a framework that meets the new requirements of the Act. This narrative discussion may be in the form of a memorandum prepared by the state Attorney General, as suggested by one commentator. However, a memorandum from the Attorney General is not added as a requirement because the state should be in the best position to determine the most appropriate agency to develop the narrative discussion.

As discussed in the preamble to the proposed regulations, although the state management program is defined broadly by section 403.02, the request for transfer of management authority need not include all aspects of the state management program. The state need not provide specific laws pertaining to the manner, times or amount of take, unless specifically required by § 403.03. Thus, the state need not submit as part of its request regulations pertaining to such aspects of take as bag limits, seasons, or the minimum rifle caliber that can be used in taking the species, since they are not specifically required by the Act. However, the request must include, for example, a law that requires taking to be humane (see § 403.03(b)(2)(i)), even though this is a restriction on the manner of taking, since it is specifically required by the Act.

A. *Submission of Proposed Statutes and Regulations.*

Numerous commentators objected to provisions allowing the Service to approve a state management program containing proposed laws. Many of these comments were based on the

requirements of sections 109(b)(1) and 109(f)(1)(A) of the Act. Section 109(b)(1) requires the Secretary to find that the state "has developed and will implement" a program for the conservation and management of the species before transferring management authority to the state. This language parallels the requirement of section 109(f)(1)(A), applicable only in the case of Alaska, that the Secretary find that the state "has adopted and will implement" certain statutes and regulations governing subsistence uses of marine mammals before transferring management authority to the State of Alaska. Commentators expressed concern that approval of state management programs containing proposed laws would violate these provisions and that such approvals could preclude public comment on the management programs the states actually adopt. Furthermore, commentators stated that revocation, the Service's recourse in the event a proposed statute or regulation is not adopted as submitted in the request, is too time-consuming to assure effective conservation and management of marine mammal species as the Act requires.

The Services appreciate the concerns of all parties on this issue. The transfer of management authority is a lengthy process. Allowing states to submit proposed laws for approval purposes would help streamline the process. But the affected public should have an opportunity to comment on all aspects of the state management program and should be assured that the program the state implements is the same as the program the public reviews and the Service approves.

To accommodate these concerns, the Services retained the provisions allowing states to submit management programs based on proposed laws or policies and amended the approval and transfer provisions in § 403.03. The new provisions incorporate informal rulemaking procedures for reviewing state management programs and transferring management authority to the states. New § 403.03(f) requires the Service, promptly after receiving a state's request, to make an initial determination on whether the state has developed and will implement a marine mammal management program that meets the requirements of the Act and the regulations. The Service must publish a general notice of its initial determination in the **Federal Register** together with, in the case of a positive determination, a proposed rule to transfer management authority to the State. The general notice will provide the public with an opportunity to comment (60 days) and to request an informal public hearing on both the Service's initial determination and on the state management program.

After considering comments and all other relevant information, the Service will publish in the **Federal Register** its final determination on whether the state's program meets the requirements of the Act and regulations. Along with a positive determination, the Service will publish a final regulation transferring management authority for the species to the state after the following requirements are satisfied:

(a) The state's determinations under §403.04 are implemented under state law;

(b) Any cooperative allocation agreement required under §403.05(a) is implemented; and

(c) The state has adopted laws and policies that are substantially the same as those submitted in proposed form in the state's management program.

This process will allow the Services to decide initially to transfer management authority to a state based on a management program containing proposed laws and policies but requires those laws and policies to be adopted before management authority ultimately is transferred to the state. The Service's initial determination to transfer management will give the state reasonable assurance that its management program, including the laws and policies it intends to enact, meets the requirements of the Act and these regulations. The state can then adopt the laws and policies submitted in proposed form, conduct its hearings and make its determinations under §403.04, and develop and implement any cooperative allocation agreement required under §403.05(a).

This process also assures the public that the management program the state ultimately adopts will be substantially the same as the program on which the public had an opportunity to comment. If, after issuing proposed rules to transfer management authority to the state, the Service finds that the state has failed to adopt laws and policies substantially the same as those submitted in proposed form in the state's management program (*e.g.*, the laws and policies adopted fail to accord the same approximate level of protection to the species, or otherwise merit resubmission of the state management program for public review and comment under §403.03), the Service will not issue final regulations transferring management authority to the state. In that case, the state's recourse is to adopt laws and policies substantially the same as those submitted in proposed form in its management program. Alternatively, the state could submit a new or revised management program which the Service would consider pursuant to §403.03(f)

B. *Other Provisions.*

Paragraph (b) of § 403.03 lists those components of the state management program which must be submitted in the request for a transfer of management authority. In the case of Alaska, paragraph (d) lists additional mandatory components relating to subsistence uses of marine mammals. These requirements are the minimum necessary to enable the appropriate Service to make the determinations required by section 109(b)(1) of the Act.

Section 403.03(b)(1) requires the state to list the scientific and common names and estimated range of the species of marine mammals for which it seeks managment authority. A state may request the transfer of management for more than one species. If this is the case, those components of the state managment program that apply to more than one species do not need to be repeated for each species. Rather, the state should list the species and the components of the state management program that apply to some or all of the species. Those components of the state management program that apply to individual species should be so designated. The state should discuss which components apply generally to all species and which apply specifically to individual species in the narrative discussion required by § 403.03(a)(2).

Several commentators objected to the use of the word "provisions" to describe what aspects of the state management program must be submitted in the request for a transfer of management authority. *See*, e.g., § 403.03(b)(2). By use of the word "provisions" it was intended that some form of state law such as statutes or regulations provide for the applicable requirements. The regulations are amended by use of the phrase "provisions of state law" where appropriate to clarify this intention.

The basic premise of section 109 of the Act and these regulations is that a state to which management authority has been transferred for a given species is to regulate the taking of that species so as to prevent its population from declining below its OSP. However, the Act provides that in the case of Alaska, subsistence taking may be allowed even if the species is below its OSP, as long as the amount of subsistence take will nevertheless permit the species to

VOL

ISS
97
MY
18
1983
UMI

increase toward its OSP. Paragraph (b)(2)(iii) of this section reflects this distinction.

The State of Alaska requested confirmation of its interpretation of paragraph (b)(2)(ii)(A) concerning the transfer of management authority for a species that is below OSP. Alaska believes that section 109(b)(1) (C) and (D) of the Act contemplates transfer of management authority in this case as long as taking is not permitted, or in the case of subsistence take in Alaska, as long as the subsistence take determination does not preclude a species from "eventually attaining OSP." However, Alaska's interpretation is not entirely consistent with the MMPA. In fact, section 109(b)(1)(D) of the Act states that Alaska may not permit subsistence taking of a number of animals that "would be inconsistent with the maintenance of the species at its OSP." As indicated above, we interpret this language to mean that taking is permitted as long as the amount of subsistence take will nevertheless permit the species to *increase* toward its OSP. Taking of a species below its OSP for subsistence purposes may not be permitted at a level that will prevent the species from increasing in numbers. *See* H.R. Rep. No. 97–288, 97th Cong., 1st Sess., p. 23 (1981).

One commentator was confused over the regulation of take of marine mammals for scientific research or public display purposes. Section 403.03(b)(2)(iv) of the regulations as proposed and adopted requires the state not to permit take for scientific research and public display purposes with two exceptions: (1) Take for scientific research or public display purposes by or on behalf of the state; (2) take for scientific research or public display purposes pursuant to a Federal permit (see 50 CFR 18.31 and 216.31).

This scheme is explicitly required by the Act. Section 109(b)(1)(E) of the Act provides that the state may only *permit* take for scientific research and public display purposes when done by or on behalf of the State. Management of all other take for scientific research and public display purposes is retained by the Services even after transfer of marine mammal management authority to the state. *See* H.R. Rep. No. 97–228, *supra* at 23. The Services regulate this take pursuant to permits granted under 50 CFR 18.31 and 216.31. The state may not *prohibit* takings for scientific research or public display conducted pursuant to Federal permits. (Review of Federal permits to assure consistency with state management is provided by § 403.05(c)). (See H.R. Rep. No. 97–228, *supra*.) Thus, § 403.03(b)(2)(iv) requires that the state not permit all but these two types of scientific research and public display take; it does not authorize the state to *permit* any scientific research and public display take other than that by or on behalf of the state.

One commentator requested a provision to ensure state review of scientific research and public display permits issued by the Federal government for species that have not been transferred to the state, so that the state may review such permits for possible interference with management plans for other species that are within its jurisdiction. The MMPA does not authorize a state to review and disapprove scientific research and public display permits regarding species for which management authority has not been transferred to that state. If management authority is transferred to a state for a given species, then the Act authorizes that state to review and approve or disapprove an application for a permit to take a live specimen of that species within the state or its territorial waters for scientific research or public display purposes. Section 104(d) of the MMPA provides public review procedures for scientific research and public display permits. The Services publish notices of receipt of an application for the take of any marine mammals for scientific research and public display purposes in the **Federal Register**. Written comments are invited from all interested parties, including the states. A hearing may also be requested on such permits. Notice of the issuance or denial of any such permits is also given in the **Federal Register** and copies of these permits are available for review at the appropriate regional Service office.

One commentator believes that paragraph (b)(2) of § 403.03 contains no requirement that the state recognize the need to establish procedures for "incidental but not intentional taking." On the contrary, paragraph (b)(2)(v) requires that the state's marine mammal management program contains provisions of state law which "regulate the incidental taking of the species in a manner consistent with section 101(a)(2), (4) and (5)." Sections 101(a) (4) and (5) provide exceptions to the MMPA moratorium for incidental but not intentional taking of small numbers of marine mammals under certain circumstances.

The commentator further requested that there be a requirement that the state recognize "the potential for unexpected takes" and also stated that "[T]he difference between unexpected/incidental taking and capturing or killing is large, and we feel some recognition of this difference is warranted." The Act requires all "incidental taking", which includes "take(s)" as defined at 50 CFR 18.3 and 216.3 pursuant to MMPA section 101(a), to be regulated within a state either by the Federal government, or by the state if management authority for that species has been transferred. Congress made no distinction between unexpected incidental takings and capturing or killing except with respect to cooperative allocation agreements under Section 109(d). *See* H.R. Rep. No. 97–228, *supra* at 26.

One commentator suggested that we restrict the application of (b)(2)(v) of § 403.03 to species "within state waters" and eliminate reference to Federal regulations. This commentator believes that it is sufficient that state incidental take regulations are consistent with the Act and that any further Federal regulation would impose undue burdens on the state. The Services agree with this comment and delete the reference to Federal regulations in paragraph (b)(2)(v).

The Minerals Management Service (MMS) of the Department of the Interior commented that the effect of paragraph (b)(2)(v) could be that an oil, gas, geophysical survey or Outer Continental Shelf (OCS) development company may need to obtain permission to take marine mammals from one or more states for animals and individual activities in waters under state jurisdiction, as well as from the Federal agencies for animals and activities in areas seaward of state territorial waters. MMS believes that this situation could cause time delays and greatly escalate costs to both industry and the Federal government. MMS stated that these potential delays are inconsistent with the OCS Lands Act, as amended, and Administration policy regarding our nation's energy resources. MMS recommended, therefore, that reference to section 101(a)(5) be eliminated from § 403.03(b)(2)(v) and that authority to authorize incidental taking under section 101(a)(5) of the Act be retained by the Federal agencies.

Section 109(b)(3)(B) of the Act provides that following transfer of management authority for a given species, the Services retain authority to regulate only that incidental taking, provided for under section 101(a) (2), (4) and (5), which occurs within the 200-mile Fishery Conservation Zone (FCZ) described in section 3(14)(B) of the Act. Congress found that where management authority had been transferred to the state, and when the required

determinations and agreements have been made, the state will have exclusive authority to manage marine mammals within the state, including its territorial waters, except for the scientific research, public display, and health and welfare takings described earlier. Section 109(b)(3)(B) is intended to make this explicit. *See* H.R. Rep. No. 97–228, *supra* at 24. The Act, therefore, precludes adoption of the MMS suggestion in these regulations.

Paragraph (b)(3) of this section requires that the state program contain procedures for acquiring and evaluating data relating to OSP and the maximum allowable take of the species. The procedure for acquiring and reviewing such information need not comply with section 403.04 procedures pertaining to determining OSP and the maximum allowable take of species. However, if the review, which should be done at least annually, discloses that OSP and maximum allowable take determinations may need to be adjusted, the state must use the procedures required by § 403.04 in making these adjustments. Two commentors recommended that the word "annually," as provided in the preamble to the proposed regulations, be inserted in paragraph (b)(3), and we have adopted this recommendation.

Paragraph (b)(6) of this section lists certain aspects of the state management program which must be considered by the appropriate Service in making a determination as to whether the state's program is consistent with the Act. The description of the organization of state offices involved in the administration and enforcement of the state management program need describe only the various responsibilities of these offices as they relate to marine mammal management and how these offices relate to one another. In the latter regard, an organizational chart would be helpful. Paragraph (b)(6)(ii) relates to permits involving marine mammals. The state should describe what types of permits apply to actions involving marine mammals, the laws under which such permits are granted, and what factors guide discretion on permit applications. The state should discuss, pursuant to paragraph (b)(6)(iii), certain aspects of judicial review such as the courts which have jurisdiction to review administrative decisions, who may challenge administrative decisions, the scope of judicial review, and the range of available remedies. The state should discuss, pursuant to paragraph (b)(6)(iv), such aspects of administrative rulemaking as notice procedures, public comment requirements, *ex parte* rules and hearing requirements.

Although paragraphs (b)(6)(ii) through (b)(6)(iv) pertain to state laws on specific aspects of marine mammal management, copies of these laws do not need to be included with those provided pursuant to § 403.03(a)(1). A general description of the provisions, limitations and exceptions of these laws will be sufficient.

Paragraph 403.03(c) requires the state to submit in its request for the transfer of management authority certain supplementary information pertaining to the state management program. This information need only be submitted in summary form. It is believed that compiling the information in this form will not unduly burden the state, yet will provide the appropriate Service with a baseline from which to evaluate the proposed administration of marine mammal management by the state.

Two commentators requested greater specificity in the requirements of paragraphs (b)(6) and (c) of this section to provide Federal agencies and the public with more detailed information. We have carefully reviewed the text of the proposed and adopted paragraphs (b)(6) and (c) and have determined that these provisions require sufficient information to ensure that the public can have adequate notice of and information on the state management program and to support a finding of consistency with the goals and policies of the Act. Thus, we have adopted paragraphs (b)(6) and (c) as proposed.

Paragraph (d) of § 403.03 pertains to regulation of subsistence use of marine mammals in Alaska as provided by section 109(f) of the Act. Several commentators remarked that § 403.03(d) was confusing as written and much in need of clarification and reorganization. In addition, commentators remarked that section 109(f)(1) of the Act specifies the form in which Alaska's subsistence program must be submitted. That is, statute *and* regulations must be adopted governing certain aspects of the subsistence program; statutes *or* regulations must be adopted governing others. Accordingly § 403.03(d) is reorganized both to clarify the requirements of a submission by Alaska concerning subsistence use and to reflect the form of legal authorities required by the Act.

Other minor changes are made in § 403.03(d) in response to comments. For example, paragraph (d)(1)(ii) of the proposed regulations (now (d)(2)(ii)) is amended to include examples from the legislation of some types of economic opportunities, at the request of several commentators. In addition, the proposed regulations provided, in conformance with section 109(f)(1)(B) of the Act, that nonsubsistence use can be authorized only if certain findings are made on the basis of the administrative record before the state agency. Section 403.03(d)(2)(iii) of the final regulations is added to ensure that written findings are made in suppport of the state agency's determinations. A new § 403.03(d)(3) is added to parallel the general requirement of § 403.03(a)(2) that the state request include a narrative discussion explaining its program in terms of the requirements of the Act. Section 403.03(d)(3) requires that the State of Alaska provide a discussion specific to the regulation of nonsubsistence consumptive uses of marine mammals and their effect on subsistence users.

Several commentators suggested the need for specific information on this issue and requested amendment of paragraph (d) to require that the State of Alaska provide this information in its request for marine mammal management authority. We disagree with the recommendation to add additional requirements to these regulations when the Act does not specifically require them. However the following are examples of the types of information the state should provide in the narrative discussion required by paragraph (d)(3): A description of: (1) The types of nonsubsistence consumptive uses which may be authorized for each species; (2) how nonsubsistence consumptive uses of a marine mammal species will be regulated to provide economic opportunities to residents of rural coastal villages of Alaska who engage in subsistence uses of the species; (3) any permit or licensing system relating to the taking of a marine mammal species for nonsubsistence uses, the licensing of marine mammal hunting guides, the designation of marine mammal guiding areas, and the assignment of such areas to marine mammal hunting guides; (4) any laws which authorize and establish the standards for granting or withholding such permits and licenses; and (5) the procedures used in granting or withholding such permits or licenses. In any event, the narrative discussion required by paragraph (d)(3) must provide the Services with a clear explanation of how the state's program satisfies the requirements of section 109(f) of the Act.

Additionally, it should be noted that § 403.03(d)(1)(iv) requires that the state submit a statute and regulations ensuring that takings for subsistence

VOL 48 ISS 97 MAY 18 1983 UMI

uses are accomplished in a non-wasteful manner. For an example of the FWS's position on what constitutes takings in a "wasteful manner," see the definition of "wasteful manner" in 50 CFR 18.3.

One commentator suggested that provisions for subsistence take in Alaska apply only to Alaskan natives and their families, not all rural Alaska residents. This is contrary to the requirements of the MMPA. Section 109(f)(2) of the MMPA clearly defines the term "subsistence use" to be the "customary and traditional uses by rural Alaska residents". Although the legislative history of the Act, as cited by the Defenders of Wildlife in their comments, does speak of "Alaskan Natives," *see* H.R. Rep. No. 97–228, *supra* at 28, this does not limit the definition for several reasons.

First, Congress recognized that the subsistence use provisions of section 109 of the MMPA are similar to those of Title 8 of the Alaska National Interest Lands Conservation Act (ANILCA), Pub. L. 96–487. H.R. Rep. No. 97–228, *supra* at 28. The only difference between the two subsistence provisions is that "customary trade is not included within the purview of section 109 [of the MMPA]". Congress further stated that:

> The section 109(f)(2) definition of subsistence uses is identical to the definition of the same term in section 803 of ANILCA in that it defines subsistence uses as the customary and traditional uses by rural Alaska residents for the personal and family consumption purposes set forth in section 803.

Id. Since the ANILCA subsistence provisions apply to both native and non-native rural Alaska residents, *see* S. Rep. No. 96–413, 96th Cong., 1st Sess., p. 233 (1979), so do the subsistence provisions of section 109 of the MMPA.

Second, marine mammal management authority could not be transferred to Alaska, the only state to which the subsistence provisions of section 109(f) of the MMPA apply, if subsistence provisions of section 109(f) were limited to Natives. Congress noted that Alaska interprets its Constitution as prohibiting any discrimination between its citizens on the basis of race, thereby precluding transfer of management authority to Alaska unless the subsistence provisions were racially neutral. *See* H.R. Rep. 97–228, *supra* at 12.

Thus, the subsistence provisions of section 109 of the MMPA apply to rural Alaska residents independent of race. It should be noted, however, that under section 101(b) of the MMPA, the subsistence priority when the Federal Government is exercising management authority is limited to Alaskan Natives.

Paragraph (e) of § 403.03 provides procedures for the appropriate Service's informal review of a request for transfer of management authority. The preliminary review procedures of paragraph (e) are not designed as a mechanism for piecemeal review of the state's management program. This subsection can be used either to gain guidance on an entire program before formal submission, or as a means of evaluating proposed aspects of the state management program before final enactment and submission.

As explained above, the Services incorporated informal rulemaking procedures for approving state management programs and transferring management authority to states in § 403.03 (f) through (h). One commentator suggested that a public comment period of at least 90 days be established. The Services believe that 90 days is excessive, but agree to the need for a minimum comment period to assist states and Federal agencies in planning and to assure adequate time for public involvement especially in rural areas. Accordingly, we have revised paragraph (f) to include a comment period of 60 days.

Section 403.04

This section describes procedures which the state must provide for in its management program and employ in determining the OSP of a given species and the maximum allowable number of animals that can be taken without reducing the population below OSP. These procedures are required by section 109(c) of the Act.

In response to public comments, we have made the following minor revisions to this section. The first sentence of paragraph (c) has been amended to read "The state agency with responsibility for managing the species in the event management authority is transferred to the state * * *," since at this point in the process management authority has not yet been transferred. A typographical error ("uses" should be "issues") has been corrected in paragraph (f)(5) and in paragraph (g)(1) the term "may" has been replaced by the word "shall" which does not change the intent of this paragraph. Finally, paragraph (g)(3) has been revised by the addition of the phrase "and the hearing record" at the end of this paragraph to clarify that both the hearing record and the decision document must be available for public inspection.

Several editorial changes were suggested by a number of commentators concerning the timing and specific content of documents. These suggestions have not been adopted. In our view the requirements of section 109(c) of the Act are already rigorous and specific and need no further elaboration.

One commentator requested an addition to paragraph (b) that would require states to consider the impacts on state residents and on operations in state and national interest (i.e., oil and gas development) when making any changes in regulations establishing bag limits, quotas, seasons, areas, manner of take, etc. Neither the Act, nor the House Report accompanying the 1981 amendments, contains any reference to a priority allocation of marine mammals for oil and gas development purposes. This commentator also requested some provision for public comment on proposed changes in these state regulations. Public notice provisions of state rulemaking procedures will provide the opportunity for public review of proposed changes in state regulations.

Paragraph (c) requires that a state make an initial determination regarding OSP and maximum allowable take. One commentator recommended that this paragraph also require the state to determine the current population size of the species or stock, its OSP and then whether or not it is within that range. Section 403.04 and the OSP definition at § 403.02 reflect Congressional intent concerning the findings the state must make in the OSP hearing, *see* section 109(b)(1)(C) of the Act, and therefore provide sufficient guidance to states on their responsibilities under this section.

One commentator noted that biological data may be lacking concerning certain marine mammal species, and that the appropriate Service should participate in the OSP determination rather than simply review the results of a state determination. The Services intend to make available all information on marine mammal species and any expertise needed by state agencies or the public throughout the state's OSP proceedings. The Services may also choose to submit evidence at an OSP hearing just as any other interested party. It should be emphasized however that the OSP and maximum allowable take determinations are solely the responsibility of the state and are a prerequisite to transfer of management authority for a species.

Paragraph (f) describes procedures which must be employed in the hearing itself. The hearing must be transcribed verbatim. In accordance with the Act, final determinations must be based on the best available scientific information. This information must be of sufficient quantity and quality to ensure that any taking will be consistent with the maintenance of OSP. *See Committee for Humane Legislation* v. *Richardson*, 414 F. Supp. 297 (D.D.C. 1976), *aff'd*, 540 F. 2d 1141 (D.C. Cir. 1976).

Interested persons must be afforded the opportunity to participate in the hearing to the extent specified in paragraph (f)(3). Other aspects of hearing procedures are left to the discretion of the presiding officer(s) in accordance with state law.

One commentator questioned the intent of Congress concerning the standing of written testimony that is not orally presented at a hearing conducted pursuant to § 403.04. Congress specifically found that a state may not rely on evidence, oral or written, which is not presented at the hearing. All written documents, therefore, must be entered into the record by a person able, by virtue of training and experience, to respond fully to cross-examination regarding the facts and conclusions contained in the written material. *See* H.R. Rep. No. 97–228, *supra* at 25. Sections 403.04(f)(3) and 403.04(g)(1) are intended to make this explicit.

One commentator suggested that a specific time period be established for the review and final determination process described in paragraph (g). We believe that the states, because they are most familiar with resources available to them, are in the best position to determine appropriate time periods for review of the hearing record and decisions on the issues relevant in the OSP hearing.

Section 403.05

This section describes Federal and state responsibilities after transfer of management authority. Several minor changes have been made to this section including substituting the word "transferred" for the word "returned" in paragraphs (c) and (d), when referring to the process for transferring authority for marine mammal management to states. The word "returned" is reserved for that process whereby management authority is returned to the Federal Government pursuant to § 403.07. Paragraph (c) has also been revised in response to a comment by the addition of the phrase "together with the basis for such finding" in the first sentence of paragraph (c)(1). This is to clarify that the Service is to receive specific information on the reasons for a state's finding that the issuance of a permit would not be consistent with the state management program for a given species.

Several commentators asked that the Services explain the requirements for cooperative allocation agreements in § 403.05. The State of Alaska suggested language explaining this provision in terms of Congressional intent and providing a description of the cooperative allocation agreement and the process by which it will be developed:

> Paragraph (a) describes the cooperative allocation agreement. In the case of a species whose range extends beyond the territorial water of the state, this agreement is a prerequisite to the transfer of management authority. . . . This instrument was designed by Congress to ensure that the state does not preempt all available take so as to preclude federal incidental take determinations in the FCZ, and to ensure that the Secretary does not make unjustifiable claims respecting numbers of animals purported to be needed to carry out his responsibilities under section 101 of the Act. Thus, it is anticipated that after the State has made its determination as to maximum allowable take, the [Service] will provide its judgment as to the number of animals that will be taken in the FCZ pursuant to federal incidental take determinations. The State will compare this number to its determination of maximum take and also, in the case of Alaska, to that necessary for subsistence use. Priority of allocation is given first to taking for subsistence purposes, in the case of Alaska, and secondly to incidental taking within the FCZ under the authority of section 101(a). The cooperative allocation agreement [including the procedures required by section 109(b)(1)(G) of the Act and 403.03(b)(4) of these regulations], therefore, is designed to provide [that] . . . (1) the state [does not] assert the need for a number of animals for subsistence uses which is not supported by historical experience or fact and which would preclude the occurrence within the FCZ of commercial fishing or other activities involving the incidental taking of marine mammals, or (2) the Secretary [does not] make unjustifiable claims regarding the number of marine mammals necessary for the Secretary to carry out his responsibilities pursuant to section 101(a). It is not intended that the cooperative allocation agreement be a vehicle by which the Secretary can assert that the State has provided inadequate numbers of marine mammals for subsistence uses.

The State of Washington believes that the allocation of maximum allowable take, provided for in the cooperative allocation agreement in paragraph (a), would entail a joint effort in determining OSP both in and out of state waters. It recommends that these regulations include further information on the Federal methodology and procedures to be utilized in such a joint determination.

As indicated above in the discussion of § 403.04, the scientific and technical expertise of the Services is available to states requesting assistance in developing their initial OSP determination pursuant to that section. However, it is the state, and only the state, which has the authority and responsibility to determine OSP and maximum allowable take for species pursuant to section 109 of the Act. There are no joint Federal/state OSP determinations for species whose range extends beyond territorial waters of the state. The state's OSP and maximum allowable take determinations will apply within the FCZ pursuant to section 109(b)(3) and shall be treated within this zone as a Secretarial determination made in accordance with section 103 and as an applicable waiver of the moratorium under section 101(a). *See* H.R. Rep. No. 97–228, *supra* at 25.

The State of Washington, and other commentators, identified a problem which may arise concerning the management of species that migrate through the jurisdictions of two or more states. The cooperative allocation agreement described in paragraph (a) and further explained above, applies only between a state and the Federal Government. This does not preclude however the development of cooperative agreements between states on joint OSP research for the purpose of developing a data base to be used in the OSP determinations of one or more adjacent states for that species. We encourage the development of such cooperative agreements among states which may share management for a species.

One commentator requested a definition of the term "incidental take" as used in paragraph (a). Because cooperative allocation agreements concern that taking provided for under section 101(a) of the Act, the Services believe no additional definition of "incidental take" is necessary for § 403.05(a). *See* H.R. Rep. No. 97–228, *supra* at 26. Another commentator requested that some priority consideration in allocation be provided for non-commerical fishing incidental take under section 101(a)(5); however, no such priority was established in the 1981 Amendments for this type of take.

Paragraph (d) of section 403.05 encourages the state and the appropriate Service to cooperate, to the maximum extent practicable, in conserving the species of marine mammals. Three commentators requested clarification of this paragraph. The State and Federal cooperation in marine mammal conservation activities may include joint efforts involving marine mammals (e.g., research and enforcement) and does not preclude the state agency from entering into other agreements with its citizens or other parties for conservation purposes. The Federal role in monitoring and reviewing the implementation of state programs is explained under § 403.06 below.

VOL 48 ISS 97 MY 18 1983 UMI

Section 403.06

This section provides procedures for the monitoring and review of the state management program. Under section 109(e) of the Act, the Services have responsibility, after management authority has been transferred to the state, to monitor the state's implementation of its program. To facilitate this review process, paragraph (b) requires the state to submit an annual report on its management of the species, and paragraph (c) requires a report whenever either of the two events listed in that subsection occur.

Several minor changes have been made in this section. Paragraph (a) has been revised to include the phrase "implementation of" to emphasize that the Services must monitor and review the implementation of the state's program. In paragraphs (b) and (d) the words "transfer" or "transferred" have been substituted for the words "return" or "returned," and in paragraphs (b)(1) and (c)(1) the term "law(s)" has been substituted for the phrase "laws or regulations" as discussed earlier. In paragraph (b)(9), pertaining to "other information" that may be requested from the state, the phrase "consistent with the Act as amended" has been added to clarify that "other information" must pertain to the Act and to its requirements. Finally, in paragraph (d) we have added the phrase "and at the appropriate regional office of either Service" in response to several requests. To provide greater public access to reports submitted pursuant to this section, reports will be available for inspection at the appropriate regional offices of the Services as well as in the Washington, D.C. offices of the FWS and the NMFS.

Paragraph (b) defines the components of the annual report. Any changes in the state laws provided in the original request pursuant to § 403.03(b) and, in the case of Alaska, § 403.03(d), must be described in the annual report. The report should include a discussion of how such changes affect implementation of the management program. However, the extent of each discussion should be proportional to the importance of that change. For example, a change in rulemaking procedures (§ 403.03(b)(6)(iv)) may require less attention than a change in laws concerning the take of the species (§ 403.03(b)(2)).

Paragraph (b)(3) of § 403.06 requires the state to provide a summary of all available information relating to takings under the state management program. Two commentators suggested this provision as it relates to the State of Alaska and takings for subsistence uses be explained. For the State of Alaska, the summary must include takings which have been authorized for subsistence purposes, takings which have been authorized for nonsubsistence consumptive uses, and a discussion of how the regulation of nonsubsistence consumptive uses has, to the maximum extent practicable, provided economic opportunities for the residents of rural coastal villages of Alaska who engage in subsistence uses of marine mammal species.

One commentator requested that paragraphs (b) and (c) require states to report all available information on the causes of marine mammal mortality. Information on marine mammal mortality must be supplied under paragraphs (b) (2), (3), (5), and (7), and under (c)(2) if the extent of mortality may warrant reconsideration of the OSP and maximum allowable take determinations.

Paragraph (c) of this section requires the state to report the occurrence of either of two specified events: a change in relevant state law that may impair the implementation of the state's program, or a significant occurrence or new information that may warrant reconsideration of the determinations made under § 403.04. These events concern either the very foundation of the state management program or the status of the species involved and, therefore, require immediate review by the appropriate Service.

The report should describe the event and how it affects marine mammal management. The extent of discussion should correspond to the magnitude of the problem for either the state management program or the species. For example, a change in regulatory procedures for acquiring and evaluating data relating to OSP (§ 403.03(b)(3)) may require less discussion than significant new information that warrants reconsideration of the state's OSP and maximum allowable take determinations for a species.

One commentator recommended that a specific timeframe for the filing of paragraph (c) reports be established. We have added a specific time period to paragraph (c) (45 days), but any significant event which may require an emergency reconsideration of a state management plan is to be communicated to the appropriate Service as soon as possible within this new 45-day period.

Several commentators objected to the wording of paragraph (c)(1) which requires the state to report any change in a relevant statute or regulation *which might impair the state's ability to implement the program.* These commentators felt that the state should report all changes to relevant statutes and regulations.

The report required by paragraph (c) is distinct from the annual report and is intended to provide the opportunity for emergency review of significant events. States need not report under paragraph (c) minor changes in statutes and regulations, such as changes in time periods or minor procedural revisions. In our view, a requirement to report any minor changes would be unnecessarily burdensome on the states. Instead, states must report, under § 403.06(b)(1), on an annual basis all changes in laws submitted pursuant to § 403.03 (b) and (d). The appropriate Service must be alerted as soon as possible to changes which might impair the state's ability to implement its marine mammal management program. Although some commentators suggested that this standard was vague and did not provide assurance that significant changes would be immediately reported by the state, no change has been made in this standard. The state will be in the best position to judge immediately the effect of a change in state laws governing its program. By use of the phrase "may impair," doubtful situations must be resolved in favor of reporting the change to the Service. In addition, any change in the state management program that will qualify for immediate reporting is likely to be widely known. Concerned citizens or organizations can therefore play an important role in keeping the Services informed about changes in the state management program.

Section 403.07

This section provides procedures and standards for the Service's review of state management of a species of marine mammals and revocation of management authority. In addition, this section provides procedures for the state's voluntary return of management to the appropriate Service.

Numerous editorial and minor revisions have been made to this section in response to commentators' suggestions. Again, the word "transferred" has been substituted for the word "returned" when referring to the transfer to a state. "Returned" refers only to the return of management from a state to the Federal Government pursuant to this section. The word "implementation" has been added to paragraph (a) to clarify that implementation of the program is subject to review by the Services. Throughout this section, "approved management program" has been substituted for the term "request for return of management authority" since the program being implemented, and therefore subject to review, is the management program that was approved. Paragraph (a)(1) has been changed to provide that after the Service has received information concerning implementation of the state management program, the determination of whether or not the state is in compliance with the Act and the regulations must be made within 30 days. In paragraph (a)(2) the phrase "and invite public comments thereon" has been inserted following the provision that notice be published in the **Federal Register**, to clarify our intent that the public have an opportunity to review the Service's decision to revoke. The phrase "or unless otherwise agreed upon" has been added to the end of paragraph (b)(1) to accommodate the possibility that a state may be able to advise the appropriate Service of its intent to return management well in advance of the effective date. In paragraph (b)(2) the words "and management" have been inserted following the word "conservation," to clarify that the implementation of all aspects of the state management program is of concern.

Paragraph (b)(2) of § 403.07 provides a mechanism for the return of marine mammal management authority to the appropriate Service should any aspect of the state management program be enjoined by court order so as to preclude effective conservation and management of the species. The State of Washington, in commenting on this provision, noted that there is no vehicle for "re-transfer" of management authority to the state should the injunction be dissolved or the matter causing the return of management to the Service otherwise be satisfactorily resolved. It is not the intent of these regulations to require resubmission of an entire state management program pursuant to § 403.03 should the events noted by the State of Washington occur. For example, if a preliminary injunction that caused management authority to be returned to the Service is dissolved, or should a final injunction be denied, the state management program for which management authority had originally been transferred would be revived and continue to apply. Likewise, if a final injunction is issued but the defect cured through, for example, state legislation, the original state management program, as amended by the curative legislation, would comply with this Part provided the new legislation cured that aspect of the state management program which had been enjoined.

Accordingly, § 403.07(b)(2) is amended by adding a sentence providing that when management authority has been returned to the appropriate Service pursuant to § 403.07(b)(2), it may be returned to the state ("re-transferred") should, in the judgment of the Service, the cause for return be alleviated in such a way as to ensure that the state's management program provides effective conservation and management of the species. Compliance with § 403.03 procedures is not required for this type of "re-transfer."

Several aspects of this provision should be noted. It applies if the state has concluded that the injunction precludes effective conservation and management of the species under the state management program and has, therefore, voluntarily returned management under § 403.07(b)(2). It also applies if the state notifies the appropriate Service that effective conservation and management is not precluded because of the injunction, but the Service has decided otherwise and revoked management authority pursuant to § 403.07(a). In order for the state to take advantage of the "re-transfer" provision of § 403.07(b)(2), the state should notify the Service of the resolution of the matter. This notification should specify how the matter has been resolved and describe why the state believes effective conservation and management of the species under the state management program is now possible. In addition, the ability to take advantage of the "re-transfer" provision of § 403.07(b)(2) assumes that no other aspect of the state management program other than that which was the subject of the injunction has been impermissibly altered since the injunction was issued. If another aspect of the state management program has been altered, the state must report this change in the notice to the Service that the cause for the injunction has been cured. The Service will review this change in the state management program as if it was reported pursuant to § 403.06(c). After the state has provided notice to the Service that the cause for the injunction has been cured (including the description of any other changes in the state management program), the Service may "re-transfer" management authority if, in their judgment, a certain standard is met. This standard is the same as for the original transfer of management to the state as set forth in § 403.03(h). If the Service declines to "re-transfer" pursuant to § 403.07(b)(2), the state may regain management authority only by complying with § 403.03.

One commentator requested guidance on the meaning of the term "substantial factual information" as used in paragraph (a). We are unable to be more specific in this regard. All information will be judged on a case-by-case basis. The Services retain an oversight responsibility under section 109 of the Act following transfer of management authority to a state and anyone may report any type of information to the appropriate Service concerning the implementation of a state management program. However, this procedure is not intended to provide a forum for arbitrary or unfounded statements by individuals opposed to state management per se.

One commentator noted that paragraph (a)(2) requires publication of a notice of intent to revoke management, but does not require publication of a contrary determination following receipt of any substantial factual information concerning the implementation of the state program. Since a finding that the state is in compliance with the Act and these regulations does not change the status quo, no general public notice is required. The individual or organization providing information to the Service will be informed of the decision pursuant to the Services' policy of responding to public inquiries and correspondence.

Two commentators noted that there is no provision under paragraph (a)(2) allowing the Services to impose an immediate emergency moratorium on taking within the state. There is no authority under the Act for such action by the Services.

One commentator requested that additional language be included in this section to require revocation of state management authority in the event that the state does not give adequate consideration to activities that are in the national interest, such as siting of energy facilities. No such authority exists under the Act.

Section 403.08

This section provides notification of the states to which management has been transferred. Accordingly, it will be updated from time to time when management has been transferred to a new state or for a new species.

This section has been revised to include reference to cooperative allocation agreements where they apply. The Marine Mammal Commission also requested the addition of reference to any state regulations adopted by the Services under § 403.05(b). However, we

VOL 48 ISS 97 MAY 18 1983 UMI

intend to place these regulations, if and when adopted, under a separate section of this Part.

Applicability to Other Laws, Regulations and Requirements

Environmental assessments have been prepared in conjunction with these proposed regulations. They are available at the addresses noted in the preamble to this final rule. Based on the environmental assessments, the Department of the Interior and the Department of Commerce determined that the proposed rule would not be a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(c).

The Department of the Interior and the Department of Commerce have determined that this is not a major rule and does not require preparation of a regulatory impact analysis under Executive Order 12291.

The Departments have also determined that this rule will not have a significant economic impact on a substantial number of small entities and thus a regulatory impact analysis need not be prepared under the Regulatory Flexibility Act, 5 U.S.C. 601. (The determinations by the FWS under Executive Order 12291 and the Regulatory Flexibility Act are discussed in more detail in a Determination of Effects which has been made a part of the Administrative record.)

The information collections contained in this final regulation are not subject to Office of Management and Budget clearance under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since there are expected to be fewer than ten respondents annually.

Primary Authors

The primary authors of this final rule are John Bardwell and W. Michael Young, Department of the Interior; and Georgia Cranmore and Gretchen Beck, Department of Commerce.

Regulation Promulgation

For the reasons set out in the preamble, Subpart F of Part 18, Title 50, Code of Federal Regulations and Subpart H of Part 216, Title 50, Code of Federal Regulations are removed and replaced with the following references and new Part 403:

PART 18—[AMENDED]

Subpart F—Transfer of Management Authority to States

Regulations governing the transfer of management authority to states pursuant to Section 109 of the Marine Mammal Protection Act for marine mammal species under the jurisdiction of the Secretary of the Interior are found at Part 403 of this Title.

PART 216—[AMENDED]

Subpart H—Transfer of Management Authority to States

Regulations governing the transfer of management authority to states pursuant to Section 109 of the Marine Mammal Protection Act for marine mammal species under the jurisdiction of the Secretary of Commerce are found at Part 403 of this Title.

PART 403—TRANSFER OF MARINE MAMMAL MANAGEMENT AUTHORITY TO STATES

Sec.

403.01 Purpose and scope of regulations.
403.02 Definitions.
403.03 Review and approval of state request for management authority.
403.04 Determination and hearings under section 109(c) of the MMPA.
403.05 State and Federal responsibilities after transfer of management authority.
403.06 Monitoring and review of state management program.
403.07 Revocation and return of state management authority.
403.08 List of states to which management authority has been transferred.

Authority: 16 U.S.C. 1361 *et seq.*, as amended by Pub. L. 97–58.

§ 403.01 Purpose and scope of regulations.

The regulations contained in this Part implement section 109 of the Act which, upon a finding by the Secretary of compliance with certain requirements, provides for the transfer of marine mammal management authority to the states.

(a) The regulations of this Part apply the procedures for the transfer of marine mammal management authority to a state, the form and minimum requirements of a state application for the transfer of management authority, the relationship between Federal and state wildlife agencies both prior and subsequent to the transfer of management authority, and the revocation and return of management authority to the Federal Government.

(b) Nothing in this Part shall prevent: (1) The taking of a marine mammal by or on behalf of a Federal, state or local government official, in accordance with sections 18.22 or 216.22 of this Title and section 109(h) of the Act, or (2) the adoption or enforcement of any state law or regulation relating to any marine mammal taken before December 21, 1972.

(c) The information collection requirements contained in §§ 403.03, 403.06, and 403.07 of this Part do not require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*, because there are fewer than 10 respondents annually.

§ 403.02 Definitions.

The following definitions apply to this Part:

(a) The term "species" includes any population stock.

(b) "Optimum Sustainable Population" or "OSP" means a population size which falls within a range from the population level of a given species or stock which is the largest supportable within the ecosystem to the population level that results in maximum net productivity. Maximum net productivity is the greatest net annual increment in population numbers or biomass resulting from additions to the population due to reproduction and/or growth less losses due to natural mortality.

(c) "State management program" means existing and proposed state statutes, regulations, policies and other authorities which form the framework for the conservation of a species of marine mammals.

(d) "State regulation" means the whole or part of a state agency statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law or policy or describing the organization, procedure, or practice requirements of a state agency and which is duly promulgated in accordance with established procedure.

(e) The "Act" means the Marine Mammal Protection Act (MMPA) of 1972, 16 U.S.C. 1361 *et seq.*, as amended by Pub. L. 97–58.

(f) The " Secretary" means the Secretary of the Interior or the Secretary of Commerce, depending on the species involved. Under Section 3(11) of the Act, the Secretary of Commerce has jurisdiction over members of the order Cetacea and members, other than walruses, of the order Pinnipedia; the Secretary of the Interior has jurdisdiction over all other mammals. These secretarial authorities have been delegated to the National Marine Fisheries Service and the Fish and Wildlife Service, respectively.

(g) The "Service" or "Services" means the Fish and Wildlife Service (FWS) and the National Marine Fisheries Service (NMFS), as appropriate depending on the species involved. Any determination or finding required by this Part to be made by the "Service" must be made by the Director of the FWS or by the Assistant Administrator of the NMFS, or their delegees, as appropriate.

§ 403.03 Review and approval of State request for management authority.

(a) Any state may request the transfer of management authority for a species of marine mammals by submitting a written request to the Director of the Fish and Wildlife Service ("Director") for species of marine mammals under the jurisdiction of the FWS, or to the Assistant Administrator for Fisheries of the National Marine Fisheries Service ("Assistant Administrator") for species of marine mammals under the jurisdiction of the NMFS. The request must include:

(1) Copies of existing and proposed statutes, regulations, policies and other authorities of state law which comprise those aspects of the state management program outlined in paragraph (b) of this section, and, in the case of Alaska, paragraph (d) (1) through (3) of this section;

(2) A narrative discussion of the statutes, regulations, policies and other authorities which comprise those aspects of the state management program outlined in paragraph (b) of this section, and, in the case of Alaska, paragraph (d) of this section, which explains the program in terms of the requirements of the Act and the regulations of this Part; and

(3) Supplementary information as required by paragraph (c) of this section.

(b) A request for transfer of marine mammal management authority will not be approved unless it contains the following:

(1) The scientific and common names and estimated range of the species of marine mammals subject to the state management program.

(2) Provisions of state law concerning the take of marine mammals that

(i) Require that the taking of marine mammals be humane as defined by section 3(4) of the Act;

(ii) Do not permit the taking of marine mammals until the following have occurred:

(A) The state, pursuant to the requirements of § 403.04 of this Part, has determined that the species is at its Optimum Sustainable Population (OSP) and determined the maximum number of animals that may be taken without reducing the species below its OSP, and, in the case of Alaska, when a species is below OSP, the maximum numbers that can be taken for subsistence uses while allowing the species to increase toward its OSP;

(B) The determination as to OSP and maximum take are final and implemented under state law; and

(C) A cooperative allocation agreement, if required under § 403.05(a) of this Part, is implemented;

(iii) Do not permit take in excess of the maximum number of animals that may be taken as determined pursuant to § 403.04 of this Part; provided that for Alaska, subsistence take may be allowed in accordance with paragraph (d) of this section, and if the species is below OSP, any level of take allowed for subsistence use shall permit the species to increase toward OSP;

(iv) Do not permit take that is for scientific research or public display purposes except such take by or on behalf of the state, or pursuant to a Federal permit issued under §§ 18.31 or 216.31 of this Title; and

(v) Regulate the incidental taking of the species in a manner consistent with section 101(a) (2), (4) and (5) of the Act.

(3) Provisions for annually acquiring and evaluating data and other new evidence relating to OSP of the species and the maximum allowable take, and if warranted on the basis of such evaluation, for requiring reevaluations of OSP and maximum allowable take determinations pursuant to § 403.04.

(4) Procedures for the resolution of differences between the state and the appropriate Service that might arise during the development of a cooperative allocation agreement pursuant to § 403.05(a) of this Part.

(5) Procedures for the submission of an annual report meeting the requirements of § 403.06(b) of this Part to the appropriate Service regarding the administration of the state management program during the reporting period.

(6) A description of—

(i) The organization of state offices involved in the administration and enforcement of the state management program;

(ii) Any permit system relating to the marine mammals, the laws that apply to such permits, and the procedures to be used in granting or withholding such permits;

(iii) State laws relating to judicial review of administrative decisions as they relate to the state management program;

(iv) State laws relating to administrative rulemaking as they relate to the state management program;

(c) In addition to the aspects of the state management program required to be submitted by paragraph (b) of this section, the state shall submit information, in summary form, relating to

(1) The anticipated staffing and funding of state offices involved in the administration and enforcement of the state management program;

(2) Anticipated research and enforcement activities relating to conservation of the species for which management authority is sought; and

(3) Such other materials and information as the Service may request or which the state may deem necessary or advisable to demonstrate the compatibility of the state management program with the policy and purposes of the Act and the rules and regulations issued under the Act.

(d) In addition to the requirements contained in paragraphs (b) and (c) of this section, a request for the transfer of marine mammal management authority by the State of Alaska must contain the following concerning subsistence use of the species:

(1) A statute and regulations concerning the take of marine mammals that ensure that

(i) The taking of marine mammals species for subsistence uses will be the priority consumptive uses of the species;

(ii) If restrictions on subsistence uses of the species are required, such restrictions shall be based upon the customary and direct dependence upon the species as the mainstay of livelihood, local residency, and the availability of alternative resources; and

(iii) The taking of marine mammal species for subsistence uses is accomplished in a non-wasteful manner;

(2) Statutes or regulations that ensure that the appropriate state agency will

(i) Authorize nonsubsistence consumptive uses of a marine mammal species only if such uses will have no significant adverse impact on subsistence uses of the species;

(ii) Regulate nonsubsistence consumptive uses in a manner which, to the maximum extent practicable, provides economic opportunities, including, but not limited to, licensing of marine mammal hunting guides and the assignment of guiding areas, for residents of rural coastal villages of Alaska who engage in subsistence uses of the species; and

(iii) Make written findings supporting the authorizations and regulations described in this paragraph based solely on the administrative record before the agency;

(3) A narrative discussion of the statutes or regulations required under paragraph (2) above, and any additional policies or procedures concerning the regulation of nonsubsistence consumptive uses of marine mammals. This discussion must explain how the State's program satisfies the requirements of Section 109(f) of the Act, namely that the regulation of nonsubsistence consumptive uses of marine mammals provides, to the maximum extent praticable, economic opportunities for the residents of rural coastal

VOL 48 ISS 97 MY 18 1983 UMI

villages of Alaska who engage in subsistence uses of the species.

(e) To assist states in preparing the state management program for submission, the Service will also, at the written request of any state, make a preliminary review of any aspects of the state management program. This review will be advisory in nature and shall not be binding upon the Services. Notwithstanding preliminary review by the Service, once any proposed aspect of the state management program has been prepared and submitted in final form, it shall be subject to final review and approval under paragraphs (f) through (h) of this section.

(f)(1) After receiving the state's request, for management authority, the Service shall make an initial determination on whether the state's management program meets the requirements of the Act and these regulations.

(2) Within 45 days after receiving the state's request, unless the state and the Service agree to another time period, the Service shall publish a general notice of its initial determination in the **Federal Register** together with, in the case of a positive determination, the text of a proposed rule to transfer management authority to the state. The general notice shall contain a summary of the major components of the state's management program and shall indicate where the full text of the management program may be inspected or copied. The public shall be allowed to submit written comments and to request an informal public hearing on the Service's initial determination and the state's management program within 60 days of publication of the general notice.

(g) If requested, the Service may conduct an informal public hearing after publishing 30 days' advance notice of the date, location, and time of such hearing in the **Federal Register.**

(h) After considering all comments and other relevant information, the Service shall publish in the **Federal Register** its final determination on whether the state has developed and will implement a management program that meets the requirement of the Act and these regulations. In the case of a positive final determination, the Service shall publish with the notice a final regulation transferring management authority for the species to the state after the following requirements are satisfied:

(1) The state's determinations pursuant to § 403.04 of this Part are final and implemented under state law;

(2) Any cooperative allocation agreement required under § 403.05(a) of this Part is implemented; and,

(3) The state has enacted and submitted to the Service laws and policies that are substantially the same as those provided pursuant to § 403.03(a) in proposed form in the state's management program.

§ § 403.04 Determinations and hearings under section 109(c) of the MMPA.

(a) *Introduction.* In order to gain approval of its marine mammal management program the state must provide for a process, consistent with section 109(c) of the Act, to determine the optimum sustainable population of the species and the maximum number of animals that may be taken from populations it manages without reducing the species below OSP. The state process must be completed before the state may exercise any management authority over the subject marine mammals, and it must include the elements set forth below.

(b) *Basis, purpose, and scope.* The process set forth in this section is applicable to and required for only the determination of the OSP of the species and maximum number that may be taken without reducing it below its OSP and, in the case of Alaska if the species is below OSP, the maximum number of animals that may be taken, if any, for subsistence uses without preventing the species from increasing toward its OSP. The state need not allow the maximum take, as determined in accordance with this process, that is biologically permissible. The state may change regulations establishing bag limits, quotas, seasons, areas, manner of take, etc. within the maximum biologically permissible take pursuant to its other rulemaking criteria, authority, and procedures. Compliance with the process set forth in this section would not be required again unless the state proposes to modify its determinations of the status of the species with respect to its OSP or the maximum permissible take from that species.

(c) *Initial determination by the State.* The state agency with responsibility for managing the species in the event management authority is transferred to the state shall make initial determinations on the basis of the best scientific evidence available of: (1) Whether or not it is at its OSP; (2) if so, the maximum number of that species that may be taken without reducing it below its OSP; and (3) if not, in the case of Alaska, the maximum number of animals that may be taken, if any, for subsistence uses without preventing the species from increasing toward its OSP.

(d) *Notice and review of initial determinations and request for hearing.* The state agency shall provide notice of its initial determinations to the Service and the public and shall provide access to or copies of the documentation supporting its determinations to the Service and the public. The state agency shall indicate, in the notice of its initial determinations, the location(s) and hours during which such documentation may be inspected, and the costs, if any of copies of such documentation. The state agency shall also indicate in the notice that any interested person may request a hearing regarding the initial determinations, and the state shall provide a reasonable time, not less than 30 days, for making the request, taking into account the time required to advise the public of the initial determinations and to make the supporting documentation readily available to interested persons for their consideration. If a request for a hearing is not made within the prescribed time period, the initial determinations shall be treated as final.

(e) *Notice of hearing.* If a request for a hearing is made within the prescribed time period by any interested person, the state agency shall provide notice of the hearing to the Service and the public not less than 30 days in advance of the scheduled date(s) of the hearing(s). The notice shall include the date(s), location(s), and purpose of the hearing, a recitation of the initial determinations, the name(s) of the person(s) who will preside at the hearing, and the manner and date by which interested persons must notify the state agency or presiding officer(s) of their desire to participate in the hearing. The state shall also make available and distribute upon request a list of witnesses and description of the documentation and other evidence that will be relied upon by the state's witnesses in support of its initial determinations sufficiently in advance of the hearing date so as to allow interested persons to prepare questions and supporting or rebuttal testimony for the hearing.

(f) *Conduct of the hearing.* (1) The hearing shall be publicly conducted and reported verbatim by an official reporter.

(2) The state shall sponsor all written documentation in support of its determinations with witnesses who are able, by virtue of training and experience, to respond fully to cross-examination regarding the facts and conclusions contained therein provided that, except by agreement of the parties, the state agency may not call any witnesses or introduce any

documentation into the record unless the advance notice requirements of paragraph (e) of this section are met with respect to such witnesses or documentation.

(3) Any interested person who has notificed the state agency of his desire to participate in the hearing pursuant to subparagraph (e) of this section may participate in the hearing by presenting oral or written testimony or cross-examining the witnesses or other parties with respect to matters relevant to the state's initial determinations, provided that any such written documentation must be sponsored by a witness who is able, by virtue of training and experience, to respond fully to cross-examination regarding the facts and conclusions contained therein.

(4) The presiding officer(s) shall conduct the hearing in accordance with such other rules of evidence, criteria, and procedures as are necessary and appropriate for the expeditious and effective determination of the issues. The presiding officer(s) may provide for oral argument and/or written briefs at the end of the hearing.

(5) Final determinations on the issues specified in paragraph (c) of this section must be supported by the best available scientific information so as to insure that any taking will be consistent with the maintenance of OSP.

(g) *Review of the hearing record and final determinations.* (1) The state agency shall provide for either: (i) Review and evaluation of the hearing record by the presiding officer(s) and transmittal by the presiding officer(s) of recommended final determinations to the decision-maker(s) in the state agency; or (ii) review and evaluation of the hearing record and final determinations by the state agency without benefit of any recommendations by the presiding officer(s). In any event, the final determinations by the state agency must be made solely on the basis of the record developed at the hearing. The state agency in making its final determinations, and/or presiding officer(s) in making his (their) recommended determinations, may not rely on oral or written evidence which was not presented at the hearing and made available to the parties for cross-examination and rebuttal testimony. Any such oral or written information transmitted to the presiding officer(s) or other members of the state agency responsible for the final determinations shall be treated as *ex parte* communications and may not be considered part of the record for decision.

(2) The state agency shall make final determinations of the issues set forth in paragraph (c) of this section and shall include in its statement of final determinations a statement of findings and conclusions and the reasons or basis therefor.

(3) The state agency shall advise the Service and the public of its final determinations and shall provide access to or copies of its decision document and Hearing Record.

(h) *Judicial review.* The state agency's final determinations after a hearing must be supported by substantial evidence in the record of the hearing. Opportunity for judicial review of the state agency's final determinations must be available under state law. The scope of judicial review shall be equivalent to that provided for in 5 U.S.C. 706(2) (A) through (E).

§ 403.05 State and Federal responsibilities after transfer of management authority.

(a) After determinations required by section 403.04 of this Part have been made in respect to a species whose range extends beyond the territorial waters of the state, the state shall not exercise management authority until a cooperative allocation agreement with the Secretary has been signed and the Service has transferred management authority pursuant to § 403.03(h). The cooperative allocation agreement shall provide procedures for allocating, on a timely basis, the maximum amount of take as determined by the state pursuant to § 403.04 of this Part. Such allocation shall give first priority to incidental take within the zone described in section 3(14)(B) of the Act as provided for under section 101(a) of the Act, except that in the case of Alaska, first priority shall be given to subsistence use.

(b) For those species to which subparagraph (a) of this section applies, the state may request the Service to regulate the taking of the species within the zone described in section 3(14)(B) of the Act for subsistence uses and/or hunting in a manner consistent with the regulation by the state of such taking within the state. If such a request is made, the Service shall adopt and enforce within such zone, such of the state's regulatory provisions as the Service considers to be consistent with the administration within such zone of section 101(a) of the Act.

(c) If management authority for a species has been transferred to a state pursuant to this subpart, the Service shall provide to the state an opportunity to review all requests for permits to remove live animals from habitat within the state for scientific research or public display purposes. If the state finds that issuance of the permit would not be consistent with its management program for the species:

(1) The state shall so inform the Service, together with the reasons for such finding, within 30 days of its receipt of the application, and the Service shall not issue the permit; and

(2) The Service shall provide to the permit applicant and the state an opportunity to adjust the permit application or otherwise reconcile it with the state management program for the species.

(d) After management of a species has been transferred to the state, state and Federal authorities shall cooperate to the maximum extent practicable in conserving the species of marine mammals.

§ 403.06 Monitoring and review of state management program.

(a) The Service has responsibility to monitor and review implementation of all state management programs approved pursuant to this Part.

(b) In order to facilitate such review, each state to which management authority has been transferred shall submit an annual report, not later than 120 days after the close of such state's first full fiscal or calendar year following the effective date of the Service's approval of the State management program, and at the same time each following year, or at such other time as may be agreed upon. The repot shall contain the following information current for each reporting period:

(1) Any changes in the state laws which comprise those aspects of the state management program submitted pursuant to section 403.03(b), and, in the case of Alaska, § 403.03(d), of this Part;

(2) Pertinent new data on the marine mammal species or the marine ecosystems in question including a summary of the status, trend and general health of the species;

(3) A summary of available information relating to takings under the state management program;

(4) A summary of state actions to protect species' habitat;

(5) A summary of all state research activity on the species;

(6) Any significant changes in the information provided with the original request for transfer of management authority;

(7) A summary of enforcement activity;

(8) A summary of budget and staffing levels for the marine mammal activities in the categories of research, management and enforcement;

VOL
48
ISS
97
MY
18
1983
UMI

(9) Any other information which the Service may request, consistent with the Act as amended, or which the state deems necessary or advisable to facilitate review by the Service of state management of the species.

(c) Each state having an approved management program shall file a report, in a timely manner, not to exceed 45 days from the occurrence of any of the following:

(1) Any change in a relevant state law (amendments, repealers, or new legislation or regulations or judicial precedent) as submitted pursuant to paragraphs (b)(2) through (b)(5), and in the case of Alaska, paragraph (d), of § 403.03 of this Part that may impair the State's ability to implement the program;

(2) Any significant natural or manmade occurrence or any new scientific information that may warrant reconsideration of the determinations made pursuant to § 403.04 of this Part.

(d) All components of the state request for transfer of management authority, as well as annual reports submitted under paragraph (b) of this section and any reports submitted under paragraph (c) of this section, shall be available for inspection and copying at the Office of the Chief, Division of Wildlife Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, or, as appropriate, at the Office of Protected Species and Habitat Conservation, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce, Washington, D.C. 20235, and at the appropriate Service's regional office.

§ 403.07 Revocation and return of state management authority.

(a) *Revocation of management.* The Service shall have responsibility to review management of a species transferred to a state under this Part and to determine whether or not the implementation of the state management program continues to comply with the requirements of the Act, this Part and the state's approved management program.

(1) Upon receipt of any substantial factual information suggesting that the state management program is not being implemented or is being implemented in a manner inconsistent with the Act, this Part, or the state's approved management program, the Service shall, as soon as practicable but not later than 30 days after receipt, determine whether or not the state continues to comply with the requirements of the Act, this Part and the state's approved management program.

(2) Whenever pursuant to a review as specified in paragraph (a)(1) of this section, the Service determines that any substantial aspect of the state management program is not in compliance with the requirements of the Act, this Part or the state's approved management program, it shall provide written notice to the state of its intent to revoke management authority, together with a statement, in detail, of those actions or failures to act upon which such intent to revoke is based. The Service shall publish notice of such intent to revoke in the **Federal Register** and invite public comment thereon, and shall conduct an informal public hearing on the matter if requested by the state or if the Service otherwise determines it to be necessary. The Service shall provide to the state an opportunity for consultation between the Service and the state concerning such actions or failures and necessary remedial actions to be taken by the state.

(3) If within 90 days after notice is provided under paragraph (a)(2) of this section, the state has not taken such remedial measures as are necessary, in the judgment of the Service, to bring the state management program into compliance with the provision of the Act, this Part and the state's approved management program, the Service shall revoke the transfer of management authority by written notice to the state and publication in the **Federal Register**.

(b) *Voluntary return of management authority to the Service.* (1) If a state desires to return management of a species of marine mammals to the Service, it shall provide the Service notice of intent to return management. The Service shall accept the return of management, and such return shall become effective, upon publication of a notice in the **Federal Register** to this effect no sooner than 30 days (except in an emergency as determined by the Service) nor longer than 60 days after the state has provided notice of its intent to return management or unless otherwise agreed upon.

(2) If implementation of any aspect of the state management program is enjoined by court order, the state shall advise the Service of such injunction and its effect on the state management program. If the state determines that the effect of the injunction is to preclude effective conservation and management of the species under the terms of the state management program, it shall so notify the Service and such notification shall be treated as a notice of intent to return management as provided in paragraph (b)(1) of this section. If the state determines that the injunction does not preclude effective conservation and management of marine mammals under the terms of the state management program, it shall so notify the Service together with the basis for the state's determination and such notice shall be treated as a report submitted pursuant to the terms of § 403.06(c)(1) of this Part. In either case, the state shall provide notice to the Service as soon as practicable but not more than 30 days after issuance of the injunction. Management authority returned to the Service pursuant to this paragraph may be re-transferred to the state, notwithstanding the requirements of § 403.03, when, in the judgment of the Service, the cause for return of management authority to the Service has been alleviated in such a way as to allow effective conservation and management of the species consistent with the requirements of the Act and this Part.

(c) When revocation of a management authority pursuant to paragraph (a) of this section becomes final, or when a state returns management pursuant to paragraph (b) of this section, the Service shall resume such management authority and provide for the conservation of the species within the state in accordance with the provisions of the Act.

§ 403.08 List of states to which management has been transferred.

The following states have received management authority pursuant to this Part for the species listed and, where appropriate, cooperative allocation agreements pursuant to § 403.05(c) are in force:

[Reserved]

Dated: March 16, 1983

G. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

Dated: April 18, 1983.

Bureau of Land Management

43 CFR Part 8370

Use Authorizations; Amendment of Subpart 8372—Special Recreation Permits, Other Than on Developed Recreation Sites

[NOTE: This document originally appeared in the issue of May 6, 1983 at 48 FR 20630–20635. It is reprinted at the request of the Agency because those pages were omitted in the production process from some copies of the May 6 issue.]

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The proposed rulemaking would amend 43 CFR Subpart 8372—Special Recreation Permits, Other Than on Developed Recreation Sites, by setting forth clearly a recitation of specifically prohibited acts under the regulations and the penalties that would apply upon conviction. It would: state grounds for exemption from Special Recreation Permit requirements; authorize the Director of the Bureau of Land Management to set recreation permit fee schedules to help reimburse the United States for costs incurred in permitting recreational use of public lands; replace the requirements that an applicant for a waiver of fees submit documentation of its official recognition as an educational or scientific institution with discretion to require such documentation on the part of the authorized officer; allow commercial educational users to obtain such waivers; and state the appeals procedure.

DATE: Comments should be submitted by June 30, 1983. Comments postmarked or received after this date may not be considered in the decisionmaking process in the final rulemaking.

ADDRESS: Comments should be sent to: Director (140), Bureau of Land Management, 1800 C street NW., Washington, D.C. 20240. Comments will be available for public review in Room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT:
Bruce R. Brown,
or
Robert I. Conquergood, (202) 343–8353.

SUPPLEMENTARY INFORMATION: The proposed rulemaking would amend 43 CFR Subpart 8372 in four respects: (1) By giving the Director, Bureau of Land Management, discretion to set special recreation permit fees for the use of public lands administered by the Bureau; (2) by modifying the requirements for obtaining waivers of permit fees; (3) by clearly setting forth prohibitions relating to special recreation permits other than on developed recreation sites, and the penalties for violating those prohibitions; and (4) by adding a section stating the circumstances when special recreation permits are not required.

Section 8372.4 is amended in the proposed rulemaking to require the Director, Bureau of Land Management, to publish a schedule of fees for special recreation permits. This fee schedule is designed to require recreational users of the public lands to pay the costs of administering the permits. The proposal also allows the Bureau of Land Management to recover the actual costs of issuing and monitoring permits when the estimated costs exceeds certain levels, allows the authorized officer to require a nonrefundable partial prepayment to cover the cost of processing the application and to charge larger fees than those provided in the schedule if permitted by the Federal Land Policy Management Act of 1976 or the Land and Water Conservation Fund Act, as appropriate.

The following fees are required for special recreation uses of public lands administered by the Bureau of Land Management in accordance with proposed 43 CFR 8372.4(a)(1). This fee schedule will be effective upon the date of final publication in the **Federal Register.**

(1) Commercial use—a minimum of $100 or the amount from the table below, whichever is greater, is required. The adjusted daily charge recognizes that operators provide discounts to certain customers and groups that may vary from the initially advertised customer rate schedules. The fee per user day will be based on the adjusted daily charge per customer rather than the advertised rate schedule. Additional adjustments may be made if the advertised daily rate includes long distance transportation costs or lodging in local communities before or after the permitted use.

Adjusted daily charge collected by permittee from each participant	Fee paid to the Bureau per user day
$6.00 or less	$.25
6.01 to 20.00	.60
20.01 to 35.00	1.30
35.01 to 50.00	1.90
50.01 to 75.00	2.60
75.01 to 100.00	3.40
100.01 to 125.00	4.10
125.01 to 150.00	4.90
150.01 to 175.00	5.60
175.01 to 200.00	6.40
200.01 to 250.00	6.75
250.01 to 300.00	8.25
Over 300.00	(1)

[1] Three percent of adjusted daily charge per participant.

(2) Competitive use. A minimum of $2.00 per user day or 3 percent of the gross receipts, whichever is greater, is required. When use is both commerical and competitive, the competitive fee shall be charged.

(3) Other uses. A minimum of $2.00 per user day is required.

The existing regulations, at § 8372.4(d), include a complicated set of criteria for waiver of fees for use of the public lands for educational or scientific purposes, including the need to present proof of accreditation and to demonstrate that the institution is noncommercial or that the activity is not connected with commercial aspects of the institution. These requirements have been shown to be unnecessarily burdensome and are removed from the proposed rulemaking. Instead, the authorized officer would have discretion to require documentation of accreditation by Federal, State or local government agencies, or any other documentation necessary to show that the use proposed is educational.

Proposed amended § 8372.0–7 clearly states acts that are prohibited under the subpart. In addition to prohibiting use of the public lands without obtaining the permits and paying the fees required by the subpart, this section prohibits: Violation of stipulations or conditions in such permits; knowing participation in the events or activities for which the required permit has not been issued; and failure to post a copy of a commercial or competitive permit in plain sight where all participants can read it. The proposed rulemaking also adds a paragraph stating the criminal and civil penalties that may be incurred by violators.

The proposed rulemaking adds a new § 8372.1–3 excepting certain uses from the requirement to obtain Special Recreation Permits and pay fees. These include events sponsored or co-sponsored by the Bureau of Land Management, events traversing less than 1 mile of public land and beginning and ending on other land, and, in the discretion of the authorized officer, non-commercial events with fewer than 50 vehicles, no cash prizes, no public advertising, and in compliance with off-road vehicle designations.

The proposed rulemaking includes other amendments that are editorial only, removes unnecessary or confusing language from the existing regulations and adds a section on appeals. All decisions of the authorized officer will be held in full force and effect pending appeal unless the Secretary of the Interior rules otherwise.

This proposed rulemaking is being published to coordinate with the public consideration of the Proposed Special Recreation Permit Policy of the Bureau of Land Management, which was published in the **Federal Register** on March 16, 1983. Copies of this proposed policy document may be obtained by calling the telephone number listed above. The deadline for submitting public comments on both this proposed rulemaking and the proposed policy will be June 21, 1983.

The principal authors of this proposed rulemaking are Bruce R. Brown and Robert I. Conquergood, Division of Recreation, Cultural and Wilderness Resources, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that the publication of this proposed rulemaking is not a major Federal action significantly affecting the quality of the human environment and that a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is not required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). There will be no significant impact on any user group, and the proposal favors no demographic group.

The proposed rulemaking would serve to protect the recreation resources and opportunities on the public lands. The proposed rulemaking would only affect individuals and groups using the public lands for certain recreation purposes, and educational institutions using the public lands for educational or scientific purposes. The proposed increase in fees will compensate the United States for administering the program, with no significant impact on any entity.

Information collection requirements contained in this rulemaking have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*, and assigned clearance number 1004–0119.

List of Subjects in 43 CFR Part 8370

Public lands—recreation, Recreation areas, Surety bonds.

PART 8370—[AMENDED]

Under the authority of 43 U.S.C. 1201, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), the Oregon and California Railroad and Coos Bay Wagon Road Grant Lands Act (43 U.S.C. 1181a), the Act of September 15, 1960, as amended (16 U.S.C. 670g–n), the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 460*l*–6a), and the National Trails System Act (16 U.S.C. 1241 *et seq.*), it is proposed to amend Subpart 8372, Part 8370, Group 8300, Subchapter H, Chapter II of Title 43 of the Code of Federal Regulations as follows:

§ 8372.0–3 [Amended]

1. Section 8372.0–3 is amended by correcting the citation "16 U.S.C. 460(1–6a)" to read "16 U.S.C. 460*l*–6a."

2. Section 8372.0–5 is revised by:

a. Revising paragraph (b) to read as follows:

§ 8372.0–5 [Amended]

* * * * *

(b) "Actual expenses" are expenses necessarily incurred for the permitted activity or use. These include, but are not limited to, the actual costs of such items as expendable equipment and supplies. Actual expenses do not include any salaries, profit, increase of capital worth, allowances, or subsidies of any other activities of the permittee or sponsor, the purchase or amortization of nonexpendable supplies or equipment, any allowance for undersubscribed events or any monetary compensation for sponsors or participants."

* * * * *

b. Revising paragraph (e) to read as follows:

* * * * *

(e) "Educational use" is an academic activity sponsored by an accredited institution of learning.

* * * * *

3. Section 8372.0–7 is revised to read as follows:

§ 8372.0–7 Enforcement

(a) *Prohibited acts.* On all public lands, it is prohibited to: (1) Fail to obtain a permit and pay any fee required by this subpart; (2) violate stipulations or conditions of a permit issued under authority of this subpart; (3) participate knowingly in an event or use subject to the permit requirements of this subpart where no such permit has been issued; (4) fail to post a copy of any commercial or competitive permit where all participants have the opportunity to read it.

(b) *Penalties.* (1) Any person convicted of violating any prohibited act in this subpart may be subject to a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months. (2) Unauthorized users may be subject to civil action for unauthorized use of the public lands and their resources.

4. A new § 8372.1–3 is added to read as follows:

§ 8372.1–3 Exceptions.

(a) Special Recreation Permits are not required for uses that are sponsored or co-sponsored by the Bureau of Land Management.

(b) The authorized officer may determine that permits and fees are unnecessary where a use or event begins and ends on non-public lands, traverses less than 1 mile of public lands, and poses no threat of significant damage to public land resource values.

(c) The authorized officer may waive permit and fee requirements for off-road vehicle competitive events that are not commercial when the events comply with off-road vehicle designations for the use area, no cash prizes are awarded, fewer than 50 vehicles are involved and there is no public advertising for the event.

5. Section 8372.4 is amended by:

a. Amending paragraph (a) to read as follows:

§ 8372.4 [Amended]

(a) *Fees.* (1) Fees for Special Recreation Permits shall be established and maintained by the Director, Bureau of Land Management, and may be adjusted from time to time to reflect changes in costs. The fee schedule shall be incorporated in the Manual of the Bureau of Land Management, published periodically in the **Federal Register** and otherwise made generally available to the public.

(2) The authorized officer may charge fees larger than the minimum set in the current fee schedule if the authorized officer determines that such larger fees are needed to compensate the United States for costs incurred in connection with the issuance of permits and for uses of the public lands and their resources under said permits. The authorized officer shall notify the applicant of any fee larger than that provided in the schedule in writing within 15 days of receipt of the application.

(3) The authorized officer may require a nonrefundable prepayment of all or a portion of the fees from the schedule, not to exceed the estimated cost of processing the application, before processing the application.

(4) Actual costs to the United States shall be charged in lieu of the fees provided in the schedule when the estimated cost of issuing and monitoring the permit (estimated at the time of application) exceeds $5,000, except when the total estimated fees from the schedule over the term of the permit exceed the estimated actual cost. In that case, the fees from the schedule shall be charged. The authorized officer shall

VOL 48 ISS 97 MY 18 1983 UMI

notify the applicant in writing of such charges within 15 days of receipt of the permit application and shall not process said application until payment has been made for such charges.

* * * * *

b. Removing paragraph (b) in its entirety.

c. Redesignating paragraphs (c) and (d), as (b) and (c), respectively.

d. Amending paragraph (c), formerly paragraph (d), by removing paragraphs (c) (4) and (5) in their entirety and amending paragraph (c)(3) to read as follows:

* * * * *

(c) * * *

(3) Applicants for waiver of fees on this basis may be required to provide documentation of their official recognition as educational or scientific institutions by Federal, State or local government bodies or any other documentation necessary to demonstrate educational use as defined in section 8372.0–5(e) of this title. The use of recreational resources for which a waiver on this basis is requested shall relate directly to scientific or educational purposes and shall not be primarily for recreational purposes.

6. New § 8372.6 is added to read as follows:

§ 8372.6 Appeals.

(a) Any person adversely affected by a decision of the authorized officer under this part may appeal under Part 4 of this title from any final decision of the authorized officer.

(b) All decisions of the authorized officer under this Part shall remain effective pending appeal unless the Secretary rules otherwise.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

April 14, 1983.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Transportation Accident Planning and Preparedness Guidance; Availability of Transportation Guidance Document

[NOTE: This document originally appeared in the issue of May 6, 1983 at 48 FR 20635. It is reprinted at the request of the Agency because that page was omitted in the production process from some copies of the May 6 issue.]

AGENCY: Federal Emergency Management Agency.

ACTION: Notice of Availability of a transportation accident planning and prepardness guidance document and invitation for submittal of comments.

SUMMARY: The transportation guidance document, *Guidance for Developing State and Local Radiological Emergency Response Plans and Preparedness for Transportation Accidents*, is available for public distribution and comment. Copies will be distributed to State and local governments by the Federal Emergency Management Agency (FEMA) for review, comment and use.

This document provides planning and preparedness guidance in the form of 14 planning objectives and related criteria for use by State and local governments in developing emergency response plans for transportation accidents involving radioactive materials. The document also provides background information to support the application of the guidance to specific jurisdictions and to explain the unique characteristics of transportation accidents. This document is intended for interim use by State and local governments until a final edition is published early in 1984. Comments received by FEMA on the current, interim-use document will be analyzed with the results being used to develop the final edition.

This document has been developed by the Federal Radiological Preparedness Coordinating Committee's Subcommittee on Transportation Accidents which is co-chaired by the U.S. Department of Transportation and FEMA.

A copy of this document may be obtained from the: Federal Emergency Management Agency, P.O. Box 8181, Washington, D.C. 20024. Please reference the title of the document in your request.

Comments on this document will be received through September 6, 1983 and should be addressed to: Rules Docket Clerk, Federal Emergency Management Agency, Room 835, 500 C Street, SW., Washington, D.C. 20472.

Dated: April 29, 1982.

Joe D. Winkle,

Acting Deputy Associate Director, State and Local Programs and Support, Federal Emergency Management Agency.

Nondiscrimination Based on Handicap in Federally-Assisted Programs and Activities of the Department of Housing and Urban Development

[NOTE: This document originally appeared in the issue of May 6, 1983 at 48 FR 20638. It is reprinted at the request of the Agency because pages 20638–20656 of that document were omitted in the production process from some copies of the May 6 issue. This reprint also incorporates an Agency correction to the effective date which was printed in the issue of May 10, 1983 at 48 FR 20902.]

AGENCY: Department of Housing and Urban Development (HUD).

ACTION: Interim rule.

SUMMARY: HUD adopts procedures and policies to assure nondiscrimination based on handicap in programs and activities receiving Federal financial assistance from the Department of Housing and Urban Development. The rule implements Section 504 of the Rehabilitation Act of 1973, as amended.

DATES:

Effective date: June 15, 1983.

Comment due date: August 4, 1983.

ADDRESS: Interested persons are invited to submit comments regarding this rule to the Office of General Counsel, Rules Docket, Room 10278, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: John Putman, Special Advisor to Deputy Under Secretary for Intergovernmental Relations, Office of Housing, Office of Policy and Budget, Room 10184 at the above address (202) 755–6732. A telecommunications device for deaf persons (TDD) is available at (202) 426–0016. These are not toll free numbers. This notice will be available on tape for persons with vision impairments in the office of the Rules Docket Clerk shown above.

SUPPLEMENTARY INFORMATION: Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794) provides that "No otherwise qualified handicapped individual in the United States * * * shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance * * *."

On April 19, 1978, the Department published a Notice of Proposed Rulemaking (43 FR 16652) for public comment (the "1978 proposed rule"). In addition, 10 public hearings were conducted throughout the country. More than 225 individuals and organizations presented testimony at the public hearings. Transcripts were made of each public hearing and were analyzed along with 258 written comments received from other sources. The largest number of comments (c. 185) were received from organizations representing handicapped people. The next largest group (c. 131) was Federal, State or local agencies, including some 31 Housing Authorities. Seventeen comments were received from individuals or organizations representing the housing industry.

In general, both the organizations representing disabled persons and the housing industry were critical of the 1978 proposed rule, but for different reasons. The principal concern expressed by the disabled consumer groups was the number of provisions for waivers and exceptions. On the other hand, most of the housing industry representatives felt that these should be expanded, and that funds should be provided by HUD to cover any costs incurred as a result of Section 504 requirements. Similarly, public agencies questioned the source of funds for assuring accessibility and were concerned that such costs would reduce the level of funds currently available for program purposes.

Subsequently, two events occurred which have direct bearing on the Department's implementation of Section 504 as it applies to HUD programs. These were: (1) the decision of the United States Supreme Court in *Southeastern Community College* v. *Davis*, 442 U.S. 397 (1979), and subsequent appellate decisions regarding the extent of recipient's obligations to accommodate the needs of handicapped persons, discussed more fully below in connection with the "program accessibility" provisions of the regulations, and (2) a Report to Congress (B–197756, June 19, 1981) issued by the Comptroller General entitled "Weaknesses in the Planning and Utilization of Rental Housing for Persons in Wheelchairs."

The GAO report concluded that HUD and the Farmers Home Administration "have no reliable statistics on the number of people using wheelchairs in the United States or on the characteristics of such persons, for example, their geographic location, age, income, family size, and need for federally subsidized housing * * * Also, they have no information to determine if a market exists for accessible units in the area serviced by the housing projects they support." The GAO report went on to state that: "HUD and FmHA need to have such information to determine if a market exists for accessible units and whether policies relating to housing the handicapped adequately respond to such a market."

The GAO surveyed 847 accessible housing units and determined that only 27% were actually occupied by persons using wheelchairs. The report concluded that HUD and FmHA need to do more with respect to out-reach programs and effectively advertising the availability of units accessible for handicapped individuals. Of equal importance to regulatory implementation of Section 504, GAO also recommended the elimination of nationwide percentage goals (previously adopted administratively under various HUD and FmHA programs) in favor of establishing local or regional goals, based upon a market analysis of demand.
